The conference agreement, which includes a provision exempting certain storm water runoff from the NPDES permitting process takes a giant step toward reducing the immense regulatory burden being proposed by the EPA. As a result, the cost to local governments for complying with the act will be restrained. Under current law, municipalities would be required to obtain permits for each of the millions of storm water discharge points across the country at a cost which would be almost impossible to meet per permit application. It does not take a whiz at math to realize that our cities and towns were facing massive capital outlays; the cost could have easily exceeded $8.5 billion in expenditures for compliance with the proposed EPA regulations from storm water discharge.

Other storm water discharges are exempted from permits unless they fall into one of five categories. One of the discharge categories is "a discharge associated with an industrial activity." A discharge is not considered to be associated with industrial activity unless it is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. Such discharges include those from parking lots and administrative areas and employee buildings.

At the same time, the agreement will strengthen the act through tighter controls and enforcement mechanisms, thus insuring that all of our national waters will ultimately be free of pollution and remain that way for future generations.

Mr. Speaker, I hope our colleagues will support the conference agreement which is a well-thought-out and hard-fought agreement that does justice to the environment and reaffirm the Congress' ability to accomplish the objectives for which it exists; to serve those who have the confidence to trust us with their welfare.

Mr. Speaker, I want to engage the chairman of the subcommittee, the gentleman from New Jersey [Mr. ROE] in a short colloquy at this point concerning the provisions for a study in the storm water runoff section.

May I ask the chairman, as I understand it, this study would only require the EPA to carry it out in areas that are not permitted. I would like for it to be understood that this will not preclude the EPA and the States and it does not preclude them in the law from carrying out the studies in other areas if they so desire.

Mr. Speaker, I yield to the gentleman from New Jersey.

□ 1815

Mr. ROE. As the gentleman knows from his extraordinary work on this legislation, which I applaud and appreciate, the intent of the conferees and the intent of the committee is that they would have wider latitude to do their studying, as the gentleman has suggested.

Mr. ROWLAND of Georgia. I certainly appreciate that, and again I appreciate the hard work that the gentleman has done on this legislation.

Mr. STANGELAND. Mr. Speaker, I yield 4 minutes to the gentleman from California [Mr. PACKARD].

Mr. PACKARD. Mr. Speaker, I rise in support of S. 1128, the Clean Water Reauthorization Act. I would like to commend the gentleman from New Jersey [Mr. ROE], and the gentleman from Minnesota [Mr. STANGELAND], the ranking minority member, as well as the gentleman from New Jersey [Mr. HOWARD], and the gentleman from Kentucky [Mr. SNYDER] for their leadership on this legislation. They and the committee staff have worked long and hard to bring this legislation to a successful conclusion. All should be commended for their diligence and perseverance.

This bill is of great importance to the citizens of San Diego County, CA. In particular, it addresses a longstanding problem involving Tijuana sewage. For some time, the city and county of San Diego have been plagued with raw sewage emanating from Tijuana, Mexico. This bill authorizes defensive treatment works to address this problem.

In addition, this legislation authorizes additional treatment works to take care of this problem if they are needed, particularly if the Mexican's construct their stage II Alamar Plant. If the stage II Alamar Plant is built by the Mexican's, this bill provides authority to build additional treatment works on the United States side of the border. A number of alternatives have been suggested such as an inland plant land outfall or a deep ocean outfall. One or both if these alternatives may be constructed if the Administrator determines they are necessary to take care of this difficult problem.

Furthermore, it is my understanding that a Federal agency or commission, or such other Federal entity designated by the President will be responsible for the operation and maintenance of any treatment works constructed under the provisions of this bill. This is not just a San Diego issue, or just a California Issue, but rather it is a Federal issue as well.

I urge my colleagues to vote for this conference report and I urge the President to sign this legislation into law as rapidly as possible so that we can begin to address the many problems this bill is designed to correct.

Mr. Speaker, there is a point involving the provisions of this bill regarding Tijuana sewage which I would appreciate a clarification on. Specifically, it is my understanding that any treatment works built to take care of the Tijuana sewage problem will be operated and maintained by a Federal agency, commission, or entity as designed by the President. Is this the understanding of the conferees?

Mr. ROE. Mr. Speaker, will the gentleman yield?

Mr. PACKARD. I yield to the gentleman from New Jersey.

Mr. ROE. The gentleman from California is correct. His understanding regarding operation and maintenance of these treatment works by a Federal entity is the same understanding shared by the conferees.

Mr. PACKARD. I thank the gentleman for his clarification.

Mr. ROE. Mr. Speaker, I yield 1 minute to the gentleman from Maryland [Mr. DYSON].

Mr. DYSON. Mr. Speaker, I think that everyone in this House knows that the Chesapeake Bay is in trouble. It is one of the largest estuaries in the world, and it has been suffering from pollution ever since the first Marylanders came about 350 years ago.

We have in conference report, which I would urge all the Members of the House to support, a section that the subcommittee has agreed to that will help us in our efforts in Maryland, Virginia, and Pennsylvania to clean up the Chesapeake Bay.

Mr. Speaker, the revitalization of this historic bay will benefit not only those States I just mentioned, but the entire eastern seaboard. With a clean bay we may restock the dwindling striped bass population which is so important to the economy of these States. The upper bay is the major

spawning ground for this important, and endangered fish. A clean bay will almost assuredly add to the survival of the striped bass for future generations of Americans.

Much time, money, and energy has already been spent on restoring the bay. This noble effort has been conducted by the Federal and State governments, environmental and private citizen groups, and by those individuals who use the bay for recreation and to earn their livelihood. It is our duty to see that these efforts continue, for they are already providing that we can reverse the generations of abuse and neglect that has damaged the bay's water. By passing this important legislation, we will accomplish this goal.

So today I would like to thank the gentleman from New Jersey [Mr. HOWARD], the gentleman from New Jersey [Mr. ROE], the gentleman from Kentucky [Mr. SNYDER], and the gentleman from Minnesota [Mr. STANGELAND] for their efforts in bringing this important bill to its conclusion.

I urge my colleagues to support the reauthorization of the Clean Water Act. I think that someday we can count on seeing a cleaner Chesapeake Bay, and all Maryland is indebted to them for their efforts.

Mr. STANGELAND. Mr. Speaker, I yield 2 minutes to the gentlewoman from Maryland [Mrs. BENTLEY], a member of the full Committee on Public Works and Transportation.

Mrs. BENTLEY. Mr. Speaker, as a result of the hard work of the House/Senate conferees on the Clean Water Act Amendments of 1986, we have before us today the conference report for consideration. I commend all those responsible for bringing us this agreement on the clean water legislation.

Our House conferees are to be commended. Mr. HOWARD, Mr. ROE, Mr. ANDERSON, Mr. MINETA, Mr. OBERSTAR, Mr. EDGAR, Mr. TOWNS, Mr. SNYDER, Mr. HAMMERSCHMIDT, Mr. STANGELAND, Mr. CLINGER, and Mr. SHUSTER represented the will of the House as House conferees on the clean water bill.

As a member of the Committee on Public Works and Transportation, I had the privilege to participate in preparation of the clean water legislation. Many of my colleagues have joined me in working to ensure passage and enactment of the Clean Water Act Amendments of 1986.

This legislation will reauthorize Federal funding for construction of local sewage treatment systems. These funds are necessary if we are to continue the important work of cleaning up the environment.

Included in the conference report to the clean water bill are measures requiring States to develop plans for combating nonpoint source pollution, such as polluted runoff from city streets and farmland. These measures are of major importance to the Midatlantic States of the Chesapeake Bay region. Maryland, Virginia, the District of Columbia, and Pennsylvania have been working for the last decade to implement effective legislation needed to restore the Chesapeake Bay.

In my home State of Maryland, some 50 percent of the pollution entering the upper Chesapeake Bay is a result of nonpoint source pollution. Enforcement of this clear water bill will play a vital role in significantly reducing half of the pollution entering our Nation's largest natural estuary.

The restoration of the water quality of our Nation's water supplies is of importance to all. This conference report takes into account efforts made by State and local governments. Cost sharing provisions between Federal and State governments are included to help implement water pollution programs.

Federal construction grant assistance is the cornerstone of each State achieving an effective environmental initiative needed to reduce water pollution. In Annapolis, MD, the Chesapeake Bay Program Office has contributed to much of the success of controlling water pollution. This program, under the direction of the EPA, has worked to coordinate Federal and State efforts in restoration of the Chesapeake Bay.

Regional planning councils and local and State governments will play a more active role in development and implementation of water quality maintenance. Federal funds, distributed to States, will be passed on to local governments and those directly involved in water quality planning. Because of this provision, the Baltimore Regional Planning Council anticipates greater success in their work to reduce water pollution.

Within my home district, the Second Congressional District of Maryland, industries have been working to end pollutants entering our water supply. A new program will be established under this bill for cleaning up toxic "hot spots"—waters that will not meet water quality goals even after industrial dischargers have installed the best available cleanup technologies. Private industry working with government will succeed in eliminating pollutants which impose a threat to the environment.

Studies have been conducted by the Chesapeake Bay Office to determine the impact natural and man-induced environmental changes have on the living resources of the bay. Such studies are essential to cleaning up pollutants which are a result of nutrients, chlorine, acid rain, toxic waste, and heavy metals present in our water supply. A continuation of EPA programs such as this one will help us to achieve a cleaner environment. We need a dependable water supply to meet our water needs.

Mr. Speaker, I urge my colleagues to join me in working to meet our water needs by voting for passage of this conference report agreement accompanying the Clean Water Act Amendments of 1986.

Mr. ROE. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. NOWAK].

Mr. NOWAK. Mr. Speaker, I would like to engage in a colloquy with the gentleman from New Jersey to clarify the funding provisions of the Great Lakes amendment, that have been incorporated into the conference report.

First, I would like to thank the gentleman for his support of the amendment, which for the first time establishes a coordinated cleanup program for Great Lakes. This is a small part of the bill, but a big step forward for the Great Lakes, and I think the gentleman can be proud of his role in helping to make it happen.

The amendment provides $11 million per year from fiscal 1987 through fiscal 1991 to be subdivided as follows: $4.4 million for demonstration cleanups of toxic-contaminated sediments; $3.3 million for a NOAA research program; and $770,000 for nutrient monitoring. I just want to clarify that these funds are to be provided in addition to the existing appropriation for the Great Lakes National Program Office.

Mr. ROE. If the gentleman will yield, the gentleman's understanding is correct. The purpose of the amendment is to build on the agency's existing resources, not to displace them.

Mr. NOWAK. If we viewed the amendment any other way, the result would be absurd. The Great Lakes National Program Office currently has an operating budget of $5 million per year. That money is used to support vital projects such as studies of atmospheric deposition in the lakes, and toxic contamination in nearshore areas. These ongoing activities are required by the United States-Canada Water Quality Agreement. If this amendment were to be seen as displacing the existing GLNPO appropriation we would actually be reducing funding for these activities to $2.5 million per year. I just want to make clear that the committee does not intend such an absurd result.

Mr. ROE. That is right. The point of this amendment is to reverse a decade of neglect of the lakes, not to add chaos to EPA's existing programs. A recent National Academy of Sciences report found that the population of the Great Lakes is exposed to appreciable more toxic substances than those in other parts of the United States. This amendment will provide the EPA with the resources to help reverse that trend.

Mr. STANGELAND. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey [Mr. GALLO], a valued member of the Water Resources Subcommittee.

Mr. GALLO. Mr. Speaker, I rise to strongly support this bill, which reauthorizes the Clean Water Act. A great many Members of this body have spent a great deal of time to develop this bill. It meets the very real needs of the people of New Jersey and across the country.

In July 1985, when I rose in support of this bill when it first came before us, I said that it provides the tools to help us with a number of serious environmental problems. In the last 15 months, those problems have not gone away. In the State of New Jersey, there are currently more than 200 communities on building bans as they work hard to meet our Federal standards with regard to sewage treatment.

These communities need our assistance in these efforts to reverse the effects of our past actions.

We are answering this call for help today, with $18 billion nationally to continue our commitment to clean water.

The State of New Jersey will receive $99 million in our continuing efforts in this area.

In addition to reauthorization of our current grant program through 1990, we are creating an innovative program to create revolving funds in each State for the purpose of meeting the future needs of our communities in the year 1991 and beyond.

This program is very close in concept to the Infrastructure Bank legislation which I sponsored as the Republican leader in the State assembly 4 years ago.

I believe in this program, because it will provide a greater degree of support to local governments than can be provided under the current grant program.

I am very proud of the part I was able to play in the Public Works and Transportation Committee during the development stage of this bill. I urge my colleagues to support this important legislation.

□ 1825

Mr. ROE. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from West Virginia [Mr. WISE.]

Mr. WISE. Mr. Speaker, I thank the gentleman from New Jersey [Mr. ROE], and I greatly appreciate the opportunity to speak on all that he has done in this bill.

This bill is very important for a rural State such as West Virginia because the construction grants program that is so essential as we build these sewer systems that are necessary for economic development, for providing a decent way of life, for making sure that our rivers are truly fishable and swimmable. I am pleased to say that in this bill the share that West Virginia will receive under the construction grants program will remain almost the same as it has been receiving, $38 million a year. This is a great deal of help and it will continue through 1990. Of course then this bill will create a revolving loan fund that the State will be eligible to participate in.

The good news about the revolving loan fund is that as moneys are paid back into the revolving loan fund, they are then made available again for other projects in the State of West Virginia. So this is an important element that will permit us to carry on the necessary sewer construction that must place now, estimated within my State to be approximately 2.5 billion dollars' worth of necessary sewage construction.

There were those who would urge a much lesser share for construction grants. Happily they were not successful, and indeed the program will continue essentially as we have known it for the next 6 years.

I appreciate the chairman and all that he has done to bring this bill to the floor, and I heartily endorse it.

Mr. STANGELAND. Mr. Speaker, I yield 2 minutes to the gentlewoman from California [Ms. FIEDLER].

Ms. FIEDLER. Mr. Speaker, I would like to ask the gentleman from Minnesota a question regarding the amended section 203(a) of this conference report on S. 1128, the Clean Water Act Amendments of 1985. In my district, the Los Virgenes Municipal Water District received a construction grant after its plans, specifications, and estimates were approved on several occasions by EPA and the State of California. Several years later and after final completion of the construction project, a review of the project has resulted in a recommendation to disallow some of the project's cost because the total amount of expected sludge generation has not been realized. By EPA's own program staff admission there is no evidence of waste, fraud, or abuse. Nonetheless, the Los Virgenes District has been forced to enter into the expensive process of refuting this disallowal.

Has the committee run into problems similar to this in any other areas of the country with respect to EPA Construction Grants Program decisions?

Mr. STANGELAND. If the gentlewoman will yield, yes we have and that is why the committee included in our House-passed version of this legislation and why we have also included in the conference report before us today the language of section 203(a). This section provides that, before taking final action on certain plans and specifications, the Administrator shall enter into a written agreement establishing which items of a proposed wastewater treatment project are eligible for Federal grant assistance. The section also provides that the Administrator may not later modify his eligibility determinations unless they are found to have been made in violation of Federal law.

Ms. FIEDLER. Would the distinguished gentleman from Minnesota [Mr. STANGELAND] agree to work with me, or whoever represents my district, and with the Chairman of the Water Resources Subcommittee next year to conduct oversight on the extent to which problems such as those experienced in my district concerning the Los Virgenes Municipal Water District may need to be addressed further by congressional action?

Mr. STANGELAND. Yes; I would certainly be pleased to lend my support to the request of my esteemed California colleague.

Ms. FIEDLER. I thank the gentleman for this clarification and also his willing assistance.

Mr. ROE. Mr. Speaker, I yield one-half minute to the distinguished gentleman from Minnesota [Mr. OBERSTAR].

Mr. OBERSTAR. Mr. Speaker, I rise in strong support of the conference report to accompany the Water Quality Renewal Act of 1986, and commend the gentleman from New Jersey [Mr. HOWARD], chairman of the Public Works and Transportation Committee, for his very early leadership on this bill way back in 1983 when he introduced the first version of the Water Quality Renewal Act. But a very special tribute is due to the gentleman from New Jersey [Mr. ROE], the chairman of the Water Resources Subcommittee, who has labored virtually day and night since 1983 over every comma, semicolon, and period, every clause, every phrase, every sentence of this bill to bring it and other needed environmental legislation to final congressional action, and hopefully through to enactment.

I am particularly appreciative of the gentleman's sensitivity to three provisions of this bill that are of particular concern to me: The Nonpoint Sources Control Act, the provisions on antibacksliding, and the amendment in section 205(j), which are my amendments to the 1981 Clean Water Act.

The gentleman from New Jersey has been most cooperative and supportive and understanding and a splendid legislator. I commend also the ranking member of the full committee, the gentleman from Kentucky [Mr. SNYDER], who has watched over this legislation and given of his wisdom and his support every step of the way, as well as the gentleman from Minnesota [Mr. STANGELAND], the ranking minority member of the subcommittee, who has devoted countless hours and a great deal of thought and con-

tributed significantly to the shaping of the final version that comes before us today.

We have a truly outstanding piece of legislation that will keep the Nation on its commitment toward fishable, swimmable waters, and a commitment to clean water in America. I urge passage of the legislation.

Nonpoint sources: The conference agreement on management of nonpoint sources of water pollution will close the one remaining large gap in the Clean Water Act, runoff from farms and forests, urban streets and lawns, construction sites and mines. In many areas of the country, on many water bodies, these pollutants now cause more water quality degradation than do point sources. It is thus crucial that this section, which creates a new section 319 in the Clean Water Act, be enacted now.

The agreement emphasizes the need to improve water quality as well as to reduce nonpoint sources of pollution. State management programs must not only control nonpoint source pollution but also improve water quality. The agreement further provides that the administration shall disapprove a State program or portion of a program, if it is not adequate to reduce nonpoint sources and improve water quality.

The House version of the nonpoint source program incorporated very early a firm insistence on water quality improvement, reflecting the main thrust of the Federal Water Pollution Control Act. Water quality improvement was not intended to be a precise measurement but a broad overall requirement that the Administrator, in his judgment, determine that the State is addressing the major sources of pollution on each particular stream segment. For instance, a program which reduced sediment from a construction site, on a segment where the main pollutants were from agriculture or acid mine drainage, would reduce pollution but not add to the overall goal of upgrading the stream. The House bill also sought to avoid instituting best management practices [BMP's] on a scatter approach, one here, one there. Given the scarcity of resources, it required States to select priority watersheds on which to focus their resources, with the anticipated result that cleaner streams would result.

The conference agreement adopted a broader approach, requiring State management programs to address all waters which, without additional action to control nonpoint sources, cannot reasonably be expected to attain or maintain water quality standards or the goals and requirements of the act. However, it retains the requirement for water quality improvement and, in the conference report, states that it would be appropriate for States to focus on specific categories and subcategories or watersheds where nonpoint pollution is a significant problem and to set priorities among categories, subcategories, and watersheds. It also provides that States are, to the maximum extent practicable, to develop and implement their programs on a watershed-by-watershed basis. At the same time, it is very clear that management programs may not exclude watersheds not meeting water quality standards or categories or subcategories contributing significant nonpoint pollution.

I believe the conference agreement is a happy combination of both House and Senate approaches, assuring that no nonpoint source-polluted waters or significant sources will be neglected, while at the same time allowing States to focus on priority watersheds and sources.

The agreement also mandates that BMP's be undertaken as part of the State management programs. The other parts of the program, such as technical assistance and education, are important, but actual BMP's are required under the nonpoint section.

The conference agreement contains several sections relating to local organizations such as conservation districts and other regional substate entities. Programs are to be developed and implemented, to the maximum extent practicable, with the involvement of local, substate regional, and interstate entities with expertise and experience in control of nonpoint sources. Further, to assure the maximum implementation possible, the agreement provides that, if a State fails to submit a management program, or if it is not approved, a local public agency or organization with expertise in and authority to control nonpoint sources may, with the approval of the State, develop and implement a program for its area.

The agreement establishes a mechanism for reconciling pollution of one State's waters by another State. At the request of a downstream State with an approved plan, or at the initiation of EPA, an interstate management conference of all States contributing significant nonpoint pollution to the water body shall be convened to develop an agreement between the States. To the extent that States reach agreement through the conference, their management programs will be revised to reflect agreements reached at an interstate management conference. It is intended that the agreements will be incorporated in revised State programs and will be carried out. Management programs are to be consistent with Federal and State law.

Antibacksliding: During Water Resources Subcommittee hearings on proposed legislation, several examples were cited of companies seeking, and in some cases States trying to provide, relaxation of permit limits which were based on water quality standards, or on what is called best professional judgment [BPJ]. I was particularly concerned at two instances, one where a company argued that its new permit should allow increased discharges because the water quality had improved since its last permit was issued. In the second instance, a State proposed to reapportion wasteload allocations among four plants, after a fifth plant on the stream segment had closed, thereby freeing up some stream assimilative capacity. In both cases the argument was that a stream could be polluted back down to the water quality standard. The effect of such procedures would be to freeze water quality at the standard, the lowest quality allowed by law, and would run counter to the thrust of the Clean Water Act, which is the continued improvement of water quality.

There are some valid reasons for relaxing a permit's requirements, which the antibacksliding provision carefully defines. However, the provision is intended to prohibit renewal, reissuance, or modification of permits to include less stringent effluent limitations except under certain carefully controlled circumstances.

I urge the Administrator, the regions, and the States to be particularly vigilant against backsliding, and announce my intent to keep very close scrutiny over its implementation.

Regional wastewater management agencies: Finally, I am pleased at the conference agreement amendments to section 205(j), which I added to the 1981 Clean Water Act Amendments. That provision clearly required the States to share the funds set aside under this subsection, and the planning responsibilities, with local agencies. In the intervening years, however, we have had many complaints from agencies across the country that the States were not passing these funds through. For example, in 1982, only $4.9 million of the $24 million available under the subsection was passed through to areawide and local water quality management agencies. Accordingly, I introduced, and the House adopted, my provision mandating that 50 percent of the funds be passed through to local agencies. As amended in the Public Works and Transportation Committee and in conference, the provision requires that at least 40 percent of a State's funding go to regional public comprehensive planning organizations and appropriate interstate organizations for the development or implementation of water quality management plans, unless the Governor, in consultation with such organizations and with the approval of EPA, determines that this allocation would not result in significant participation by these organizations. The test, or the burden of proof against the passthrough, is necessarily high and difficult to make, because EPA and the States have, in the past, resisted the intent of Congress. I hope that this will be the last time that Congress will have to clarify an intent which was already quite clear in both the 1981 amendments and the legislative history.

Mr. Speaker, again I commend all my colleagues who participated in bringing this conference agreement to the House floor. As one who participated at the staff level in writing the landmark Federal Water Pollution Control Act Amendments of 1972, I can attest that this bill keeps faith with that act, and will enhance its objective of restoring and maintaining the chemical, physical, and biological integrity of the Nation's waters.

I urge all my colleagues to support it, and the President to sign it into law.

Mr. STANGELAND. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan [Mr. HENRY].

Mr. HENRY. Mr. Speaker I rise in strong support of this legislation.

Mr. Speaker, I want to use the occasion of the conference report on the Clean Water Act to emphasize a point relative to the enforcement of the act by the Environmental Protection Agency.

We are all aware of the fact that a major issue with this bill is the level of funding authorized for the Construction Grants Program. Even at the amount authorized in the conference report, which the administration threatens to veto because it is too high, funds for this program will be more limited than ever.

There is no question that this will put many local communities in a very difficult position, as they attempt to meet Federal deadlines for compliance without Federal assistance, or with a much lower level of Federal assistance.

In many cases, these communities are at the final stage of compliance with Federal regulation, the construction phase. The step 1 and step 2 studies and plans, however, were done in a different "era"—an era of plenteous Federal funding and "imprecise" Federal deadlines. As a result, the studies and the construction plans may not have been done with the same eye toward construction costs and cost effectiveness as would be the case when 75 percent Federal funding is not available.

Much has changed. The 1981 changed in the law and the resulting EPA regulations have brought some flexibility to municipal requirements. There are new technologies available which can achieve the level of secondary treatment required which were not available 5–8 years ago. And overriding everything is the reduction in Federal funds, which has brought a new, and proper, realization of the costs of these projects and consideration of the cost effectiveness of various approaches to meeting the discharge requirements.

These changes make it incumbent on EPA to adopt an equitable and reasonable approach to achieving compliance by local communities, particularly smaller communities which not only lack the resources to construct these plants on their own, but, as EPA has noted, in most cases represent the least threat to the quality of our rivers and lakes.

Unfortunately, it is not being done that way. I have one of those communities in my own district. The step 1 and step 2 stages were completed in the days when Federal funds were plentiful. With the blessing of the enforcement agencies, the city delayed construction until it could move up the State priority list and be eligible for 75 percent Federal funding. Then suddenly last year, the enforcement agency demanded that the city sign a consent agreement setting forth a construction schedule, without any guarantee of Federal funds.

When they refused because the cost of the plant, under the plans which had been completed years earlier, would more than double the local tax burden, if the city was required to finance the entire plant itself, the EPA "lowered the boom"—filing suit against the city in Federal district court. In subsequent discussions, the EPA has insisted that the only issue is over penalties for noncompliance, which it is insisting upon, despite the fact that penalties would obviously only make it more difficult for the city to achieve compliance.

I say to the EPA and to my colleagues here—this is not the way to get things done. It will do no good, and it will not get the water any cleaner to do business in this way. EPA should focus on the goal, which is to protect the quality of our water, and to lend its considerable expertise to achieving this goal by working with, not against, communities in this position. It has taken the intervention of the court to permit the city, at its own expense, to redo the studies and possibly come up with alternative plans.

These are things EPA should be assisting in, because we are no longer in that era when the Federal Government will pick up the tab for 75 percent of the costs. So I urge the EPA to spend its efforts at helping these communities find solutions to these problems. It is quite obvious that if EPA does not take this approach, but insists on arbitrary deadlines and seeks penalties rather than affordable solutions, then we in this body will be under increasing pressure to once again delay the statutory deadlines for compliance.

Mr. STANGELAND. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. GREEN].

Mr. GREEN. Mr. Speaker, I thank the gentleman for yielding me this time and want to congratulate the conferees on the successful conclusion of the conference on this most important piece of legislation. I think you have done extremely well, and I urge the Members to support you and pass the bill

As the ranking minority member on the Appropriations Subcommittee for EPA, I know many of the problems you faced in crafting this legislation, and I think you have done an excellent job. I know that the administration would have liked to have a lot sooner the start of a revolving fund with the loan mechanism replacing the grant mechanism. But, frankly, I think you did a wise thing in taking your time in putting that into effect, because I think there are some real problems as to whether some of the communities involved, particularly some of the smaller communities, are going to be able to use that mechanism effectively. I think that we have to recognize that during the course of time that this legislation was under consideration that tax law changed very considerably, and the possibility of using private operators who could benefit from the investment tax credit and the accelerated costs recovery system is now gone. I think we are going to have to take a good hard look during the time that you have given us in the bill that you have brought before us before we begin this revolving fund and the replacement of the grants with loans kicked in. I think we are going to have to use that time to see if everyone who needs to help that this bill offers will be able to use that substitute mechanism.

So I congratulate the conferees on their product, and I urge all the Members of the House to support the conference report.

□ 1835

Mr. ROE. Mr. Speaker, I yield 2 minutes to the gentleman from Alabama [Mr. BEVILL]

Mr. BEVILL. Mr. Speaker, I thank the chairman for yielding to me so that we may enter into a colloquy here regarding H.R. 6.

I want to commend Chairman HOWARD and ranking minority member, Mr. SNYDER, and Chairman ROE here as well as ranking minority member, Mr. STANGELAND regarding H.R. 6, the public works authorization bill.

As everyone knows, we have been waiting now for 16 years for an authorization bill, and I want to commend the committee and the subcommittee for what they have done, because they passed legislation through this body for at least four times in the last 8 years; but for the last 16 years we have not had a bill, and we are right on the verge, I know, of having one now, and I commend all the Members for the tremendous work they have done.

Mr. Speaker, I do not know of any committee or subcommittee in this Capitol that has worked longer and harder hours in putting this piece of legislation together, and I do not know one that is more needed in this country than that piece of legislation.

So this is why I am asking you if you would give us a status report of where we are. I know the other body has passed it; we passed it first and they passed it this time for the first time—the other body has been unable to get the bill through. This is a matter most urgent to our Nation, and I would appreciate it if the gentleman could give us a report.

Mr. Speaker, I yield to the gentleman from New Jersey [Mr. ROE].

Mr. ROE. Mr. Speaker, I appreciate the kind words the gentleman from Alabama [Mr. BEVILL] expressed on behalf of our committee, Mr. HOWARD and myself, Mr. STANGELAND, Mr. SNYDER, and the other members of our committee. We have worked assiduously hard, as you know, for 3 years on this legislation, and we have concluded our work.

This body, our House, and the other body have passed the bill overwhelmingly. We have completed our work in conference with the exception of just one item, which has to do with the vessel tax issue, which is the 0.04-percent ad valorem tax in the added diesel fuel tax on the inland waterway transportation operations.

It would not take more than 15 minutes to pass that, because that program was agreed to by everybody, both in the House and the Senate. We are waiting for the Committee on Ways and Means to make that move.

As the gentleman knows, we have been waiting for a week now, and our problem is that if we cannot get that done we are going to lose out simply because we cannot file the report until Ways and Means acts.

But we are confident; I have talked to the chairman of that committee. Chairman HOWARD has talked to the chairman of that committee, and we are confident that it will be moving soon.

Mr. BEVILL. I thank the gentleman.

Mr. STANGELAND. Mr. Speaker, I yield 2 minutes to the gentlewoman from Connecticut [Mrs. JOHNSON].

Mrs. JOHNSON. Mr. Speaker, I rise in strong support of the Clean Water Act and want to commend the gentleman from New Jersey [Mr. ROE], the gentleman from Minnesota [Mr. STANGELAND], the chairman of the committee, the gentleman from New Jersey [Mr. HOWARD], and the gentleman who serves admirably as our ranking member, Mr. SNYDER of Kentucky, on their leadership over so many years in bringing this bill to final passage.

Under Mr. ROE's and Mr. STANGELAND's leadership, we did not just recycle the last Congress' proposal this year, but went through every section and reviewed every "t" and every "i," as Mr. ROE likes to say, and reevaluated the merits of each section. That painstaking approach improved the bill considerably and so we have before us a fine piece of legislation that will assure continued progress toward cleaning up the waterways of our Nation.

I rise in very strong support of the Construction Grant Program. It is extraordinarily important because it will move along projects that will have an impact on the quality of water for decades ahead and make some of the communities I represent to expand industrial parks and attract new jobs. The provisions that streamline the program to deal with those situations in which storm-water systems are not separate from sewers will have enormous impact on the older urban areas of the Nation, where storm-water overflow is in many instances the leading cause of major pollution in our rivers.

The new nonpoint source pollution program is also an important step forward.

In all, Mr. Speaker, this is an excellent bill, carefully thought out, and I commend the leadership for their staying power as well as their very strong commitment to the quality of our environment.

In closing, let me say that the staff on both sides have done an outstanding job. They have put in many overnight stands on this bill, and I commend our staff members as well as the leadership of the committee and urge the support of my colleagues of this Clean Water Act.

Mr. ROE. Mr. Speaker, I yield 1 minute to the gentleman from Indiana [Mr. VISCLOSKY].

Mr. VISCLOSKY. Mr. Speaker, I rise in strong support of the bill. I would start by thanking Mr. STANGELAND and Mr. ROE. They have been excellent to deal with; they have been meticulous in their preparation, and they have prepared a bill that is fiscally sound and environmentally responsible.

Particularly, I want to address a question of the cleanup of the tributaries and harbors in the Great Lakes. I think that this is a meaningful inclusion in this bill. We have a serious problem in northwest Indiana.

I would urge all Members to strongly support this bill and again conclude by thanking Mr. ROE and Mr. STANGELAND for their outstanding leadership on this issue.

Mr. ROE. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey [Mr. FLORIO].

Mr. FLORIO. Mr. Speaker, I rise in support of the conference report on the Clean Water Act amendments of 1986. I would like to express my pleasure in being able to join my colleagues in considering this vital legislation to restore our Nation's water resources and ensure the protection of the quality of our rivers, our streams, and our lakes.

I am pleased that the conference agreement contains a key provision, I initiated which was approved by the House last year, that will have important implications for the residents of Pitman, NJ. This important clean lakes section authorizes funds for improving the water quality of our Nation's lakes by funding demonstration programs at a number of contaminated lakes across the Nation and providing grants to the States for controlling nonpoint sources of pollution which are contributing to the degradation of water quality in lakes.

The clean lakes section authorized $3.5 million to clean up Alcyon Lake which adjoins Lipari Landfill in Pitman, NJ. Lipari has the dubious distinction of being the No. 1 site on the Superfund national priority list.

In January 1980, Pitman residents were officially told what they had suspected for a long time—that the lake where their children swam and played was contaminated with cancer causing chemicals. Alcyon Lake was closed at the time because a known carcinogen, BCEE [Bis-2-dichlorethyl ether], was found in the water. Analyses confirmed the worst fears of Pitman residents: toxic contaminants had indeed leached from Lipari landfill.

Currently, EPA is in the process of implementing their plan to clean up Lipari landfill by flushing water through the landfill for a number of years in order to remove the chemicals. I have, on many occasions, expressed my concern about this chosen process because of the uncertainty of its effectiveness, and because of the doubts that this process will truly clean Lipari and conform to the strict cleanup standards contained in the Superfund reauthorization.

To this point, however, EPA has still not released a plan to deal with the off-site contamination which includes Alcyon Lake. This $3.5 million will speed the recovery of Alcyon Lake by funding the removal and disposal of contaminated sediments in the lake. Once the project is completed, a report must be submitted to Congress recommending further cleanup measures. With this funding, there can be no further excuse to delaying the cleanup of Alcyon Lake.

Once again, the citizens of Pitman should be able to fish and swim safely in this body of water. This is a strong effort to restore Alcyon Lake as an environmentally sound natural resource, and a source of recreation, pride and beauty to the residents of Pitman and Gloucester county.

I commend the conferees, and especially my colleagues from New Jersey, Mr. HOWARD and Mr. ROE, for including this vital section in the conference agreement and for their perseverance over these many months to bring this agreement up for consideration. I urge my colleagues to join in supporting these efforts.

Mr. STANGELAND. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, in closing, let me say this: I want to again commend my chairman, Mr. ROE, with whom I have worked so closely on this legislation; and just salute him for the outstanding job he has done; the tenacity he has shown; and then commend the full water resources staff.

I will not name them all, but particularly Errol Tyler from the majority side, and John Doyle from the minority side, who have worked side-by-side with Mr. ROE as this bill has gone through the process. It would not be here if it was not for the further tenacity of the gentlemen from New Jersey and the fact that our Senate colleagues worked together in conference to bring this to us.

This bill passed the House 340 to 83, the clean water bill, H.R. 8, and I would urge all of my colleagues to vote as the gentleman from New Jersey [Mr. FLORIO] said, unanimously for this. It is one of the soundest pieces of environmental legislation that this Congress will have a right to pass.

Mr. Speaker, I yield back the balance of my time.

Mr. ROE. Mr. Speaker, I yield myself the balance of my time. I want to conclude for our side and thank the staff particularly, who have done an outstanding job. There has been a great group of people who have worked over the years, particularly again, Mr. Errol Tyler and Mr. John Doyle, who are two leading staff members.

I certainly want to thank Mr. STANGELAND and Mr. SNYDER, and our full committee chairman, Mr. HOWARD, for all their work, and Dick Sullivan, our chief counsel, and all those that did so much on the bill. The conferees, and all the members of the committee.

71-059 O-87-24 (Pt. 22)

I think that the House should review this bill as being critical to the future of this country, the water supply of this Nation, which is first and foremost for the health of the people of our country, and I would urge a unanimous vote by the House on this legislation.

Mr. Speaker, I yield back the balance of my time.

Mr. TOWNS. Mr. Speaker, as a conferee on H.R. 8, I want to ensure my colleagues that we worked long and hard, in a bipartisan fashion to develop a good bill. I believe the conference report on the Clean Water Reauthorization Act reflects the conferees effort to develop a balanced allocation formula for all States, a progressive change in the law on stormwater discharges along with a number of specific projects which are needed in various communities throughout this country to preserve a high standard of water quality. I am particularly pleased that the conference report retained House language to reimburse Brooklyn Union Gas for utility relocation costs in Brooklyn and Queens. Because of this provision, utility costs will be reduced to consumers in these areas. Finally, I would add that I hope that our work has not been in vain. I hope that the President will sign this bill; that he will not deprive communities around this Nation from the construction funds they need to improve or maintain good water quality. This is legislation that cities and counties have clamored for for the last 2 years. I hope that they will not be disappointed.

Mr. MOLINARI. Mr. Speaker, I would like to commend the conferees for completing work on the reauthorization of the Clean Water Act. This is an important step forward in our effort to safeguard our Nation's rivers, lakes, and estuaries. I am, however, very disappointed that my amendment to channel additional funds to the Interstate Sanitation Commission [ISC] was deleted from the final conference agreement.

During committee consideration of H.R. 8, the clean water reauthorization bill, I succeeded in attaching an amendment to the bill to earmark an additional $2 million for the ISC. These funds would come from New York, New Jersey, and Connecticut, the three States that the ISC serves. The ISC amendment had the solid backing of the House conferees, but was adamantly resisted by the other body's conferees. Finally, after it became evident that the other body would not even consider a compromise on this matter, the House conferees were forced to drop the ISC amendment from the conference report.

Mr. Speaker, let me stress that the additional funding called for under my amendment is crucial for the ISC. By way of background, the ISC is an environmental agency established by an interstate compact among New York, New Jersey, and Connecticut. The ISC has regulatory jurisdiction over water quality in the tidal waters of northeastern New Jersey, southeastern New York and southwestern Connecticut. ISC monitors water quality in the tristate area and has certain enforcement authority. In addition, ISC conducts an air quality monitoring program, although it has no enforcement authority in this regard.

Although ISC's responsibilities are extensive, its budget has traditionally been inadequate. Despite, these budget constraints, ISC has been able to perform a number of valuable tasks. Allow me to list some of these: First, ISC samples discharges from sewage treatment plants and industries in the tristate area more than the State agencies. In fact, New Jersey has left sampling almost exclusively to ISC; second, ISC performs routine sampling within the Interstate Sanitation district almost exclusively on an on-going basis; third, The ISC has reviewed approximately 301(h) waivers and denied concurrence in all instances. ISC's position on these waivers prevailed and none were issued; fourth, The commission is the coordinator of the regional high air pollution warning system for the tristate air quality control region; and, fifth, ISC is the only agency that logs and investigates air pollution complaints of an interstate nature.

Mr. Speaker, with adequate funding, ISC could do much more to protect the environment of the tristate region. In the area of air pollution, which is a serious problem in my district, ISC officials estimate that in 6 to 8 months the agency could develop its own air enforcement regulations and get an enforcement program underway. ISC believes that the first enforcement action could be undertaken at the end of the first year or the beginning of the second year of the program. However, without the additional moneys called for under my amendment, it will be extremely difficult for the ISC to establish such an air enforcement program. Indeed, many other valuable ISC environmental programs will probably have to be foregone because of insufficient funding.

Mr. Speaker, although I am disappointed that my ISC amendment was not included in the conference report, I would like to express my gratitude to Chairman ROE and the other House conferees for their strong and persistent support for the amendment. Their dedication to this worthy cause is most appreciated.

Mr. McCAIN. Mr. Speaker, I rise in strong support of the reauthorization of the Clean Water Act. The lack of reauthorization has resulted in delays and postponements in cleaning up our Nation's lakes, rivers and streams.

The enactment of this legislation will enable our communities to plan and to construct sewage treatment plants which are so essential to my own State of Arizona where the protection of our precious ground water supplies is so very critical.

This legislation represents Congress' commitment to our environment and to our future water supplies. The funding provided for in this legislation in loans and grants for new, publicly owned treatment plants over the next 8 years is the cornerstone of this measure and I feel will enable us to achieve the goal of having all domestic waste treated before being discharged into the Nation's waterways.

Mr. Speaker, this is a strong but a balanced bill. It deserves all of our support, not only for those we represent today, but more importantly for those who will inherit our Nation's resources. I urge my colleagues support for this urgently needed, and long overdue legislation.

Mr. HOWARD. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HOWARD. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 408, nays 0, not voting 24, as follows:

□ 1900

Messrs. FAWELL, ARMEY, and CRANE changed their votes from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

MOTION OFFERED BY MR. ROE

Mr. ROE. Mr Speaker, I move that the House insist on its amendment to the title of S. 1128.

The motion was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and include extraneous matter, on the conference report just agreed to.

The SPEAKER pro tempore (Mr. MONTGOMERY). Is there objection to the request of the gentleman from New Jersey?

There was no objection.

ESTABLISHING THE BLACKSTONE RIVER VALLEY NATIONAL HERITAGE CORRIDOR IN MASSACHUSETTS AND RHODE ISLAND

Mr. VENTO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table Senate bill (S. 1374) to establish the Blackstone River Valley National Heritage Corridor in Massachusetts and Rhode Island and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

Mr. LAGOMARSINO. Mr. Speaker, reserving the right to object, I yield to the gentleman from Minnesota [Mr. VENTO] to explain the legislation.

Mr. VENTO. Mr. Speaker, I intend to offer a House amendment in the nature of a substitute to S. 1374 as a refinement of the Senate measure. Language has been included to further delineate the appropriate Federal-State-local partnership role in the planning and preservation efforts needed to retain and enhance the important resources of the 46-mile Blackstone River Valley in Massachusetts and Rhode Island. The amendment further reflects a substantial decrease in Federal costs, by limiting the amount of funds authorized to $250,000 annually for the next 5 fiscal years, with the stipulation that the Federal contribution to this undertaking cannot exceed 50 percent of the operating costs of the Commission established by this legislation.

The Blackstone River Valley was the subject of a joint study undertaken in 1984 by the National Park Service and the States of Massachusetts and Rhode Island. That study found important cultural, historical and natural resources of the valley that were in need of preservation and enhancement efforts. S. 1374, as amended, can provide the stimulus to achieve these results in a cooperative effort involving the public and all levels of government.

Mr. Speaker, I would like to take this opportunity to commend Mr. EARLY and Mr. ST GERMAIN, as well as the other members of the Massachusetts and Rhode Island delegations, for their willingness to work with the committee to address several concerns that had been raised with this legislation.

I believe S. 1374, with the House amendment, is a substantial improvement from the original proposals that were put forward, and I support adoption of the measure.

Mr. LAGOMARSINO. Mr. Speaker, further reserving the right to object, I rise in support of the amended version of S. 1374 before us today. As the subcommittee chairman has explained, this bill seeks to preserve the cultural, historical, recreational, and economic resources of the Blackstone River Valley corridor by establishing the Blackstone River Valley National Heritage Corridor and Commission in the States of Rhode Island and Massachusetts.

I want to commend the chairman of the subcommittee for his amendments to the Senate-passed bill. I believe they substantially improve this legislation by placing the responsibility for protection and management of the resources in the corridor upon the States, rather than the Federal Government. The Secretary of the Interior will provide technical and financial assistance, but the corridor commission must also obtain State and private assistance. I believe it is important that for resources, such as those in the Blackstone River Valley corridor, which lack the integrity necessary for inclusion in our National Park System, the Federal Government not take the primary role in their preservation and management. This is much more appropriately a State and local role, and I am pleased that we are establishing this fact in S. 1374. I certainly hope this will be the case for future legislation of a similar nature.

With these amendments, I believe this is a good proposal and I urge my colleagues to support it.

Mr. EARLY. Mr. Speaker, I rise in strong support of the pending legislation to establish the Blackstone River Valley National Heritage Corridor in Massachusetts and Rhode Island. This bill will provide national recognition to the Blackstone River Valley, the "cradle of the American industrial revolution."

I would like to thank the distinguished chairman of the subcommittee, Mr. VENTO, and the ranking minority member, Mr. LAGOMARSINO, for their efforts in bringing this legislation to the House floor. I would also like to say that it was, once again, a pleasure working with my

good friend from Rhode Island, Mr. ST GERMAIN, to bring a Blackstone River Valley National Heritage Corridor another step closer to fruition.

The purpose of this measure is to preserve the historical and cultural resources of the Blackstone River Valley Corridor for the benefit of present and future generations and to share with them its significant contributions to our national heritage.

This legislation is an outgrowth of a study conducted by the National Park Service to assist Massachusetts and Rhode Island with their effort to develop a linear park system along the Blackstone River from Worcester,, MA to Providence, RI.

The Blackstone River Valley is rich in history, natural beauty and cultural traditions. Indeed, English settlements in the area began in 1635.

The National Park Service has determined that the Blackstone Valley Corridor is of national significance to American industrial history. Three factors distinguish the valley from other industrial regions. It was the first such region in the United States; the first widespread use of water power for industry occurred on the Blackstone and Branch Rivers; and it was where the Rhode Island system of manufacturing was developed.

The technology and organization of manufacturing pioneered in the Blackstone Valley influenced industrial development in the rest of our young country. As home of the Rhode Island system, a distinct tradition in manufacturing, the valley is unique. The textile manufacturing centers which developed in Worcester, Hopedale, Northbridge, and Millbury, MA, and in Pawtucket and Providence, RI, constituted one of the most important machine-making districts in the Nation.

The Blackstone Canal, built in the 1820's, was an important canal in its own right in early America, contributing to the growth and commercial prominence of Worcester and Providence, now the second and third largest cities in New England.

The mills, villages, transportation networks, and social history of the early settlers of this area tell the story of the industrialization of 18th and 19th century America. The valley offers an invaluable resource for the study and appreciation of the community life and work place in industrial America.

Over the decades, economic decline has taken its toll and much of the industry has vanished, but its cultural heritage has not. Massachusetts and Rhode Island have already begun a cooperative effort to revitalize the corridor and preserve and interpret the unique and significant contributions of the Blackstone Valley to our heritage—marshaling their own energies and resources.

This legislation would provide a framework to assist Massachusetts and Rhode Island in the development and integration of cultural, historical, and land resource management programs in the corridor. It will facilitate protection and enhancement of the corridor's historical, cultural, and natural resources, as well as opportunities for recreational activities. It will provide a stimulus for needed economic revitalization.

National designation will provide an important impetus in achieving these goals. A partnership among the National Park Service, the Commonwealth of Massachusetts, and the State of Rhode Island will assist the Blackstone River Valley Corridor in realizing its potential—not only for the benefit of residents of Massachusetts and Rhode Island, but it will also help to preserve an important part of our heritage for all Americans.

I urge your support for this worthwhile legislation.

Mr. VENTO. Mr. Speaker, S. 1374 would authorize the creation of a Blackstone River Valley National Heritage Corridor in the States of Massachusetts and Rhode Island. At the appropriate point, I intend to offer an amendment in the nature of a substitute to S. 1374 that is a refinement of the Senate measure. The amendment involves a substantial rewrite of portions of S. 1374, and for that reason I would like to explain in detail for the Members the substance of the amendment.

Language has been included in the amendment to further delineate the appropriate Federal-State-local partnership role in the planning and preservation efforts needed to retain and enhance the important resources of the 46-mile Blackstone River Valley in Massachusetts and Rhode Island. This was accomplished by including a provision for the Governors of the two States, as well as the Secretary, to approve the more comprehensive Cultural Heritage and Land Management Plan to be developed by the Blackstone River Valley National Heritage Corridor Commission established by the legislation. In addition, the amendment adds provisions to spell out the plan approval process for the Secretary.

As passed by the other body, S. 1374 would have permitted the Commission to set the corridor's boundaries. Rather than permit an unspecified boundary, the substitute includes a map reference specifying the corridor's boundaries. This was done with the understanding that the National Heritage Corridor would encompass those lands identified in the park plans developed by the Massachusetts and Rhode Island Departments of Environmental Management.

The role of the Secretary of the Interior is refined by the amendment. S. 1374 required the Secretary, in addition to approving the plan, to detail two employees to the Commission and carry out certain direct duties in the Corridor. The amendment, instead, specifies that the role of the Secretary is one of providing technical assistance to the Commission and State and local governments in developing and implementing plans for the preservation and enhancement of the corridor's resources.

The amendment further reflects a substantial decrease in Federal costs, by limiting the amount of funds authorized to $250,000 annually for the next 5 fiscal years, with the stipulation that the Federal contribution to this undertaking cannot exceed 50 percent of the operating costs of the Commission established by this legislation. If non-Federal interests match the Federal contribution to the Commission, the available pool of money would be equal to the $500,000 that was originally provided for in S. 1374. Additionally, in keeping with the Secretary's technical assistance role, the $75,000 in annual funding for the Secretary is eliminated, since the Secretary can provide these services under existing authorities.

I would note that the $250,000 authorized under the amendment is intended for the Commission's operating costs in preparing and implementing the plan called for by this legislation. In deleting funds for acquiring lands and renovating structures, it is understood that the acquisition of State and local park lands in the area are eligible for funding under the State Grant Program of the Land and Water Conservation Fund Act. Likewise, programs for the restoration of historic structures are eligible for funding under the National Historic Preservation Act, as well as the more direct incentives provided by the historic preservation tax credits.

The Blackstone River Valley was the subject of a joint study undertaken in 1984 by the National Park Service and the States of Massachusetts and Rhode Island. That study found important cultural, historical, and natural resources of the Valley that were in need of preservation and enhancement efforts. S. 1374, as amended, can provide the stimulus to achieve these results in a cooperative effort involving the public and all levels of government.

Mr. Speaker, I would like to take this opportunity to once more commend Mr. EARLY and Mr. ST GERMAIN, as well as the other Members of the Massachusetts and Rhode Island delegations, for their willingness to work with the committee to address several concerns that had been raised with this legislation.

I believe S. 1374, with the House amendment, is a substantial improvement from the original proposals that were put forward, and I support adoption of the measure.

Mr. Speaker, I withdraw my reservation objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1374

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Blackstone River Valley National Heritage Corridor Act of 1985".

FINDINGS AND PURPOSE

SEC. 2. (a) FINDINGS.—The Congress makes the following findings:

(1) The Blackstone River Valley has significance as the cradle of the American Industrial Revolution. The valley was the first to experience widespread use of waterpower for industry. Independent entrepreneurs developed the Rhode Island system of manufacturing, employing families in the making of textiles, and other industrial goods.

(2) Because of the influence of Roger Williams and, later, the growth of transportation networks and the textile industry, the Blackstone Valley developed great ethnic and religious diversity. The cultural heritage of these groups is still preserved in the villages and cities of the Blackstone Valley.

(3) There are many historic buildings, structures, and districts remaining in the Blackstone Valley which represent the his-

tory of the birth and growth of the textile industry and the transportation revolution from land to water to railroad. In Rhode Island, there are 26 National Register Districts, including the Blackstone Canal and 13 mill villages, and 89 structures listed in the National Register. Massachusetts has 7 National Register Districts and 57 structures listed in the National Register.

(4) The corridor was once one of the most heavily industrialized regions of the Nation and has potential for further economic expansion and modernization. The area in which the corridor is located is currently experiencing high rates of unemployment and industrial migration. Establishment of the corridor as provided in this Act may provide the stimulus required to retain existing industry and to provide further industrial growth and commercial revitalization.

(5) Despite efforts by the State, political subdivisions of the State volunteer associations and private business, the cultural, historical, natural, and recreational resources of the corridor have not realized full potential. Their value will be enhanced with assistance from the Federal Government.

(b) PURPOSE.—The purpose of this Act is to retain, enhance, and interpret, for the benefit and inspiration of present and future generations, the cultural, historical, recreational, and economic resources of the corridor, where feasible, consistent with industrial and economic growth.

DEFINITIONS

SEC. 3. For purposes of this Act—

(1) the term "Commission" means the Blackstone River Valley National Heritage Corridor Commission established in section 5;

(2) the term "corridor" means the Blackstone River Valley National Heritage Corridor established in section 4(a);

(3) the term "plan" means the Cultural Heritage Plan submitted to the Secretary by the Commission pursuant to section 9; and

(4) the term "Secretary" means the Secretary of the Interior.

ESTABLISHMENT OF NATIONAL HERITAGE CORRIDOR

SEC. 4. (a) ESTABLISHMENT.—To carry out the purposes of this Act, there is established the Blackstone River Valley National Heritage Corridor.

(b) BOUNDARIES.—The boundaries of the corridor shall be determined by the Commission, in consultation with the Governor of Massachusetts and the Governor of Rhode Island.

(c) ADMINISTRATION.—The corridor shall be administered in accordance with the provisions of this Act.

ESTABLISHMENT OF BLACKSTONE RIVER VALLEY NATIONAL HERITAGE CORRIDOR COMMISSION

SEC. 5. There is established a commission to be known as the Blackstone River Valley National Heritage Corridor Commission which shall carry out the duties specified in section 9.

ORGANIZATION OF COMMISSION

SEC. 6. (a) MEMBERSHIP.—The Commission shall be composed of nineteen members appointed by the Secretary as follows:

(1) The Director of the National Park Service, ex officio, or a delegate;

(2) six individuals nominated by the Governors of Rhode Island and Massachusetts and appointed by the Secretary, who shall be: the Department of Environmental Management Directors from Rhode Island and Massachusetts, the State Historic Preservation Officers from Massachusetts and Rhode Island, and the Department of Economic Development Directors from Massachusetts and Rhode Island;

(3) four representatives of local government from Massachusetts and four from Rhode Island nominated by the Governor of their State and appointed by the Secretary, to represent the interests of local government;

(4) two individuals, nominated by the Governor of Massachusetts and two individuals nominated by the Governor of Rhode Island appointed by the Secretary, to represent other interests each Governor deems appropriate.

A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(b) TERMS.—Members of the Commission shall be appointed for terms of three years.

(c) COMPENSATION.—Members of the Commission shall receive no pay on account of their service on the Commission, but while away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.

(d) CHAIRPERSON.—The chairperson of the Commission shall be elected by the members of the Commission.

(e) QUORUM.—(1) Ten members of the Commission shall constitute a quorum, but a lesser number may hold hearings.

(2) Any member of the Commission may vote by means of a signed proxy exercised by another member of the Commission, but any member so voting shall not be considered present for purposes of establishing a quorum.

(3) The affirmative vote of not less than ten members of the Commission shall be required to approve the budget of the Commission.

(f) MEETINGS.—The Commission shall meet at least quarterly at the call of the chairperson or ten of its members. Meetings of the Commission shall be subject to section 552b of title 5, United States Code (relating to open meetings).

STAFF OF COMMISSION

SEC. 7. (a) DIRECTOR AND STAFF.—(1) The Commission shall have a Director who shall be appointed by the Commission and who shall be paid at a rate not to exceed the minimum rate of basic pay payable for level GS-13 of the General Schedule.

(2) The Commission may appoint up to two additional staff personnel and may pay such staff at rates not to exceed the minimum rate of basic pay payable for level GS-13 of the General Schedule. Such staff may include specialists in areas such as interpretation, historic preservation, recreation, conservation, commercial and industrial development and revitalization, financing, and fundraising.

(3) Except as otherwise provided in this subsection, such Director and staff—

(A) shall be appointed subject to the provisions of title 5, United States Code, governing appointments in the competitive service; and

(B) shall be paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(b) EXPERTS AND CONSULTANTS.—Subject to such rules as may be adopted by the Commission, the Commission may procure temporary and intermittent services to the same extent as is authorized by section 3109(b) of title 5, United States Code, but at rates determined by the Commission to be reasonable.

(c) STAFF OF OTHER AGENCIES.—(1) Upon request of the Commission, the head of any Federal agency may detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out the Commission's duties under section 9.

(2) The Commission may accept the services of personnel detailed from the State or any political subdivision of the State and may reimburse the State or such political subdivision for such services.

POWERS OF COMMISSION

SEC. 8. (a) HEARINGS.—(1) The Commission may, for the purpose of carrying out this Act, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate.

(2) The Commission may not issue subpenas or exercise any subpena authority.

(b) POWERS OF MEMBERS AND AGENTS.—Any member or agent of the Commission, if so authorized by the Commission, may take any action which the Commission is authorized to take by this Act.

(c) ADMINISTRATIVE SUPPORT SERVICES.—The Administrator of General Services shall provide to the Commission, on a reimbursable basis, such administrative support services as the Commission may request.

(d) MAILS.—The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(e) USE OF FUNDS TO OBTAIN MONEY.—The Commission may use its funds to obtain money from any source under any program or law requiring the recipient of such money to make a contribution in order to receive such money.

(f) GIFTS.—(1) Except as provided in subsection (g)(2)(B), the Commission may, for purposes of carrying out its duties, seek, accept, and dispose of gifts, bequests, or donations of money, personal property, or services, received from any source.

(2) For purposes of section 170(c) of the Internal Revenue Code of 1954, any gift to the Commission shall be deemed to be a gift to the United States.

(g) ACQUISITION OF REAL PROPERTY.—(1) Except as provided in paragraph (2) and except with respect to any leasing of facilities under subsection (c), the Commission may not acquire any real property or interest in real property.

(2) Subject to paragraph (3), the Commission may acquire real property, or interests in real property, in the corridor—

(A) by gift or devise; or

(B) by purchase from a willing seller with money which was given or bequeathed to the Commission on the condition that such money would be used to purchase real property, or interests in real property, in the corridor.

(3) Any real property or interest in real property acquired by the Commission under paragraph (2) shall be conveyed by the Commission to an appropriate public or private land managing agency, as determined by the Commission. Any such conveyance shall be made—

(A) as soon as practicable after such acquisition;

(B) without consideration; and

(C) on the condition that the real property or interest in real property so conveyed is used for public purposes.

(h) COOPERATIVE AGREEMENTS.—For purposes of carrying out the plan, the Commission may enter into cooperative agreements with the State of Massachusetts and the State of Rhode Island, with any political subdivision of each State, or with any person. Any such cooperative agreement shall, at a minimum, establish procedures for providing notice to the Commission of any action proposed by the State of Massachusetts and the State of Rhode Island, such political subdivision, or such person which may affect the implementation of the plan.

(i) ADVISORY GROUPS.—The Commission may establish such advisory groups as the Commission deems necessary to ensure open communication with, and assistance from, the State of Massachusetts and the State of Rhode Island, political subdivisions of the State of Massachusetts and the State of Rhode Island, and interested persons.

DUTIES OF COMMISSION

SEC. 9. (a) PREPARATION OF PLAN.—Within one year after the Commission conducts its first meeting, it shall submit a Cultural Heritage Plan to the Secretary for review and approval for 90 days. The plan shall be based on existing State plans, but shall coordinate those plans and present a unified historic preservation and interpretation plan for the corridor. The plan shall—

(1) define the boundaries of the National Heritage Corridor;

(2) provide an inventory which includes any property in the corridor which should be preserved, restored, managed, developed, maintained, or acquired because of its national historic or cultural significance;

(3) establish standards and criteria applicable to the construction, preservation, restoration, alteration, and use of all properties within the corridor; and

(4) develop an historic interpretation plan to interpret the history of the valley.

(b) IMPLEMENTATION OF PLAN.—(1) After review and approval of the plan by the Secretary as provided in subsection (a), the Commission shall implement the plan. In implementing the plan, the Commissions shall give priority to actions which assist in—

(A) preserving and interpreting the historic resources of the valley;

(B) completing State and local parks in the corridor; and

(C) supporting public and private efforts in economic revitalization consistent with the goals of the Cultural Heritage Plan.

(2) Priority actions to be carried out under paragraph (1) shall include—

(A) assisting the States in appropriate preservation treatment of the Blackstone Canal;

(B) assisting the States in designing, establishing, and maintaining visitor centers and other interpretive exhibits in the corridor;

(C) encouraging private landowners adjacent to the canal or river to retain or reestablish, where possible, vegetative, or other buffers as specified in the State park plans;

(D) assisting in the enhancement of public awareness of an appreciation for the historical and architectural and geological resources and sites in the corridor;

(E) assisting the State or any local government or any nonprofit organization in the restoration of any historic building in the corridor;

(F) encouraging, by appropriate means, enhanced economic and industrial development in the corridor consistent with the goals of the plan;

(G) encouraging local governments to adopt land use policies consistent with the goals of the State park and the plan and to take actions to implement those policies; and

(H) ensuring that clear, consistent signs identifying access points and sites of interest are put in place.

TERMINATION OF COMMISSION

SEC. 10. (a) TERMINATION.—Except as provided in subsection (b), the Commission shall terminate on the day occurring five years after the date of the enactment of this Act.

(b) EXTENSION.—The Commission may be extended for a period of not more than five years beginning on the day referred to in subsection (a) if, not later than one hundred and eighty days before such day—

(1) the Commission determines such extension is necessary in order to carry out the purpose of this Act;

(2) the Commission submits such proposed extension to the Committee on Interior and Insular Affairs of the House of Representatives and to the Committee on Energy and Natural Resources of the Senate; and

(3) the Governor of Massachusetts, the Governor of Rhode Island, and the Secretary each approve such extension.

DUTIES OF THE SECRETARY

SEC. 11. (a) PURPOSE.—To carry out the purpose of this Act, the Secretary shall—

(1) assist the Commission in preparing the Cultural Heritage Plan; and

(2) design and fabricate interpretive materials based on the Cultural Heritage Plan including—

(A) guide brochures for exploring the heritage story of the valley by automobile, train, bicycle, boat, or foot;

(B) visitor displays (including video presentations) at several locations well distributed along the corridor, including both indoor and outdoor displays; and

(C) a mobile display depicting the heritage story to be used in the park, public buildings, libraries, and schools.

(b) TECHNICAL ASSISTANCE.—The Secretary shall, upon request of the Commission, provide technical assistance to the Commission in carrying out its duties described in section 9, including recommendations concerning appropriate preservation treatment, adaptive re-use, potential strategies for funding, private investors, and tax advantages of rehabilitation of historic structures.

(c) DETAILS FROM INTERIOR.—For each fiscal year of the life of the Commission, the Secretary shall detail to the Commission, on a nonreimbursable basis up to two employees of the Department of the Interior to enable the Commission to carry out its duties under section 9.

DUTIES OF OTHER FEDERAL ENTITIES

SEC. 12. Any Federal entity conducting or supporting activities directly affecting the corridor shall—

(1) consult with the Secretary and the Commission with respect to such activities;

(2) cooperate with the Secretary and the Commission in carrying out their duties under this Act and, to the maximum extent practicable, coordinate such activities with the carrying out of such duties; and

(3) to the maximum extent practicable, conduct or support such activities in a manner which the Commission determines will not have an adverse effect on the corridor.

AUTHORIZATION OF APPROPRIATIONS

SEC. 13. (a) There is authorized to be appropriated annually for the next five fiscal years—

(1) to the Commission a sum not to exceed $500,000 to carry out the Commission's duties under this Act; and to be used by the Commission for—

(A) leasing buildings and land;

(B) renovating or restoring structures to serve as visitors centers or interpretive facilities for the heritage corridor; and

(C) preserving the Blackstone Canal and its associated structures; and

(2) to the Secretary a sum not to exceed $75,000 to carry out the Secretary's duties described in Sec. 11(c) and to carry out the Secretary's other duties under this Act.

(b) Any sums appropriated under this section shall remain available until expended.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. VENTO

Mr. VENTO. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by

Mr. VENTO: Page 1, line 3 strike all after the enacting clause and insert in lieu thereof the following:

SECTION 1. ESTABLISHMENT OF NATIONAL HERITAGE CORRIDOR.

That for the purpose of preserving and interpreting for the educational and inspirational benefit of present and future generations the unique and significant contributions to our national heritage of certain historic and cultural lands, waterways and structures within the Blackstone River Valley in the States of Massachusetts and Rhode Island there is hereby established the Blackstone River Valley National Heritage Corridor (hereafter in this Act referred to as the "Corridor"). It is the purpose of this Act to provide a management framework to assist the States of Massachusetts and Rhode Island and their units of local government in the development and implementation of integrated cultural, historical and land resource management programs in order to retain, enhance and interpret the significant values of the lands, waters and structures of the Corridor.

SEC. 2. BOUNDARIES AND ADMINISTRATION.

(a) BOUNDARIES.—The boundaries shall include those lands generally depicted on a map entitled Blackstone River Valley National Heritage Corridor, numbered BRV-80,000 and dated October 1986. The map shall be on file and available for public inspection in the office of the Department of the Interior in Washington, D.C. and the Massachusetts and Rhode Island Departments of Environmental Management. The Secretary of the Interior (hereafter referred to as the "Secretary") shall publish in the Federal Register, as soon as practical after the date of enactment of this Act a detailed description and map of the boundaries established under this subsection.

(b) ADMINISTRATION.—The corridor shall be administered in accordance with the provisions of this Act.

SEC. 3. BLACKSTONE RIVER VALLEY NATIONAL HERITAGE CORRIDOR COMMISSION.

(a) ESTABLISHMENT.—There is hereby established a commission to be known as the Blackstone River Valley National Heritage

Corridor Commission (hereafter known as the Commission) whose purpose shall be to assist Federal, State and local authorities in the development and implementation of an integrated resource management plan for those lands and waters as specified in section 2.

(b) MEMBERSHIP.—The Commission shall be composed of nineteen members appointed by the Secretary as follows:

(1) the Director of the National Park Service, ex officio, or a delegate;

(2) six individuals nominated by the Governors of Rhode Island and Massachusetts and appointed by the Secretary, who shall be the Department of Environmental Management Directors from Rhode Island and Massachusetts, the State Historic Preservation Officers from Massachusetts and Rhode Island, and the Department of Economic Development Directors from Massachusetts and Rhode Island;

(3) four representatives of local government from Massachusetts and four from Rhode Island nominated by the Governor of their State and appointed by the Secretary, to represent the interests of local government; and

(4) two individuals, nominated by the Governor of Massachusetts and two individuals nominated by the Governor of Rhode Island appointed by the Secretary, to represent other interests each Governor deems appropriate.

A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(c) TERMS.—Members of the Commission shall be appointed for terms of three years.

(d) COMPENSATION.—Members of the Commission shall receive no pay on account of their service on the Commission, but while away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.

(e) CHAIRPERSON.—The chairperson of the Commission shall be elected by the members of the Commission.

(f) QUORUM.—(1) Ten members of the Commission shall constitute a quorum, but a lesser number may hold hearings.

(2) Any member of the Commission may vote by means of a signed proxy exercised by another member of the Commission, but any member so voting shall not be considered present for purposes of establishing a quorum.

(3) The affirmative vote of not less than ten members of the Commission shall be required to approve the budget of the Commission.

(g) MEETINGS.—The Commission shall meet at least quarterly at the call the chairperson or ten of its members. Meetings of the Commission shall be subject to section 552b of title 5, United States Code (relating to open meetings).

SEC. 4. STAFF OF THE COMMISSION.

(a) STAFF.—(1) The Commission shall have the power to appoint and fix the compensation of such staff as may be necessary to carry out its duties.

(2) STAFF APPOINTED BY THE COMMISSION—

(A) shall be appointed subject to the provisions of title 5, United States Code, governing appointments in the competitive service; and

(B) shall be paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(b) EXPERTS AND CONSULTANTS.—Subject to such rules as may be adopted by the Commission, the Commission may procure temporary and intermittent services to the same extent as is authorized by section 3109(b) of title 5, United States Code, but at rates determined by the Commission to be reasonable.

(c) STAFF OF OTHER AGENCIES.—(1) Upon request of the Commission the head of any Federal agency may detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out the Commission's duties.

(2) The Commission may accept the services of personnel detailed from the States of Massachusetts and Rhode Island (and any political subdivision thereof) and may reimburse that State or political subdivision for those services.

SEC. 5 POWERS OF COMMISSION.

(a) HEARINGS.—(1) The Commission may, for the purpose of carrying out this Act, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate.

(2) The Commission may not issue subpoenas or exercise any subpoena authority.

(b) POWERS OF MEMBERS AND AGENTS.—Any member or agent of the Commission, if so authorized by the Commission, may take any action which the Commission is authorized to take by this Act.

(c) ADMINISTRATIVE SUPPORT SERVICES.—The Administrator of General Services shall provide to the Commission, on a reimbursable basis, such administrative support services as the Commission may request.

(d) MAILS.—The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(e) USE OF FUNDS TO OBTAIN MONEY.—The Commission may use its funds to obtain money from any source under any program or law requiring the recipient of such money to make a contribution in order to receive such money.

(f) GIFTS.—(1) Except as provided in subsection (g)(2)(B), the Commission may, for purposes of carrying out its duties, seek, accept, and dispose of gifts, bequests, or donations of money, personal property, or services, received from any source.

(2) For purposes of section 170(c) of the Internal Revenue Code of 1954, any gift to the Commission shall be deemed to be a gift to the United States.

(g) ACQUISITION OF REAL PROPERTY.—(1) Except as provided in paragraph (2) and except with respect to any leasing of facilities under subsection (c), the Commission may not acquire any real property or interest in real property.

(2) Subject to paragraph (3), the Commission may acquire real property, or interests in real property, in the corridor—

(A) by gift or devise; or

(B) by purchase from a willing seller with money which was given or bequeathed to the Commission on the condition that such money would be used to purchase real property, or interests in real property, in the corridor.

(3) Any real property or interest in real property acquired by the Commission under paragraph (2) shall be conveyed by the Commission to an appropriate public or private land managing agency, as determined by the Commission. Any such conveyance shall be made—

(A) as soon as practicable after such acquisition;

(B) without consideration; and

(C) on the condition that the real property or interest in real property so conveyed is used for public purposes.

(h) COOPERATIVE AGREEMENTS.—For purposes of carrying out the plan, the Commission may enter into cooperative agreements with the State of Massachusetts and the State of Rhode Island, with any political subdivision of each State, or with any person. Any such cooperative agreement shall, at a minimum, establish procedures for providing notice to the Commission of any action proposed by the State of Massachusetts and the State of Rhode Island, such political subdivision, or such person which may affect the implementaion of the plan.

(i) ADVISORY GROUPS.—The Commission may establish such advisory groups as the Commission deems necessary to ensure open communication with, and assistance from, the State of Massachusetts and the State of Rhode Island, political subdivisions of the State of Massachusetts and the State of Rhode Island, and interested persons.

SEC. 6. DUTIES OF THE COMMISSION.

(a) PREPARATION OF PLAN.—Within one year after the Commission conducts its first meeting, it shall submit a Cultural Heritage and Land Management Plan to the Secretary and the Governors of Massachusetts and Rhode Island for review and approval for 90 days. The plan shall be based on existing State plans, but shall coordinate those plans and present a unified historic preservation and interpretation plan for the corridor. The plan shall—

(1) provide an inventory which includes any property in the corridor which should be preserved, restored, managed, developed, maintained, or acquired because of its national historic or cultural significance;

(2) establish standards and criteria applicable to the construction, preservation, restoration, alteration, and use of all properties within the corridor;

(3) develop an historic interpretation plan to interpret the history of the valley;

(4) contain policies for land use management which consider and detail the application of appropriate land and water management techniques, including but not limited to local zoning, use of easements and development of intergovernmental cooperative agreements, so as to protect the Corridor's historical, cultural, scenic and natural resources and enhance water quality of the Blackstone River in a manner consistent with supporting economic revitalization efforts;

(5) contain a coordination and consistency component which details the ways in which local, State and Federal programs may best be coordinated to promote the purposes of this Act; and

(6) contain a program for state and local government implementation of the plan.

(b) APPROVAL OF THE PLAN.—(1) No plan submitted to the Secretary under this section shall be approved unless the Secretary finds that the plan, if implemented, would adequately protect the significant historical and cultural resources of the corridor and consistent with such protection provide adequate and appropriate outdoor recreational opportunities and economic activities within the corridor.

(2) In determining whether or not to approve the Plan, the Secretary shall consider whether:

(A) the Commission has afforded adequate opportunity, including public hearings, for public and governmental involvement in the preparation of the plan;

(B) he has received adequate assurances from appropriate State officials that the recommended implementation program identified in the plan will be initiated within a reasonable time after the date of approval of the plan and such program will ensure effective implementation of the State and local aspects of the plan.

(3) If the Secretary disapproves the plan, he shall advise the Commission in writing of the reasons therefore and shall indicate any recommendations for revisions. Following completion of any necessary revisions to the plan, the Secretary shall have 45 days to either approve or disapprove the plan.

(c) Implementation of the Plan.—(1) After review and approval of the plan by the Secretary and the Governors of Massachusetts and Rhode Island as provided in subsections (a) and (b) the Commission shall give priority to actions which assist in—

(A) preserving and interpreting the historic resources of the valley;

(B) completing State and local parks in the corridor; and

(C) supporting public and private efforts in economic revitalization consistent with the goals of the Cultural Heritage Plan.

(2) Priority actions to be carried out under paragraph (1) shall include—

(A) assisting the States in appropriate preservation treatment of the Blackstone Canal;

(B) assisting the States in designing, establishing, and maintaining visitor centers and other interpretive exhibits in the corridor;

(C) encouraging private landowners adjacent to the canal or river to retain or reestablish, where possible, vegetative, or other buffers as specified in the State park plans;

(D) assisting in the enhancement of public awareness of an appreciation for the historical and architectural and geological resources and sites in the corridor;

(E) assisting the State or any local government or any nonprofit organization in the restoration of any historic building in the corridor;

(F) encouraging, by appropriate means, enhanced economic and industrial development in the corridor consistent with the goals of the plan;

(G) encouraging local governments to adopt land use policies consistent with the goals of the State park and the plan and to take actions to implement those policies; and

(H) ensuring that clear, consistent signs identifying access points and sites of interest is put in place.

SEC 7. TERMINATION OF COMMISSION.

(a) TERMINATION.—Except as provided in subsection (b), the Commission shall terminate on the day occurring five years after the date of the enactment of this Act.

(b) EXTENSION.—The Commission may be extended for a period of not more than five years beginning on the day referred to in subsection (a) if, not later than one hundred and eighty days before such day—

(1) the Commission determines such extension is necessary in order to carry out the purpose of this Act;

(2) The Commission submits such proposed extension to the Committee on Interior and Insular Affairs of the House of Representatives and to the Committee on Energy and Natural Resources of the Senate; and

(3) the Governor of Massachusetts, the Governor of Rhode Island, and the Secretary each approve such extension.

SEC. 8. DUTIES OF THE SECRETARY.

(a) PURPOSE.—To carry out the purposes of this Act, the Secretary shall assist the Commission in preparing the Cultural Heritage and Land Management Plan. Following approval of the plan as provided under Section 6 (a) and (b) the Secretary shall assist the Commission to design and fabricate interpretive materials based on the plan including—

(A) guide brochures for exploring the heritage story of the valley by automobile, train, bicycle, boat, or foot;

(B) visitor displays (including video presentations) at several locations well distributed along the corridor, including both indoor and outdoor displays; and

(C) a mobile display depiciting the heritage story to be used in the park, public buildings, libraries, and schools.

(b) TECHNICAL ASSISTANCE.—The Secretary shall, upon request of the Commission, provide technical assistance to the Commission in the preparation of the plan and for implementing the plan as set out in Section 6(c).

SEC. 9. DUTIES OF OTHER FEDERAL ENTITIES.

Any Federal entity conducting or supporting activities directly affecting the corridor shall—

(1) consult with the Secretary and the Commission with respect to such activities;

(2) cooperate with the Secretary and the Commission in carrying out their duties under this Act and, to the maximum extent practicable, coordinate such activities with the carrying out of such duties; and

(3) to the maximum extent practicable, conduct or support such activities in a manner which the Commission determines will not have an adverse effect on the corridor.

SEC. 10. AUTHORIZATION OF APPROPRIATIONS.

There is authorized to be appropriated annually to the Commission $250,000 for the next five fiscal years to carry out the purposes of this Act; except that the Federal contribution to the Commission shall not exceed 50 percent of the annual operating costs of the Commission.

Mr. VENTO (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Minnesota [Mr. VENTO].

The amendment in the nature of a substitute was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. VENTO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the Senate bill just considered and passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

LOWER COLORADO WATER SUPPLY ACT

Mr. MILLER of California. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5028) entitled the "Lower Colorado Water Supply Act," with Senate amendments thereto, concur in Senate amendments numbered 1, 2, 3, 4, 6, 7, 8, 9, 10, and 11, and disagree to the Senate amendment numbered 5.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, line 8, strike out [only] and insert: "only: *Provided*, That, the Secretary is hereby authorized, in his discretion, to contract with non-Federal interests for the care, operation, and maintenance of all or any part of the project works, subject to such rules and regulations as he may prescribe".

Page 1, line 8, after "constructed" "in stages as increases in demand warrant and".

Page 3, line 7, strike out [interest] and insert: "interest, as determined by the Secretary of the Treasury, as of the beginning of the fiscal year in which the contract is executed, on the basis of the average market yields on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the applicable reimbursement period of the project, adjusted to the nearest one-eight of 1 per centum,".

Page 3, line 8, strike out [municipal and industrial] and insert: "domestic, municipal, industrial, and recreational".

Page 3, line 11, after "by" insert: "section 9(c) of the Recreational Project Act of 1939 (Act of August 4, 1939, ch. 418, 53 Stat. 1187) and by".

Page 3, line 18, after "project" insert: "on a current basis".

Page 3, after line 18, insert:

"(4) The Secretary has transmitted to Congress the final planning report/environmental assessment on the Lower Colorado Water Supply Project.".

Page 4, line 8, after "construction" insert: "through September 30, 1993".

Page 4, strike out all after line 8 down to and including "supply" in line 14, and insert: "the sum of $1,800,000 plus or minus such amounts, if any, as may be justified by reason of ordinary cost indices applicable to the types of construction involved therein and in addition thereto such sums as may be required for operation, maintenance and replacement of that portion of the project used to supply domestic,".

Page 4, after line 19, insert:

SEC. 4. CONTRIBUTION OF CONSTRUCTION COSTS.

The Secretary is authorized to accept monetary contributions from the City of Needles and other incorporated cities for the construction of project features of the Lower Colorado Water Supply Project allocated to the provision of water supplies to the City of Needles and other incorporated

cities; Provided, that, such contributions shall be credited towards the reimbursible costs to be repaid by the City of Needles and other incorporated cities pursuant to the contracts entered into pursuant to Sec. 2 of this Act. Such contribution by the City of Needles and other incorporated cities shall be contributed during the construction of the appropriate project features and shall constitute twenty percent of the costs of such project features allocated to the City of Needles and other incorporated cities for repayment.

Page 4, after line 19, insert:

SEC. 5. SAVINGS PROVISION.

Nothing contained in this Act shall be construed to alter, repeal, modify, interpret, or be in conflict with the provisions of the Colorado River Compact (45 Stat. 1057), the Water Treaty of 1944 with the United Mexican States (Treaty Series 994, 59 Stat. 1219), the decree entered by the Supreme Court of the United States in Arizona against California, and other (376 U.S. 340), the Boulder Canyon Project Act (45 Stat. 1057), the Boulder Canyon Project Adjustment Act (54 Stat. 774; 43 U.S.C. 618a), or the Colorado River Basin Project Act (82 Stat. 885; 43 U.S.C. 1501). Nor shall any provision of this Act—

(a) affect the rights or jurisdictions of the United States, the States, Indian tribes, or other entities over waters of any river or streams or over any ground water resources, or

(b) otherwise be construed to alter or establish the respective rights of States, the United States, Indian tribes, or any person with respect to any water or water-related right.

Mr. MILLER of California (during the reading). Mr. Speaker, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from California?

Mr. CHENEY. Mr. Speaker, reserving the right to object, I do not plan to object, but I reserve the right to object to allow the gentleman from California [Mr. MILLER] to explain the bill and the proposed amendments.

Mr. MILLER of California. Mr. Speaker, if the gentleman will yield, the other body added a series of amendments making technical and clarifying changes in H.R. 5028 as passed by the House. I see no reason to object to these proposed amendments.

However, the other body has proposed an amendment authorizing the Interior Secretary to write contracts under authority of section 9(c) of the Reclamation Projects Act of 1939. This is an unnecessary provision since the Secretary already has the authority he needs under the Water Supply Act of 1958.

Mr. Speaker, I urge adoption of the motion to agree with the Senate amendments.

Mr. CHENEY. Mr. Speaker, further reserving the right to object, I yield to the gentleman from California [Mr. LEWIS].

Mr. LEWIS of California. I thank the gentleman for yielding to me.

Mr. Speaker, in the grand scheme of worldly matters this bill is such a small speck on the globe that it almost is nonexistent—but, the solution it provides for a few of the worlds little people is a matter of life and death. Water lawsuits have flowed for 30 years leaving little people in and around Needles and Winterhaven without water rights or an adequate supply of water. Let me explain, my community is out in the middle of nowhere, 4 hours from the nearest city. The majority of these well owners are living off their Social Security and have been using Colorado River water for 20 years. For them, there is no other source of water. Without an assured supply of water, what choice would these citizens have except to be forced out of their homes?

There are individuals, communities, and recreational interests located along the Colorado River that do not have sufficient water rights to meet their present or future needs. These noncontract water users will shortly be required to close their wells and terminate their use of the Colorado River unless another supply can be provided for them. About half of these noncontract users include recreational lands leased by the Bureau of Land Management, the others are individuals from the town of Winterhaven, and citizens living in and around the City of Needles.

Concern about an adequate water supply for noncontract users led the Colorado River board to work with the Secretary of the Interior on a Federal-State task force in 1975 that investigated the problem and recommended a course of action. Following this, Congress, in 1980, authorized the Secretary of Interior to conduct feasibility studies of possible alternative supplies that could provide up to a maximum of 10,000 acre-feet of water per year. My bill simply authorizes the Bureau of Reclamation's recommended project as presented in their December 1985 draft report.

This authorization in not premature. The draft recommendation was submitted for comment in December 1985. With the comment period long since closed the Bureau will be presenting their final recommendation within the next 45 days. Every indication we have had shows that the final report recommends this project. With the few legislative days that remain in this session it would be a shame if this legislation was not passed.

The Bureau's water supply plan calls for two to five wells along and south of the All-American Canal. The wells would pump ground water that has seeped from the canal back into the canal. In return, a like amount of Colorado River water would be made available for use by the noncontract users along the river in California. The exchange agreements among the various water users would be executed by the Secretary of the Interior to allow this swapping of water supplies.

The Bureau of Reclamation's peferred plan has been more than 10 years in the making and would supply the people in Duncan Hunter's, Al McCandless', and my district with a firm and affordable water supply to meet their present and future water needs.

The costs of the project and the operation and maintenance costs will be repaid in full with interest specified by current market rates. The city of Needles will participate with up front financing.

Mr. CHENEY. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MILLER of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

WAIVING CERTAIN POINTS OF ORDER AGAINST CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 738, CONTINUING APPROPRIATIONS, 1987, AND AGAINST CONSIDERATION OF SUCH CONFERENCE REPORT

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 593 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 593

Resolved, That upon the adoption of this resolution it shall be in order to consider the conference report and amendments reported from conference in disagreement on the joint resolution (House Joint Resolution 738) making continuing appropriations for the fiscal year 1987, and for other purposes, if the conference report and amendments reported from conference in disagreement have been available to Members for at least one hour, the conference report and amendments reported from conference in disagreement shall be considered as having been read when called up for consideration, all points of order against the conference report and against its consideration are

hereby waived, and all points of order, except under clause 7 of rule XVI, are hereby waived against motions in the House of dispose of the amendments reported from conference in disagreement. All points of order are hereby waived against a motion offered by the chairman of the Committee on Appropriations or his designee to recede from disagreement to Senate amendment number 59, reported from conference in disagreement and to concur therein with an amendment. All points of order are hereby waived against a motion offered by Representive Regula of Ohio or his designee to recede from disagreement to Senate amendment number 117, reported from conference in disagreement and to concur therein with an amendment.

The SPEAKER pro tempore. The gentleman from South Carolina [Mr. DERRICK] is recognized for 1 hour.

□ 1910

Mr. DERRICK. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Mississippi [Mr. LOTT], for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 593 is a rule providing for the consideration of the conference report on House Joint Resolution 738, making continuing appropriations for fiscal year 1987. The rule makes in order consideration of the conference report and any amendments reported from the conference in disagreement if they are available to Members 1 hour prior to consideration. The rule also provides that the conference report and the amendments reported from conference in disagreement shall be considered as having been read when called up for consideration.

Mr. Speaker, this rule waives all points of order against the conference report and against its consideration. The rule also waives all points of order, except under clause 7 of rule XVI, against motions in the House to dispose of the amendments reported from conference in disagreement.

Clause 7 of rule XVI is the rule of germaneness. At the time the Rules Committee acted on this measure, Mr. Speaker, the conference had not been completed. Therefore, although we were apprised generally as to those matters likely to be reported back to the House in disagreement, nothing was certain pending conclusion of the conference. Therefore, by requiring that the amendments in disagreement comply with the House requirement of germaneness, Mr. Speaker, this rule protects the perogatives of the Members of the House by ensuring that Members will be able to pursue separate votes on nongermane amendments reported from conference in disagreement, or nongermane portions thereof, if they choose to do so.

Mr. Speaker, this rule also waives all points of order against a motion to be offered by the Chairman of the Committee on Appropriations or his designee to recede from disagreement to Senate amendment 59, reported from conference in disagreement, and to concur therein with an amendment.

Senate amendment No. 59 requires the Administrator of the General Services Administration to acquire space for the U.S. courts in the State of Washington. The amendment to be offered to this amendment by the Chairman of the Committee on Appropriations, or his designee, provides appropriations for construction, purchase, repairs, and alterations to various Federal buildings around the country.

Finally, Mr. Speaker, this rule waives all points of order against a motion offered by Representative REGULA of Ohio or his designee to recede from disagreement to Senate amendment No. 117, reported from conference in disagreement, and concur therein with an amendment. The Regula amendment, Mr. Speaker, will contain a revised version of the so-called buy American provision for producers of oil and gas in the Outer Continental Shelf. Specifically, the amendment requires that domestic producers of oil and gas must purchase drilling structures constructed with no less than 50 percent of domestic materials.

Mr. Speaker, this rule will allow the House to work its will on one of the three remaining budget-related bills which must be finalized before this Congress can adjourn. The temporary short-term continuing resolution will expire tonight. The continuing resolution which this rule will make in order provides funding for all of fiscal year 1987.

I believe it important to note, Mr. Speaker, that prior to consideration of this continuing resolution, the House had completed action on 11 of 13 regular appropriations bills for the fiscal year which began on the first of this month, fiscal 1987. The two which the House did not consider—Defense and Foreign Operations—were, nonetheless, reported from the Committee on Appropriations prior to being incorporated into this continuing resolution.

Mr. Speaker, while I have never believed that continuing resolutions are the best way to fund Federal activities, I must note that the House had made very considerable progress toward adopting all the regular appropriations bills, as separate bills, before the late date and nonaction on these matters in the other Chamber made this procedure necessary.

The House adopted House Joint Resolution 758 on September 25, 1986. The other body passed the resolution, with amendments, on October 3, 1986. The conference on the legislation was concluded last evening. And as I've already noted, the temporary short-term continuing resolution under which we are presently operating will run out tonight. It is, therefore, imperative that we move this legislation forward.

Mr. Speaker, I am advised by the Appropriations Committee that they are within their budget allocation in regard to the 13 regular appropriations bills carried in this continuing resolution. The provisions in the resolution providing funding for the Omnibus Drug Supplemental Appropriations Act of 1987 will, however, cause the budget ceilings to be exceeded. Moreover, these provisions provide funding for activities which were not anticipated in the first budget resolution and which have been identified as a very high priority by an overwhelming majority of our colleagues in both Chambers of Congress.

Mr. Speaker, I urge colleagues support of this rule so we can expedite further legislative action on the continuing resolution.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, before I begin my own remarks, I yield 2 minutes to the gentleman from Indiana [Mr. HILER] to proceed out of order for an announcement that the body will be interested in.

IN TRIBUTE TO THE HONORABLE SHEP CRUMPACKER

Mr. HILER. I thank the gentleman for yielding me this time.

Mr. Speaker, I take the floor to announce to my colleagues that Shepard J. Crumpacker, a former Republican Member of Congress from Indiana's Third Congressional District, died early this morning, October 15, 1986, in South Bend, IN.

Shep Crumpacker was first elected to the Congress in 1950, and was reelected in 1952 and 1954. He chose not to seek reelection in 1956, and was succeeded by a Republican, F. Jay Nimtz.

Mr. Crumpacker was born February 13, 1917, in South Bend and was a graduate of Central High School. He earned an engineering degree from Northwestern University in 1938 and received his law degree from the University of Michigan. He was admitted to the bar in 1941.

After serving 4½ years in the Army during World War II as an aircraft maintenance officer, Mr. Crumpacker joined his father's law firm until he ran for Congress in 1950.

Following his decision not to seek reelection to the House in 1956, Mr. Crumpacker returned to his South Bend law firm and worked 20 years. In 1977 he was appointed St. Joseph County Superior Court judge by then Governor, of the State of Indiana and now Secretary at the Department of Health and Human Services, Dr. Otis R. Bowen. He retired from the bench in August 1985.

At the time of his retirement, Mr. Crumpacker said that becoming a judge was the fulfillment of a lifelong

ambition. "Being a judge was something I always wanted to do," he said.

One of the things that Mr. Crumpacker said he enjoyed most about serving as judge was trying cases. As a former trial lawyer, he felt he understood the pressures that attorneys feel during trials.

"I liked being able to hear cases tension free as an impartial observer," he said. "Someone else was in the hot-seat."

Mr. Crumpacker's associates and colleagues considered him a diligent worker who was concerned both about people and the integrity of the legal system.

Mr. Crumpacker also served as city attorney during the administration of South Bend Mayor Lloyd M. Allen. He was appointed to the job in 1968.

Mr. Crumpacker was active in various civic affairs and organizations including the South Bend Rotary Club, of which he was a former president.

He was also a member of the local, State and national bar associations and other legal organizations.

I know my colleagues join me in expressing our condolences to Shep's wife of 36 years, and their son, Richard; four grandchildren; and a brother Harold.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, finally we have a conference report on the continuing resolution, I think. I hurriedly say I think because during the Rules Committee meeting yesterday we had not seen the report. A report had not been filed at that time. But the distinguished chairman of the committee, Mr. WHITTEN, promised us that the report would be ready and would be filed today and that it would be available to the Members for at least 1 hour before it was called up for consideration. I understand that that time has been met and that it is now, in very lengthy form, available to the Members for review.

The rule that brings up the continuing resolution for appropriations has been very ably described by the gentleman from South Carolina [Mr. DERRICK] so I will not go into the details of what is waived, although I will point out there are some very important waivers here.

I do want to note that there are some specific amendments in disagreement that will come up. As I understand it, the way this will proceed when we complete the rule, if the rule is adopted, we will then go to an hour of debate on the continuing resolution itself at which point we would vote, and if the continuing resolution is adopted, we will then go to six amendments in disagreement that would be brought up, each with an hour of debate and then the possibility of a vote at that point.

The six amendments that are involved are as follows:

Agriculture, amendment #23, Farm payment cap;

Interior, amendment #117, OSC drilling equipment "Buy America" provision;

Labor—HHS—Education, amendment #19, "Double breasting";

Transportation, amendment #124, Transfer of National and Dulles airports;

Treasury-Postal Service, amendment #59, Federal building fund; and amendment #60, Imported distilled spirits (Gray Market).

□ 1920

So those are the amendments in disagreement that would be brought up separately and we would consider those, one after the other, and then, when we complete that, that will finish the continuing appropriations resolution, which would take us, I might say, it looks like probably close to midnight. So the Members should be prepared for that.

This is no way to do business. The process stinks. The procedure stinks and the result probably stinks, in more ways than I would care to enumerate.

But we need a continuing resolution to keep the Government in operation and so that we can hopefully, mercifully bring this session of Congress to a conclusion.

So with no great glee, but with an admission of reality, we have no option and I would urge the adoption of the rule.

Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, for the Members who may not have seen it, this is the bill which the rule takes under consideration. Many of you may not have had a chance to see it yet because it has only been out here for about an hour. It is about a $500 to $600 billion bill, just a minor little item that we bring to the floor here fairly hastily.

I will tell the membership, however, that that hour that you had to consider this particular measure is an hour more than the Committee on Rules took before they wrote this rule. The Committee on Rules did not even have this bill before it when they wrote the rule, and yet they managed to waive all points of order against this particular piece of legislation.

It seems to me that that is very interesting. The Committee on Rules has told us now on a couple of occasions coming to the floor today that they are very reluctant to bring bills out here waiving all points of order that they did not have a chance to see.

Here is a pretty big one that they did not have a chance to see, and yet they waived all points of order against consideration of the bill.

The question becomes, what kind of process is this? Is this the kind of process that we should have in the House of Representatives for the process of bringing legislation to this floor?

One of the amendments that is in this particular bill, we also waived points of order against. The Members ought to be very interested in this particular amendment. It is called the Federal building fund, and the reason why we are waiving the points of order against it is because there are buildings that were put into the bill that had not passed either the House or the other body. They managed to just divvy up some goodies in the conference committee, and then they come to the floor and they waive all points of order against it. It is several million dollars. We have got about $32 million for a project in Chicago. There are a couple of million dollars in there for a project in Miami, and heaven knows what else.

But we waived the points of order against them and so on, and we are going to be told that this is the responsible approach to governing.

I would suggest that anybody who votes for this rule and votes for this bill and then tells us about how responsible the House of Representatives is on spending just cannot be very realistic.

This is a totally irresponsible approach to spending. It is a totally irresponsible approach to our own rules.

This is a slightly smaller document than what we are considering. It is called the House Rules Book. We might as well rip it up. The Committee on Rules keeps coming out here; there is no sense putting the money out next year for printing it because the House just waives the rules that are in this rule book every time we want to.

We get to the end of the session; we come up with a $600 billion bill and we decide that the rules do not make any difference anymore. I do not know why we have the Committee on Rules around here having this function. We could spend this irresponsibly without doing it under a rules process.

I suggest to the membership that a no vote on this rule would be the most responsible vote you would cast in this Congress.

Mr. Speaker, I yield back the balance of my time.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 3 minutes to the gentleman from Michigan [Mr. TRAXLER].

Mr. TRAXLER. Mr. Speaker, I would like to engage in a colloquy, if I may, with the distinguished chairman of the full committee and the chairman of the Subcommittee on Agriculture, Rural Development and Related Agencies of the Committee on Appropriations to ask some questions in connection with the agriculture disaster aid portions of the conference report.

Mr. Speaker, I want to clarify the conferees' intent regarding the amount of production losses a farmer need have in order to qualify for disaster assistance payments.

Is it the committee's intent that if a farmer who produces several crops loses more than half of any one of those crops he is eligible for disaster payment assistance on the individual crop that he lost?

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. TRAXLER. I yield to the gentleman from Mississippi.

Mr. WHITTEN. Mr. Speaker, it is my understanding that if a farmer produces several crops on the same farm, and loses more than half of any one of those crops, he is eligible for disaster payment assistance on the individual crop.

Mr. TRAXLER. Mr. Speaker, furthermore, with respect to the modifications being made in the farmers home loan programs, is it the committee's intent that the Farmers Home Administration be as lenient as current law allows with respect to eligibility for refinancing and new loan assistance of all FmHA programs for those producers located in disaster areas?

Mr. WHITTEN. Mr. Speaker, the resolution directs the Administrator of the Farmers Home Administration to do that. As the gentleman knows, most of our farm troubles come now because the head of the Farmers Home Administration demanded cash flow. The cash-flow requirement is not in the law. In other words, instead of helping a fellow stay in business, they make him show, in order to be eligible, that he not only has enough money to pay all his debts, plus a year's work and pay everything off at the end of the year, which most farmers cannot do. We have attempted to obviate that by directing them to use all the authority in law to help keep the farmer on the farm.

Mr. TRAXLER. Mr. Speaker, I thank the gentleman for those answers.

Mr. Speaker, I rise in support of the conference report to accompany the continuing resolution, House Joint Resolution 738. A very long process has brought us here, and I want to tell you that as a member of the conference committee, I truly appreciate the leadership and determination exercised by our chairman, Mr. WHITTEN.

Further, without the Senate amendment offered by Senators RIEGLE and LEVIN, the matter of disaster assistance payments to Michigan's farmers would not have even been brought before the conference.

I want you to know that the provisions in this conference report regarding the agricultural disaster payment program represent an untiring effort of the entire Michigan congressional delegation to secure vital assistance for our farmers at their time of need. A particular compliment and thanks must be paid to the many agricultural leaders from our State who over the past few weeks came to Washington and diligently visited with our colleagues in both the House and the Senate to let them know of our legitimate need for assistance. I am particularly grateful to our colleague, HOWARD WOLPE, for his concern and great help in getting this disaster package passed.

I want to describe what happened in our efforts to secure disaster payment assistance for farmers in Michigan and other parts of the country who have been hit with literally the worst weather in centuries. It is one of those good news-bad news situations. The good news is that we have before us the most generous disaster assistance programs to come before us for a final vote in many years. The bad news is that we were faced with the administration's opposition every step of the way. First the Secretary of Agriculture told us that he would not use the discretion he has under law to provide disaster assistance to many farmers. Then yesterday the Director of OMB advised us that unless changes were made in the program he would recommend a veto of the entire resolution. In fact, he wrote to Mr. WHITTEN: "The original provision has been modified in a manner to make it wholly unacceptable".

Taken on balance, given the administration's distaste for disaster payments and a workable disaster loan program, I consider what we accomplished a significant victory.

Mr. Speaker, the disaster payment program before us is a good one. It is not the best that I could have designed. It is also the only one we could get. I personally wanted to see it improved to provide meaningful assistance to producers who are faced with very difficult financial situations. It will provide such assistance to many farmers, just not to as many I would prefer.

In negotiations with the Senate during conference, I argued that we needed to increase the percentage of loss coverage for farmers. The Senate wouldn't go along. I argued that we needed to increase the dollar payment limitations. The Senate wouldn't go along. The Senate wouldn't go along because they had been told that any modification of the program beyond the Senate's original design of disaster payments for losses in excess of 50 percent for production would result in a veto. In fact, the OMB letter to Chairman WHITTEN stated: "We would be willing to accept a disaster payment program as long as it is workable and no larger than that contained in the original Senate bill."

Current law provides for a discretionary disaster payment program in which any farmer who lost more than 50 percent of his production would receive disaster payment assistance on the amount of loss over 50 percent. Secretary Lyng in a meeting with myself, some of my Michigan colleagues, and a number of farm leaders from our State told us 2 weeks ago that he would not use this discretion. He would not exercise any discretion to assist and help the disaster-stricken Michigan farmers.

The provisions of the Riegle-Levin-Mattingly amendment passed by the Senate virtually within days of that meeting with Secretary Lyng took those discretionary provisions of current law and made them mandatory. They also expanded the program to cover crops like dry beans, potatoes, and vegetables which are not covered by current law. These two changes are major accomplishments. They just don't help as many farmers as I and the Senators would prefer.

The conference agreement also calls upon the Secretary of Agriculture to open up the farmers home loan programs to the fullest extent possible under current law to help as many farmers as it can. Again, this provision has been scaled back from a more generous provision than we had originally designed. This reduction is specifically to respond to the veto threats we received from OMB.

The agreement also provides additonal resources for the Soil Conservation Service and the Agricultural Stabilization and Conservation Service for emergency conservation work to begin the restoration of land and drainage structures.

Mr. Speaker, I want to provide assistance that our farmers need. I do not want to invite a veto on this resolution which could result in no disaster payment assistance being provided to anyone. But Mr. Speaker, I want everyone to understand that the reason this program is not as generous as we had hoped for is not because Congress hasn't tried. In fact, I find almost total willingness on the part of Congress—urban and rural members alike—to help the Michigan farmer in this time of need. To the extent that we haven't succeeded, the administration's opposition must bear the blame.

At this point, I am submitting a letter from OMB Director James C. Miller to Appropriations Committee Chairman WHITTEN, detailing his opposition to the disaster program to be printed in the RECORD so that all can see exactly the problems we had to face.

EXECUTIVE OFFICE
OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, October 14, 1986.

Hon. JAMIE L. WHITTEN,
Chairman, Committee on Appropriations, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: This is to outline our remaining concerns with the agriculture provisions of the 1987 Continuing Resolution.

First, as you know, the Administration has consistently opposed the disaster payment program which was adopted by the Senate. Despite our opposition to the Senate provision which would have cost up to $332 million, we did not indicate that this provision alone would warrant a recommendation to the President to disapprove of the legislation containing it.

Now, however, the original Senate provision has been modified in a manner to make it wholly unacceptable. The amendment, as tentatively agreed to by the conferees, would require the Secretary of Agriculture to refinance existing FmHA debt at the "lowest allowable interest rate" for borrowers affected by the drought or flood and to provide new production loans to such borrowers. Although some technical revisions have been made which improve this provision, it is still potentially open-ended and could lead to billions of dollars in FmHA losses in future years. Accordingly, in order to make the Continuing Resolution acceptable to the Administration, this provision must be modified to make it discretionary with the Secretary of Agriculture.

Second, although the Senate provision went into conference at $332 million (the House had no similar disaster payment provision), the tentative agreement reached by the conferees is now at $500 million—a substantial increase in a program that we deemed to be too generous at the $332 million level. The amount of assistance provided under the disaster payment provisions must be reduced from the amount contained in the tentative agreement.

Third, the conferees proposd to partially pay for the disaster payment program by mandating additional Rural Electrification Administration (REA) guaranteed Federal Financing Bank (FFB) loan refinancing. As you know, the Administration steadfastly has opposed allowing existing REA guaranteed FFB borrowers to prepay their outstanding loans without the penalty provision provided for in their existing contracts, except in the case of financial distress or other need. To require additional loan refinancing above the $2 billion mandated in the Reconciliation Bill as a method of paying for a brand new program is something we cannot support. This provision must be eliminated as a funding offset. Furthermore, I would like to reiterate that the current subsidized Federal Crop Insurance Program is intended to address these kinds of disasters. This provision runs contrary to the intent of the crop insurance program by rewarding those who elected to not purchase insurance thereby creating a disincentive for future participation in the Federal Crop Insurance Program.

The Administration has been very flexible in trying to work with the Congress to meet the legitimate needs of America's farmers. Again, let me emphasize that we would be willing to accept a disaster payment program as long as it is workable and as long as it is no larger than that contained in the original Senate bill. However, we cannot accept a program that is substantially larger than that in the Senate bill, nor can we accept a potentially open-ended FmHA provision or additional mandatory REA prepayments as a way of paying for new programs.

As we move toward the conclusion of the conference on the 1987 Continuing Resolution, I would hope that these issues will not stand in the way of a speedy resolution of the many important matters which the Congress must deal with before it adjourns.

Sincerely yours,

JAMES C. MILLER III,
Director.

Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. SCHUETTE].

Mr. SCHUETTE. Mr. Speaker, I thank the gentleman from Mississippi [Mr. LOTT], the gentleman from South Carolina [Mr. DERRICK], and certainly the chairman of the Committee on Appropriations, the gentleman from Mississippi [Mr. WHITTEN] and the gentleman from Massachusetts [Mr. CONTE].

I rise in strong support of the rule and the continuing resolution upon which we will vote this evening. Within the continuing resolution, there are measures for disaster payments for farmers.

In the State of Michigan, for 3 weeks, almost 27 inches of rain fell, destroying more than a quarter of a billion dollars' worth of crops, $250 million, minimum, of crop loss. From shore to shore, from Huron to Michigan, we have seen a devastation of the magnitude never witnessed before in Michigan's history—sugarbeets, dry beans, corn, vegetables, soybeans. We need help at this point in time.

As difficult as it is to fully compensate or make people whole after a disaster of this proportion, the time is now when Government ought to help. There is no more appropriate time than now for Government to help producers, given this devastation.

This does not just help Michigan; rather, it helps farmers in the drought-stricken Southeast and other flood-drenched States in the Nation's breadbasket. This effort has been achieved through the hard work of producers, farmers from Michigan who came and sent a message, and a bipartisan effort by the Michigan delegation and other Members of Congress and Members of the other body.

I personally want to thank my friend and colleague, the gentleman from Michigan [Mr. TRAXLER], for his efforts, in our joint efforts together in making this a reality.

So, in conclusion, I urge my colleagues to lend a hand to help those farmers, through no fault of their own, disaster of drought or a flood that has rained out the incomes and the livelihoods of these people. Now is the time the Government must act.

That is why you must vote yes on the rule and yes on the continuing resolution.

Mr. Speaker, Thomas Jefferson wrote that the essence of representative government is to do that which the people cannot do for themselves.

Today, we have the opportunity to do just that; to approve legislation that goes to the very heart of what compassionate representation is all about.

As most of us know, Michigan has recently suffered the worst natural disaster in its history. Normal September rainfall is 3.2 inches. This September, we received from 18 to 27 inches. The result has been flood-drenched homes and businesses; roads, bridges, and dams demolished; and crops destroyed.

Mr. Speaker, the bill before us today attempts to give back a portion of hope to a group of people who have lost so very, very much. Our farmers have seen their very livelihood quite literally washed away. From shore to shore—from Lake Michigan to Lake Huron—Michigan communities have been devastated. Michigan's pride, our edible bean crop, has been severely damaged. The floodwaters know no favorites: both program crops, such as corn and soybeans, have been lost, as well as the other commodities Michigan is justifiably famous for, sugar beets, fruit, potatoes, carrots, onions, celery, pickles, mint, and other crops.

Mr. Speaker, numerous counties in Michigan have been declared Federal disaster areas. Thousands of acres have simply disappeared under the tide. Michigan State University estimates that, without relief, almost 25 percent of the farms in the disaster area will be, quite simply, out of business next year.

Many of these farmers were the most efficient ones in our State. They have survived the financial crisis gripping agriculture. But now, for many of these farmers, there is no hope of salvaging their fall harvest—a harvest which was expected to yield bumper crops. It could be years before these men and women are able to return their operations to normal production levels.

There is no question that these floods will have a profound impact upon the future of Michigan agriculture, the second most productive sector of our State's economy. In Michigan, as in many other States across the country, the farm economy is the lifeblood of most of our rural communities. By failing to provide the necessary assistance to keep these farmers in business, we would, in turn, be threatening the very future of most of the towns and villages throughout our State.

Of course, this unprecedented disaster is not confined to Michigan. Flooding has claimed major portions of our Nation's breadbasket. In addition, the scourge of drought has ravaged our neighbors in Southeastern States, and this bill extends a much-needed hand of friendship to them as well.

Mr. Speaker, as you know, crafting assistance for our farm families was not an easy task. It required a unique coalition of agricultural producers, farm leaders, and a bipartisan group of legislators. Quite frankly, this measure is a result of an all-too-rare occurrence in our Nation's Capital. It is literally the result of people traveling to Washington to press for relief that, despite their best efforts, they could not provide on their own. And, within a

very few days, they stoked the fire and produced the results you see before you today.

If ever we were offered the opportunity to cast a vote that Mr. Jeffersons would applaud, Mr. Speaker, today is that day. To do for our people what they cannot do for themselves is, by God's grace, the noblest calling of the civil government He has ordained.

I urge my colleagues to vote for this resolution.

Mr. LOTT. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. PORTER]

Mr. PORTER. Mr. Speaker, the conference report is upon us. It is big, it is ugly, it is irresponsible, and it is probably over budget. It's hard to tell how badly over budget it may be—it's hard to even know what's in it because it was just reported this morning. Many of the subcommittee conference reports aren't even available. We're voting on almost $600 billion in spending and the ink isn't even dry on the bill.

Total appropriations, commendably, are down a little from the budget ceiling. Total outlays, however, are probably over budget. At first, estimating outlays under Gramm-Rudman was a problem, but we found ways to get around that problem. This Congress has not met a number it cannot fudge, it has not met a procedural obstacle it cannot dodge, and it has not met a budget deficit that it cannot exceed.

I commend my appropriation chairman for not allowing the other body to take the farm price support program off budget. The conference agreement, as I understand it, puts $17 billion into CCC payments and holds another $3 billion in a contingency fund. You may rest assured—given the continued deterioration of our farm economy—that that $3 billion will become real outlays in fiscal year 1987.

Then there is the NASA portion of the bill which has received a nice gift from the Defense Subcommittee—$2.4 billion in appropriations for the questionable purpose of building a new space shuttle.

This gift is made possible by the 3-year spendout rate for building a new shuttle—it only costs $100 million in fiscal year 1987, which means there will be $2.3 billion in outyear budget busting. I wish the Budget Committee luck, next spring, when they attempt to fudge their way to a $108 billion deficit ceiling and are confronted with large, built-in outlays of this type.

With regard to foreign aid, we got rid of most of the gimmicks that were contemplated earlier. Those gimmicks were motivated, I would point out, by an attempt to avoid an unconscionable slashing of economic assistance to our allies in Africa and Asia. But huge spending bills allow us to obscure this sort of irresponsibility. We kept one gimmick, however: The foreign aid section contains a magic downward reestimate of the obligation rate for the military assistance account. That magic reestimate came just in time to foster a compromise on foreign operations funding.

Even the little legislative branch bill, unfortunately, contain some manipulating of the numbers to squeeze in under its outlay allocation. New spending estimates for the Member's mail account have been reestimated slightly downward to pay for a few million in Capitol spending.

Finally, there is the defense section of this bill. The chairman of the Defense Authorization Committee has been kind enough to issue a press release outlining the phony numbers in his section and I respect his candor. We'll have put up on the scoreboard still another $200 billion deficit.

We are taking money out of operations and maintenance—the bread and butter account for our men in uniform—and we are putting it into procurement. Why? Because procurement spends out slower. So again, we create headaches for ourselves next year by building in large future outlays. Moreover, we slap today's soldier in the face while guaranteeing that tomorrow's children will pay the bill for the weapons we want. Are we going to slide payday for our men in uniform over to the first day of fiscal year 1988? That's a cute accounting trick, but we all know that next year—when the focus is on fiscal year 1988—the budget committee will shift that payment back to fiscal year 1987 where it belongs. That sort of gamesmanship is part of the reason that this year's deficit is $230 billion.

Beyond the gimmickry, beyond the overspending, there is substantive legislation in this bill. Trade provisions relating to imported alcohol and steel for oil rigs. Labor provisions incorporating the undeveloped and hopelessly confused construction industry amendments. Last time I checked, there was an amendment to the tax reform bill.

So this continuing resolution is part of the process, an irresponsible process that includes phony budget resolutions and phony deficit reduction bills. This omnibus spending bill is just too big and it is part of the reason when all the actual numbers are toted up a year from now, the American people will find out the truth—that we will have missed the Gramm-Rudman deficit target of $144 billion for fiscal year 1987 by $50 billion.

□ 1930

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from California [Mr. FAZIO].

Mr. FAZIO. Mr. Speaker, I think it is that time in the session when people throw around terms like "big" and "bloated" and "ugly" and imply that perhaps we have not done our job here. I think the evidence is absolutely to the contrary. We ought to clear the record, because there are people who do pay attention to what we say here occasionally, not as many as many of us would like to think, but still sufficient to make the effort.

The first thing I would like to point out is that we are $15 billion below what the President asked for in the same spending categories that we are involved with in this bill.

In other words, if this is big and bloated and ugly, it is less big, less bloated and less ugly than the President's budget submission.

I would argue that we have been very responsible in bringing to the floor something that really puts the President's budget to shame. You know, that is the budget that was not brought to the Senate floor in order to save the President embarrassment and the one that got one vote here on the floor of the House of Representatives.

We also have been focusing a great deal of our time and effort this year on the question of outlays. You know, that is the new jargon because that is what relates to Gramm-Rudman, not budget authority, but outlays.

Members should know that, this is under the budget resolution on outlays by almost $2 billion and that is after adding on the drug program, coming late in the session with a special spending program because of a perceived national problem.

So let me make very clear to all those who really are interested in the facts and are concerned about what we are enacting here tonight that we can do so with our heads held high. We can do so knowing that we have passed a prudent document, a fiscally sound one, one that puts the budget of the President in some perspective, I would say to shame.

Perhaps that is why we are in receipt of a letter from James Miller indicating that he—the Office of Management and Budget—urges adoption of the conference report. He has a couple caveats, a few items in true disagreement that he would like us not to accept, but in general he says that the administration thinks this is a prudent document and they can live with it.

I hope the Members on both sides of the aisle will stop the game playing and let us get on to the election.

Mr. LOTT. Mr. Speaker, I yield 3 minutes to the gentleman from Texas [Mr. ARMEY].

Mr. ARMEY. Mr. Speaker, we are now 15 days into the fiscal year 1987 and we are now contemplating a rule that will allow us to vote on all the appropriations for 1987. Let us review the process.

Have we done our job? No, we have not done our job. In the legislative calendar we would have throughout 1986 prior to this time, before October 1, have passed 13 separate appropria-

tions bills. They would have gone through both bodies and to the President where he would have had the opportunity to veto them or to sign them. Had he vetoed them, he could have identified in each of the separate bills those particular items that he disapproved and we would then have had time to reconsider them and decide whether we want to override his veto or not.

Now, I understand there are a great many people who are not enamored of the President's veto power. There was a time when he had in addition to that, rescission authority and impoundment authority. That was taken away.

There have been efforts in this body to amend those appropriation bills that we did get before us and to try to reduce spending by making judicious cut decisions. Most of them failed, but that is now no longer relevant.

There have been efforts to get something like a renewed rescission authority to the President so that he could go into a bill and find those items that he disapproved and deal with them individually.

Now, 43 States in this Nation have line-item vetoes for their Governors and it works well. Yet, repeated efforts in this party to obtain even limited line-item veto authority for the President have never gotten past the Rules Committee here.

If we pass this continuing resolution tonight and pass over $500 billion in the largest single expenditure in the history of the human race, at one fell swoop we will have then taken the President's veto power away from him, unless he is willing to veto the entire budget 2 weeks into the fiscal year and shut down the Government because we are late and we have not done our work.

Now, I first began to study the budgetary spending patterns of this House back in the early 1970's. In 1972 I had a chance to discuss them with a famous internationally renowned economist named Paul N. Rosenstein-Rodan, and as he discussed it he said, "Considering each separate appropriations bill on its separate merits is a perfect formula for not thinking."

Well, we have come a long way since then, Mr. Speaker. We now consider all of them en bloc and we have a perfect formula for bad thinking and late thinking. We have not done our job. I think we ought to admit that we are responsible for putting the President in an impossible position. Vote no on the rule and on the continuing resolution.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Michigan [Mr. TRAXLER].

Mr. TRAXLER. Mr. Speaker, I thank the distinguished gentleman for yielding me this time.

Mr. Speaker, I rise for the purpose of explaining the status of the various 13 appropriation bills and their progress through the House over the last several months. For whatever reasons, it is important to note that 11 of the 13 appropriation bills for fiscal year 1987 have passed the House in reasonable, responsible time, to be acted upon by the other body, to have a conference and to have the separate 13 bills go to the President. There was plenty of time.

Let me tell you, Agriculture passed this House on July 24; Commerce, July 17; the District of Columbia bill, July 24; Energy and Water, July 23; HUD Independent Agencies, September 12; Interior, July 31; Labor-HHS, July 31; Legislative, July 29; Military Construction, June 25; Transportation, July 30; and Treasury, Postal Service, August 6.

DOD was outstanding because of the clear and apparent situation where we knew that the Senate would not do a DOD bill and the same was true in our foreign aid situation.

The House has performed its task admirably. To those who want to criticize the process, I suggest they go to the other side of the dome and down to the end of the street that leads to the White House. For whatever reasons, those people are not prepared to move individual appropriation bills on to the President and the shoe fits them and it is darn tight.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume, only to say that the recitation we just had here on the floor has very strong arguments on the other side of it, but I am not going to give them now for the sake of trying to save this continuing resolution rule. Let us spare ourselves this type of jousting, or else we will lose the whole thing that we are trying to get through the House right now, the continuing resolution.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 3 minutes to the distinguished gentleman from Massachusetts [Mr. FRANK].

Mr. FRANK. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I was interested to hear the gentleman from Mississippi decry jousting. When some of his knights came galloping down, we did not hear him say that; but that is not unusual, that kind of select application of principle.

We are told this rule was a problem because it did not follow the proper procedure. I still remember the Gramm-Rudman bill which was an amendment to the Deficit Reduction Act. There was a time when some of us were talking about that going back to committee to be examined and we could not think of what committee to send it back to, because it had never been to a committee in either House.

Gramm-Rudman, a major piece, a flawed major piece of legislation, came out of here and there was no concern about procedural regularity; so procedural regularity is kind of like a faucet that people turn on and off. The number of people who are always for doing it exactly in that way seem to be quite slender, the people criticizing this rule now who have when they like the substantive product voted for a similar kind of a rule.

I am going to vote for the rule. I hope we get the bill before us so we can have a clean cut vote on the continuing resolution, which ought to be defeated.

The gentleman from Michigan is entirely right. We passed all the appropriation bills. Some anonymous people elsewhere in this building refused to pass any appropriation bills, but we have passed them.

So now the question is, What do we do about the continuing resolution? Well, the continuing resolution, we have done a lot of good stuff on arms control and then we held off because the President had to negotiate. Well, now we know the model that guides the President when he negotiates, a bird in the hand is worth pie in the sky, so we now have a continuing resolution that has no serious arms control advances.

We have money for the Contras, which is in the continuing resolution, although apparently the administration has decided they can finance the war without that, but they will take the money in addition because that will give them a few extra things. That is before us. I hope we can defeat it.

I think the amount of money that we are talking about is a reasonable one, but it ought to be reallocated. We hear from the Office of Management and Budget that they have no objection to the overall dollar amount. The gentleman from California read that, so we have a dollar amount that is apparently acceptable to the other side and it is acceptable to the President and that means that the issues that are at least between us and the other body have to do with aid to the Contras and arms reduction.

We now have the President telling us that he is not interested essentially in arms reduction. He says that he is not going to give up at all on his strategic defense initiative. The Russians tell us that we are not going to get any arms reduciton if he does not.

I support my President on most issues when he is negotiating with the other side. I am disappointed that his approach has been so productive of so little.

I was interested in his speech the other night. He listed all these issues, Cambodia, Angola, Nicaragua, and human rights and arms reduction. The problem is that Ronald Reagan has

not been productive of any success in any of them. I wish he had been. I wish he had been able better to control the aggressive and oppressive behavior of the Soviets.

□ 1945

So far we have gotten very little to show for it, so what we are being asked in effect is, let us continue to vote large amounts of money, virtually unrestricted, to the President; let us give him money for the Contras; let us not have a test ban; let us let him break out of SALT II; and let us let him go full speed ahead on chemical weapons—all in contradiction to how the House voted, and that is what is in the continuing resolution.

I hope that we defeat it.

Mr. LOTT. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

Mr. DERRICK. Mr. Speaker, I have no further requests for time and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 281, nays 122, not voting 29, as follows:

□ 1955

Messrs. COLEMAN of Missouri, CROCKETT, and ECKART of Ohio changed their votes from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CONGRATULATIONS TO 1986 NATIONAL LEAGUE CHAMPIONS, NEW YORK METS

(Mr. ACKERMAN asked and was given permission to address the House for 1 minute.)

Mr. ACKERMAN. Mr. Speaker, I rise on this momentous occasion to lead the House in congratulating the 1986 National League Champs, the Queens New York Mets.

From owners Nelson Doubleday and Fred Wilpon, to General Manager Frank Cashen, to Manager Davey Johnson, to all 24 heroic and amazing players, the Mets have had a season that has been truly astronomical.

Sparked today by Roger McDowell's gutty five innings of relief pitching and a compelling performance by Jessie Orosco, the Mets have fully earned their glory.

Whether they play the Speaker's beloved Red Sox or the Disneyland Angels, there can be no doubt today who the world champions will be at the end of the month—from Queens, the New York Mets.

Mr. LELAND. Mr. Speaker, will the gentleman yield?

Mr. ACKERMAN. I yield to the gentleman from Texas.

Mr. LELAND. Mr. Speaker, I am not sure whether I should praise the gentleman or ask that his words be taken down. But, Mr. Speaker, let me congratulate not only the gentleman in the well right now but also all of the delegation from New York who have so graciously been nice to those of us from Houston who feel very, very proud of the fact that the Astros did do as well as any team could do against a tremendous baseball team.

We are proud of the fact that the Mets will do well in the World Series, and we know that you will be victorious.

I do not know what the Massachusetts delegation is going to say, but I want to thank the gentleman for being so gracious.

Mr. ACKERMAN. I thank the gentleman for being gracious as well, and I accept your kind offer for dinner for nine. Tex-Mex food will be fine.

□ 2005

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report and amendments in disagreement to House Joint Resolution 738, and to include tables and other extraneous matter.

The SPEAKER pro tempore. Is there objection to request of the gentleman from Mississippi?

There was no objection.

CONTINUING APPROPRIATIONS, 1987

Mr. WHITTEN. Mr. Speaker, pursuant to the provisions of House Resolution 593, I call up the conference report on the joint resolution (H.J. Res. 738) making continuing appropriations for the fiscal year 1987, and for other purposes.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Pursuant to House Resolution 593, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of earlier today.)

The SPEAKER pro tempore. The gentleman from Mississippi [Mr. WHITTEN] will be recognized for 30 minutes, and the gentleman from Massachusetts [Mr. CONTE] will be recognized for 30 minutes.

Mrs. SCHROEDER. Mr. Speaker, it is my understanding that both the gentleman from Mississippi [Mr. WHITTEN] and the gentleman from Massachusetts [Mr. CONTE] are in favor of the bill; and in that case, I would ask recognition for 20 minutes under the rule as being opposed to the bill.

The SPEAKER pro tempore. Is the gentleman from Massachusetts [Mr. CONTE] opposed to the conference report?

Mr. CONTE. Well, I have not made up my mind, Mr. Speaker, but I guess not.

The SPEAKER pro tempore. Is the gentleman from Mississippi [Mr. WHITTEN] opposed to the conference report?

Mr. WHITTEN. No, Mr. Speaker.

The SPEAKER pro tempore. The gentlewoman from Colorado [Mrs. SCHROEDER], then, qualifies for one-third of the time.

Therefore, the gentleman from Mississippi [Mr. WHITTEN] will be recognized for 20 minutes, the gentleman from Massachusetts [Mr. CONTE] will be recognized for 20 minutes, and the gentlewoman from Colorado [Mrs. SCHROEDER] will be recognized for 20 minutes.

The Chair now recognizes the gentleman from Mississippi [Mr. WHITTEN].

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I bring to you the conference report on the continuing resolution, which the press and many Members describe as a poor way to operate. I agree with them for many reasons. However, they are wrong in saying that the contents of this resolution were thrown together.

The facts are that the contents of this resolution were evolved by the regular 13 subcommittees after months of hearings, and the members of the subcommittee were the conferees on the area for which it had jurisdiction. Eleven of the thirteen bills passed the House of Representatives in the normal manner. The exceptions were defense and foreign aid, where the authorization and other factors held up action by the subcommittee.

Mr. Speaker, I hope my colleagues will listen to this, because this bill was as carefully prepared as any that we have. It just happens to come up at the same time.

After months of hearing witnesses, those 11 bills, the record shows, passed the House of Representatives by an overwhelming vote as follows:

The Agriculture appropriation bill passed July 24 by a vote of 329 to 49;

Commerce, Justice passed July 17, by 269 to 66;

District of Columbia passed July 24, 296 to 117;

Energy and water passed July 23, 329 to 82;

HUD-Independent Agencies passed on September 12, 295 to 46;

Interior passed July 31, 359 to 51;

Labor-HHS passed July 31, 328 to 86;

Legislative passed July 29, 266 to 146;

Military construction passed June 25 by a vote of 249 to 174;

Transportation passed July 30 by a vote of 329 to 87; and

Treasury-Post Office passed by 302 to 118 on August 6.

The point I make is, contrary to what we read, and some of our colleagues say, this bill is a reproduction of and actually a repassing of the bills that the Congress passed some time ago.

On those bills, the regular appropriations subcommittees spent months in hearings; all the work that normally goes into them. We sent them to the Senate, after being held up, and they did not come back in a timely fashion.

So while we are handling all these bills together here, and it is a poor way to run a railroad. We are the last train; and we have been drafted to take this work.

I do want to tell you that we brought to you that which has been carefully prepared.

I know you want to know some of the items that are in this bill.

BELOW PRESIDENT'S BUDGET

First, let us compare this with the President's recommendation. Compared to the President's budget requests, this resolution is $2.4 billion below in budget authority, and $14.9 billion below in outlays; so we have held the line.

TOTALS BELOW BUDGET RESOLUTION

The conference agreement totals $575.9 billion in overall fiscal year 1987 budget authority and $560 billion in overall 1987 outlays. In comparison with the fiscal year 1987 Congressional Budget Resolution and the 302 allocations provided to the Committee on Appropriations, we are well below. We are $1.628 billion below in total budget authority and $2.452 billion below in total outlays.

These comparisons do not include funds for the Omnibus Drug Program. The Drug program was not passed in time to be included in the Congressional Budget Resolution totals. The Omnibus Drug Program totals $1.666 billion in budget authority and $700 million in outlays.

I would like to point out some of the things here that are of special interest.

DEFENSE ITEMS

We hear so much about the Defense Department. In this bill we provide $1.2 billion for Midgetmen research and development;

We provide for no ASAT tests unless the President certifies to Congress that the Soviets have conducted such a test;

We provide $120 million for MX research and development for follow-on basing operations;

We provide $290 million for MX research and development;

We provide $1.1 billion for procurement of 12 MX missiles;

We provide $3.500 billion for SDI research and development, test and evaluation;

The resolution states sense of Congress that it is in the national security interests of the United States to continue voluntary compliance with the central numbered sublimits of the SALT II Treaty as long as the Soviet Union complies with such sublimit; and

We provide $35 million for procurement of the Bigeye binary chemical

bomb, but prohibit obligation until after October 1, 1987.

DRUG INITIATIVE

Of great public interest is the drug initiative. The resolution includes $1,666,251,000 in new budget authority for funding the omnibus drug initiative. These funds are provided in some 37 separate accounts as title II of the continuing resolution.

LIMITATIONS

Since this resolution includes all 13 regular appropriation bills at specified levels of funding and under the terms and conditions of each individual bill, the resolution embraces those limitations on funding carried in the regular bills such as those regarding abortion funding.

We have also restored the major domestic programs, as well as many other things.

So may I tell you that we have brought you all the bills together, but they have had the same careful attention that they had before you voted for them overwhelmingly.

So this is not pulled out of the sky; it is a sound bill, and I think the administration can accept it. In fact, I have a letter from the Director of the Bureau of the Budget a while ago, that it is his recommendation that it be approved by the President. He did have two amendments that he mentioned.

I mention this so you may know that while we consider this bill, it is the same bill that we have voted for overwhelmingly. We had to put together the 13 bills because the other body did not act on the bills that we sent to them in time to do otherwise.

I ask your support for this. If we do not pass this, as we know, our time limit expires at 12 o'clock tonight. If we do not adopt this resolution it is our responsibility that the Government has to close its doors.

Mr. Speaker, I reserve the balance of my time.

□ 2015

Mr. CONTE. Mr. Speaker, I understand the opposition has time.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The gentleman from Massachusetts [Mr. CONTE] has 20 minutes, and then we will go to the opposition.

However, if the gentleman would prefer, the chair would recognize the gentlewoman from Colorado first.

Mr. CONTE. Yes, Mr. Speaker.

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Colorado [Mrs. SCHROEDER].

Mrs. SCHROEDER. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, I imagine many people wonder why we are trying to oppose this conference report, because there are many good things in here. I am the one who is the author of the amendment showing it costs up to $55 million a day to close down the Government, and we do not want to do that.

But the reason we feel so strongly about this is there were some very important provisions in this continuing resolution that have been removed. I think it saddens me. The problem is if we did not take these up, those provisions now, they are really lost forever.

Let me talk about what those provisons are. Number one is the whole issue of SALT II. We understand that the President intends to violate SALT II limits between now and when this Congress will reconvene as the 100th Congress. Once the limits have been broken, there is not any way that you can put it all back together.

Second, we had a very strong test ban vote in this Congress that would have allowed the United States and the Soviet Union both to stop testing as long as there was on-site inspection and verification. That was historic.

However, because it has been removed, we really fear there will be no chance to, once again, get the testing language back in because the Soviets have announced that they probably will resume testing in very short order. And once they start again, it is very hard to get it all stopped.

Third, we had the chemical weapons issue; I think that is very important because we know once we start building up the production facilities which this allows, we will never get chemical weapons stopped.

Last, there is Contra aid in here, Mr. Speaker, and that, to me, is a very painful beginning of something I do not think we really should begin as we get ready to adjourn.

No one really knows what is going on down there. We have seen all these incredible allegations in the last few weeks about what the CIA is doing, what General Singlaub is doing, what is really happening, who is doing what.

This is a very, very dangerous precedent, and I think all of us want peace in Central America but we think there is a lot better way to do it. This only spreads war.

So, Mr. Speaker, I will be yielding time later on to others who agree with me and feel that these issues are of such magnitude that it is very important to vote against this conference report because we will not have a chance to take them up later, they will be gone later. That is what is so important. It is not like a usual issue where there is always another year. This was a historic moment in arms control when the window was open. Even the President said it was one of the most historic arms control offers ever made since the first nuclear weapon went off. It now looks like we are about to lose it all.

I urge Members to vote against the conference report.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. The gentlewoman from Colorado [Mrs. SCHROEDER] has consumed 3 minutes.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report.

I might tell the body here that I have letters from both the President and OMB that though they do not like certain parts of this conference report, the President will sign the conference report.

With regard to what the gentlewoman from Colorado just said, I agree with her wholeheartedly, but we have a very difficult situation here tonight.

Mr. Speaker, we went to conference with 126 Senate amendments. Six remain in disagreement. The remaining 120 amendments cover all 13 appropriations bills, and all programs and projects that are funded through annual appropriations.

Those 120 amendments are before the House in a single package. I do not agree with all of the recommendations of the conferees, but my specific disagreements are not sufficient for me to vote against all of the programs that I support.

I know that many of my colleagues do not look at the continuing resolution in terms of the individual programs that are funded, but rather as a symbol of a system that has failed.

I agree that the system has failed.

It is an outrage that we must vote on appropriations of $576 billion with only an hour's debate, and with no opportunity to offer amendments.

It is an outrage that this conference agreement contains numerous legislative provisions, including several complete authorization bills.

It is an outrage that 2 weeks after the beginning of the fiscal year we have not enacted a single appropriations bill.

At the most fundamental level the system has failed, because it denies us the opportunity to debate and vote on many individual legislative issues.

I share the frustration of my colleagues—particularly the more junior Members of this House.

Although I have now served for 28 years, and am privileged to be the ranking minority member of the Committee on Appropriations, I have very vivid memories of my early years as a junior Member of this House. There was frustration, but the legislative process worked, and even the most junior Member could share in a sense of accomplishment and pride in the institution.

Today the legislative process does not work; and this continuing resolution is the most dramatic illustration that I can imagine of terminal paralysis.

But it is only a symbol. These problems are not caused by the Appropriations Committee, or by this continuing resolution.

They are caused by procedural gimmicks such as the Congressional Budget Act and Gramm-Rudman-Hollings that we have used to avoid difficult political choices.

Last December we brought a conference report to this House and it was voted down, in large part as a protest against the system. That protest accomplished absolutely nothing. Voting against this continuing resolution will accomplish absolutely nothing, because you will be aiming at the wrong target.

Appropriation bills and legislative provisions are in this continuing resolution because they could not be enacted within a legislative process that has been virtually paralyzed for the first 10 months of this year.

If you want to protest, change that process.

Repeal the Budget Act. Repeal Gramm-Rudman-Hollings.

Liberate the 100th Congress from budget resolutions, 302 allocations, sequestrations, and all of the political fictions that we have constructed to shelter ourselves from individual political decisions.

Let the legislative committees legislate. Let the appropriation committees appropriate. The 100th Congress would go down in history as the Congress that restored the legislative power to its elected representatives.

If you disagree with the program levels in this continuing resolution, then by all means vote against it.

If you disagree with the system, then join me in cosponsoring a bill in the 100th Congress to repeal the Budget Act and Gramm-Rudman-Hollings.

AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES

For the Department of Agriculture, rural development, and related agencies, the conference agreement contains $44.88 billion in new budget authority. This is an increase of $2.94 billion over levels approved by the House on July 24, 1986. The vast majority of the increase occurs in the CCC reimbursement account, where we have agreed to make $3 billion in addition to the $16.8 already included available upon submission of a budget request. We have also agreed to smaller increases for farm operating loans, CSRS research projects, and conservation operations.

The agreement also totals $1.04 billion over levels contained in the Senate committee-reported version of H.R. 5177, with increases for the ARS, farm ownership loans, the SCS, Public Law 480 programs and the definite level approved for the CCC.

The $44.88 billion agreement comes in $2.86 billion over the administration's requests for 1987. The total increase is spread across programs of the ARS, CSRS, Extension Service, APHIS, rural housing, farm operating loans, rural development loans and grants, REA, conservation, and food and nutrition.

The conference agreement does, however, reflect an $8.42 billion reduction from 1986 levels, a decrease that is almost entirely due to the CCC reimbursement account. For fiscal year 1986, we provided $25 billion for net realized losses of the Corporation. For fiscal year 1987, we have agreed on only a $19.8 billion level.

Amendment No. 1: The conference agreement on amendment 1 includes the agreements reached on all 99 Senate amendments to the regular 1987 appropriations bill and most of the agreements on 16 Senate amendments to the continuing resolution itself.

Of the agreements that have been reached of the regular bill, I am particularly pleased by the $1 million increase over 1986 included for the Human Nutrition Research Center on Aging to enable Federal and university nutrition scientists to expand their critical research on the dietary needs of older Americans.

I am also pleased to report that the agreement includes $95,000 for cranberry and blueberry disease and breeding research, and $60,000 for a new research project to be jointly undertaken by the Cooperative State Research Service and the University of Massachusetts at Amherst on the methods for successful introduction of the Belgian endive crop to the Northeastern United States.

The successful introduction of a new crop to a region is dependent upon research encompassing all stages of production ranging from crop establishment to marketing. Field studies are currently under way in Massachusetts to determine the influence of several cultural and management practices on the yield, sizes, and quality of Belgian endive roots. During the course of this research to date, a number of additional research problems have been identified. These problems must be addressed in order to achieve the goal of successful commercial production of endive in the Northeast region.

CSRS research funds provided in this agreement are to be directed toward the areas of crop establishment, root development, morphology, and quality and pest control.

In Europe, there is currently an arsenal of pesticides which are registered for use in controlling pests on endive. However, problems in the United States, particularly weeds, are expected to be quite different from those encountered in Europe due to differences in pest populations. Therefore, it is necessary to acquire data on efficacy of control of endive pests using both chemical and nonchemical methods. Registration of specific pesticides for both local and national use in endive production will require replicated field trials followed by analysis of pesticide residues in the roots. In addition to addressing the very short-term needs of providing information on the appropriate chemicals and rates needed to control pests, nonchemical approaches will be taken. Research will be conducted to explore the use of culture practices that will reduce the need for control of weeds using herbicides.

The conference agreement also includes a total of $332.2 million for the extension service. We have agreed to provide $60.35 million for the expanded food and nutrition education program, $7.164 million for the pesticide impact assessment program; $500,000 for the new Appropriate Technology Transfer for Rural Areas [ATTRA] Program; and $24,000 for the continuation and expansion of the rural product design, development and marketing assistance project at the Hilltown Community Development Corp. begun with the cooperation of the Farmers Home Administration in August 1986.

For the animal and plant health inspection service, I am pleased to report that the agreement includes $5.878 million for enforcement and other activities authorized under the Animal Welfare Act. We have also added $45,000 to maintain the Minnesota livestock guarding dog project research conducted through the New England Farm Center, and encourage expansion of the center's guarding dog research into Washington, Idaho and Wyoming within the $303.2 million made available to APHIS for fiscal year 1987 and with the cooperation and support of the extension service.

The conference agreement maintains Federal-State Marketing Improvement Program matching grants at the 1986 level of $942,000. This program has been of critical importance to local farmers' markets, small agricultural cooperatives and associations, and small innovative producers in the Commonwealth of Massachusetts over the years. I am very pleased that the 1987 bill includes funds to continue this small, but significant assistance.

For subsidized interest Farmers Home rural housing loans to low-income borrowers, the conference agreement provides $2.03 billion. We have agreed to provide $8 million for mutual and self-help housing, $19.14 million for rural housing preservation grants, and $95.7 million for community facility loans.

For conservation programs of the SCS and ASCS, the conference agreement provides $800.1 million, including $25.02 million for resource conservation development and $177 million for the Agricultural Conservation Pro-

gram. I am particularly pleased that the conferees retained the language enabling ACP participants to exceed the $3,500 payment limitation in any given year so long as the average cost-sharing payment does not exceed that level over the life of the contract.

For food and nutrition assistance, the conference agreement includes $4.23 billion for child nutrition programs, including $775.3 million subject to the receipt of an official budget request; $12.68 billion for the Food Stamp Program; $137.1 million for the Elderly Feeding Program and $50 million for the Temporary Emergency Food Assistance Program (TEFAP). We have also provided $1.663 billion for WIC, an $83 million increase over the 1986 program level and a $46 million increase over the administration's request. With respect to the proposed allocation of 1987 funds, the conferees have included language prohibiting the issuance of any new formula regulations prior to May 1, 1987 and directing the Department to work with State WIC directors as well as the Congress in developing a formula more equitable than the one proposed last month.

For the Food and Drug Administration, the agreement includes $411.8 million, including $14.4 million for the agency's AIDS-connected work and $5.25 million for orphan product-related activities.

The conferees have resolved all but one of the differences in the general provisions and amendments to the continuing resolution. Many of these provisions are controversial and are considered by the administration to be possible veto bait.

We have included in section 632 language proposed by the Senate prohibiting the use of private debt collection agencies. Section 633 contains an amended Senate disaster payment provision affecting producers of program and nonprogram crops. We have included a new section, section 643, to expand the list of crops eligible for subsidies through the Conservation Reserve Program to include alfalfa, multiyear grasses and other legumes.

We have also included language on surplus commodity donations, special provisions for compensation to producers of wheat and a handful of special exemptions for producers of ELS cotton, Valencia peanuts and rice.

The one provision remaining in true disagreement is the $250,000 cap on farm payments, language unanimously approved by the House late last month. It is my hope that the House will further insist on its position and start the ball rolling in true programmatic reform before the 100th Congress convenes next year.

COMMERCE, JUSTICE, STATE, JUDICIARY AND RELATED AGENCIES

The conference agreement provides $12,329,785,000 for the Departments of Commerce, Justice, and State, the Judiciary and related agencies. This is $18,165,000 over House-passed amounts and $373,931,000 over the Senate amounts.

Of the total provided, $2.1 billion is for the Department of Commerce, about half of which is for the grants and programs administerd by the National Oceanic and Atmospheric Administration. Economic Development Administration programs account for $180.4 million of the Commerce total, $197.5 million is for the International Trade Administration, $11.5 million is for the U.S. Travel and Tourism Administration, $122 million is for the National Bureau of Standards, and $20.5 million is for public telecommunications facilities.

Funding of items of particular interest to a number of Members includes sea grants, coastal zone management State grants, maintaining existing weather services, the Susquehanna River flood warning system, the privatization of Landsat, the next generation radar for windshear warnings, trade adjustment assistance for firms, the Centers for Fire Research and Building Technlogy, and public and private funding for a cold neutron research facility.

For the various law enforcement activities of the Department of Justice $4.1 billion is provided, including $1.3 billion for the FBI, $420 million for the Drug Enforcement Administration, $593 million for the Immigration and Naturalization Service, $730 million for the Federal Prison System, $191 million for Justice Assistance programs, and $863 million for the legal activities of the Department.

Justice Department programs of some interest to Members which are funded in the resolution include juvenile justice, the regional information sharing system [RISS], missing children, and State and local assistance.

In addition to these funds, the continuing resolution carries $464 million in title II for Department of Justice drug control programs.

For the Department of State the resolution includes $2.6 billion, of which $354 million is for the Diplomatic Security Program, $1.4 billion is for salaries and expenses of the Department, and $385 million is for contributions to international organizations, $130 million of which is deferred for obligation until fiscal year 1988.

The conference agreement provides $1.2 billion for the judiciary.

The 19 related agencies funded in this section of the resolution receive a total of $2.4 billion. The largest amounts go to the U.S. Information Agency, $807 million, the Small Business Administration, $482 million, the Legal Services Corporation, $306 million, the Equal Employment Opportunity Commission, $165 million, the Board for International Broadcasting (Radio Free Europe/Radio Liberty), $140 million, and the Securities and Exchange Commission, $111 million.

The conferees have approved $7.5 million for the Commission on Civil Rights along with restrictions on the Commission's continued operation. The House had provided funds only for the closing of the Commission.

The Legal Services Corporation would operate in essentially the same manner as in the current year at the presequestration level of $305.5 million.

USIA'S educational and cultural exchange programs would be funded at $145 million, and funds are provided for the construction of facilities for Radio in the American Sector [RIAS] in West Berlin.

The resolution provides $15 million for the National Endowment for Democracy, and report language reserves 25 percent of the program funds for discretionary grants not related to the traditional CORE grantees.

Antiabortion language is included covering the activities of both the Department of Justice, including the Bureau of Prisons, and the litigation activities of the Legal Services Corporation.

In addition to CORE support for the Commission on the Bicentennial of the U.S. Constitution in the amount of $13.2 million, the conference agreement provides $20 million for a new James Madison Memorial Fellowship Program and $3.2 million to endow four constitutional law chairs at identified universities for the purpose of encouraging the study of the Constitution.

DISTRICT OF COLUMBIA

Section 101(d) of House Joint Resolution 738, amendment 4, contains the rate of operations and terms and conditions for H.R. 5175, the District of Columbia Appropriations Act, 1987. In amendment 4, the Senate replaced the House-passed version of H.R. 5175 with the District bill that passed the Senate on September 16, 1986.

The conference agreement for this bill provides $560,380,000 in Federal funds and approves approximately $3 billion in District of Columbia funds. The Federal funds contained in this conference report appropriates $30.4 million more than the fiscal year 1986 adjusted amount and the House-passed bill. However, the $560.4 million level is the same as the amount requested in the President's budget.

The administration has no particular concern with the Federal funds provided by this ageement in fiscal year 1987. However, OMB does object to a provision added by the Senate authorizing additional Federal funds for the construction of a new jail. In fiscal year 1986, the Congress appropriated $30 million for a new jail. This agreement provides an advance appropria-

tion of $20 million for fiscal year 1988 to augment the previously appropriated funds. The District must use these funds to construct a 700-bed, medium-security facility.

Although not on the "A" list of objectionable items, the $20 million advance appropriation was included on OMB's "B" list.

The conferees also agreed to carry the standard abortion prohibition for Federal funds, and a general provision was included to specify the placing of signs which designate "Andrei Sakharov Plaza." This designation, the street address of the Soviet Embassy in Washington, was made last year in the District of Columbia Appropriations Act.

ENERGY AND WATER DEVELOPMENT

For programs under the jurisdiction of the Subcommittee on Energy and Water Development, the conferees have provided slightly over $15 billion.

For the Corps of Engineers, the conferees have provided $3.1 billion, for projects in every State of the Union.

For the Bureau of Reclamation, the conference agreement provides $867.6 million.

For the Department of Energy, in which we had a number of very controversial issues, we have provided $10.4 billion. Of that amount, nearly $7.5 billion is for atomic energy defense activities, including $341 million for the strategic defense initiative [SDI], or such lesser amount as may be subsequently authorized.

For the nuclear waste disposal fund, the conferees have recommended $499 million, of which $420 million is available immediately and $79 million is available subject to prior approval of the Subcommittees on Energy and Water Development Appropriations of the House and the Senate. No funds are provided for drilling of any exploratory shaft at any site in fiscal year 1987, and no funds are expected to be spent for a second repository. It is clear that the task for the coming year will be to restore a consensus within the Congress and the administration regarding future progress on this program.

With regard to the uranium enrichment criteria, which were of concern to a number of Members, I believe that the chairman has provided an outline of those provisions, and that the statement of managers adequately sets out the compromise reached by the conferees. I would simply say that the compromise language would not impair existing enrichment contracts, and would not interfere with pending litigation involving this issue.

Under the general provisions for the Department of Energy there is language included that I authored, providing for an increase in the "Buy American" differential to 30 percent, for purchases of extra-high voltage [EHV] electrical equipment by Federal power agencies. This language would apply to purchases from countries that do not offer fair trading opportunities to U.S. manufacturers of such equipment, and it is my hope that this provision will encourage our trading partners to bring their trading practices into line with ours, and agree to include this type of equipment in the GATT procurement code. In making determinations regarding exemptions from this language, it would be my intention, as the author of this language, that consideration would be given to a country's provision of fair trading opportunities to manufacturers of all types of EHV electrical equipment, taken as a whole, rather than by a narrow review of a specific product line—such as capacitors or resistors, for example. As indicated in the House report language on this provision, it is expected that a country will receive a generic exemption from the application of this increased differential, upon meeting the specified criteria, rather than being required to be reviewed extensively for each procurement. This would, by necessity, require a review of the accessibility of the relevant foreign market to the full range of EHV electrical equipment manufactured in the United States.

Within the conference agreement, language has been included prohibiting the expenditure of any Federal funds for the planning, implementation, construction, or granting of any permit for the Northfield Mountain water supply project or the Millers and Tully Rivers water supply project in Massachusetts. These projects, which would involve diversions from the Connecticut River, are strongly opposed as environmentally unsound. This language would have the effect of killing these projects once and for all.

Finally, I would note that the conferees have agreed to language contained in the House-passed report, earmarking $800,000 for the Renewable Energy Program at the University of Massachusetts at Amherst. These funds, which will support a project involving wind energy research and engineering, will help make an outstanding institution even stronger.

HUD-INDEPENDENT AGENCIES

Amendment No. 7: The conference agreement for the Department of Housing and Urban Development and the Independent Agencies incorporates the conference report (H. Rept. 99-977) filed in the House on October 7, 1986 into amendment No. 7, with an additional provision of $2.434 billion for a NASA replacement orbiter previously included in the Senate amendments to the defense section.

Our recommendations for HUD and the Independent Agencies total $56.012 billion, in new budget authority. This is an increase of $2 billion over the level contained in H.R. 5313 as passed the House on September 24, 1986. We have agreed to increases of $50 million for public housing operating subsidies, $15 million for new homeless housing programs, $50 million for EPA abatement control and compliance activities, $550 million for Superfund, $2.78 billion for NASA, $72 million for the NSF, and increases in the limitations on guaranteed loans of $20 billion for the FHA and $17.5 billion for GNMA.

Among the reductions from House-passed levels are: $289.3 million from assisted housing, $50 million from the UDAG Program, $55 million from FEMA disaster relief, and $76.9 million from VA medical care.

The conference agreement represents a $2.33 billion increase over the Senate-passed version of H.R. 5313, and a $9.52 billion increase over the administration's revised requests. The majority of the increase over the President's budget comes in the area of housing programs, where we have restored $5.03 billion in proposed cuts; NASA accounts which we have increased by $2.5 billion; and Veteran's Administration, where we have increased funding by $403 million.

I would like to point out to my colleagues, that the fiscal year 1987 levels recommended for HUD and the Independent Agencies represent a $2.14 billion reduction from 1986-enacted levels. This decrease is in large part due to the fact that we were unable to include funds for the unauthorized revenue sharing program.

Mr. Speaker, most of the fiscal year 1987 agreements reached on accounts in this section are good ones. For the most part, we have maintained our commitments to the priorities that have survived the Gramm-Rudman-Hollings budget process.

We have provided for 12,000 units of section 202 housing for the elderly and handicapped. We have maintained funding for community development block grants at $3 billion and included $99 million for housing development grants. We have made over $1.4 billion available to the Superfund and $2.4 billion for EPA construction grants. We have agreed to $9.4 billion for veterans' medical care, $1.6 billion for scientific research and education, and over $10.4 billion for strengthened aeronautics and space programs at NASA.

I am also pleased to report that we have provided $576 million for FEMA, a $106.8 million increase over the request, to maintain the Emergency Food and Shelter Program at $70 million, and to restore proposed reductions in the National Fire Academy, and the U.S. Fire Administration, including adequate funds for the continuation of the Community-Based Anti-Arson Grant Program.

I am, however, disappointed, Mr. Speaker, that the conferees were

unable to address the issue of general revenue sharing at all, and that we were forced to take a $91 million reduction in the Urban Development Action Grant Program, one of the most worthwhile housing and community development assistance programs on the books. I will be back next year to fight for this program again, Mr. Speaker, as I have for the past 7 fiscal years over the administration's objections. Redeveloping communities in western Massachusetts and throughout the country depend upon these small but vital Federal investments to make housing and commercial revitalization projects possible.

Amendment No. 46: The agreement deletes language proposed by the House earmarking funds for the reopening and reoperation of a HUD field office. Language prohibiting HUD field office closures in 1987, and requiring the reopening of any field office closed in the past 12 months, has been included in Amendment No. 7.

Amendment No. 47: The agreement restores House language extending the cigarette fire safety study by 6 months.

Amendment No. 91: The agreement deletes language proposed by the Senate rescinding and appropriating funds for the hazardous response trust fund. Similar language has been included in the conference agreement on Amendment No. 7.

Amendment No. 104: Deletes Senate language extending the period for the commencement of construction under the HoDAG Program. This language has been included in the agreement on Amendment No. 7.

Amendment No. 115: Deletes Senate language mandating a specific agreement between EPA and the State of Arkansas.

INTERIOR AND RELATED AGENCIES

Section 101(H) of House Joint Resolution 738—amendment 8—contains the rate of operations and terms and conditions for H.R. 5234, the Department of the Interior and Related Agencies Appropriations Act, 1987. In Amendment 8, the Senate replaced the House-passed version of H.R. 5234 with the Interior appropriations bill that passed the Senate on September 16, 1986.

The conference agreement for this bill provides $8,333,076,000 in new budget authority for fiscal year 1987. This amount is $181.3 million over the House passed bill and $477.4 million more than H.R. 5234 as passed the Senate. Compared to the President's budget, this agreement exceeds the request by $1.7 billion.

Let me point out to my colleagues that the agreement is higher than the House-passed bill because the managers decided to include anticipated supplemental fire costs for three agencies; $233 million over the House-passed bill is included for fire costs, $125 million for the Forest Service, $25 million for Bureau of Indian Affairs, and $83 million for the Bureau of Land Management.

The administration's objections to the Interior bill were not confined to the funding levels for the various agencies and programs funded in this bill.

The so-called A list prepared by OMB included three items within the jurisdiction of the Interior Subcommittee. First, the House prohibition on the President's policy deferral authority was deleted from the bill. This language was similar to a provision that was proposed but not included in the fiscal year 1986 Supplemental Appropriations Act. Second, the administration objected to amendment 86 which requires structures on the Outer Continental Shelf to contain at least 50 percent U.S. materials. OMB has made its intentions clear regarding this provision. In a letter to the conferees, OMB Director Miller warned that "the buy American requirement for oil drilling rigs is one of those items in the continuing resolution which, if not deleted, would cause the President's senior advisers to recommend a veto". No agreement between the House and Senate managers could be reached in conference, and therefore this amendment (86) is reported to the House in true disagreement.

Third, the administration objected to the House language mandating a minimum fill rate of 75,000 barrels per day for the strategic petroleum reserve. The language was not included in the conference agreement, and the $220 million provided in the House bill for oil acquisition was dropped in conference. Approximately $550 million available from unobligated balances for oil purchases would allow for filling the reserve in fiscal year 1987 at a rate up to 90,000 barrels per day.

The administration cited the two provisions in the House bill as B list items. The compromise moratorium language on OCS leasing offshore California was retained intact by this conference agreement. The administration opposed this provision. The managers did agree to drop a House provision which would have prohibited any studies on the sale of the Naval Petroleum Reserve. The conference agreement limits the amount to be spent on such studies to $500,000 and requires the administration to issue a report to the Congress by June 30, 1987.

Over the course of last week, meeting every day for countless hours, the conferees hammered out compromises on many other issues in disagreement.

The conference agreement includes an innovative plan to raise additional funds for the National Park Service by increasing fees on an incremental schedule. The maximum fee is set at $5.00, and the charge is gradually reduced depending on the particular park unit. Urban parks with multipoint access are exempt from the fee program. Overall, $50 to $60 million in additional resources will be pumped back into the National Park System, particularly to the units which collect the most in fees. This change is long overdue and should improve the quality of the national park experience.

The conference agreement also includes $10 million for an energy demonstration and research facility at Tufts University in Massachusetts. Using these Federal funds and private resources, an Energy Conservation Research Center will be established at Tufts. This center will be a model facility where innovative energy conservation technologies will be studied and tested for their effectiveness for use in commercial building construction. Building on a proven record of academic excellence and expertise in the area of energy conservation, the Tufts Center will use already existing extensive utility and industry contacts to conduct a research program with widespread applications.

In an effort to expedite the awarding of this grant, the managers modified language proposed by the House and struck by the Senate in amendment numbered 127. The modifications were made to bring this project in line with the construction authorization contained in section 202 of the Conservation Service Reform Act of 1986 (Public Law 99-412). The language defining the grant was expanded to include "an energy demonstration and research facility" which clearly is covered by the authorization in section 202. In addition, the reference to "specific" authorization was deleted from the House language. As a conferee for this provision and as manager of this resolution, it was my understanding that the section 202 of the Conservation Service Reform Act of 1986 satisfies the authorization conditions contained in the revised version of this language. The conference agreement includes a provision which releases the $10 million grant "when authorized by an act of Congress". The authorization contained in Public Law 99-412 was discussed by the conferees, and the Department of Energy should consider the authorization condition met by the provisions of the Conservation Service Reform Act of 1986.

Another modification to the Tufts language was made by the conferees. The requirement for a special peer review of this project was dropped and replaced by a "technical review panel." This review should be limited to the university construction grant award implementation program, as administered by the Department's Chicago Operations Office.

At this point in the RECORD, I will include correspondence between myself and Congressman ED MARKEY, the chairman of the subcommittee with jurisdiction over the authorizing legislation for this project.

The conferees for the Interior section also disposed of several Senate amendments added to the body of this continuing resolution.

On amendment 49, the conference agreement included language added by the House which required that part A of title IV of the Indian Education Act be distributed under the same eligibility requirements as applied in fiscal year 1986.

On amendment 50, the conferees included $500,000, instead of $1 million as proposed by the House, for the acquisition and curation of the Duke Ellington collection. The funds were provided to the Smithsonian Institution.

On amendment 63, the managers accepted the Senate provision which authorizes the acquisition and development of a mainland tour boat facility for Fort Sumter National Monument in South Carolina.

On amendment 90, the managers agreed to accept language proposed by the Senate concerning the use of Bureau of Indian Affairs funds for Institute of American Indians Act.

On amendment 112, the managers accepted a provision proposed by the Senate which would permit the extension of any geothermal lease in effect as of July 27, 1984 to December 31, 1988 and provides protection for thermal features within certain units of the National Park System.

On amendment 116, the managers agreed to three of four separate pieces of authorizing legislation. The provision reinstating desert land entry rights for certain claimants in Idaho was not included in this resolution.

On amendment 117, the managers accepted language proposed by the Senate concerning the Office of Surface Mining applicant violator system.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, October 14, 1986.

Hon. EDWARD J. MARKEY,
Chairman, Subcommittee on Energy Conservation and Power Committee on Energy and Commerce, Washington, DC

DEAR ED: I am writing to you with regard to the energy demonstration research facility for which funding has been included in the Interior Appropriations section of the Continuing Resolution (H.J. Res. 738). It is my understanding that this project was authorized in the Conservation Service Reform Act of 1986.

I would very much appreciate it is you could confirm my understanding that the above mentioned energy demonstration research facility has been authorized by law.

Thank you in advance for your assistance in this matter.

With best wishes, I am
Cordially yours,

SILVIO O. CONTE,
Member of Congress.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, October 15, 1986.

Hon. SILVIO O. CONTE,
U.S. House of Representatives, Washington, DC.

DEAR SIL: Thank you for your letter of October 15, 1986 requesting confirmation of the authorization of the energy demonstration research facility that has been included in the Interior section of the Continuing Resolution. I share your interest.

The project you mention in your letter was authorized in the Conservation Service Reform Act, Public Law No. 99-412, enacted earlier this year.

Should you have any further questions regarding this matter, please let me know.

Sincerely,

EDWARD J. MARKEY,
Member of Congress.

LABOR, HHS, AND EDUCATION—FISCAL YEAR 1987

For the Departments of Labor, Health and Human Services, and Education, and Related Agencies, this continuing resolution provides funding at the level of the conference report on H.R. 5233, the fiscal year 1987 Labor/HHS/Education bill, filed on October 2, 1986.

Once again—for the fourth year in a row—we crafted a Labor/HHS/Education bill that meets both our commitment to those Americans who need help from their Government and our obligations to the budget crisis that faces this Government. If we had been able to get this bill to the President, I am convinced that he would have signed it, just as he has done with every Labor/HHS/Education bill we've sent him the last 3 years.

This conference report provides $113.1 billion in new budget authority for fiscal year 1987, including nearly $78 billion in mandatory spending and $35.2 billion in discretionary spending. That total is $7 billion more than last year and $8.4 billion over what the President requested. For discretionary spending, the only part of the bill over which the appropriations process has any control, we added just under $3.4 billion to last year's funding for these programs which reach into virtually every school, hospital, nursing home, unemployment office, college, and biomedical research laboratory in the Nation.

And even with those added amounts, let me tell my colleagues that the Labor, HHS, and Education portion of the continuing resolution adds nothing to the budget deficit because it's within our fiscal year 1987 budget ceiling!

The total amount is $684 million under the budget authority amount allocated to the subcommittee by the budget process, and $682 million under the House outlay ceiling imposed by that process. In terms of discretionary spending, the measure by which an appropriations bill is judged against the budget allocation, the total is $333 million under in budget authority, and $3 million below the House outlay ceiling.

This measure contains $10.2 billion more than we had when H.R. 5233 was adopted by the House on July 31 by a vote of 328 to 86. That increase reflects funding for programs that were unauthorized when we brought the bill to the floor in July. But, in case anyone starts to get the impression that we added too much to the House bill in conference, let me remind Members that we held aside more than that amount when this bill was considered 2½ months ago.

In July, when the House considered H.R. 5233, amendments were offered to apply across-the-board cuts to every program in the bill. Each of those amendments was based on the belief that we were spending too much on these programs and that we would not meet our budget ceiling after we added in the unauthorized programs. I fought those amendments and told their proponents that we would work with our counterparts in conference to keep the bill under its allocation ceiling, and that we would do it without resorting to indiscriminate and unfair across-the-board cuts. I kept my word, and I repeat—the Labor, HHS, Education portion of this resolution is under the House 302(b) discretionary budget authority and outlay ceilings.

In most areas, the conference report restores programs to the fiscal year 1986 level, which was essentially a freeze at fiscal year 1985 levels. It also contains major funding increases for several programs, including AIDS research, summer youth employment programs, biomedical research at the National Institutes of Health, compensatory education, education for the handicapped, and student financial aid for college students.

For AIDS, we provide an 84-percent funding increase—from $224 million last year to $396 million for fiscal year 1987—for research and prevention activities on this dreadful disease at the Center for Disease Control, the NIH, the Alcohol, Drug Abuse, and Mental Health Administration, and other agencies of the Department of Health and Human Services.

Summer youth employment programs will receive an increase of $114 million, to a total for fiscal year 1987 of $750 million. That represents a clear recognition of the Federal responsibility in dealing with youth unemployment, particularly during the summer months.

An additional $796.5 million is provided over the fiscal year 1986 level for other biomedical research at NIH, bringing fiscal year 1987 total to $6.18 billion for the institutes of cancer; child health and human development;

allergy and infectious diseases; heart, lung and blood; general medical sciences, neurological and communicative disorders and stroke; diabetes, digestive, and kidney diseases; and all the others. In this centennial year of NIH, we provide an increase of $1.1 billion over the amount requested by the President.

Compensatory education for disadvantaged children, chapter I, will receive an increase of $414 million, to an historic total of $3.944 billion. The conferees recognized that this is the major Federal program for ensuring equal educational opportunity to low-income, disadvantaged children, and chose to provide funding that is $256 million more than the administration requested.

Head Start, our major program to assist preschool children from low income families through a comprehensive program of education, health, nutrition, and related social services, also will receive a major increase. Fiscal year 1987 funding will be at $1.13 billion, more than $90 million more than was provided last year.

For education of the handicapped, the agreement provides a $392 million increase over last year's level, to a total of $1.741 billion. Rehabilitation services, the other major program of assistance to handicapped persons, will be funded at $1.484 billion in fiscal year 1987, an increase of $175 million over last year.

Student financial assistance programs will receive an increase of $374 million in fiscal year 1987. Most of this increase is in the Pell Grant Program and even with the ever-increasing number of program participants, this increase will maintain the award at a steady level. Other student aid programs are also restored to their pre-Gramm-Rudman-Hollings fiscal year 1986 levels. With the recent reauthorization of the Higher Education Act, I hope to take a close look at these programs next year to see whether we can increase actual benefits to students faced with rising education costs.

It is my hope that we also take a look early next year at some of the programs that we could not restore in conference with the Senate. Included among those programs are the Work Incentives Program and Low Income Home Energy Assistance—two areas where I strongly disagree with the conference.

For the second straight year, WIN loses. Last year, it was cut $46 million; this year it's another $110 million cut from that already reduced fiscal year 1986 amount. This is the one program that provides training and employment opportunities to persons on welfare. It works in my home State and in many other States. To keep the program running as close to last year as possible the conferees also directed the Department to spend the full $110 million over the first three quarters of the fiscal year. If the downward trend in funding cannot be turned around, the conferees also express their hope that a replacement AFDC employment program will be put in place in the first session of the 100th Congress.

Another major decrease which I strongly opposed came in the Low Income Home Energy Assistance Program. LIHEAP is funded at $1.825 billion in the conference agreement, $184 million less than last year. I think that's a big mistake, but given the decrease in home energy prices and the influx of funds to the States from the Exxon overcharge case, I could not influence my fellow conferees otherwise. The conferees did express their intention to closely monitor this program in fiscal year 1987, and to ensure that the amount provided does not fall short of the amount actually needed.

The conferees restored funding for several programs proposed for elimination in the President's budget. Among those, the resolution restores $205.7 million for most of the health professions programs, including $53.3 million for nurse training programs; $7.4 million for organ transplants; $4 million for the vaccine stockpile, $15 million for mental health clinical training, $10.5 million for mental health protection and advocacy, $130 million for impact aid "B" payments, $30 million for emergency immigrant education, $31.6 million for consumer and homemaker education, $60 million in new loan commitments for college housing loans, and others.

The conference report also provides increases for several programs proposed for major reductions by the administration, including $750 million for summer youth employment, $656.3 million for the Job Corps (together with a prohibition on center closings until January 1, 1988), $290 million for HEAL loans, $1.1 billion for medicare contractors, $1.7 billion for education of the handicapped, and nearly $875 million for vocational education.

Finally, I would like to call attention to several provisions of the report.

The first directs the Secretary of HHS to operate the family planning program in the same manner and under the same allocation formula as he did for fiscal year 1986. This language arose out of concerns by the conferees about reports that HHS might change the allocation formula and guidelines for the program in fiscal year 1987. Aside from arguments on the merits of the possible changes, conferees were concerned about the fact that HHS first notified members of the House and Senate committees late last month about the possibility of the changes, despite the fact that departmental witnesses had told the House committee in March that no changes were contemplated. The conferees do not intend to tie the Secretary's hands in administering the program, but believe the Secretary should make a stronger effort to comply with the statutory requirement that he report to Congress on any such changes within the first 7 months, not the last 7 days, of the fiscal year.

Another area where the House and Senate reached agreement was in the formula for payments to local education agencies under the so-called Impact Aid Program. The original House-passed bill included a new sliding scale formula proposed in the President's budget. Instead of having only two categories of LEA's, "Super A's," and "non-Super A's," this new structure would have created six categories, each receiving an appropriate percentage of entitlement based on the number of "A" children enrolled. The Senate-passed bill essentially maintained last year's formula.

Mr. Chairman, in conference we struck a compromise between the two payment structures. Under the agreement in this conference report, payments for "A" children will be made at different levels for three categories of LEA's. For LEA's with 20 to 100 percent "A" children, most payments will be made at 100 percent of entitlement. For LEA's within 15 to 20 percent "A" children, most payments will be made at 75 percent of entitlement. For LEA's with less than 15 percent "A" children, most payments will be ratably reduced from 100 percent of entitlement. For all LEA's, payments for children residing in low-rent housing will be made at lower levels. For LEA's with 20 to 100 percent "A's", these payments will be at 15 percent of entitlement; for LEA's with 15 to 20 percent "A's", these payments will be at 11.25 percent of entitlement; for LEA's with less than 15 percent "A's", these payments will be ratably reduced from 15 percent of entitlement.

Increases in 1987 local contribution rates for LEA's with 15 to 100 percent "A's" will be limited to 5 percent over their 1986 local contribution rates. This limit will not apply to the additional funds provided to LEA's eligible under sections 3(d)(2)(B) or 3(D)(d)(3)(B)(ii).

Finally, the conferees urged the Secretary of Education to continue to use loan repayments to the College Housing Loan Fund to make new loan commitments. This loan portfolio is slated for sale, with the proceeds from such sale to be used to retire the outstanding debt to the Treasury. But conferees believe that new requirements of the Academic Facilities Program will require new outlays of capital in future years from the College Housing Loan Fund, and believe such new loan capital should come from repayments on that portion of the portfolio not yet sold.

Mr. Chairman, the Labor, Health and Human Services, Education, and Related Agencies portion of House Joint Resolution 738 is something we should all be proud of. I only wish we had not been precluded by all the delays in this year's budget process from letting this bill stand on its own.

TRANSPORTATION AND RELATED AGENCIES

For programs under the jurisdiction of the Subcommittee on Transportation, the conferees have recommended a total of $10.2 billion in new budget authority.

For the Essential Air Service Program, which has been of such interest to so many Members, the conferees have recommended $30 million. This amount will be more than sufficient to fund all anticipated needs for payments to air carriers under this program.

For the operations of the Federal Aviation Administration, including air traffic control, we have provided $2.78 billion. In addition, we have dropped the language involving the rehiring of striking air traffic controllers, the so-called "PATCO" language, which resulted in a veto of the interim continuing resolution last Wednesday. In its place, we have provided a statutory requirement that the FAA satisfy certain staffing criteria by the end of fiscal year 1987, including a total air traffic controller work force level of not less than 15,000; a requirement that 70 percent of those eligibile to be full performance level controllers have achieved FPL status; and a requirement that at least 60 percent of those at each en route air traffic control center and each "level 3" or above terminal shall have achieved full performance level status. The administration does not object to this provision.

For FAA facilities and equipment, we have included $804.6 million, to provide for the continuation of the airspace modernization plan. And for grants in aid to airports, we have recommended a limitation on obligations of $1 billion.

For the Coast Guard, $1.755 billion is included in this section for operating expenses, and another $75 million may be made available through the Department of Defense.

For the Coast Guard's acquisition, construction, and improvements account, the conferees have included $209 million. In addition, $200 million in coastal defense augmentation funds will be made available through the defense section of this resolution.

For Reserve training, we have provided $64.4 million, which will further improve the Coast Guard's ability to fulfull its defense-related missions.

And for boating safety, we have provided the fully authorized level of $30 million.

Programs within the Federal Railroad Administration have been funded at a level of $683.3 million. Of this amount, $602 million has been provided for Amtrak, an amount which will permit the continued operation of a national passenger rail system, but only a modest capital program. I would register my concern for the dangerous impact of continued deferred maintenance for Amtrak. At some point, we are going to need to look at increasing Amtrak's capital expenditures.

For the Northeast Corridor Improvement project, we have provided $16.9 million, of which $5.5 million is for phase I of the Boston North Station project. This will be the final installment of phase I funding for this project. Any additional funding requirements for this phase still have to be provided from non-FRA sources.

For local rail service assistance, we have provided continued support for essential local rail projects. This includes $1 million for the rehabilitation of lines in western Massachusetts, between North Adams and Pittsfield and between Pittsfield and Canaan, CT.

For UMTA, we have provided $3.45 billion, including $2 billion in formula grants and $1 billion for the Section 3 Discretionary Program. Although we have provided a 2.5-percent reduction in operating assistance, that cut will only apply to systems serving a population of 1 million or more.

For Washington Metro, we have provided $201.1 million, and amount which will permit work to continue on existing projects and the recently initiated Green Line, pursuant to the recently negotiated regional funding agreement.

Language has been included in the conference agreement that would permanently prohibit any planning or implementation of any change in the current Federal status of the Transportation Systems Center in Cambridge, MA.

And finally, we have one item in disagreement, involving the transfer of National and Dulles Airports through a long-term lease arrangement. It is my hope that we will, with some modification, ultimately agree to the Senate provision on that item.

TREASURY-POSTAL SERVICE-GENERAL GOVERNMENT

Section 101(m) of H.J. Res. 738 (Senate amendment 12) contains the rate of operations and terms and conditions for H.R. 5294, the Treasury, Postal Service, and General Government Appropriations Act, 1987. The House version of the continuing resolution contained the text of H.R. 5294, as passed the House on August 6, 1986. As amended by the Senate, section 101(m) contained H.R. 5294, as reported to the Senate on August 14, 1986, except for section 621. This provision contains the so-called beer bill which provides certain antitrust exemptions for the wholesale distributors this provision was removed from the concurrent resolution after extensive debate on the Senate floor.

The conference agreement for the Treasury bill provides $13,637,434,800 in new budget authority for fiscal year 1987. This amount is $22.7 million less than the House-passed level and $344.2 million more than the amoung recommended by the Senate-reported bill. Compared to the President's budget, this agreement exceeds the request by $772.8 million. The total amount for budget authority exceeds the fiscal year 1986 post-Gramm/Rudman level by $596.1 million.

Although the total amount is more than the President's budget request, this agreement is within the target levels for both outlays and budget authority. As calculated by CBO, the outlay level in this agreement is $6 million below the target for this bill, and for budget authority, the total amount is about $4 million below the target level of $13.640 billion.

For the Treasury bill, most increases over the President's budget can be attributed to three agencies. For the U.S. Customs Service, this agreement provides $786 million for salaries and expenses. This amount is $69 million over the fiscal year 1986 adjusted level, $93 million over the President's request, and $10 million less than the House-passed level; $77.8 million was provided for the Customs Air Interdiction Program. This amount is $10.6 million more than the House-passed level and $23.1 million more than the President's request. These funds are essential to our effort to wage a multifront war on drugs. The Customs Service is the front line agency for stopping the illegal flow of narcotics into this country, and we must provide the resources required to do the job.

The operation of the Internal Revenue Service will cost at least $4.3 billion in fiscal year 1987. The conference agreement provides the House-passed funding levels for the IRS which is $150 million more than the President's request. Considering the processing disaster of last year, the appropriation of these funds is a prudent course for us to take.

Finally, the agreement provides $650 million for the revenue forgone postal subsidy. The conferees agreed to postpone the $40 million payment for unfunded liabilities of the former Post Office Department. This deferral of payment does not affect the postal rates of nonprofit mailers or rural publications. The $650 million provided in this agreement is sufficient to maintain the current rates for all users of the revenue forgone subsidy.

The conference agreement also provides additional funds for two very important law enforcement agencies. The conferees agreed to the Senate level for the Bureau of Alcohol, Tobacco and Firearms: $193.5 million.

This amount is $15 million over the President's request and $3 million more than the House-passed level. The agreement also includes the Senate-recommended funding level for the U.S. Secret Service: $318 million. This amount is $10.8 million more than the President's budget and $1.2 million more than the House-passed level.

Together with the increases for the two enforcement agencies and the training academy, the add ons for Customs Service, the IRS and the postal subsidy account for practically the entire increase above the President's budget, some $950 million. In fact, the conferees made significant cuts to reduce the overall total even further, to a level $773 million above the budget request.

The administration's objections to the treasury bill were not confined to the money issues.

The so-called "A" list included one item within the jurisdiction of the Treasury-Postal Service Subcommittee: The funding restriction on OMB's Office of Information and Regulatory Affairs [OIRA]. The House-passed bill cut $5.4 million from the OMB account and included a restriction on the use of funds for OIRA-related activities. The Senate bill had no such provisions. The conference agreement satisfactorily answers the concerns expressed by the administration. The language was dropped, and the Senate funding level of $37 million was adopted. In addition, a new title VIII was added to the bill. This title is essentially the text of the "Paperwork Reduction Reauthorization Act of 1986" which authorizes $5.5 million for OIRA through fiscal year 1989. The reauthorization act also includes several pages of unrelated legislation.

The "B" list includes objections to several provisions which were included in both House and Senate versions of H.R. 5294, and as such they were not a matter of conference. The conferees did agree to drop three provisions listed as objectional: The circular A-21 language, the funding prohibition on the Assistant Secretary of the Treasury pending revision of REA repayment rules, and the so-called "beer" bill. The conference agreement did not drop the provision establishing an employment floor for the Customs Service.

The Treasury-Postal Service section of this resolution contains several language provisions worked out by the conferees.

Section 519 limits the amount of silver deposited in the National Defense Stockpile to 128 million troy ounces. The total amount in the stockpile includes any silver on loan to the Department of Defense. As of September 30, 1986, there should be no more than 128 million troy ounces of silver in the National Defense Stockpile.

To implement the directives in this provision, the Administrator of General Services should closely monitor the disposal of silver as provided by section 203 of the Liberty Coin Act. If it is estimated that the coinage program will not bring the level of silver in the stockpile to the specified amount, then the Administrator of General services should plan a sale of silver on the open market so that the the statutory stockpile ceiling for silver will not be exceeded. The sale of silver should begin well before September 30, 1987 to insure minimal market disruption.

Section 520 mandates the use of all funds previously authorized and appropriated before January 1, 1985 from the National defense Stockpile Transaction Fund to evaluate, test, relocate, upgrade or purchase stockpile materials to meet National Defense Stockpile goals and specifications in effect on October 1, 1984. These funds must be expended no later than October 1, 1988, and as indicated by the language in this provision, these funds do not include grants for construction provided in fiscal year 1986 and in this continuing resolution. Both the University of Massachusetts and the University of Nevada received construction grants through the transaction fund in the amounts of $10 million for each fiscal year 1986 and $5 million each for fiscal year 1987. These funds are dedicated for this purpose and shall not be used for any other program.

In addition to the regular appropriations bill, the continuing resolution contains several amendments within the jurisdiction of the Treasury-Postal Service-General Government Subcommittee.

On amendments 58 and 59, the conferees agreed to accept language which requires the GSA to negotiate a 30-year lease with the city of Tacoma, WA for space in the Union Station for the U.S. courts.

On amendment 60, the conferees could not agree on a provision further regulating the importation of alcoholic beverages. The amendment will be reported to the House in true disagreement.

On amendment 62, the managers accepted Senate language naming a U.S. courthouse in Aiken, SC.

On amendment 75, the conferees deleted language regarding INS and Customs Service activities at Bangor International Airport in Maine. As similar provision is included in the Commerce/State/Justice section of this resolution.

On amendments 76 and 93, the conferees dropped two provisions which affect tax policy. Both amendments were subject to a point of order in the House.

On amendment 81, the conference agreement accepted this provision which mandates OMB to include Harvey County, KS in the area designated as the Witchita Metropolitan Statistical area.

On amendment 85, the conferees accepted language included by the Senate to provide an annuity to former Senator Gladys Pile of South Dakota.

Mr. Speaker, I reserve the balance of my time.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts [Mr. BOLAND].

Mr. BOLAND. Mr. Speaker, the resolution before us today contains the conference agreement on the 1987 HUD-Independent Agencies Appropriations bill. It has been a long and arduous year—but I am pleased to report that the HUD conferees resolved all issues in disagreement.

For housing, we agreed to a level of $7,805,668,000. That is about $300 million below the House-passed level and represents what I believe should be the minimum—the absolute minimum—to support housing for the poor. And I hope everyone here will agree that the recommendations for subsidized housing are both constructive and attuned to the realities of the budget crisis.

When H.R. 5313 left this House, we placed a strong emphasis on public housing modernization. We did that by providing more than $1,430 million of direct capital grants for that activity. The conference agreement reaffirms that commitment and adds $244,712,000 for public housing project reconstruction or public housing new construction.

The fact is that there are a number of public housing developments in need of repair that the normal comprehensive modernization program cannot address. These projects must be totally gutted and rebuilt. Last year we made available 20 percent of public housing new construction funds for that purpose. This year we are affording the public housing authorities the option of requesting funds either for public housing reconstruction or for new units.

So, Mr. Speaker, I believe that for housing we have, on balance, come up with a reasonable—a fair—and a responsible program.

We were also remarkably successful in putting NASA on the road to recovery. The conference agreement on the HUD bill and this resolution includes a total of $10,434,000,000 for the National Aeronautics and Space Administration.

Within that level we are providing $2.1 billion for construction of a new orbiter.

We are funding the full Air Force payment to NASA of $531 million.

We are covering the cost of replacing the inertial upper stage cradle that was lost in the *Challenger* accident.

And we are initiating construction of a new tracking and data relay satellite also lost on *Challenger*.

I want to pay special tribute to Mr. CHAPPELL and other members of the Defense Appropriations Subcommittee in agreeing to reallocate $2.4 billion of budget authority and $100 million of outlays from that subcommittee's 302(b) allocation to the HUD Subcommittee.

That reallocation was invaluable and I believe that most Members would agree it is probably better to fund a new orbiter under NASA—rather than under the Air Force.

In other areas of the bill, we have included $1,622,850,000 for the National Science Foundation. That roughly splits the difference between the House and the Senate and provides for—get this—an 11-percent increase above fiscal year 1986. When you separate out the budgetary impact of the *Challenger* accident—no other agency in the bill is treated as generously as the NSF.

For the Federal Emergency Management Agency, we are making available a total of $576 million—including $70 million for the Food and Shelter Program. And, in connection with the Food and Shelter Program, we are also providing $15 million for new shelter programs under the Aegis of the Department of Housing and Urban Development.

For EPA, we are providing a total of $1,493,792,000 for that Agency's operating programs. This represents a small increase above fiscal year 1986—and includes $50 million for continuation of the School Asbestos Removal Program.

Also under EPA, we made available $1,411,300,000 for the Superfund—and it is our earnest hope that the President will sign the basic Superfund legislation so that those funds can be expended. And, Mr. Speaker, we are providing $1,800,000,000 of new budget authority for construction grants and releasing the remaining $600 million of the 1986 appropriation. This will provide a program level in 1987 of $2,400,000,000.

Finally, Mr. Speaker, the conferees on the part of the House made a supreme effort to protect the funding for veterans medical care. And I believe, for the most part, we were very successful. The other body reduced the House passed funding level for medical care by $250 million. This conference agreement reduces it by only $77 million below the House mark. That will provide a total of $9,411,817,000 to care for our veterans in 172 hospitals and nursing homes. And, Mr. Speaker, it will assure that the current staffing level of 193.941 will be maintained in fiscal year 1987. Frankly, I believe that is one of the major achievements of this conference agreement.

So, Mr. Speaker, those are the highlights of the fiscal year 1987 HUD appropriations bill.

Now let me conclude with the bottom line. The total budget authority for the agencies funded under this bill is $56,011,802,700. That is about $280 million below the section 302(b) allocation to the HUD Subcommittee.

And what about outlays. I am happy to report that this bill also meets the outlay test. The total outlays as scored by the Congressional Budget Office for the HUD bill is $56,508,409,000. That level is within $8 million of the informal ceiling allocated to that subcommittee.

Mr. Speaker, I would like to mention several technical errors in the printing of the conference report and joint explanatory statement of the managers (H. Rept. 99-977) on the 1987 Department of Housing and Urban Development-Independent Agencies Appropriations Act (H.R. 5313) as that document appears in the CONGRESSIONAL RECORD of October 7, 1986, on pages 29375 through 29385 and in the slip copy. The significant differences from the official copy of the conference report and joint explanatory statement of the managers are as follows:

In the bill language in amendment numbered one on H.R. 5313, the next to the last paragraph concerning rent control, the reference is to county, not country.

In amendment numbered 12, the conference agreement provides that the 1987 research and technology appropriation remains available until September 30, 1988. This matter is not clear when looking at the copy of H.R. 5313 dated October 3, 1986, the bill with the amendments of the Senate numbered, but becomes clear when looking at the official amendments.

In amendment numbered 16, the official version of the joint explanatory statement of the managers included an increase above the budget estimate for the Consumer Product Safety Commission. Salaries and expenses, of $100,000 for additional rent expenses in the Logan Building. That line was not printed in either version of the joint statement.

So, Mr. Speaker, I believe that the HUD bill is the product of a great deal of work and effort. And I believe it is a bill that should receive the support of this House—of the other body—and of the President.

Mrs. SCHROEDER. Mr. Speaker, I yield 3 minutes to the gentleman from Massachusetts [Mr. MARKEY].

Mr. MARKEY. Mr. Speaker, I rise in opposition to the continuing resolution.

I am voting against this bill for many of the same reasons I voted against the Defense authorization conference report earlier today.

First, I feel very strongly that negotiators for the other body did not act in good faith in carrying out the compromises reached during the conference, and as a result, the arms control provisions incorporated into this bill do not merit our support.

When we finally reached a compromise on Friday, it was far less than what many of us had hoped for—particularly on the SALT and nuclear testing issues. But the other side was not satisfied with their victories. They wanted more.

As soon as we reached agreement on these issues with the other body—on terms less than favorable to the House position—the other side began to redefine what the agreement was.

We agreed to drop binding SALT restrictions, but won agreement that we would be able to draft strong nonbinding language. The other side suddenly decided that it wanted to write the SALT language, incorporating into it provisions that we could not accept. They did not drop this insistence until the last minute.

On chemical weapons production, we reluctantly agreed last Friday to allow the artillery shell to go forward but ban Bigeye production. The other side suddenly decided that it wanted to approve release of $90 million in fiscal year 1986 moneys for Bigeye production. This was inconsistent with the agreement we reached last Friday. Nevertheless, it was part of the final bill.

Second, and more fundamentally, I believe that in the aftermath of the summit, this body has a responsibility to see that our country does not compound its failure to reach a new arms control agreement with the Soviets by shredding the SALT II Treaty—the only existing restrictions on Soviet nuclear forces.

We struck a less-than-desirable bargain last Friday in the expectation that the President would use this opportunity to reach an agreement with the Soviets.

Instead, the President squandered a chance to dramatically reduce nuclear weapons and limit nuclear testing.

The failure of Reykjavik demonstrated the President's dream of strategic defense is a nightmare for arms control.

I agree with the distinguished gentleman from Wisconsin that those of us who were frustrated with the final outcome of the authorization conference will have an opportunity to revisit the nuclear testing and star wars funding issues early in the next Congress. But if SALT II falls to pieces, I doubt that we will have an easy time putting it back together again. That's why we must act now.

In the aftermath of the failure at Reykjavik, let's not make things worse by tearing up the existing fabric of arms control. Let's defeat this resolution and pass a continuing resolution that prohibits abrogation of the SALT numerical limits.

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentlewoman from Nebraska [Mrs. SMITH].

Mrs. SMITH of Nebraska. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of House Joint Resolution 738 making continuing appropriations for the fiscal year 1987.

Let me commend my good friend and colleague, the chairman of the full Appropriations Committee and chairman of the Appropriations Mr. WHITTEN, and our distinguished ranking member, SILVIO CONTE for their leadership and expertise in crafting a bill that significantly addresses the needs of America which serves an extremely broad spectrum of constituencies. I also commend the other members of the committee for their efforts to work in a bipartisan manner on behalf of agriculture and other sectors of the economy. They truly realize the importance of agriculture in the economy and other areas that affect the well being of all Americans. Thanks are extended to the staff for their outstanding assistance.

Although this bill contains funding for all sectors of the economy, I specifically want to address those portions of the bill concerned with agriculture. This bill provides funds for nutrition of those in need by the Women, Infants, and Children Nutrition Program and related programs, helps disseminate information vital to our citizens health through the Human Nutrition Information Service, sends food for peace to Africa and other regions of the world that may be experiencing shortages of food and famine, and helps our youth understand the importance of agriculture from education programs provided through the Extension Service such as the 4-H program.

Although many important issues are addressed in this bill, none is more vital than providing assistance to our agricultural producers, the farmers and ranchers of this great Nation. However, before going into greater detail concerning the major appropriations of this bill I would like to comment on the historical importance of Agriculture.

The proportion of farm workers in the civilian labor force is 2.8 percent, just over 3 million workers. When you add to this the 21 plus million workers who support the production and delivery of food and fiber to our citizens, you have the largest single industry in the United States. Thus agriculture employs as many workers as the transportation, steel, and automobile industries combined.

The farmers, ranchers and those in the work force supporting the food and fiber industry are able to provide their products to the U.S. citizens with less than 15 percent of citizens' income. This is less than any other country on the Earth.

Although we recently had a negative agricultural trade balance this summer for the first time in 27 years, without the benefit of agricultural exports our trade balance would show even more red. This bill funds important programs included in the 1985 Farm bill. Exports sales as of mid-September are beginning to improve with wheat sales up about a fifth over a year ago, soybeans and rice up over 40 percent, and cotton sales are nearly 3.5 times the level of a year ago. Our agriculture trade balance should start to improve as the remainder of our commodities become priced closer to world prices.

One method to ensure that exports continue to increase is through the Export Credit Guarantee Program slated to provide $5 billion annually with nearly $4 billion made available through June 1986.

A Barter Program with other countries has been authorized by making $300 million in CCC commodities available to acquire oil to replenish the Strategic Petroleum Reserve. This is a small step in better utilizing our abundant resources for those goods we use to fuel our economy.

With this in mind our historical export surplus of agricultural products almost certainly will continue to help offset our overall huge trade deficit. This year even though the agricultural trade surplus will be the lowest in years, it will still be about $6 or $6.5 billion.

I would like to point out that this bill contains funding for a program that has been working wonderfully in Nebraska. The Agriculture-In-Transition Program will continue its pilot project of counseling and retaining farmers and ranchers in Nebraska for different careers. The $500,000 will ensure that this program is able to continue its important work for at least another year.

This program is administered by the Greater Nebraska Job Training Program in 88 of the 93 counties in Nebraska. During the past year it has provided job training services to over 600 individuals and reports a job placement rate of 73 percent.

Our agricultural economy continues to face unprecedented stress and problems, requiring continued support for those that have no choice but to leave farming. It is absolutely essential that those who can no longer farm or ranch have an opportunity to learn new skills. I, for one, am determined to provide them that opportunity now and in the future.

The funding levels of this bill are within the proposed levels in the budget. Let me comment on the major features of this bill as they relate to the Members of this body as follows.

As a result of budget-cutting determination, many programs were slated for reduction, termination, or the application of user fees to cover the cost of operation. However, most programs were returned to previous levels with only minor budget reductions.

Some of the more significant include the agricultural conservation program and flood prevention operations, loans for rural electric and telephone projects, rural housing loans, emergency loans to farmers, research and extension grants, animal and plant health programs, agricultural marketing programs and finally nu-

trition programs. Here it is more than apparent that this bill encompasses much more than just agricultural producers without mentioning the other subcommittees fine work in their portions of the continuing resolution.

Conservation to our Nation has no limit in value. It covers flood prevention which saves our productive land, our homes, and even the lives of our friends, neighbors, and relatives. Nationally more than 175 million acres of private land is subject to flooding with an estimated $2 to $3 billion worth of damage per year. The conservation of our land preserves for future generations the food and fiber which has made and allows our nation to be a world leader not only in food production but in other industries, humanitarian aid and as a force production but in other industries, humanitarian aid and as a force for preserving peace on this troubled planet. We must not let our past mistakes be repeated as in the 1930's when devastating wind storms swept the western plains almost irreversibly damaging our most precious of possessions, our fertile land.

In providing funds for our farmers, ranchers and other rural residents the Farmers Home Administration is very important. This agency helps keep youth in our rural areas by providing low cost funds enabling young men and women the opportunity to own their own farm or home. Not only are rural residents helped in starting their productive lives but the FmHA many times keeps farmers in business when nothing else stood between them and the doorway to foreclosure and bankruptcy. The benefits can be made even more realistic when one considers that more than 9.6 million loans and grants have been made since the program began in 1935 until the end of fiscal year 1985.

The comforts enjoyed and taken for granted by most of us today, were brought to the rural residents of our country by an agency started in 1936 under its own authorization. Of course, I am referring to the Rural Electrification Administration which has brought electricity and telephones to virtually every corner of our great land. With electricity came the modern appliances and machinery which have greatly increased the comfort and output of agriculture. Electricity provides light and safety to millions of Americans not to mention the availability of information that urban residents have. Telephones help span the great distances of our rural regions allowing Americans the convenience of always being only a phone call away from virtually anyone else in the country.

The REA has an outstanding reputation for payments received and losses sustained. With over $12.5 billion collected only $44,478 worth of losses have been incurred. Few if any other lending institutions could boast of such an impressive record.

Extension work in the United States has no equal in providing information to families in all 50 States plus territories under the protection of the United States. This program has helped to improve the nutrition and understanding of food for approximately 2.5 million homemakers and over 6 million of our country's youth. This bill would fund this very important program at close to the 1986 appropriation level, thus continuing a quality service at $289,317,000.

The number of farm bankruptcies and bank failures continue at an unprecedented rate. Currently up to one-third of all family-size commercial farmers are facing severe financial difficulty. Surveys by the American Bankers Association indicate that an increase in farm failures from slightly more than 2 percent in 1982 to around 4.8 percent in 1985. It is expected that in 1986 the rate of farm failures will continue to be near or above those experienced in 1985.

The financial conditions leading to the aforementioned problems can be summarized by returns paid to farmers and the prices paid by farmers. Historically the ratio of net income to farmers' equity has been less than 3 percent and recently less than 2 percent. Along with this decrease in returns, the farmers share of the food dollar has decreased from 51 percent around World War II to a recent level of 25 percent. This is compared to the 1985 labors share of the food dollar of 34 percent. In order to meet the continued decline in farm income many farmers have turned to off-farm income which now represents nearly 60 percent of the total farm income.

From 1977 to 1980 food prices rose approximately in line with other consumer prices, since then food prices have increased by only half the percentage as all other consumer goods according to the Consumer Price Index. Spending on domestic foods at $346 billion has increased 3.5 percent over the 1984 level.

Nearly 45 percent of the country's farms had negative cash flows even considering all sources of family income and cash obligations, including interest, principal payments, and minimal family living expenses. A further problem is the debt-to-asset ratio has increased from 19 percent of American farms owing 62 percent of the farm debt to 22 percent of our farms owing 66 percent of all farm debt.

Lenders are still facing considerable risk of loss because over two-thirds of operator debt is owed by highly leveraged farmers. Highly leveraged farmers with negative cash flows owe nearly 37 percent of this two-thirds.

This is further exacerbated by having this concentrated in farms with annual sales $40,000 and greater, among grain and general livestock farms, and among younger and middle-aged farmers. These are the typical farms in my district in Nebraska. Hardly a week goes by when one or more of these farmers calls me to tell me of the dire circumstances facing him. He may tell me that his place is up for sale, his food stamps are inadequate to pay for the meals that he, his wife and his children need for proper nutrition, he has no other opportunities available because he has never done anything but till the land that his family has farmed for three or more generations.

This bill provides hope for our farms and ranches today and into the future by funding research which could discover new crops and uses for old crops. Fifty years ago soybeans were known mainly to the Asian nations. Now soybeans are the foundation of our livestock and poultry industries, our major oilseed and our 3d largest crop. Other as yet unknown crops to our world but previously known to the Indians are oca, a hardy root plant, arracacha a relative of the carrots and celery which has a flavor combining celery, cabbage, and roasted chestnuts. Altogether man has used about 3,000 plant species for food. We now need to begin research on the more than 20,000 edible plants, instead of concentrating on the 30 or so plants that have received the most research and development and make up the majority of today's annual world crop production.

Farm programs are very expensive to taxpayers with program expenditures probably exceeding $24 billion of which approximately $10 billion will go to corn producers. Yet, this cost occurs as a result of consumers desire for cheap, abundant food often resulting in below cost of production prices. However, this is a transition period in agriculture and one that requires compassion for our farmers.

However, one must put this in perspective with other expenses that taxpayers have. Nationally, our utility companies have an excess capacity for producing electricity of $75 billion, with the assumption that a 20-percent carrying charge would pay for this excess, consumers are paying $15 billion per year for surplus electric production capacity. The 1985 farm bill, according to the best Government estimates, will cost about $10 billion per year for the next 5 years. This is just one indication where one industry is able to pay for its surplus capacity and keep a low profile, while America's farmers are often viewed as a bunch of ingrates looking for a handout.

Farmers have been devastated by the cruel turbulent trends of inflation, rates and export embargos that have occurred since the middle 1970's. However, we, the Members of Congress, must continue to support our farmers until a more competitive economy rewards our farmers for the outstanding and unequaled job of producing food.

The other side of Agricultural Appropriation is in nutrition programs aimed at reducing hunger in our country. The three major programs are Food Stamps, WIC, and School Lunch. The Food Stamp Program from 1970 until 1984 saw a growth in participation from 4.3 million to 20.9 million people at an increase in expenditures from $0.6 to $11.6 billion. That's over a 380-percent increase in the number of individuals participating in the Food Stamp Program while our population has only increased by 25 percent and with an increased cost of over 1,800 percent.

In the last few years, from 1980 to 1985 the Food Stamp Program had a 41-percent increase in cost from $8.3 to $11.7 billion with 19.2 million participants to 19.9 million participants. Also, the maximum benefit per month for a family of four increase from $209 to $264, a 26-percent cost increase.

The Woman, Infants, and Children Program has seen a similar increase with nearly 3 million participants in 1984. One of our best programs is the School Lunch Program with nearly 11.8 million free and reduced cost lunches served in 1984 up from 4.6 million in 1970. In 1970 only 20.7 percent of all school lunches were served as free and reduced while in 1984 over 50 percent of all lunches served were through the School Lunch Program. This generosity has been extended in those in need and can only benefit America with healthier and stronger U.S. citizens.

As the previous numbers indicate the Agricultural Appropriations portion of this bill provides funding, more than half of which goes to nonfarm residents and programs, which serves all our citizens. The animal and plant health inspection services provided in this bill maintains our country's health by protecting us from consuming diseased and contaminated food. No other country goes so far in its efforts to protect its citizens health, happiness, and security than the United States.

Mr. BEDELL. Mr. Speaker, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Speaker, is the gentlewoman aware of the fact that apparently in this bill that it says that if REA's refinance their loans then they will not be eligible for loans from their financing bank?

Mrs. SMITH of Nebraska. I am not up on how that point is in this material tonight.

Mr. BEDELL. Mr. Speaker, I just wanted to be sure that the House was aware of that situation, that that is a part of the continuing resolution as it is now, as I understand it.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Florida [Mr. CHAPPELL].

Mr. ASPIN. Mr. Speaker, will the gentleman yield?

Mr. CHAPPELL. I yield to the gentleman from Wisconsin.

Mr. ASPIN. Mr. Speaker, it is my understanding that the continuing resolution provides funding for the T-46A trainer aircraft. Is that correct?

Mr. CHAPPELL. The gentleman is correct.

Mr. ASPIN. Is the gentleman aware that on Tuesday, September 30, in the defense authorization conference, agreement was reached to establish a competition for the Air Force trainer aircraft program, including the T-46A?

Mr. CHAPPELL. Yes, I am aware of the conference action.

I would note, however, that the House Appropriations Committee, with full understanding of the agreement, proceeded to recommend funding for the T-46A. Our decision was based on the committee's best judgment that the Air Force needs a new trainer aircraft now. A new competition is not required and the T-46A trainer aircraft meets the established requirement.

Mr. ASPIN. I appreciate the gentleman's explanation. Would the gentleman explain the effect of the Appropriations conference action on the Department of the Air Force?

Mr. CHAPPELL. In our view, the continuing resolution represents the last word of the Congress on this particular issue. Therefore, notwithstanding the action taken in the defense authorization conference, it is the judgment that the Air Force should follow the guidance and actions taken in the continuing resolution.

Mr. ASPIN. I agree completely with the gentleman's position.

Mr. CHAPPELL. Mr. Speaker, the Department of Defense Appropriations Act for fiscal year 1987 as contained in this joint resolution provides net obligational authority of $268.8 billion which compares to $265.2 billion provided by the House bill and $272.5 billion as provided by the Senate bill. Mr. Chairman, that is just about an even split between the House and Senate bills. The conference agreement is $3.6 billion above the House bill and $3.7 billion below the Senate bill.

The conference agreement is $5.7 billion below the latest House 302 allocation in budget authority and is about $1 billion below the latest House 302 allocation for outlays when the pay raise reserve is distributed in those allocations.

Mr. Speaker, we have also included in the conference agreement the entire procurement reform package as agreed to in the defense authorization conference.

The defense appropriation bill as presented to you today also includes the defense authorization conference package relating to arms control.

READINESS CUTS IN THE CONTINUING RESOLUTION

Some concerns have been raised about the possible harm to readiness as a result of the level of reductions to the operation and maintenance accounts in fiscal year 1987.

How can we cut $7.7 billion from operation and maintenance with minimal readiness impacts?

First, we reduced $4.5 billion as a result of lower fuel prices, prior year inflation gains in the Defense industrial funds and overestimates in budgeted inflation rates.

Second, we reduced $750 million by cutting out funds for programs that were either excess to requirements or no longer required, such as the funds budgeted to overhaul the two Poseidon submarines the President ordered dismantled.

Third, we reduced $300 million as a result of legislative changes in the Defense Authorization, such as CHAMPUS reform.

Fourth, we reduced $700 million in programs as a result of management and productivity improvements directed by the conferees, such as elimination of appropriated fund support for golf courses and other recreation facilities.

Finally, the remaining $1.45 billion, which equates to less than 2 percent of the Department's request, is made up of numerous adjustments to hundreds of programs identified by the conferees as being unnecessary, duplicative, or improperly unfunded.

In summary, while the conferees are not happy with the magnitude of the fiscal year 1987 reductions to operations and maintenance we believe that the Department will not experience any significant problems in operating and maintaining their forces at levels comparable to fiscal year 1986.

I urge the adoption of the joint resolution.

The Defense chapter of the continuing resolution, as scored by the Congressional Budget Office, provides a net total of $268.8 billion in new budget authority.

This consists of $274 billion in new budget authority and a rescission of slightly over $5 billion of old budget authority.

In other words, the conferees are saying that, for a wide variety of reasons, such as, contract savings; program delays; premature commitments to procurement; and contract cancellations; we are rescinding over $5 billion of existing budget authority that is no longer needed for the purposes for which it was originally appropriated.

We are also providing $274 billion in new budget authority.

In summary:

We have provided sufficient funds for all of the weapons systems needed to maintain a strong national security.

We have also reduced the unobligated balances of the Pentagon by over $5 billion.

Mrs. SCHROEDER. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts [Mr. MARKEY].

Mr. MARKEY. Mr. Speaker, as chairman of the subcommittee with jurisdiction over the Department of Energy Uranium Enrichment Program, I would like to add a few words about the provision in this resolution relating to uranium enrichment criteria. These criteria were considered by my subcommittee and acted upon by both the legislative committees to which the criteria were referred. Because this provision disapproves significant elements of the criteria, it is consistent with the actions of the two legislative committees.

As chairman of the subcommittee of jurisdiction, let me briefly provide a backdrop for this discussion. Our Government enriches uranium for utilities and by law must recover its costs through its charges. Unfortunately, the program is $7.5 billion in debt, according to both the GAO and OMB.

In July, the Department transmitted to Congress criteria that, among other things, proposed to writeoff $4 billion of this debt—in other words, saddle the taxpayers, not utility customers, with this cost. Subsequently, both the Committee on Energy and Commerce and the Committee on Interior and Insular Affairs disapproved the criteria by passing House Joint Resolution 699.

Now the continuing resolution comes along, and ratifies the disapproval action of the committees of jurisdiction.

As chairman of the subcommittee of jurisdiction over the DOE Enrichment Program, I

71-059 O-87-25 (Pt. 22)

want to make clear to all who read this continuing resolution, whether it is DOE or utilities, that the law is still the law, and the requirement of full cost recovery in the Atomic Energy Act has not been amended. This language does not change the size of the debt—simply because no one can legally change the books which reveal it to add up to $7.5 billion—and does not alter the requirement of full cost recovery. It does, however, recognize that Congress may change the amount to be recovered if it so chooses. However, if Congress fails to amend the law, then the requirement of full cost recovery explicit in the Atomic Energy Act still stands. For my part, I will seek to ensure that every nickel of this program's cost—the entire $7.5 billion—is paid for by the program's customers, and not the taxpayer. The nuclear industry does not need a $7.5 billion subsidy, at a time when we are cutting valuable social programs.

As for fiscal year 1987, it is clear that the requirements of section 7502 of the consolidated Omnibus Reconciliation Act of 1985 still apply. That law sets a $150,000,000 repayment goal for fiscal year 1987. It must be repaid.

Finally, Mr. Speaker, I feel constrained to observe that the actions by the conferees on this matter, in circumventing the jurisdictional committees, suggests that in the future, it will be necessary to give greater consideration to the appointment of conferees from legislative committees to handle matters of legislation on a continuing resolution.

STOPPING THE $4 BILLION TAXPAYER RIP-OFF

The Subcommittee on Energy Conservation and Power has closely monitored the management of the Department of Energy's Uranium Enrichment Program for several years. This $1.3 billion per year program represents the largest energy budget item within the committee's jurisdiction, and has been filled with controversy since the late 1970's. The hearing and correspondence record over the past 5 years, coupled with regular reports by the General Accounting Office, reveals intense oversight of the program raising substantial questions about the financial management of this billion dollar program. Some of these questions have been laid bare by the proposed criteria. Consequently, I find it incumbent to make substantive comments on the proposed criteria and their implication for the Uranium Enrichment Program.

The area which I find most significant is the question of how much enrichment customers should have to repay the Treasury, and how much taxpayers should have to bear. During this era of budget constraint, I find it unconscionable that this administration, and some of its supporters in Congress, propose to write off $4 billion in debt. This money is owed to the Treasury and the taxpayer by the Enrichment Program customers. They have enjoyed low prices for years and have failed to pay the full cost of the Uranium Enrichment Program, in direct violation of the Atomic Energy Act. It is for this reason that I feel so strongly that these criteria are illegal and must be rejected. In support of this conclusion, I point to a February 19, 1986 letter from the General Accounting Office which states unequivocally, "Energy's proposed uranium enrichment services criteria are contrary to some basic and significant elements of the letter and legislative history of the statute governing the substantive requirements of their Uranium Enrichment Program. Therefore, * * * [the criteria] cannot legally be accomplished through rulemaking."

The criteria suffer other flaws, including a failure to include the basic terms and conditions required by law, an excessive grant of flexibility to the program that would frustrate congressional oversight, and a failure to comply with the full cost recovery requirement in the Atomic Energy Act. Each of these concerns is laid out in more detail below.

ILLEGAL "WRITE OFF" OF $4 BILLION

The Department's authority to propose criteria changes for the uranium enrichment program lies in section 161 (v) of the Atomic Energy Act. The act directs the Department to "establish criteria in writing setting forth the terms and conditions under which services provided under this subsection shall be made available * * * ." Of course, the criteria must be in accord with the statutory requirements of the program as well as be consistent with other requirements of the act. A primary requirement of that same section of the act is that there must be "recovery of the Government's costs over a reasonable period of time." Yet the criteria propose that this statutory requirement of full cost recovery not be met. Consequently, the criteria violate the statutory requirements and therefore must be rejected.

Section 762.6 of the proposed criteria states that DOE will seek to repay to the Government costs "attributable to plant capacity used to provide enrichment services for civilian customers, but will not necessarily include costs attributable to plant capacity or other investments not properly allocable to the Government's costs associated with providing enrichment services to civilian customers." This interpretation contradicts the language of the act, which unequivocally states, "any prices established under this subsection shall be on a basis of recovery of the Government's costs over a reasonable period of time." The act makes no allowance for the Department to "write off" a portion of the Government's investment in order to improve the competitive position of DOE. Thus, the proposed write-off of $4 billion in Government investment, so as to obviate the need for customer payments of these assets as part of the uranium enrichment fee, violates the statutory mandate of full cost recovery enunciated in section 161(v) of the Atomic Energy Act, as amended. This same position was also taken by the GAO, which stated, "These so-called write-offs result in a shifting of more than $4 billion of program costs from enrichment customers to the Government. This in effect constitutes a subsidization of the Enrichment Program in contravention of the Atomic Energy Act of 1954, as amended, and its legislative history."

FLEXIBILITY IN COST RECOVERY REQUIREMENT

The Department of Energy maintains that it enjoys "considerable flexibility" to determine the most effective means to recover the Government's costs, and furthermore that it has the authority to determine what portion of the $7.5 billion in total Government investment is "appropriate" for recovery. In making this determination, DOE relies heavily on the 1954 act and the amendments made in 1964 and the legislative history of those acts which allows that the requirement of " 'reasonable compensation to the Government' is flexible * * * [and] the Commission will have to consider not only the Government's costs in providing enrichment services but also the national interest in the development and utilization of nuclear power." (House Report No. 1702, 88th Cong., 2d Sess. 17 and 18 (1964); Senate Report No. 1325, 88th Cong., 2d Sess. 17 and 18 (1964)).

However, what DOE ignores, and it does so at the peril of misrepresenting the intent of Congress, is section 8 of Public Law 91–560, approved December 19, 1970, which altered the basis of pricing from "reasonable compensation to the Government" to the much narrower and clearer defined requirement, "recovery of the Government's costs over a reasonable period of time."

This 1970 amendment had the effect of narrowing the meaning of the criteria language and ruled out, except in the special case where the "Conway Formula" would apply, nonrecovery of the full Government's costs in the enrichment program. Whatever flexibility may have been associated with the phrases of "appropriate Government costs" and "appropriate depreciation of said plants", that flexibility was trimmed by the scope of the 1970 amendment. Although these phrases using "appropriate" have not changed since 1966, the underlying statutory language on which they are based has been altered. Consequently, full cost recovery was required by statute after 1970, and the criteria emanating from the statute must reflect this requirement. These criteria fail to incorporate this requirement, and therefore must be rejected.

The limited application of the flexibility inherent in the phrases "appropriate Government costs" and "appropriate depreciation of said plants" was made explicit by the legislative history of the 1970 amendment. In a January 26, 1971 letter to the joint committee, the AEC stated, "The significance of the inclusion of the word 'appropriate' in the first sentence of Subparagraph (2) [of subsection 4 (c) of the criteria] is to preserve the Conway formula * * *." Uranium Enrichment Pricing 92d Cong., 1st Sess., 6 (February 25, 1971). Clearly, the use of "appropriate" as a rationale for "writing off" $4 billion in Government investment undermines the letter and spirit of the statute.

FULL COST RECOVERY REQUIREMENT

The Government is required to recover its costs for the uranium enrichment program over a reasonable period of time. It is self-evident that in order to accomplish this goal, the price for enrichment services must be calculated to meet the cost recovery requirement. However, DOE abandons this principle in the proposed criteria. The "Supplementary Information" indicates that "DOE does not believe the reference to 'recovery of the Government's costs over a reasonable period of time' mandates a pricing mechanism which explicitly calculates the price in each contract solely on the basis of certain specified costs. The accounting principle of allocating specific costs to particular prices is not synonymous with the statutory concept of recovery of costs over a reasonable period of time."

While DOE's failure to fully recover the Government's costs under the existing pricing regime supports the conclusion that allocating costs to prices is not synonymous with cost recovery, the obverse is not necessarily true. If there is no relationship between costs and prices, then Congress and DOE will have no indication of whether the cost recovery requirement is being met. Although DOE argues the "Compliance * * * can be judged only by looking at the overall performance * * * over a period of time," that is a recipe for disaster. Congress must know whether the program is making progress toward the cost recovery requirement. If no judgment can be made until some unknown period of time has elapsed, then Congress may suddenly find a program hopelessly in debt. An allocation of costs to prices at minimum gives Congress the information it needs to assess whether the program is making progress toward meeting the cost recovery requirement, or whether congressional intervention is necessary.

EXECESSIVE FLEXIBILITY AND IMPACT ON CONGRESSIONAL OVERSIGHT

The goal of flexibility overreaches the proposed criteria and merits special attention for it captures in one word all of the flaws which permeate the proposed criteria. It is axiomatic that Government officials managing a program want flexibility. These criteria are infected with flexibility. Flexibility gives a program a comfortable buffer which shields it from annoying congressional scrutiny and enables it to meet almost any performance standard with a statement that "Flexibility permitted the program to focus on a number of different goals," but whether any of those goals were achieved is deliberately left ambiguous. Flexibility serves well private sector enterprises which only have to answer to shareholders, but it ill serves the Government process since it holds no one accountable for the expenditure of taxpayer money.

This is not the first time the management of the Uranium Enrichment Program have proposed new criteria replete with flexibility. In 1973, the Atomic Energy Commission, the predecessor to the DOE, proposed criteria which contained more general and generic terms and conditions than had been present in earlier criteria. Testimony received by the Joint Committee of Atomic Energy highlighted the objective of the AEC: "The proposed revisions to the uranium enrichment services criteria include changes necessary * * * to afford appropriate flexibility to incorporate changes in the contracting details as may be warranted by experience." Proposed Changes in AEC Contract Arrangements for Uranium Enrichment Services, hearings before the Subcommittee on Energy, Joint Committee on Atomic Energy, 93d Congress, 1st session (March 7, 8, 26; and April 18, 1973), Mr. George F. Quinn, Assistant General Manager for Production and Management of Nuclear Materials, testifying. Moreover, the vague language of the AEC's proposal is strikingly similar to the imprecise proposed criteria being discussed today: "The quantitative terms and conditions for termination by the customer of an enrichment services contract are, therefore, not specified in the criteria and will not be set forth in individual contracts." Id., at 22.

This AEC proposal for greater flexibility met strong opposition from the Joint Committee, statements which speak directly to today's proposed criteria. Senator Jackson observed: "[T]he revised criteria omit any reference to the types and significant details of the contracts under which enrichment services will be provided." Id., at 2. Representative Holifield concluded: "It is very clear on the face of it that this is a move, justified on the basis of a new arrangement, to evade or to nullify congressional control * * * It seems to me that this is a very convenient way to say that it is too complicated and, therefore, we want to change the law, or evade it, in order to keep control from taking place." Id., at 33. The result was that the AEC's criteria modifications were not adopted as proposed.

The same concerns which fueled the opposition of the Joint Committee in 1973 apply to the present criteria modifications. Congressional oversight would be blocked by the flexibility contained in the proposed criteria. Furthermore, the flexibility endemic in the proposed criteria not only obstructs the oversight role of Congress but it also stands in contradiction to the requirements of the statute that significant details of the contracts nder which enrichment services shall be provided.

CRITERIA FAIL TO INCLUDE CONTRACT TERMS

The Atomic Energy Act requires DOE to "establish criteria in writing setting forth the terms and conditions under which services provided under this subsection shall be made available." The committee report accompanying the 1964 act elaborated on this requirement: "Included among these 'terms and conditions' would be such matters as the charges for enrichment services, the conditions under which such services would be offered, and the general features of standard contracts for uranium enrichment services." House Report No. 1702, 88th Congress, 2d session 16 (1964); Senate Report No. 1325, 88th Congress, 2d session 16 (1964). Accordingly, the criteria must contain the general features of standard contracts for uranium enrichment services.

The proposed criteria fall woefully short of this standard and are remarkable in the lack of detail they contain. As the "Supplementary Information" to the criteria states, "Under the proposed criteria, there is no fixed price or pricing mechanism in each and every contract * * *. Therefore, the proposed criteria make clear DOE's flexibility to respond to changing market conditions by negotiating the price in each contract." Certainly, the criteria make abundantly clear DOE's thrist for flexibility, but the proposed criteria ignore the statutory requirement that "such matters as the charges for enrichment services" be set forth in writing.

Finally, the proposed criteria close with a broad waiver of the requirement that the "general features of standard contracts" be included. The "Supplementary Information" states, "a contract can contain terms and conditions not specified in the criteria.

No prohibition against a term or condition is intended by its noninclusion in the proposed criteria." This indicates that the DOE can change the "general features" of contracts so long as they are not "inconsistent with the criteria." This contradicts the clear intent of Congress that the "general features" of contracts be set forth in writing. Consequently, the proposed criteria are seriously flawed because they fail to outline all of the "general features of standard contracts for uranium enrichment services."

NONDISCRIMINATION IN PRICING OF ENRICHMENT SERVICES

Section 161(v) states that prices for enrichment services "shall be established on a nondiscriminatory basis * * *." However, the proposed criteria appear to be the antithesis of "nondiscriminatory" since it calls for DOE to "negotiate price in individual enrichment services contracts in accordance with an overall approach intended to maintain the long-term competitive position of DOE while obtaining the recovery of the Government's cost over a reasonable period of time." Without further guidelines, this broad discretion could mask discriminatory pricing practices. On its own, the criteria allow, if not invite, discriminatory pricing and therefore contravene the Atomic Energy Act.

IMPORT RESTRICTIONS

The proposed criteria continue the current policy of not imposing restrictions on the importation of uranium destined for domestic use. While the DOE has found the uranium industry to be "nonviable," the Department maintains that import restrictions on foreign uranium would not assure the viability of the domestic mining and milling industry. The Department contends that the current difficulties facing the domestic uranium industry stem from excess uranium inventories, excess production capacity, the cost advantage of foreign source uranium, shrinkage in the demand for nuclear power, and cancellation of powerplants due to cost overruns and licensing delays. The Department concludes, "Import restrictions would have no long term positive effect on the consumption of domestic uranium."

I agree with this conclusion. Import restrictions would not serve the long-term interest of the DOE Enrichment Program, electric utilities, consumers, or the domestic mining and milling industry. The problems facing the uranium industry are many, but they cannot be solved by import restrictions. High inventories and a decrease in demand for nuclear power contribute substantially to the depressed state of the uranium industry. In addition, some foreign production of uranium enjoys a significant cost advantage to domestic sources. While an import restriction may lead to short-term gain for the domestic mining industry, the fundamental causes would not be addressed. Consequently, as the DOE has stated, "Import restrictions would have undesirable effects on both the U.S. uranium industry and the DOE enrichment business."

In addition, I object to import restrictions on uranium because consumers would have to pay higher prices in order to subsidize domestic production. The limited short-term gain the domestic uranium industry would come at the expense of electric utilities and consumers. Import restrictions would mean higher fuel prices for utilities, and these costs would be passed on to consumers. One witness at the subcommittee's February 19, 1986, hearing estimated that import restrictions would double domestic uranium prices and raise the

cost of electricity by nearly $800 million over 5 years. I find this unacceptable.

Import restrictions are not the solution to the problems confronting the domestic uranium industry. While I oppose the proposed criteria in general, I support the conclusion reached by the Department of Energy with respect to import restrictions on uranium. Moreover, I agree with the Department that the Secretary is not obligated to impose import restrictions even if there is a finding of "nonviability." The Secretary has announced appropriate steps to ameliorate the domestic mining industry. Import restrictions do not provide the relief the uranium industry seeks. In conclusion, I believe that the proposed criteria should be rejected, but nothing in this action should be interpreted or construed as approval for import restrictions.

CONCLUSION

The primary reason why I oppose these criteria is because they represent a raid on the Treasury which cannot be tolerated during this era of budget crisis. The Department of Energy is seeking to transfer $4 billion from commercial customers of the Uranium Enrichment Program to the taxpayer. In addition, the Department seeks to undertake this taxpayer ripoff under the cloak of a criteria change. The action by the Department is illegal and represents a gross subsidy to the utility industry. For this reason, I believe these criteria should be rejected.

COMPTROLLER GENERAL OF
THE UNITED STATES,
Washington, DC, February 19, 1986.

Hon. EDWARD J. MARKEY,
Chairman, Subcommittee on Energy Conservation and Power, Committee on Energy and Commerce, House of Representatives.

DEAR MR. CHAIRMAN: By letter of February 6, 1986, you requested that GAO provide a legal opinion on the consistency of the Department of Energy's (Energy) proposed revised uranium enrichment services criteria with the requirements of law. These proposed criteria are set forth at 51 Federal Register 3624 (January 29, 1986). You also requested that we provide this opinion in time for your hearings scheduled for February 19, 1986. We have here set forth the major issues of legal concern, but in light of the time constraint, we did not solicit Energy's views.

In summary, we have concluded that Energy's proposed revised uranium enrichment services criteria are contrary to some basic and significant elements of the letter and legislative history of the statute governing the substantive requirements of the uranium enrichment program. Therefore, despite recognizing that economic circumstances of the enrichment market have changed and whatever the policy merits of Energy's proposal, it cannot legally be accomplished through rulemaking. We recommend that the policy changes reflected in Energy's proposed revised criteria be introduced in the form of a bill in the Congress and formally enacted before any further attempt is made to implement them.

More specifically, the primary substantive requirements of Energy's uranium enrichment program are set forth in subsection 161(v) of the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2201(v). That provision prescribes, in relevant part, that:

1. "any prices established under this subsection shall be on a basis of recovery of the Government's costs over a reasonable period of time";

2. prices for services provided "shall be established on a nondiscriminatory basis";

3. Energy, "to the extent necessary to assure the maintenance of a viable domestic uranium industry, shall not offer such services for source or special nuclear materials of foreign origin intended for use in a utilization facility within or under the jurisdiction of the United State";

4. Energy "shall establish criteria in writing setting forth the terms and conditions under which services provided under this subsection shall be made available"; and

5. Before Energy establishes such criteria, the proposed criteria shall be submitted to the appropriate authorizing committees of the Congress, and a period of 45 days shall elapse while Congress is in session.

In addition, the reports of the Joint Committee on Atomic Energy accompanying the enacted subsection 161(v) set forth the Joint Committee's view on the terms and conditions that should be included in the criteria: "Included among these 'terms and conditions' would be such matters as the charges for enrichment services, the conditions under which such services would be offered, and the general features of standard contracts for uranium enrichment services." H.R. Rep. No. 1702, 88th Cong., 2d sess. 16 (1964); S. Rep. No. 1325, 88th Cong., 2d sess. 16 (1964).

The proposed revised uranium enrichment services criteria and acccompanying Supplementary Information are not consistent with the statute or the Joint Committee's advice in the following major respects:

1. The criteria provide that henceforth Energy's primary pricing objective of the enrichment program is maintenance of Energy's long-term competitive position,

a. relegating to a secondary objective the statutory requirement that the Government's costs be recovered over a reasonable period of time;

b. rejecting the concept of full cost recovery of the Government's investment, which had been implemented in practice for more than 15 years and had been endorsed by the Congress, Energy and its predecessor agencies, the GAO;

c. explicitly stating that Energy will not recover from customers in excess of $4 billion of prior Government investments in the program; and

d. asserting that the new standard for cost recovery is only "appropriate" Government costs, which Energy states will only be those actually incurred in providing enrichment services to current civilian customers.

2. The criteria provide that prices will be individually negotiated, and they fail to set forth any fixed price or pricing mechanism, contrary to the Joint Committee's directive that "the charges for enrichment services" are to be set forth in the criteria.

3. The criteria fail to make provision for any standard contracts or to set forth the material general features to be contained in contracts, contrary to the Joint Committee's directive that the "general features of standard contracts for uranium enrichment services" are to be set forth in the criteria.

In addition, we have reservations about (1) whether the statutory requirement for assurance of nondiscrimination can be satisfied in practice if the proposed criteria are implemented as reflected in the Supplementary Information accompanying them, and (2) whether Energy has satisfied the statutory requirement regarding enrichment of uranium of foreign origin. This latter issue is currently being litigated before the U.S. District Court in Colorado.

COSTING

The proposed revised uranium enrichment services criteria are premised on the basis that the recovery of the Government's full costs of providing enrichment services is not required, and that "Congress granted [Energy] considerable discretion to determine, in the first instance, the best pricing approach and which costs are appropriate for recovery in an ever changing environment." 51 Fed. Reg. 3226 (January 29, 1986). We believe Energy is in legal error on this matter.

As you know, at the request of your subcommittee, we rendered a legal opinion (B-207463, December 27, 1984) in which we concluded that full cost recovery, including depreciation, was statutorily required after the 1970 amendment to subsection 161(v) of the Atomic Energy Act of 1954, 42 U.S.C. § 2201(v).[1] A copy of this opinion is enclosed for your convenience.

Footnote 5 to the Supplementary Information accompanying Energy's proposed criteria revisions specifically rejects this full cost recovery standard. In so doing, Energy relies extensively on the flexibility referred to in the 1964 legislative history when the Private Ownership of Special Nuclear Materials Act[2] was passed, adding subsection 161(v) to the Atomic Energy Act. The pricing standard provided in that act was admittedly the flexible one of "reasonable compensation to the Government." However, subsection 161(v) was amended in 1970[3] specifically to change the pricing standard to one of "recovery of the Government's costs over a reasonable period of time." It is the legislative history associated with the 1970 amendment that is now relevant and not that of the predecessor version of the statute.

As pages 6 and 7 of Appendix III to our December 27, 1984 legal opinion more fully explain, in the reports[4] of the Joint Committee on Atomic Energy associated with the 1970 amendment, the Joint Committee explicitly affirmed a GAO legal interpretation[5] of the meaning of subsection 161(v) as the Committee's intended meaning of the new statutory language requiring "recovery of the Government's costs over a reasonable period of time." GAO's opinion required the recovery of costs in every instance except one, namely, the situation for which the Conway Formula had been devised to deal with the reduction or possible elimination of the military need for enriched uranium. Flexibility and consideration of the national interest were directed specifically and solely to this particular problem. As is explained in footnote 1 to this opinion, the interim

[1] As is more fully explained in that opinion, there was one exception specifically provided for in the legislative history of the 1970 amendment; namely, where the Conway Excess Capacity Formula was applicable. However, this exception is no longer relevant, because the interim period in which the Conway Formula applied expired in 1976 when Energy exceeded 75 percent of production capacity from its gaseous diffusion plants.

[2] Public Law No. 88-489, approved August 26, 1964, 78 Stat. 603.

[3] Section 8 of Public Law No. 91-560, approved December 19, 1970, 84 Stat. 1472, 1474.

[4] H.R. Rep. No. 1470, 91st Cong., 2d sess., 2 (1970); S. Rep. No. 1247, 91st Cong., 2d sess. 2 (1970).

[5] B-159687, July 17, 1970 entitled "Review of Proposed Revisions to the Price and Criteria for Uranium Enrichment Services," at 9, reprinted in "Uranium Enrichment Pricing Criteria," 91st Cong., 2d sess. 161-238 (June 16 and 17, 1970).

period for which the Conway Formula applied expired in 1976 and is no longer relevant. Consequently, under the 1970 amendment to subsection 161(v) and its legislative history, full cost recovery is required.

GAO continues to believe that under existing statutory constraints, Energy does not have the legal flexibility to exclude unilaterally any government costs from its prices given the full cost recovery pricing requirement. The general tenor and a number of specific provisions of the proposed criteria contravene this legal requirement. For example, proposed 10 C.F.R. § 762.5 provides for recovery of only "appropriate" Government costs, with an implicit right reserved to Energy to determine what costs are appropriate. In this connection, Energy states in the Supplementary Information accompanying the proposed criteria revisions that: "The costs of items which are not, and most likely will not, be used in providing enrichment services to current civilian customers are not appropriate for consideration in determining the extent to which Government's costs are recovered over a reasonable period of time. [Energy] has determined that none of the costs of the Gas Centrifuge Plants and only forty percent of the costs of the Gaseous Diffusion Plants are used to provide enrichment services to civilian customers. Accordingly, only these latter costs are appropriate for determining the extent to which the Government's costs are recovered over a reasonable period of time." 51 Fed. Reg. 3628 and 3629 (January 29, 1986).

Our December 27, 1984, opinion addressed the legality of the exclusion from cost recovery and prices of the $1.2 billion of undepreciated value attributable to unused capacity of the gaseous diffusion plants. We held that this write-off for pricing purposes of undepreciated plant and capital equipment, so as to obviate the need for customer payments of related depreciation and imputed interest as part of the fee for enriching services, violates the cost recovery requirement of subsection 161(v) of the Atomic Energy Act of 1954, as amended, 42 U.S.C. § 2201(v). We have an open request from this subcommittee for a legal opinion on Energy's exclusion from current and future prices of its investment in the Gas Centrifuge Enrichment Plant (GCEP). We have formally requested of Energy any basis for its actions which would differentiate GCEP from our conclusions regarding the unused plant capacity of the gaseous diffusion plants. We have received no response from Energy, and we are aware of no distinguishing factors which would justify a different GAO result on the exclusion of GCEP costs from Energy's pricing formula.

These so-called write-offs result in a shifting of more than $4 billion of program costs from enrichment customers to the Government. This in effect constitutes a subsidization of the enrichment program in contravention of the Atomic Energy Act of 1954, as amended, and its legislative history. See Uranium Enrichment Service Criteria and Related Matters, Hearings Before the Joint Committee on Atomic Energy, 89th Congress, 2d session 29, 33, 121, 319, 517 and 518 (August 2, 3, 4, 16 and 17, 1966).

We held in our December 27, 1984 legal opinion and still find that in order for enrichment program assets to be legally written-off and not recovered in the service price from customers, Congress must amend the Atomic Energy Act to authorize it. A criteria change will not suffice, since the criteria must be in accord with the statute.

PRICING

Proposed 10 C.F.R. § 762.4 provides:

"[Energy] shall negotiate prices in individual enrichment service contracts in accordance with an overall approach intended to maintain the long-term competitive position of [Energy] while obtaining the recovery of the Government's costs over a reasonable period of time."

51 Fed. Reg. 3631 (January 29, 1986). In addition, in the Supplementary Information accompanying the proposed revised criteria, Energy states that this "approach will permit [Energy] to pursue a vigorous program to regain market share." 51 Fed. Reg. 3628 (January 29, 1986). Elsewhere in that statement, Energy asserts that the Atomic Energy Act "does not mandate any particular form of pricing. Rather, it grants [Energy] considerable flexibility to determine what prices best achieve the objectives of [Atomic Energy Act], including recovery of the Government's costs over a reasonable period of time." Id.

Whatever the policy merits of this proposed pricing approach of Energy, it is inconsistent with the Atomic Energy Act and its legislative history governing the substantive requirements of the uranium enrichment program.

Subsection 161(v) of the Atomic Energy Act of 1954, as amended, 42 U.S.C. § 2201(v), provides that "any prices established under this subsection shall be on a basis of recovery of the Government's costs over a reasonable period of time." Moreover, the reports of the Joint Committee on Atomic Energy accompanying enactment of subsection 161(v) directed that "the charges for enrichment services" be set forth in the criteria. H.R. Rep. No. 1702, 88th Congress, 2d session 16 (1964); S. Rep. No. 1325, 88th Congress, 2d session 16 (1964)

Energy's proposed pricing approach chooses as primary pricing objectives of the program principles which are not referred to in the Atomic Energy Act or its legislative history—namely, the maintenance of Energy's long-term competitive position and pursuing a vigorous program to regain market share. On the other hand, it relegates to a secondary objective the primary statutory pricing requirement of obtaining the recovery of the Government's costs over a reasonable period of time. Moreover, the charges for enrichment services are not set forth in the proposed criteria as directed by the Joint Committee.[6] Rather, there is to be no fixed price or pricing mechanism. 51 Fed. Reg. 3628 (January 29, 1986). Energy plans to negotiate prices in individual enrichment services contracts.

Energy's new pricing approach has no particular sanction in present law nor was it contemplated by the committees considering the legislation. Accordingly, whatever its policy merits, in our view, it should not be accomplished through rulemaking. This major reorientation of pricing policy and practice should only be legally accomplished by amendment of the Atomic Energy Act's pricing provisions.

[6] We recognize that current enrichment service criteria also do not specify a particular price for enrichment services. *See* 44 Fed. Reg. 28875, 28876 (May 17, 1979). However, they provide for a pricing mechanism. They specify the costing elements to be included in the price, and were based on full recovery of the Government's costs and the prohibition on the making of a profit. Accordingly, the service charge or price was whatever was required to recover the listed costs over a reasonable period of time.

OTHER TERMS

Subsection 161(v) of the Atomic Energy Act of 1954, as amended, 42 U.S.C. § 2201(v), provides that Energy "should establish criteria in writing setting forth the terms and conditions under which [uranium enrichment] services provided under this subsection shall be made available." In addition, the reports of the Joint Committee on Atomic Energy accompanying the enacted subsection 161(v) state: "Included among these 'terms and conditions' would be such matters as the charges for enrichment services would be offered, and *the general features of standard contracts for uranium enrichment services*." (Emphasis added.)

H.R. Rep. No. 1702, 88th Congress, 2d session 16 (1964); S. Rep. No. 1325, 88th Congress, 2d session 16 (1964)

In implementation of these requirements, the 1966 criteria specified two standard types of contracts—Firm Quantities Contracts and Requirements Contracts. The basic principles of each type were set forth along with the more significant provisions of the contracts. See 31 Fed. Reg. 16479 (December 23, 1966). Similarly, the criteria adopted in 1973 and, in large part, still effective today identified the Fixed Commitment Contract as its primary contracting vehicle and specifically set forth some new basic principles and concepts to be employed in the contracts. 38 Fed. Reg. 12180, 12181 (May 9, 1973) and 44 Fed. Reg. 28875 (May 17, 1979)—

Moreover, current criteria include many guidelines on contract features in general terms, which must or may be included in Energy's uranium enrichment contracts in detail. Examples are provisions concerning advance contracting, fixed commitments, advance payments, delivery schedules, chemical form and specifications of feed material, the basis on which charges for enriching services will be calculated, the basis on which charges for termination by the customer will be calculated, delivery, transfer of title, and others.

Under Energy's proposed revised criteria, this practice will no longer be continued. Energy will have no standard contracts. Moreover, the proposed criteria contain virtually no significant general features to be contained in contracts. Prices are to be individually negotiated, as are termination charges and other contractual provisions. In addition, Energy explicitly states that "a contract can contain terms and conditions not specified in the criteria. No prohibition against a term or condition is intended by its non-inclusion in the proposed criteria." 51 Fed. Reg. 3629 (January 29, 1986). The only restriction is that "the terms and conditions in a contract cannot be inconsistent with the criteria." *See* proposed 10 C.F.R. § 762.14.

The purpose of the statutory requirement that the terms and conditions under which enrichment services will be provided be established in published criteria and the directive of the Joint Committee on Atomic Energy that the charges for services and general features of standard contracts be set forth in the criteria was to enable the exercise of some congressional control over the content of uranium enrichment contracts and enrichment prices prior to their becoming effective, as well as facilitating congressional oversight. Energy's proposed revised criteria severely limit all of these objectives. When Energy's predecessor (the Atomic Energy Commission) proposed very general criteria in 1973 excluding some of these ele-

ments, they were rejected by the Joint Committee on Atomic Energy. Several examples of statements made by committee members at that time are illustrate of their reaction:

1. "Senator Jackson. * * * the revised criteria omit any reference to the types and significant details of the contracts under which enrichment services will be provided." Proposed Changes in AEC Contract Arrangements for Uranium Enriching Services, Hearings Before the Subcommittee on Energy, Joint Committee on Atomic Energy, 93rd Cong., 1st Sess. 2 (March 7, 8, 26; and April 18, 1973).

2. "Representative Price. Since the significant features of the new types of contracts are not described in the criteria there appears to be nothing that would require the Commission to return to the Joint Committee should it decide to vary the terms and conditions under which it would provide the uranium enrichment services. This seems to be a substantial departure from the intent of section 161(v) * * *." Id., at 32.

3. "Representative Holifield. * * * What control do you feel the Joint Committtee will have over the essential terms and conditions of this or any other contract for enriching services under the new criteria?

"Mr. Allen [President, Yankee Atomic Electric Co., and Vice President, New England Electric System]. None.

"Representative Holifield. Thank you. I came to the same conclusion. * * * The new criteria would eliminate any supervision of this committee over these things." *Id.*, at 83.

We believe that the failure of Energy's proposed revised criteria to provide for standard contracts and to set forth their material general features is contrary to the intended structure and operation of the uranium enrichment program as reflected in the Atomic Energy Act and its legislative history.

NONDISCRIMINATION

Subsection 161(v) of the Atomic Energy Act of 1954, as amended, 42 U.S.C. § 2201(v), requires that prices for enrichment services "shall be established on a nondiscriminatory basis." Proposed 10 C.F.R. § 762.7 provides:

"The same prices, as well as other terms and conditions, shall be available to all similarly-situated customers on a nondiscriminatory basis, reflecting the cost of the enrichment services supplied to those customers."

Although the language of this proposed nondiscrimination criterion refers to the statutory language, we have reservations whether the statutory standard can be satisfied in practice if the proposed criterion is implemented as reflected in Energy's Supplentary Information and the other proposed criteria.

Energy's proposed revised criteria provide that it will negotiate price, as well as other terms and conditions of a contract. Not only will there be no fixed price, but no fixed price mechanisms. There will be no standard contracts. Similarly, there need not be standardized terms and conditions for other aspects of a contract. Despite these circumstances, Energy states in the Supplementary Information accompanying the proposed criteria provisions that the statutory nondiscrimination provision means that "all customers * * * be afforded an opportunity to strike a bargain equal in attractiveness to those available to other customers." 51 Fed. Reg. 3629 (January 29, 1986). However, no provision is made in the criteria for disclosure of pricing and other contracting information to other customers when a particular contract is entered into.

In these circumstances, we have reservations whether the proposed criterion provision will assure in implementation the nondiscriminatory treatment required by the statute. This is a very different factual situation from that existing previously, when there were standard contracts, general features contained in these contracts, and a published price for services available to all customers.

CONCLUSION

For the above reasons, we have concluded that Energy's proposed revised uranium enrichment services criteria are contrary to the letter and legislative history of the statute governing the substantive requirements of the uranium enrichment program. Consequently, they cannot be legally accomplished through rulemaking, whatever their policy merits. We recommend that, if Energy wishes to continue to pursue the policy initiatives reflected in these proposed criteria revisions, these policy changes be introduced in the form of a bill in Congress and formally enacted before any further attempt is made to implement them.

Notwithstanding these conclusions, it must be recognized that the current market situation with regard to the sale of uranium enrichment services is far different from conditions which prevailed at the time the full cost recovery requirement was enacted. As we have stated on a number of occasions in the past, there is a compelling need, because of the market changes and constraints imposed by full recovery pricing in the current market environment, for the executive branch and the Congress together to reexamine the fundamental purpose and structure of the uranium enrichment program.

Sincerely yours,

MILTON J. SOCOLAR,
Acting Comptroller General of the United States.

Mrs. SCHROEDER. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. LEWIS].

Mr. LEWIS of California. Mr. Speaker, I thank the gentlewoman for yielding this time to me.

Mr. Speaker and Members, I reluctantly rise in opposition to this conference report. As a member of the Appropriations Committee it is not something that one enjoys doing.

I must say that it was my intention to come to the floor and support the conference report until just recently.

I would like to raise a couple of questions and would hope that the Members would focus on these questions.

First, it seems to me that we ought to take a close look at an item called the Budget and Impoundment Act. Not so long ago, the House, in its effort to improve communications between the committees around here, to make some sense out of the amount of money we are spending every year and relate that reasonably to our revenue, passed a Budget Act with the hopes that that communication would take place.

Instead it has become the excuse each year for delaying our work. We find ourselves under the Budget Act, not only delaying the work of the authorizing committees, but in turn putting pressure on our committee, the Appropriations Committee, so that we end up passing only about half of our appropriations bills on the floor, and in turn the Senate is held up. So at the end of the session, we find ourselves in a continuing resolution process where the entire business of Government is in one package, in this case $576 billion in one package.

That is not good enough, ladies and gentlemen. Next year—early I hope—we should revisit that Budget and Impoundment Act and consider, if not eliminating it entirely, at least revising what we have done.

Second, ladies and gentlemen, I find myself in the uncomfortable position today having to make the decision not to sign the subcommittee report of one of the subcommittees on which I serve. That is the Subcommittee on Foreign Operations. I want to extend my appreciation to the gentleman from Massachusetts [Mr. BOLAND], where I work with him on his subcommittee, for his spirit of bipartisan effort; and the same to my colleague from California [Mr. FAZIO], where we work on some of the toughest business around here in a bipartisan fashion.

Because of the pressure of time, we found ourselves unfortunately in the Foreign Operations Subcommittee unable to deal in that fashion. Today in that subcommittee I had no chance to look at the numbers in my subcommittee report and therefore was not able to sign the report.

I urge the Members to seriously consider this vote and vote "no" on the continuing resolution.

Mr. McDADE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I shall not take much time to discuss the defense portion of this continuing resolution.

Our chairman has explained the details contained in our bill. We have complied with our obligations under the Budget Act. Our overall dollar figures, in terms of both budget authority and outlays meet the requirements of Gramm-Rudman.

Our bill tracks the agreements reached in the defense authorization conference. I would remind my colleagues on this side of the aisle that items of great significance to the administration—the funding level for SDI, treatment of chemical weapons, SALT II, antisatellite weapons, nuclear testing—all the agreements reached late last week have been incorporated into this bill.

In addition, we have included the arrangements agreed to in the Authorization Committee with respect to special operations forces, and also, an area of particular interest to the House, procurement reform.

Finally, I would call to your attention an important feature of this bill, namely, the mechanism for funding a

new space shuttle, the fourth orbiter needed to replace the *Challenger*.

I could go on with particulars, but at this point I would like to step back and say just how proud I am of the works of my colleagues on the Conference Committee who produced this legislation.

I have been in this House for 24 years. In that time, I have never seen a more complicated, more stressful, more confused situation than what our committee faced this year in putting together the defense bill.

You all know the problems we faced: Severe dollar restraints because of Gramm-Rudman, serious policy disputes over arms control, and until late last night, no solid agreement on an authorization to give us the parameters within which we would work.

Despite these problems our defense subcommittee—and our counterparts in the other body—rolled up our sleeves and turned out the best possible product under the circumstances. This bill takes care of our people in uniform; it increases funds for readiness; it contains the modernization of our forces, conventional and nuclear.

This bill certainly isn't perfect, and I'm not here to tell you that it is. But I can tell you that you will not see a better bill if the continuing resolution fails.

We are under the fiscal 1986 levels. We are under the authorizing conference, we are under the House allocation numbers. And we are far under what the President says he needs.

Going back to it again won't make anyone any happier. We were in conference 7 days and 7 nights looking at more than 3,000 individual line items.

Mr. Speaker, as nearly as I can tell, no one is satisfied with the defense bill. It is either too high or too low. It is either too restrictive or too permissive. It does too much or it does too little.

I suggest therefore, that our work product is about the best we can do.

Mr. Speaker, I do not want to prolong this debate. But I must recognize the magnificent work of our chairman, the gentleman from Florida, and the work of each and every one of the conferees.

Our job was most difficult and we would not have finished our work had not the House conferees been together in our determination to work our way through the issues.

Some of my colleagues who were conferees have trouble with this bill and I appreciate their difficulties. But I think I am safe in telling this body that any noises of dissent from the conferees should not be taken as disarray within our committee.

Our committee is together in our desire for the best defense for the least cost and to that end, we worked for the budget levels achieved in this bill.

I hope that votes cast against this conference report are not directed against the defense portion of it.

We are below every dollar target we or others set for us, and we have provided a level of defense I believe to be adequate for our needs.

□ 2040

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from Illinois [Mr. YATES].

Mr. YATES. I thank the gentleman for yielding me this time.

Mr. Speaker, I am pleased to bring the Interior bill to the floor as a part of the continuing resolution. I agree with the gentleman from California [Mr. LEWIS]. I think it is unfortunate that our bills are not passed as individual bills.

The Interior bill was brought to the House floor and passed in July. It went over to the Senate and we waited and we waited for the other body to act. It is now a part of the continuing resolution. It should have been a single bill that had been sent to the Senate by itself.

Mr. Speaker, this bill includes $4,125,802,000 for programs of the Department of the Interior; $1,665,845,000 for the Forest Service; $935,350,000 for programs of the Department of Energy; and $1,581,408,000 for Indian health, Indian education, the Smithsonian Institution, the National Endowments for the Arts and the Humanities and the other related agencies of the bill, all of which are described in detail in the statement of the managers accompanying House Joint Resolution 738. Included in these amounts is $188,101,000 for land acquisition which will help fill out our national parks and forests and acquire critical wildlife habitat.

A significant change to H.R. 5234 which passed the House on July 31, 1986 is a provision for a 1-year increase in National Park System entrance fees to further park purposes. The House bill continued the parks fee schedule as it exists today. We were opposed to the Senate schedule of increased fees. The Senate had proposed a top fee of $7.50 per vehicle which we refused to accept. Fees at other parks would be less, based on the quality of the facilities available. Recreation parks in urban settings and parks with multiple access points where fee collection would be cumbersome are exempt. We finally agreed to a top fee of $5 for major parks and much lower fees for other units of the Park System.

In order to assure that increased fees go to park purposes rather than serving as a tax, the managers agreed to a $15 million fund for enhancements to parks. Half of this amount is to be distributed to all parks, in proportion to the park's operating budget and half is to be distributed to the fee collecting parks based on their share of fees collected.

Mr. Speaker, I personally was strongly opposed to the Senate provisions greatly expanding the roads program of the Forest Service. I supported the House provisions. I was in the minority and I opposed the amended Senate provisions which were approved by the conferees.

Another significant provision is striking new budget authority for continuing to fill the strategic petroleum reserve since there is approximately $550 million available from unobligated balances for oil purchases to allow filling the reserve in fiscal year 1987 at up to 90,000 barrels a day.

With respect to the Outer Continental Shelf, the conference agreement contains the compromise agreement proposed by the House for leasing areas off California. This agreement provides review by the Secretary of the Interior of the two proposals developed by the congressional negotiating group as well as the proposal developed by the Governor in accordance with section 18 of the OCS Lands Act amendments. The Secretary is also instructed to provide the congressional group a 30-day period to review and comment on a draft copy of his final program for offshore California prior to its submission to the President and the Congress. In this submission the Secretary is required to indicate, in detail, why any specific recommendation contained in these proposals has not been incorporated. The agreement provides for continuing prelease activity in the three California planning areas and delays sales 95 and 91 in southern and northern California, respectively. A great deal of time and effort went into forging this agreement and the managers are pleased to include this proposal. The conference agreement also maintains the moratorium on leasing in the Georges Bank-North Atlantic planning area.

One area of true disagreement is the buy American provision which was contained in the House passed version of the Interior appropriations bill. The managers could not come to any agreement or compromise on this language which contained specific minimum percentages on American labor and materials which apply to oil rigs being purchased for offshore leasing activity.

Language has also been included by the managers which delays the implementation of a settlement on oil shale claims in Colorado for 180 days, provided the Courts and the parties to the agreement concur. I sought to amend the Senate amendment to strike the right of parties to the agreement to agree to the 180-day time period and to extend the time to September 30, 1987, to provide adequate time to Con-

gress to review the problem. The Senate refused.

The bill contains funding for the Navajo and Hopi Indian Relocation Commission. There is no forced eviction in this relocation program and priority for moves is given to those who have been certified eligible and who have selected a new or replacement home. With the adoption of the House language by the managers, those that have complied with the law are not penalized. The funding in this bill enables the Commission and the Bureau of Indian Affairs to go forward with housing people who have been uprooted and may be living in adverse conditions.

Recognizing the importance of the quality of the Nation's water, the managers have included $7 million to continue a pilot scale national water quality assessment to be coordinated by the U.S. Geological Survey. The managers continue to be concerned with the Nation's water quality in light of recent problems with agricultural drainage, such as at the Kesterson Wildlife Refuge in California, and toxic waste burial and contamination which led to the inception of this program in fiscal year 1986.

In clean coal technology, the managers have included language which provides for submission of statements of interest and information proposals on retrofit within 60 days after a Federal Register notice soliciting such statements and proposals is published. In addition, a summary report is required on March 6, 1987, and a detailed report is required within 120 days of receipt of such statements and proposals.

In energy conservation, $112,450,000 has been provided on a contingent basis for low-income weatherization and schools and hospitals. The conference agreement on the Budget Reconciliation Act of 1986 provides that up to $200 million from product escrow amounts held by the Department of Energy shall be made available for State energy conservation programs, including weatherization and schools and hospitals, as long as enough funds remain in escrow for restitution of injured parties. If funds are less than $200 million or if the legislation does not pass, funds will be appropriated directly from escrow accounts.

Under the Bureau of Indian Affairs, the conferees have agreed to fund several projects, including the Fort McDowell irrigation project, from unobligated jobs bill funds, which are no longer needed. The reprogrammed funds are to come from the Colorado River power project and the Uintah and Ouray irrigation project.

In conclusion, Mr. Speaker, I am pleased to bring the chapter containing the Interior and related agencies appropriation bill for fiscal year 1987 to the floor. The total for the chapter as recommended by the managers is $8,308,405,000. The conference agreement on House Joint Resolution 738 incorporates some of the provisions of both House and Senate versions of the Department of the Interior and Related Agencies Appropriations Act, 1987, and is a reasonable compromise.

The bill reflects our continuing investment in America and the American people. It provides the amounts necessary to maintain and protect our national parks, wildlife refuges, public lands, and national forests.

President Kennedy once said, "To further the appreciation of culture among all people, to increase respect for the creative individual, to widen participation by all the processes and fulfillment of art—this is one of the fascinating challenges of these days." Mr. Speaker, it is even more challenging in a time when limited funds are available, yet, this bill provides funding for the arts and the humanities at a level which will allow our Nation to continue to advance and promote a heritage which we can pass along to our children, our grandchildren, and generations to come.

Mr. Speaker, this is a good chapter. It could have been better had we received Senate concurrence, but it is the product of bargaining. It continues important programs necessary for the protection and enhancement of our unsurpassed natural resources, while maintaining fiscal responsibility. I want to commend the conferees for their efforts and contributions throughout this conference. In particular, I want to note the contributions of the ranking minority member of our subcommittee, RALPH REGULA.

Mr. Speaker, I would like to clarify that statements which appear in either House Report 99-714 or Senate Report 99-397 and are not contradicted in the statement of the managers contained in the conference report accompanying House Joint Resolution 738 would stand.

Mr. Speaker, I recommend that House Joint Resolution 738 be adopted.

Mr. FAZIO. Mr. Speaker, will the gentleman yield?

Mr. YATES. Mr. Speaker, I yield to the gentleman from California [Mr. FAZIO].

Mr. FAZIO. Mr. Speaker, I rise in strong support of this conference report, not because it is perfect but because it strikes difficult balances between literally thousands of competing issues in the fairest way available to us.

As a matter of procedure, of course, enacting the entire Federal discretionary budget in one sweeping measure is undesirable. Too many of the issues resolved in this bill will go unremarked upon. No doubt there are many which could be improved upon were we to enjoy the time to focus on them.

Nonetheless, since we have no choice but to fund the Government in an omnibus bill, and since in the main this bill represents the whole to which the 13 separate bills would add up, I can support this measure with enthusiasm.

I do think several improvements could be made to the resolution on the floor, by resolving two items being reported in true disagreement in such a way as to include them in the final measure sent to the White House. One is the greatly modified "Buy-America" provision affecting the composition of materials in offshore oil rigs constructed in U.S. territorial waters. The other is a requirement that all wine and liquors imported into the United States have their ingredients reported to and certified by the Bureau of Alcohol, Tobacco and Firearms.

In both these instances we would only be applying standards to our foreign competition which we apply to ourselves. American consumers and workers will be better off.

I am particularly happy about one provision in this bill which prevents the transfer of distribution system and drain costs from water users in the San Luis unit of the California Central Valley project to the power users of that project. This provision reasserts the policy in the Central Valley project of having local water beneficiaries be responsible for their own drain and distribution systems.

The amendment was made necessary by a new opinion by the Solicitor for the Department of the Interior which contends that drains and distribution systems in the San Luis unit can be repaid through the unit's water service contract with the CVP, leaving open the possibility that any drain and distribution costs in excess of a standard called the San Luis unit's "ability to pay" could be transferable to the power users of the CVP.

As I assured members of the House Appropriations Committee when they first agreed to amend this provision into the continuing resolution, the amendment does not pass costs for these systems on to the taxpayers by virtue of preventing the ability-to-pay mechanism from transferring the costs to the power users. It deals merely and exclusively with costs transfers within the Central Valley project. It does not affect the relationship between the CVP and the Treasury.

It may be that there are legitimate arguments for the absorption by the taxpayer of part of the drainage costs associated with the selenium problem in the San Luis unit lands, though both the San Luis unit and the Bureau of Reclamation itself have repeatedly assured Congress: one, that the costs of the problem will remain within the unit's ability to pay; and two, that existing CVP repayment policy requires that the San Luis unit costs not be transferred outward to any other entity, within or without the CVP. These questions deserve full consideration and will have to be settled later.

Meanwhile, however, as I assured the committee and the Congress in previous statements, nothing in this provision affects requirements in existing law that the Bureau of Reclamation obtain full repayment from project beneficiaries for project features and operations. Therefore, the way things stand now, if anyone is to pay for San Luis unit drainage and distribution system costs the San Luis unit itself will.

The continuing resolution also contains at the request of myself, Mr. MCHUGH, and ultimately of the House Banking Subcommittee on Housing, a provision preventing the prepayment of section 515 rural housing loans through June 30, 1986, unless the landlord can certify that the prepayment will not drive rent increases which force out existing low-income tenants.

This provision has been compromised somewhat from the original House provision, which established an absolute moratorium on section 515 prepayments for a year, to give the authorizing committees in the Congress a chance to deal with what appears to be a crescendo of loan prepayments induced by the uncertainties in the new tax bill and lower interest rates now prevailing in the marketplace.

The compromise amendment in my view preserves the original purpose of our moratorium, while hopefully making it less onerous to our friends in the housing industry who maintain a legal right to prepay loans granted prior to 1980. Subsequent to that time, legislation enacted by Congress requires any recipient of a section 515 loan to maintain his units in low-income status for 20 years. Before that point, however, no such requirement was in effect, and the housing industry maintains existing law not only encourages them to seek to repay, but grants them an absolute right to have the Farmers Home Administration accept their application for prepayment.

Whether the FmHA must accept prepayment applications is legally disputable, but the law does consider pre- and post-1980 prepayments differently and there is reason to ease the impact of the original House moratorium to the extent consistent with what must remain the overriding public purpose: preserving the homes of low-income people and preserving our low-income housing stock while we determine what next best to do.

For these reasons, I welcome the Senate-agreed-to revisions of our original provisions, but most of all welcome the preservation of the provision itself.

LEGISLATIVE BRANCH FUNDING

Mr. Speaker, the continuing resolution funds the legislative branch for fiscal year 1987. The conferees on H.R. 5203, the Legislative Branch Appropriations Act, 1987, reached an agreement on August 15, 1986, and filed Conference Report No. 99–805. That agreement provides appropriations totaling $1,635,190,214—$1.6 billion—for fiscal year 1987. This amount is $78.9 million over the level enacted to date for fiscal year 1986 and $187,026,586—$187 million—below the budget estimates.

When the bill went to the Senate, the other body added $342.9 million for their own operations and for several other items. If the Senate items are excluded, the conference agreement is $3 million below the amount in the bill as it passed the House.

If we compare this bill to the pre-Gramm-Rudman level enacted for fiscal year 1986, including subsequent supplementals, the fiscal yeart 1987 appropriation for the legislative branch is only $12 million—less than 1 percent above that level.

Going back to fiscal year 1985, this bill is just $35 million—about 2 percent above that year. In other words, the legislative branch budget has been constrained to about 1 percent growth each year for the past 2 years.

Mr. Speaker, I will include a comparative tabulation of the conference action at this point in the RECORD.

I will not attempt to speak to each of the items we considered in conference. There were a total of 25 amendments, of which 4 related solely to Senate housekeeping items. The remainder are explained fully in the statement accompanying the conference report.

With respect to the conference agreement on the legislative branch appropriations, I want to point out that this is another example of the willingness on the part of the legislative branch to control its own spending. We are approving a very tight budget; one that has grown only 2 percent in 2 years.

We are under the section 302(b) budget resolution targets for budget authority and outlay totals. So we have met the Gramm-Rudman test as well.

Mrs. SCHROEDER. Mr. Speaker, I yield 2 minutes to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. I thank the gentlewoman for yielding me this time.

Mr. Speaker, I very rarely get upset when I come to the floor but I have got to tell you that I have seen something happen today that has upset me very much.

Earlier today we voted on a defense authorization conference report to zero out a trainer called the T-46 to provide it no money for 1987. We also provided that we would have a competitive fly off in future years.

Now, in the appropriations bill that is tucked into this conference report, we would appropriate $3.1 billion to a program that has not been authorized. In fact, we voted earlier today not to authorize the program. I have a parochial interest in this particular issue because a company in my district might participate in that competitive fly off, but I want to be honest with my colleagues.

The fact of the matter is that I just heard a colloquy between the chairman of the Armed Services Committee and the distinguished gentleman from Florida, the chairman of the Subcommittee on Defense Appropriations in which they both agreed that the bill that passed earlier today would have no force and effect.

Now, I admit to you, I am not as powerful as those two gentlemen but I am constitutionally given the same authority as they are. I want to make my own legislative history today. My history today to the Air Force is that bill we passed today is just as big as this bill and they ought to listen to it.

Let me tell you two other things. The Air Force does not even want this particular project and we hope that the Air Force prevails to not spend any money on it. I understand that this whole thing may be determined on which bill is signed first and which bill is signed last. So I am going to recommend to my senior Senator from Kansas who is the leader of the body that he make sure that the President of the United States signs the defense authorization conference report last and signs this bill first. I will do everything in my power to ensure that the feelings of this Congress in which we passed zero funding for this in a conference report, are adhered to.

I am going to vote against the conference report because of this. I grant you it is a small reason to vote against it although a thousand jobs in my district is no small reason for people at home.

It is very disconcerting to see that we zero out a program at 4 o'clock and then we add $3 billion to the program that we have not authorized at a quarter of nine.

Mr. COUGHLIN. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, the train is leaving the station. Not one Member may agree with every provision that is in this bill. It is a half-a-trillion-dollar bill. Mr. Speaker, this does meet national needs. It does restore unfair budget cuts. It does meet the deficit reduction targets of Gramm-Rudman. It is a fair and a wise bill.

It provides, my colleagues, for a major drug initiative. It provides a 5-fold increase in Superfund budgets. It continues the Brown-Coughlin provisions for arms control and satellite weapons. It restores funding for urban mass transit and for Amtrak. It provides funds for renewal and redevelopment of our cities. It is a major bill.

It is the culmination of the work of many hours by many people in this body. It is the culmination of the process of compromise. It is the culmination of the process of legislation that is indeed the hallmark of this body.

To those who are listening and watching, let us say that as the train leaves the station that it may be the last train for you to catch. If we do not pass this bill that train may be gone.

I urge support of the legislation.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Texas [Mr. WRIGHT].

Mr. WRIGHT. I thank the gentleman for yielding me this time.

Mr. Speaker, I urge an "aye" vote on this conference report. It does not please anybody in all of its particulars. However, it is the best compromise that the best minds in this Congress have been able to achieve with respect to funding levels.

Having been involved in a working of a compromise on military spending levels last week between Members of the House and the Senate and the White House, I want to include at this point in the RECORD a copy of a letter received today by the Speaker from President Reagan, in which President Reagan says:

THE WHITE HOUSE,
Washington, October 15, 1986.

DEAR MR. SPEAKER: I am pleased to learn that the House and Senate will soon act on legislation to appropriate funds for the executive departments and agencies for fiscal year 1987. I urge that Members support the product of the Conference Committee on the basis of essential and time sensitive national security concerns and other necessary programs of the Federal Government.

While I recognize that certain provisions of this omnibus appropriations bill are of concern to some Members, on balance, it is a measure that will provide funds at acceptable levels for the next fiscal year. As you know, my Administration has registered its specific objections to some aspects of the bill—not all of which have been resolved by the Conference Committee recommendations. Nonetheless, it is my hope that the House of Representatives will speedily adopt the Conference Report and act subsequently to eliminate those policy provisions that remain of major concern to me so that I can sign the bill.

I solicit your support and that of your colleagues to send this measure to my desk in acceptable form at the earliest opportunity.

Sincerely,

RONALD REAGAN

Mrs. SCHROEDER. Mr. Speaker, I yield 3 minutes to the gentleman from Iowa [Mr. BEDELL].

Mr. BEDELL. I thank the gentlewoman for yielding me this time.

Mr. Speaker, first of all let me say that there is great confusion in regard to what this bill says for REA borrowers. At least as I read the bill, it does not say that this is only for Alaska, and I hope this will be cleared up before we vote on the bill.

Second, let me acknowledge how difficult it is to get everybody together on a bill such as this. Let me say that in my opinion the problem I have with this bill does not come from the Appropriations Committee, the problem I have with this bill is that many of us who felt quite strongly about some of the arms control issues that were in what was in the House bill agreed to compromise a long, long way in order to help the President as he went to Iceland for his summit meeting.

□ 2050

As we did so, there was an agreement, we understood, by the other body, as to what would be included in the compromise agreement. We understood quite clearly that that compromise in regard to chemical weapons was that we would give up on the artillery shell and they would give up on the Bigeye bomb. That was our understanding. That was what was given to us.

As we get to the conference on the military authorization bill, we find that is not it at all. We find that what they say is we need to give up on the artillery shell, but that they will spend $90 million going ahead to build the

facilities to produce the Bigeye bomb. That takes 2 years. We have not held anything back at all because, obviously, they could not go ahead and build a bomb until they had the facilities.

So we are going to spend $90 million for facilities for a bomb where, as the General Accounting Office has said, "the flaws are so unrelenting that it is not even ready for development testing, let alone production."

I believe that a deal is a deal, Mr. Speaker. I believe that since that is what they told us it was going to be, that is what it should be. It is difficult for me to vote against this bill, but if we are going to stand and say that we expect the other body to stand up for the agreements they have, then I think we have to stand up for what we have been told to be the deal.

Under those circumstances, it is difficult for me to do so, but I am going to have to oppose this bill.

Mr. McDADE. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Ohio [Mr. REGULA].

Mr. REGULA. Mr. Speaker, this is not a perfect bill, obviously, but it was a very difficult challenge to take the multitude of responsibilities of the Federal Government and achieve an agreement that could receive the support of the President and the Members of this body.

I want to emphasize that this resolution is below the President's request. It is $2.4 billion below the President's request in budget authority; it is $14.9 billion below the President's request in outlays.

I think it is a major achievement to get an appropriations conference agreement that is below the budget request of the President. I might also point out that it is $1.628 billion below the budget authority and $2.452 below the outlay numbers that were set forth in the budget resolution that passed both Houses and was adopted as the budget for the United States for this fiscal year.

I think those are major accomplishments and I would urge my colleagues, even though they may have differences with some points in the bill, and I do myself, to recognize that in the total package it is a responsible approach to the funding for the fiscal year ahead.

As pointed out by my colleague, the gentleman from Pennsylvania [Mr. COUGHLIN], it is the train at the station, and I think that, while we may not be pleased with every dimension of the bill, I do know from serving on two of the conference committees that the members worked hard and gave up on a lot of good projects in both Interior and State-Justice to meet the targets set forth in the President's budget, as well as in the budget resolution we adopted.

For those reasons, I urge my colleagues to support this measure tonight.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The Chair announces that the gentleman from Mississippi [Mr. WHITTEN] has 8 minutes remaining; the gentlewoman from Colorado [Mrs. SCHROEDER] has 7 minutes remaining; and the gentleman from Pennsylvania [Mr. McDADE] has 6 minutes remaining.

Mr. WHITTEN. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, the point has been made here about a provision that applies to a rural electric cooperative in Alaska. It is a demonstration project that does not apply anywhere else in the United States, as so represented to me.

This was done without my knowledge or notice, and I just wanted to disabuse the membership of any feeling that this applies on a general basis to other electric or telephone cooperatives. To make this clear, we will take care of it next time. It was represented to me and I believe it applies only as a demonstration project and does not apply in the rest of the United States.

Mrs. SCHROEDER. Mr. Speaker, I yield 2 minutes to the distinguished new Member, the gentleman from Hawaii [Mr. ABERCROMBIE].

Mr. ABERCROMBIE. Mr. Speaker, one of my first votes as the last Member of the 99th Congress to be sworn in was on the passage of the continuing resolution. As you know, it passed by a single vote. My vote in favor of the continuing resolution was predicated in great measure on the results of literally years of effort on the part of a broad range of Members—bipartisan and crossing ideological lines—resulting in a comprehensive series of arms control measures.

These provisions were so far reaching in impact that those who had serious reservations, and even antipathy, toward such items as aid to the Contras were willing, and yes eager, to support the continuing resolution in the name of the safety of humanity and an unprecedented chance for advancing the cause of peace.

We have heard much tonight about no legislative action ever being agreeable on all points. But what is the value of citing various elements which make up the continuing resolution if all of the activities toward which the language is directed are destroyed in a nuclear holocaust?

We are blundering toward disaster of incalculable proportion. A great opportunity to take a giant stride toward peace has been lost at the Iceland summit.

The provisions in the original House-passed continuing resolution were essentially set aside at the request of the President to allow him a free hand at the summit meeting. That act of faith by this body has been shunted aside by the failure of the President to seize the moment of possibility.

We must try to restore the integrity of what was at the heart of the original continuing resolution. This vote is the only opening available to send a clear message that our support for arms control was not casual rhetoric or supported merely for the sake of form.

Tonight, I am wearing the blue armband of support given to me by the four veterans who are at this moment fasting on the steps of the Capitol in their quest to have us take some positive action to end aid to the Contras. Many of us cited the House position on arms control in the continuing resolution as a reason for them to look to the wider issues that would help bring their particular concerns into sharper focus.

They are bearing witness with their lives for the sake of peace. We must do the same with our votes. Our vote is not a negative force, but one which affirms life. It is not to deny, but to free ourselves from the bondage of fear, hatred, and purposeless rage.

This evening the President sent a message to the House asking us to pass this bill just as he did when he asked us to trust his judgment in Iceland. He asked for our support "on the basis of essential and time sensitive national security concerns * * *" What is more "essential" than ending the arms race to oblivion? No act can be more sensitive and timely in respect of national security than ending our lock step, blind expenditures on the forces of destruction.

It is precisely for these reasons that we need to reject the President's call this time and send forth one of our own—a call not to arms but to reason and hard bargaining on behalf of the peace of the world.

Mr. McDADE. Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from Florida [Mr. LEHMAN].

Mr. LEHMAN of Florida. Mr. Speaker, I rise in support of the conference report.

For those programs funded under the Department of Transportation and Related Agencies Appropriations Act, the conference report would provide a total spending level of $25.5 billion for transportation programs for fiscal year 1987. This is comprised of $10.253 billion in new budget authority and $15.259 billion in contract authority obligation limitations. The new budget authority included for these programs is $31.5 million less than the House-passed resolution and $55.6 million more than the Senate-passed resolution.

The conference agreement also includes an additional $128 million for the Coast Guard in Title II, an additional $2 million for the newly established Aviation Safety Commission, and three statutory air traffic controller workforce requirements. These minimum requirements deal with total controller staffing, systemwide full performance level controllers, and minimum full performance level controller staffing at each center and each major terminal facility.

Mr. Speaker, the transportation section of the conference report is within the committee's section 302(b) allocation made pursuant to the budget resolution. We have gone the extra mile to continue our vital transportation programs and still contribute toward overall fiscal restraint. It deserves your support.

I insert at this point in the record a table giving the conference figures on H.R. 5205, the Department of Transportation and Related Agencies Appropriations Act, 1987, in detail.

	FY 1986 Adjusted	FY 1987 Estimates	House	Senate	Conference

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. McHUGH].

Mr. McHUGH. Mr. Speaker, I ask for this time for the purpose of inquiring in the process of a colloquy about a particular provision in the bill.

In the 1985 farm bill, Congress set minimum quantities for section 416 donations, at least 500,000 tons of grains and oilseeds and at least 10 percent of total dairy stocks.

Isn't it true, Mr. Chairman, that the section 416 quantities in the conference report do not count against these mimimums and are in addition to the quantities set forth under the 1985 farm bill?

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. McHUGH. I yield to the gentleman from Mississippi.

Mr. WHITTEN. Mr. Speaker, that is correct.

Mr. McHUGH. Mr. Speaker, I thank the gentleman.

Mrs. SCHROEDER. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. FRANK].

Mr. FRANK. Mr. Speaker, I hope we defeat this conference report.

The President of the United States says it is an OK spending level. You may remember, some of you, a few weeks ago, when we heard ringing denunciations of the fact that this was the largest spending in history.

Of course, it is, to a certain extent. The country gets bigger and we grow every year. That is a profundity on the order of saying that a child gets bigger every year of his or her life. The question is the rate of growth.

But this Chamber was ringing with Republican denunciations of this big spending. We have had about 50-some-odd minutes of debate. During that 50 minutes on that continuing resolution, we have had one 2-minute speech by a Republican against it. The tigers have been caged, apparently. The President has spoken.

What has happened is a game that is coming somewhat to an end. It is a game of Members on the other side voting "no" and praying "yes" on appropriations bills.

Members have wanted the bills to pass and have wanted to vote "no" so they can then denounce people for big spending when they knew it was an appropriate level.

The level of spending in this continuing resolution, is approximately the level that called forth the most stunning denunciations. One Member said, "This costs more than the Hanging Gardens of Nebuchadnezzar." He did not pronounce it as well as I.

□ 2100

Well, yes, star wars does. Star wars does cost more than the hanging gardens. A hanging nuclear system costs a lot more than hanging gardens.

There is a lot of spending in this bill. The gentlewoman from Colorado took the time, she did not have any competition on the other side for 20 minutes, but one Republican came over and asked if he could speak against it.

So what has happened is this. This long-time game of people on the other side saying, "Let's vote no and let the dummies on the other side pass it so we can have our cake and eat it, too. We get all our defense spending, we get all our agriculture spending, but they will have to vote for it and then we will go and denounce them for being big spenders and we will go home and take credit for the big spending that we denounced them for." That is over, because the minority whip spoke for the bill.

Ronald Reagan says he is for this bill. I would not want to give him a quiz on what is in it, but he says he is for it and he can live with the spending level.

The Director of the OMB, Mr. Miller, from the office of mirrors and blue smoke, he says it is OK, too. He does not like a couple of the added provisions.

So what is at issue in this bill? What is at issue in this bill is aid to the Contras. The spending level is apparently not an issue. Ronald Reagan says it is fine. Jim Miller says that Ronald Reagan is OK, so the spending level is OK.

The tigers of fiscal responsibility seem to have gone away. Maybe they are all watching the ball game or maybe they are in a ball game, but they certainly are not denouncing the level of spending.

What are we talking about here? We are talking about arms control measures that we voted for and we said we cannot tie Ronald Reagan's hands. I said last week and I am going to repeat it. Being accused of keeping Ronald Reagan from reaching an arms control agreement is like being accused of keeping Ghandi from eating a steak dinner. He was not going to do it anyway.

But in deference to that, we said no arms control, so we have a continuing resolution and that is why the Republicans are so happy with it. It does not do very much about arms control, except the Asat ban which we continue. If the President wants to break out of SALT, he can do it.

We got an offer from the other body, and I say this with no disrespect. I just repeat the words. We were told in the negotiations, "Be of good cheer. The other body is prepared to really be decisive. They will toughen the nonbinding language." Well, we got really tough nonbinding language, but the President can break out of it.

So that is what has happened. All this talk about spending has not subsided. The Republicans are not making any fight. They are going to be voting for this in substantial numbers.

Mr. PORTER. Mr. Speaker, will the gentleman yield?

Mr. FRANK. Mr. Speaker, I will yield to the gentleman from Illinois, if the gentleman has finally been moved.

Mr. PORTER. Mr. Speaker, I assume the gentleman was in watching the ball game when the rule was under consideration and I made 5 minutes of remarks against the continuing resolution and other Members on this side of the aisle did, too.

Mr. FRANK. No. I heard the gentleman very carefully when the rule was up speak against it. The gentleman spoke against the continuing resolution during the rule, but I have not heard, and I will repeat what I said, when the continuing resolution itself was up, Members on the other side, with one or two exceptions, have not spoken against it, because there are some Members who sincerely want this defeated. There are other Members who want to be able to vote "no"; but what happened was, people should understand it, last year the continuing resolution came up and it was defeated. Some of us who thought it had too much for the military and some people on the other side and the result was less money for the military, so some of the Members on the other side now realize that the old game of voting no and praying yes—not praying yes, but hoping yes, let us keep the separation of church and state—has ended; so we now have all of these great speechmakers, and they were not here.

Yes, we did get a 5-minute speech against the bill on the rule and maybe we will get a speech against the rule on the bill, but we did not get many speeches against the bill on the bill, because people want this. They want the money for the Contras and they do not want any arms control.

I am going to vote against this and I hope other Members will, too. Vote against this on behalf of truth in advertising.

Mr. CONTE. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. DORNAN].

Mr. DORNAN of California. Mr. Speaker, I am pleased that this continuing resolution will enact my August 6, 1986 amendment to the Treasury/Postal appropriations bill. This amendment gives the U.S. Postal Service civil forfeiture authority it needs to enforce existing laws against child pornography.

When the 98th Congress enacted the Child Protection Act, the Postal Service—the lead agency in investigating violations of the statutes amended by the act—inadvertently was not included among those enforcement agencies having civil administrative authority to seize property used to violate the

statute and to confiscate all profits from violations. Nor was the Postal Service given clear authority to request the Justice Department to initiate civil judicial proceedings against such seized property. The authority to conduct seizures and forfeitures, and thereby take the profits out of the slimy hands of child pornographers, is a major feature of the act. Additionally, because the Postal Service bears the costs of enforcing the statute rather than relying upon appropriations, this amendment allows the Postal Service to retain the proceeds of civil administrative forefeitures. Existing statutes requiring that proceeds of judicial forfeitures be deposited in the Treasury are not effected.

By passing this amendment into law, we are giving the Postal Service the weapon it needs to fulfill its enforcement responsibility under the Child Protection Act.

Mr. CONTE. Mr. Speaker, I yield myself as much time as I may consume.

Mr. Speaker, again I plead with my colleagues, as late as we are, 2 weeks into the fiscal year, do not take it out on the Appropriations Committee. We did our level best. We have worked hard. We pushed these bills through the House a long time ago. The whole trouble is that the system has failed. I said it time and time again. I said it when we passed Gramm-Rudman.

Now, I know that there are certain Members in this House, including myself, who did not like the agreements on the defense part of the bill, but we had our chance here today. We had our chance. I voted against the conference report on the armed services authorization. That is where the deal was made. The deal was not made in the appropriations process. The deal was made in the armed services authorization.

Now, if these people did not have a part in making that deal, I feel sorry for them, but do not take it out on the continuing resolution.

This is the only train left, and I plead with my people on my side, I have a responsibility here tonight to ask a majority of the Republicans to vote for the continuing resolution.

Knock down the continuing resolution, and what have you got? The Government closes down.

You talk about money in this bill, there is $9.1 billion in this bill over the President's budget for the programs that you people and I fought for. There is $396 million in here to try to find the answer for AIDS.

There is more than a billion dollars in here for the National Institutes of Health over what the President asked.

Every item, higher education, elementary education, the job training program, you name it. Do you want to kill those programs? Medicare, Medicaid, that is what you are voting against. If you kill the continuing resolution, you have not accomplished anything. At midnight tonight, another 3 hours, the Government stops.

Now, I think I would like to go home and see my people.

I have been with you now for 3 weeks in conference. I am tired. I want to go home and see my people. I think a lot of you here want to go home and see your people.

If we defeat the continuing resolution, we will come back again with another continuing resolution and it will start all over again. We can go on and on endlessly.

Maybe we ought to pass a short continuing resolution and all come back here in a lameduck session. Maybe that is the way to do it. Look at the money the Government is going to save on those junkets. We will all meet here in November and December. It might be a good idea.

I plead with you, I plead with the Members on my side, if you are watching television, vote for the continuing resolution. Let us get this over to the Senate and then we can get on with the other problems we have, the debt limit and a few others, and get out of here and close up this Congress.

It is nothing to be proud of to stand on this floor 2 weeks into the fiscal year and not have passed one appropriation bill. We do not like it, but it is because the system has failed. When the debt limit comes in here I am going to have an amendment, if they give me that kind of a rule, to repeal Gramm-Rudman-Hollings, and to repeal the Budget Act of 1974, creating another layer of Government which has almost paralyzed this Congress and certainly has paralyzed the Appropriations Committee.

I plead with you, I am on the same side as you are on some of these issues, but I plead with you to vote for the continuing resolution and I hope there is a good majority on this side that will do so.

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from Michigan [Mr. WOLPE].

Mr. WOLPE. Mr. Speaker, I thank the gentleman for yielding this time.

Mr. Speaker, I rise in support of the continuing resolution.

I want to particularly commend the committee for the provision of vitally needed emergency assistance for farmers that have been impacted so tremendously in a number of our States.

Much has been written about the economic costs of the rains and the floods that have hit my State of Michigan, the hail in Nebraska and the drought in Georgia. It is hard to capture the human costs that lie behind these economic statistics.

The pain and desperation of many farm families in many of our States in this country of ours is very real and a response is required.

I thank the committee for providing that response and urge support for the continuing resolution.

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from Iowa [Mr. SMITH].

Mr. SMITH of Iowa. Mr. Speaker, I support this conference resolution.

I want to point out that the parameters of this resolution were set in the joint resolution on the budget. We had to revise our 302(b) allocation after that joint resolution was agreed to and it really ill-behooves those who complain about this but supported that joint resolution, but nevertheless, after the joint budget resolution passed, we did revise our 302(b) allocations and the part which funds the Commerce Department, Justice Department, State Department, Judiciary, and related agencies, is under the 302(b) allocations.

This bill is over $14 billion under the outlay request of the President of the United States. This is as responsible a bill as we could agree upon under that joint resolution.

Mr. Speaker, I include the following summary:

Highlights of Conference Agreement on Commerce, Justice, and State, the Judiciary, and Related Agencies fiscal year 1987—H.R. 5161

Total budget authority..... $12,152,785,000
Total outlays..... 12,439,359,000

These figures are substantially within the range of the 302(b) allocations for this Appropriations Act, which are listed below:

	House	Senate
Budget authority	[1] $13,299,000,000	$12,100,000,000
Outlays	12,386,000,000	12,386,000,000

[1] Includes allowance for the Omnibus Drug bill.

Department of Commerce

Budget authority..... $2,099,160,000
Outlays..... 1,371,140,000

The conference agreement includes $205,443,000 for EDA, $197,500,000 for ITA and a total of $1,072,138,000 for NOAA including $27,500,000 for LANDSAT. In addition the amount for NOAA restores most of the programs the administration proposed to eliminate to last year's level. The conference agreement also includes $20,500,000 for public telecommunications facilities grants.

Department of Justice

Budget authority..... [1] $4,133,590,000
Outlays..... 3,410,973,000

[1] The conference agreement on title II of H.J. Res. 738 includes an additional $464 million for the Justice Department for the enhanced Federal drug law enforcement effort.

The conference agreement provides the following amounts for the following Justice Department programs:

Program	H.R. 5161	H.J. Res. 738 title II	Total
U.S. attorneys	$419,500,000	$31,000,000	$351,000,000
U.S. marshals	142,000,000	17,000,000	159,000,000
Support of prisoners	55,000,000	5,000,000	60,000,000
Assets forfeiture fund		([2])	([2])
FBI	1,260,000,000	2,000,000	1,262,000,000
DEA (includes construction)	419,500,000	60,000,000	479,500,000

Program	H.R. 5161	H.J. Res. 738 title II	Total
Federal prison system:			
Salaries and expenses	$598,807,000	$28,000,000	$626,807,000
Buildings and facilities	122,511,000	96,500,000	219,011,000
Office of justice programs	[1] 190,650,000	[2] 225,000,000	415,650,000

[1] Includes $70.3 million for juvenile justice, $44.4 million for State and local assistance grants including carryover funds; and $12 million for RISS including carryover funds.
[2] This is a new program of grants for State and local drug law enforcement.
[3] Such sums as are necessary.

In addition, the Justice Department portion of the Act includes language to permit a $5 user fee on airline and passenger ship tickets to fund immigration inspection activities for commercial aircraft and vessels. This provision is expected to generate $150 million in fees in fiscal year 1987.

Department of State

Budget authority	$2,585,697,000
Outlays	1,826,458,000

The conference agreement provides a total of $354,000,000 for the State Department's Diplomatic Security Initiative of which $127,000,000 is in salaries and expenses and $227,000,000 is in the Foreign Buildings Program of which $15,000,000 is deferred for expenditure until October 1, 1987.

The conference agreement also provides $385,000,000 for U.S. assessed contributions to international organizations of which $130,000,000 is deferred for expenditure until October 1, 1987.

The judiciary

Budget authority	$1,155,092,000
Outlays	1,039,972,000

The conference agreement on title II of House Joint Resolution 738 includes an additional $37.5 million for the Judiciary as follows:

Courts of Appeals, District Courts and Other Judicial Services

Salaries and expenses (drug offenders)	$12,000,000
Defender Services	18,000,000
Fees of Jurors and Commissioners	7,500,000

The conference agreement retains the house report language on the Pretrial Services Program. This language says that U.S. District Courts with six or more judges, that is, metropolitan courts, must establish separate pretrial services agencies in order to receive the additional positions provided in the Act for the Pretrial Services Program.

Related Agencies

Budget authority	$2,356,246,000
Outlays	2,264,177,000

BOARD FOR INTERNATIONAL BROADCASTING

The conference agreement includes $140,000,000 for grants to Radio Free Europe and Radio Liberty and the expenses of the Board for International Broadcasting. Of this amount, $15,000,000 is deferred for expenditure until October 1, 1987.

FCC—FAIRNESS DOCTRINE

The conference agreement provides language requiring the FCC to consider alternative means of administering and enforcing the Fairness Doctrine and report to Congress by September 30, 1987.

CIVIL RIGHTS COMMISSION

The conference agreement provides $7,500,000 of which $2,000,000 is earmarked for regional offices and $700,000 for civil rights monitoring activities. The conference agreement also provides for certain restrictions on the use of the appropriation. The conferees are agreed that sufficient funds are included within the total amount provided for the Commission to meet all severance pay requirements for fiscal year 1987.

LEGAL SERVICES CORPORATION

The conference agreement includes $305,500,000 for LSC, the restrictions on LSC activities that were in the fiscal year 1986 Appropriations Act, an earmarking of funds for specific LSC programs, and a funding formula that was carried in prior years. The conference agreement also provides a total of $10,700,000 for administration and management of the Corporation including $3,300,000 in carryover funds.

SMALL BUSINESS ADMINISTRATION

The conference agreement provides $197,000,000 for salaries and expenses including $35,000,000 for Small Business Development Centers. The agreement also includes $261,000,000 for additional capital for the Business Loan and Investment Fund which will support a loan guarantee program of $3,154,000,000 and a direct loan program of $97,000,000.

U.S. INFORMATION AGENCY

The conference agreement includes a total of $807,250,000 for USIA as follows:

Salaries and expenses	$570,000,000
Educational and cultural exchange	[1] 145,000,000
Radio construction	[2] 46,000,000
Radio broadcasting to Cuba	11,250,000
East West Center	20,000,000
NED	15,000,000

[1] Of which $25,000,000 is deferred for expenditure until Oct. 1, 1987.
[2] Deferred for expenditure until Oct. 1, 1987.

GENERAL PROVISIONS

The conference agreement retains the language in the fiscal year 1986 Appropriations Act with respect to Legal Services Corporation funding litigation on abortion.

The conference agreement does not include the 5.03 percent general reduction that was in the House bill.

The conference agreement includes the Senate provision concerning certain insurance benefits for former employees of a debtor who files for bankruptcy. The LTV case.

CHILD ABUSE VICTIMS' RIGHTS ACT OF 1986

The conference agreement is identical to the Senate language which authorized the Child Abuse Victims' Rights Act of 1986 except for the provision that would have expanded the RICO statute and for the provision that would have authorized treble damages. The conference agreement provides for actual damages.

JAMES MADISON MEMORIAL FELLOWSHIP PROGRAM

The conference agreement authorized this program which provides scholarships to secondary school teachers for a masters program with emphasis on the Constitution and appropriated $20,000,000 to carry out the program, of which $10,000,000 would be available in fiscal year 1988 and $10,000,000 would be available in fiscal year 1989. The conference agreement also provides for a payback provision for those scholarship recipients who do not return to teaching.

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from Michigan [Mr. CARR].

Mr. CARR. Mr. Speaker, I want to associate myself with the remarks and sentiments of my colleague, the gentleman from Michigan [Mr. WOLPE] about the fine work this committee did with respect to the various natural disasters around the country which has affected our food supply and the health of our farmers.

I would love to stand here and talk about arms control, Contra aid and Gramm-Rudman and all these other things, but there is an issue aborning that is going to hit every American consumer, that is, automotive consumer, in the pocketbook. We tried to deal with it in the committee report, and unfortunately the time that is available to me from the chairman does not allow a full discussion of the issue.

Mr. CONTE. Mr. Speaker, how much time do I have?

The SPEAKER pro tempore. (Mr. GRAY of Illinois). The gentleman from Massachusetts has 1 minute remaining.

Mr. CONTE. Mr. Speaker, I yield 1 minute to my good friend, the gentleman from Michigan.

Mr. CARR. Mr. Speaker, I thank the gentleman from Massachusetts for yielding this time.

Mr. Speaker, I am concerned about the agreement the conference committee reached on the issue of controls for gasoline vapors released during motor vehicle refueling. The conference committee report urges that EPA propose rulemaking to recover refueling vapors "as soon as possible", and to concurrently provide Congress with the background information called for in the House report. However, the language in the House report required EPA to provide Congress with relevant data, analyses, reports and supporting material prior to proposing regulations. The House report also directed EPA to review the effectiveness, need and validity of a nationwide program and to evaluate all costs and benefit data on control alternatives to assure a cost-effective strategy. In addition, the House report directed EPA to assure Congress that any safety or defects problems resulting from onboard controls be resolved. This information is required before rulemaking is proposed because of the time required to address the issues raised by the proposed rule, particularly the safety and cost-effectiveness of the possible control options.

Mr. Speaker, EPA has actively considered how to control gasoline vapors because scientific evidence indicates that the vapors contribute to the formation of ozone (though scientists disagree on how much). Because several areas of the Nation are going to have trouble meeting the Clean Air Act requirements for ozone, EPA is looking at vapor controls as a partial solution to the problem.

EPA has considered two options for attempting to control refueling vapors. One system would require hardware installed on gasoline pumps at filling stations—known as stage II controls—or the other requires installation of recovery canisters on the vehicles themselves—known as on-board controls.

Stage II controls have known costs and proven effectiveness. They are available in an advanced stage of design, and development, and are in-use. Stage II responds quickly to what is known today as only a regional problem. Stage II controls have been working well in the State of California for over a decade, and today are of the advanced generation of such systems. For the last few years an earlier, less convenient pump system, has been in operation in the District of Columbia. Recently, the State of Missouri also adopted a program for stage II controls, and at a Senate hearing earlier this month New Jersey Governor Kean indicated that New Jersey is also moving toward requiring pump controls.

On the other hand, on-board car and truck controls are still in the early stages of design development with significant problems remaining as to the design of the systems and compliance with various vehicle safety requirements. In addition, auto manufacturers estimate that the costs of nationwide on-board controls for this regional problem could easily exceed half a billion dollars annually, in addition to millions of dollars that would have to be spent on additional research and design, testing and retooling. These costs would be several times higher than the costs associated with stage II controls in areas that have ozone compliance problems. Because of the slow phase-in of new cars on the road, it would take 10 to 15 years for the on-board alternative to have complete effect.

Yet for reasons unknown to this member indications are that EPA is leaning heavily toward requiring on-board controls. In light of this, I am concerned that EPA may not have developed sufficient data upon which to base a nationwide program further regulating motor vehicles. Given the high costs of vapor recovery controls, both stage II and on-board, I believe it is important that the appropriate committees of jurisdiction have an adequate opportunity to review all the cost-benefit and safety related data before any rule is proposed, as was explicitly called for in the House report language.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri [Mr. GEPHARDT].

Mr. GEPHARDT. Mr. Speaker, I rise in favor of the resolution.

Mr. HEFNER. Mr. Speaker, the military construction portion of the continuing resolution appropriates $8,156 million for military construction and family housing projects. The military construction portion is $1.9 billion below the President's request and $161 million below last year's appropriated level. The bill is also within the subcommittee's section 302(b) allocation for both budget authority and outlays.

The military construction portion includes funding for 2,000 projects. I will briefly describe some of the major items. In the bill, we have included $72.3 million for the Alaska Light Infantry Division which constitutes a reduction of about $100 million from the President's request.

We have included advance appropriations for construction at Fort Drum, NY, in order to permit construction under one contract which is estimated to save over $100 million.

With regard to the strategic homeporting initiative, we provided $54.4 million for the project in New York which is $9 million below the requested level. For Everett, the conferees agreed to $43.6 million which is $51.8 million below the requested level. Retained in the bill is language which limits the overall obligational amount to $799 million for all homeporting construction through fiscal year 1991. We believe this limitation to be necessary in order to hold the Navy's feet to the fire in order to prevent massive overruns.

Included is $10.3 million for SDI related construction. Not included is $10 million requested for Asat facilities at Langley Air Force Base.

Following is a State listing of the conference agreement for each project in the military construction bill.

MILITARY CONSTRUCTION (IN THOUSANDS OF DOLLARS)

INSTALLATION & PROJECT	BUDGET REQUEST	HOUSE RECOMMENDED	SENATE RECOMMENDED	CONFERENCE AGREEMENT
ALABAMA				
ARMY				
ANNISTON ARMY DEPOT				
SECURITY UPGRADE	1,950	---	1,950	---

Mr. MOLINARI. Mr. Speaker, I rise to note that the conference report for the continuing resolution eliminates the House-passed provision removing the ban on the rehiring of the dismissed air traffic controllers. As you will recall, when the House considered this provision last July, I offered an amendment mandating that at least 1,000 fired controllers be rehired over the next 2 years. My amendment was defeated by a rather close vote. Opponents said that my amendment went too far and that the mild language in the House bill will force the Department of Transportation to rehire without specifically mandating numbers.

Well obviously DOT has no intention of rehiring one single fired controller and could not even agree to the Transportation Subcommittee's limited provision.

Since we last spoke about rehiring, the air traffic control system has deteriorated further. Let me relate to you just two incidences where the system has deteriorated. I need not remind my colleagues, especially those from southern California, of the midair crash over Cerritos. The controller in that case was "oneholing," that is controlling two or more positions at the same time. Although this might not have been a cause for the crash, it usually indicates low staffing.

In July, the FAA transferred air space from New York Center to Boston Center. The transfer was intended to alleviate the staffing problem at New York Center. What it actually did was send New York's problems northward. When New York held these 7 sectors, 52 controllers worked the air space. Now that Boston controls the air space only 32 controllers are working the same area. Furthermore, the Boston controllers are now required to work 6-day work weeks and overtime, and many report working for over 4 hours without a break. In essence the FAA has tried to solve a legitimate problem in New York and seems to be creating a bigger one in Boston.

Mr. Speaker, when we debated my amendment on this issue the FAA provided a Member of this House with a statement refuting a story in the Washington Post that there were only 52 fully qualified controllers at Chicago O'Hare Airport. The FAA statement said that there were 80. Well, I did not know it at the time, but I did some investigation and found out that the Washington Post was right. FAA offered no apology for misleading Congress. In fact, if I had not showed the FAA, from its own documents, that the true number was 52 they would still not admit to their "error."

I, therefore, must insist that the only way we can get the FAA to increase the number of experienced controllers is by mandating the rehiring of the fired controllers. The safety of the American public must transcend above the politics of rehiring. We have an air traffic control system that is dangerously stressed due to the lack of experienced controllers. There is no other place that the FAA can buy the experience needed other than from the fired controllers. Simply inserting staffing requirements in the continuing resolution will not add experience. We must rehire today for the safety of all of the American people.

Mr. DAUB. Mr. Speaker, I appreciate this opportunity to comment on the fiscal year 1987 continuing appropriations (H.J. Res. 738) conference agreement that the House is considering today. This measure contains important language that will address the flood control problems in the Papillion basin, which is located in and around Omaha, NE.

The continuing resolution contains language I authored directing the Corps of Engineers to proceed in accordance with the plan contained in the Corps of Engineers' reevaluation report—50-year channel proposal—for Papillion Creek and Tributaries Lakes, NE. The bill authorizes construction as contemplated in the reevaluation report and deauthorizes features eliminated from the original authorization adopted in 1968.

Furthermore, the appropriations measure we are considering today will resolve a water quality problem that afflicts dam site 18, which is a part of the Papillion Creek and Tributaries Lakes project. To remedy the problem, the continuing resolution includes language directing the corps to provide funds for design and construction of a storage facility to keep effluent from two upstream sanitary improvement districts (SID's) from flowing into Boxelder Creek, which feeds the reservoir at site 18.

Mr. Chairman, on April 16, 1986, I appeared at a hearing before the House Appropriations Subcommittee on Energy and Water Development along with representatives from the city of Omaha; the Papio Natural Resources District; and The Papio Valley Preservation Association. The purpose of this testimony involved the request of authorizing the 50-year channel proposal adopted by the Papio Watershed Coordinating Committee (PWCC) and providing $300,000 for engineering and design work for this plan in fiscal year 1987; moreover, a request was made for $2 million in fiscal year 1987 funds for continued work on dams 18 and 20, and $421,000 for operations and maintenance of the Papio watershed.

These requests were ultimately included in the Energy and Water Development Appropriations Act of 1987 (H.R. 5162) as passed by the House on July 23, 1986. However, since the full Senate did not complete action on H.R. 5162, it has been necessary to include the respective House and Senate versions of H.R. 5162 in the continuing resolution.

While the House passed versions of H.R. 5162 and the continuing resolution contained $300,000 for engineering and design work on the reevaluation report, I regret that the conference agreement on the continuing resolution that we are considering today does not contain this $300,000 for fiscal year 1987 work (the $2 million for work on Dams 18 and 20, and the $421,000 for operations and maintenance are maintained in the conference agreement). Authorizing the 50-year channel proposal is certainly an important step to resolve the flood problems in the Papio basin, but it is also my position that the project merits funding in fiscal year 1987. I will continue to work for funding on the project through any means available this year.

The history of flooding in the Papillion Creek Basin reflects the severity of the problem and the need to expeditiously proceed with the modified project. Floods or threats of floods in the area occur almost every year during the summer thunderstorm season. Within the last 27 years, floods occurred in 1959, 1960, 1964, and 1965. The 1964 flood, which was the basin's most damaging flood, caused the loss of seven lives and an estimated $5 million in damage. Moreover, the increasing urbanization of the Omaha area in recent years has increased the potential for damage.

As a result of the severity of the flooding in 1964 and 1965, the Omaha District Corps of Engineers, in conjunction with other Federal and local agencies, conducted studies to determine methods to control flooding in the Papio Basin. These studies resulted in a plan—authorized by the Flood Control Act of 1968—consisting of 21 earthen dams for flood control, recreation, fish and wildlife enhancement, and water quality control.

Since the original authorization in 1968, the Papio project has experienced considerable delays and size reduction because of significant changes in cost, regulations, and new legislation, as well as local oppposition. As a result, only four of the authorized dams—dams 11, 16, 18, 20—have been or are being constructed by the Corps of Engineers. The remaining 17 dams—excepting dam site 17, which was completed by the private developer—have been deemed over the years as uneconomic or are highly controversial. Thus, the 17 dams are not classified in an inactive status.

Recognizing the continuing flood control problems in the Papio basin and the need to resolve the controversy resulting over the identified solutions, I brought together opponents and supporters of certain aspects of the 1968 plan and formed the Papio Watershed Coordinating Committee (PWCC) in March 1981.

The PWCC consisted of 11 members respresenting the cities of Omaha, Papillion, and Ralston; the villages of Bennington and Washington; the Washington County Board Supervisors; the Douglas and Sarpy County Boards of Commissioners; the Papio Natural Resource District; the Papio Valley Preservation Association; and the Papio Flood Protection Association. This committee concept proved to be an outstanding forum for the exchange of ideas and grievances in the effort to gain a consensus and thus resolve the longstanding local controversy.

Together, the PWCC drew up a compromise resolution seeking development of a comprehensive plan for flood damage prevention in the Papio basin that was presented in Washington before Congress. This resolution ultimately resulted in the 1982 Energy and Water Development Appropriations Act mandating funding for the continued construction of dams 18 and 20 and the initiation of a 3-year study of possible modifications to the 1968 authorized plan.

After several meetings and a lot hard work, the PWCC was presented in 1984 with five differing plans that the Corps of Engineers developed. The plan that was unanimously adopted by the PWCC on April 26, 1985, was the 50-year channel proposal (which is authorized in the fiscal year 1987 continuing resolution). The authorization consists of the following:

First, a 50-year channel improvement along the Big Papillion Creek generally extending

from West Center Road to L Street in Omaha, NE.

Second, improvement of the Union Pacific Railroad bridge crossing Big Papillion Creek located upstream of F Street, including a connecting street from F Street north to the C-D Street frontage road to access the recreation facilities along the channel.

Third, a 2 mile recreation trail extending the length of the recommendation channel improvement.

Fourth, an electronic flood warning system for the entire Papillion Creek Basin System.

Mr. Chairman, the modified Papio plan contemplated in the continuing resolution will save the Federal Government a substantial financial commitment in that the reevaluation is estimated to cost $7 million, while the original solution authorized in 1968 would have cost $120 million in terms of current prices. This authorization is truly an essential effort and duly rewards the hard work of the members of the PWCC and the Omaha Corps of Engineers.

I want to take this time to express my appreciation to members of the PWCC, the Corps of Engineers, and the countless others who participated in the efforts to come to a consensus on this flood control issue. The contributions of local interests have been essential to resolving the problem, and I am very pleased that we can finally go forth with the reevaluation plan and provide flood protection to my constituents in the Omaha area.

Mr. Chairman, with respect to the provisions of the continuing resolution that pertain to dam site 18, I also want to commend the local interests who came to a consensus to resolve the water quality problem at the site. Even though the reservoir has been built at site 18, the water quality problem originating from the effluent from the two upstream SID's has precluded final action to fill the new lake.

After a local solution to the problem was recently reached, I presented the House Energy and Water Appropriations Subcommittee with language directing the Corps of Engineers to build a containment structure to keep the effluent from flowing into Boxelder Creek, which feeds the reservoir created by dam 18. To justify to the subcommittee the local concerns on the issue, I also presented letters of support addressed to me from the following entities:

Nebraska Department of Environmental Control; Douglas County Health Department; city of Elkhorn; SID's 57 and 303; Papio Natural Resource District; Nebraska Department of Health; and the city of Omaha;

The Energy and Water Appropriations Subcommittee included my language in H.R. 5162 and the House version of the continuing resolution. And the conference agreement we are considering today directs the corps to use already appropriated funds to proceed with the necessary design and construction work to implement the agreed to solution. The proposal consists of creating a storage facility—pond—in the vicinity of the Skyline Woods Golf Course. Treated effluent from SID 57 would flow by gravity to the pond and SID 303 treated effluent would be pumped up to the pond level. The pond would thus keep the effluent from reaching Boxelder Creek.

Again, I want to commend all those individuals who contributed to the resolutions of the omnibus flood control problem in the Papio basin and the water quality problem at dam site 18. Your hard work has resulted in today's legislation, and I look forward to working with all of you in the future to implement the solutions.

Mr. UDALL. Mr. Speaker, the conference report on the fiscal year 1987 continuing appropriations bill makes an important clarification regarding the assistance provided the newest member of the American political family, the Commonwealth of the Northern Mariana Islands. It provides that the terms of the assistance are those included in the Omnibus Insular Areas Act of 1986, which authorized and requires the assistance.

I appreciate the cooperation of the very able chairman of the Appropriations Subcommittee on Interior, SID YATES, and the ranking minority member, RALPH REGULA, in working out the clarification. It indicates their continuing sensitivity to the unique situations of the U.S. insular areas.

The need for the clarification was created by an amendment by the other body to the Interior and related agencies appropriations bill. A proviso in the administration of territories section could have been misinterpreted to apply terms to the assistance which were proposed by the administration but which were not approved in Public Law 99-396.

If such a misinterpretation were implemented, it would not only have contradicted the authorization, it could have also conflicted with the covenant which established the Federal relationship with the Commonwealth. The committee report and subsequent statements of sponsors of the proviso made clear that such a misinterpretation would be contrary to intent; but there were indications that it may have been implemented anyway.

The Congress did not approve all of the terms proposed by the administration because they were technically faulty; conferred new and objectionable authority on the Secretary of the Interior to defer guaranteed appropriated spending; permitted any of the enacted terms to be changed without congressional approval; and included overly broad requirements and disputed understandings. Public Law 99-396 corrected these deficiencies.

The conference report modified the language of the proviso to make it consistent with Public Law 99-396 and apply only the terms of the assistance set forth in that law. Of the terms proposed by the administration, the law approved the schedule and purposes of the payments which will be provided on a guaranteed basis through fiscal year 1992.

It did not approve the so-called performance standards recommended by the administration or authority for the administration to withhold any of the assistance. However, performance standards which were proposed but not specifically approved may be followed to the extent indicated in my statement on that act and as mutually agreed by the administration and the Commonwealth.

If the administration believes the performance standards are not being met, however, it can request approval from Congress to withhold payments of assistance under Public Law 99-396. Such approval can only be obtained by enactment of an authorization bill.

The consideration of such a bill would enable the Congress to specifically consider the proposed performance standard at issue in the context of the disputed positions of the administration and the Commonwealth on it. This process will preserve the self-government the Commonwealth is guaranteed in the covenant and will prevent Department of the Interior from compromising it.

This process will also preserve the fiscal responsibility intent of the performance standards, which the Commonwealth has committed to meeting to the greatest extent possible, reasonable, and intended by Congress. We appreciate the efforts of the officials who developed the proposed terms but are resolute that they should be implemented only as Congress intends.

Mr. FRENZEL. Mr. Speaker, I oppose the conference report.

Once again, we are being asked to accept a comprehensive spending bill because we have failed to follow our own budget and spending process. This year's performance has been the worst ever, with not one appropriations bill being passed separately. This bill is the largest single appropriation ever, but no one here knows, or can know, what is in it.

We do not know exactly how much this bill will cost. The committee has provided us with a figure for total Budget Authority and an outlay estimate. However, to my knowledge the outlay figure is nothing more than a rough guess. I have been unable to obtain a CBO-prepared cost estimate.

We have voted for plenty of irresponsible bills, under plenty of irresponsible procedures, but this one is about as bad as any I have seen. The bill is a foot thick, and no one knows what is in it. About the only fact of which I am sure is that it spends too much money.

I do know that the bill's cost is too great. I am concerned that the HUD and Commerce/Justice/State portions of the bill will prove too costly, though no breakdown is available. The bill also fails to hold the line on defense, both across the board and in specific items. The strategic defense initiative (SDI), for example, is funded at $3.5 billion, well above the House's freeze-plus-inflation figure of $3.1 billion. On most other programs, I have been unable to obtain specific figures, but I am sure many have been granted similar increases.

Mr. Speaker, my fundamental objection is that this continuing resolution is too big and too hasty, and much too unknown. It is sure to contain pork. We just don't kow how much. It is sure to fail to hold the line on spending overall. I oppose the shoddy procedures and this bad bill. And I urge all Members to vote no.

Mr. YOUNG of Alaska. Mr. Speaker, I want to clarify a certain provision of the continuing resolution which relates to the Department of Energy's newly proposed uranium enrichment services criteria.

Mr. Speaker, although we are allowing the DOE to operate the Enrichment Program under certain provisions of the newly proposed criteria for the next several months, I wish to stress that the Congress is in no way, and I repeat in no way, approving the new criteria, nor DOE's new enrichment contract, or

DOE's failure to live up to the mandate of section 161v which requires DOE to restrict enrichment of foreign uranium for domestic use to maintain the viability of the domestic uranium industry.

I think it is an act of bad faith for DOE to wait until the waning moments of this 99th Congress to submit new criteria which represent a major change in the direction the Enrichment Program operates.

Mr. Speaker, the Enrichment Program $7.5 billion in debt and the new criteria write-off $4.1 billion of this debt without the approval of Congress. Both the Interior and Insular Affairs Committee of which I am the ranking minority member, and the Energy and Commerce Committee voted to disapprove the new criteria without dissent. The Senate without dissent also passed a resolution rejecting the criteria.

The new criteria attempt to amend the Atomic Energy Act with a simple administrative rulemaking. This the department is statutorily barred from doing. Section 161v of the Atomic Energy Act states that the prices DOE charges for its enrichment services "* * * shall be on a basis of recovery of the Government's costs over a reasonable period of time * * *" The criteria also state that DOE may, when it so desires, recover what future costs it feels may be reasonable.

Mr. Speaker, such discretion in the newly proposed criteria mask our attempts to balance the Federal budget. The write-off of $4.1 billion without congressional approval is bad enough, but for DOE to give itself future authority to write off billions more cannot be tolerated.

We cannot allow such fiscal irresponsibility to continue. DOE has no flexibility in section 161v of the Atomic Energy Act as it relates to the viability of the domestic uranium industry, the write-off of billions of dollars of debt, nor price discrimination. I would also like to know why the DOE is keeping multiple sets of books in order to justify whatever actions it so desires.

In closing, Mr. Speaker, I would like to make it perfectly clear that although we are allowing the Enrichment Program to continue to operate until the next Congress can get around to addressing DOE's conduct, I want it perfectly understood that we are in no way condoning DOE's present actions as they relate to pending litigation against the department in the U.S. Court of Appeals for the 10th Circuit. DOE has flim-flammed the Congress enough on many of these issues and I feel this is just another act on the part of DOE to attempt to intimidate the Federal court system. Our action here today should in no way impact the 10th Circuit Court of Appeals from rendering a decision against the Department for its past actions against the domestic uranium industry.

Mr. COMBEST. Mr. Speaker, today the House is considering a massive spending package which encompasses 13 fiscal year 1987 individual appropriations, and I intend to vote against this measure. I am compelled, however, to express my disappointment in having to oppose some worthy legislative measures which are trapped in the folds of the largest single spending bill in history.

The practice of carrying out the congressional appropriation process through passage of a bulky, omnibus measure is irresponsible and completely contrary to our democratic process. True democratic representation is impossible when the Nation's Federal spending allocations are carried on in this manner.

It is unfortunate that good legislation is inextricable from this burdensome measure. For instance, the energy and water development section of the continuing resolution contains a reduction in funding for the Nuclear Waste Disposal Program and includes language that would prohibit exploratory shaft drilling in fiscal year 1987. I would certainly like to support passage of a measure that would reduce funding for the program that threatens to establish a nuclear waste repository site in the heart of my agriculturally oriented congressional district.

Another section of the continuing resolution provides $100 million for aid to the Nicaraguan Contras. I have consistently championed the Contra efforts to establish democracy and preserve freedom in Central America, and yet I am forced to vote against a $100 million allocation to assist in their noble cause.

It is my view that representative democracy is denied in this distortion of our appropriations process called a continuing resolution. Because I am opposed to tremendous spending increases which expand the burden of our Federal deficit, I am forced to oppose responsible and sound legislative measures. Clearly, Mr. Speaker, the continuing resolution evidences the worst of Congress' fiscal irresponsibility.

Mr. GLICKMAN. Mr. Speaker, buried in House Joint Resolution 738, the giant funding bill we have before us today, is $625,000 for the U.S. Institute of Peace for fiscal year 1987. While this is substantially lower than the Institute's current authorization of $6 million, I understand that it represents no prejudice against the Institute. Rather, under the threat of a veto for abridgement of the budget ceiling, conferees on the Education-Labor-HHS appropriations bill decided to hold the line on new funding for the Institute, given the presence of $3.5 million in the Institute's endowment. Under its charter, funding in the endowment can be rolled over to the current fiscal year. The funds in the endowment combined with the proposed appropriation of $625,000 will bring the Institute's funding level to approximately $4 million, the sum which the Institute had available during the just-ended fiscal year. I would point out, however, that when that $4 million was appropriated, it was intended as a partial year appropriation. Therefore, since this will be the Institute's first full year of operation, I would hope that the Appropriations Committee would be willing to consider a request for supplemental funding later in this fiscal year.

It is also my understanding that the $625,000 appropriation is not to be interpreted as the base from which next year's appropriation for the Institute of Peace will be determined. In previous situations where an entity's organization has been delayed, this leaving carry-over funds which have reduced a subsequent year's appropriation, the basis for succeeding funding decisions has been determined to be the reduce appropriation plus the carryover. I trust that this will be the case for the Institute of Peace when it seeks funding for fiscal year 1988.

In conclusion, I would like to share with my colleagues some of the actions taken by the Peace Institute since its inaugural Board meeting in late February. The Institute's Board has organized its work through six committees and, to date, has met six times. The Institute currently has seven full-time staff members. On the program side, the Institute has initiated its grants program, expects to begin the Jennings Randolph Program for International Peace before the end of the calendar year, is developing a professional-level internship program, and has identified seven projects for the Institute itself to carry out during the coming year. One project is already underway: preparing an intellectual and programmatic map of the peace field.

The U.S. Institute of Peace is in the critical first years of its operation. I hope that in the months ahead the Institute will receive the congressional support so essential to its establishment as an integral component in this Nation's arsenal of peace.

Mr. DASCHLE. Mr. Speaker, I rise to offer my strong support to Chairman WHITTEN's clarifying language regarding the amendment to the Rural Electrification Act contained in the conference report on the continuing resolution. The language submitted by Senate conferees, had it become law, would have caused serious and permanent damage to the rural electric program and harm to rural electric consumers in South Dakota and across the Nation.

Mr. NATCHER. Mr. Speaker, I am inserting for the Member's benefit a table showing the amounts provided in the joint resolution for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year 1987, along with appropriate comparisons.

H.R. 5233 - FY 1987 APPROPRIATIONS FOR THE DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, EDUCATION AND RELATED AGENCIES

	FY 1986 Post Seq.	FY 1987 Budget Request	House Bill	Senate Bill	Conference	Conference compared with FY86 Post Seq.	Conference compared with FY87 Budget	Conference compared with House Bill	Conference compared with Senate Bill

Mr. WHITTEN. Mr. Speaker, I yield myself the remaining time.

Mr. Speaker, my attention has been called to the REA situation in Alaska. In reading the language, it seems to go much further than was represented to me. When we get to the provision on the Federal buildings in this section, I expect to offer an amendment saying that this applies only to Alaska as a demonstration project and shall not be used in the remainder of the United States.

□ 2115

Mr. Speaker, I yield back the balance of my time, and I move the previous question on the conference report.

The previous question was ordered.

MOTION TO RECOMMIT OFFERED BY MR. LEWIS OF CALIFORNIA

Mr. LEWIS of California. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is the gentleman opposed to the conference report?

Mr. LEWIS of California. I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. LEWIS of California moves to recommit the conference report on House Joint Resolution 738 to the committee of conference.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The motion to recommit was rejected.

Mr. MILLER of California. Mr. Speaker, the conferees on House Joint Resolution 738 have accepted language passed by the Senate which authorizes an increase in the cost ceiling for the North Loup Division, a Bureau of Reclamation project currently under construction in Nebraska. This cost ceiling increase would allow construction of this project to be completed as presently designed—a situation which severely limits the ability of the authorizing committees in the House or Senate to modify the project in the future.

There is no question that jurisdiction for raising the cost ceiling for this project properly rests with the Committee on Interior and Insular Affairs and its Subcommittee on Water and Power Resources. In response to concerns I raised with Chairman BEVILL last June, the House-passed version of the Energy and Water Development appropriations bill included language which would have restricted further expenditures on this project until a proposal to increase the cost ceiling could be properly considered by the authorizing committees. I ask unanimous consent that a copy of my June 17, 1986, letter to Chairman BEVILL be included in the RECORD at this point.

The North Loup language included in the House version of the Energy and Water Development appropriations bill was not slipped into the bill under the cover of darkness. It was readily agreed to by the gentlewoman from Nebraska [Mrs. SMITH], who provided her personal assurances to me of her continued cooperation in this matter. I was further advised by the gentlewoman that she believed the agreed-upon report language was "appropriate."

Unfortunately, these assurances were apparently forgotten during the conference on House Joint Resolution 738, as that bill and its report provide no restrictions on expenditures for this project. The bill also authorizes the ceiling increase needed to assure its completion, a legislative matter clearly within the jurisdiction of the Committee on Interior and Insular Affairs.

I consider it to be most unfortunate that the conferees have agreed to sidetrack the normal authorization process and provide special treatment for the North Loup project. I feel certain that the House bill language would have survived the conference had it been supported by the House conferees.

Despite the unfortunate action taken by the conferees, I wish to assure my colleagues that this project will receive the closest scrutiny of the Subcommittee on Water and Power Resources next year. My colleagues should be aware that this project would stand virtually no chance of surviving the congressional authorization process if it were proposed as a new project for construction today. The North Loup project has nearly doubled in cost since 1972, even after allowing for cost increases due to inflation. If completed, the Nation will be lucky to receive a return of 60 cents for every dollar of taxpayers' money invested for construction.

Other deficiencies of the North Loup project are well-known, and include: No cost sharing by local beneficiaries; only infinitesimal repayment of construction costs by irrigators, who will use a $350 million Federal investment to grow corn, already in surplus supply; and benefits—irrigation water highly subsidized by power consumers—which will flow to only a handful of farmers in central Nebraska. The purposes, costs, and final designs for this project deserve a thorough reexamination.

It is inappropriate to rush through a quick fix for a project that can only compound the problems of farmers elsewhere and taxpayers everywhere. I intend to evaluate carefully any further requests for appropriations for construction of the North Loup project until the project has received the proper oversight and approval of the Subcommittee on Water and Power Resources.

COMMITTEE ON INTERIOR
AND INSULAR AFFAIRS,
Washington, DC, June 17, 1986.

Hon. TOM BEVILL,
Chairman, Subcommittee on Energy and Water Development, Committee on Appropriations, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: It has come to my attention that the Subcommittee may be considering language in the fiscal year 1987 Energy and Water Development Appropriations bill which would authorize an increase in the cost ceiling for the North Loup Division, Pick-Sloan Missouri Basin Program, Nebraska.

I must respectfully advise you that I would have no choice but to raise the most serious procedural and substantive objectives to such a provision should it be included in the bill.

The Committee on Interior and Insular Affairs is well aware of the cost ceiling problem facing the North Loup project (and other Reclamation projects), and is considering legislation (H.R. 2503) to increase the ceiling. In addition, the Committee has specifically referred to this situation for the past two years in its Views and Estimates reports to the Committee on the Budget. Legislation to increase the ceiling for North Loup is without question a responsibility of the Committee on Interior and Insular Affairs. Any attempt to authorize a ceiling increase by including language in the Energy and Water Development Appropriations bill would clearly be out of order and would represent a direct intrusion on the jurisdiction of the Interior Committee.

I respectfully urge your attention to this matter.

Sincerely yours,

GEORGE MILLER,
Chairman, Subcommittee on Water and Power Resources.

Mr. FORD of Michigan. Mr. Speaker, I want to make it very clear that I oppose the provisions added by the other body to the continuing resolution, which would transfer ownership of Dulles and National Airports to a regional authority.

I am especially concerned about the possibility that Federal workers would lose rights and benefits as the result of any such transfer.

I am aware of the arguments made by local Members of Congress, and at first glance they seem appealing. I do not feel, however, that they can withstand close scrutiny. Proponents talk a good game about protecting Federal workers, but they are strangely silent on specifics.

When it's a choice between the rights of Federal workers and local Virginia politics, Federal workers end up losing.

The primary purpose of the provision of House Joint Resolution 738, the conference report on the continuing appropriations for fiscal year 1987, is to transfer Washington Dulles International Airport and Washington National Airport from the Federal Government to an independent regional authority. Both airports are now operated by the Federal Aviation Administration and employ numerous Federal employees whose conditions of employment, pay, and benefits are governed by laws relating to civil service employees. These laws are within the jurisdiction of the Committee on Post Office and Civil Service.

The provision would dramatically affect the employment status of FAA employees at these airports. One provision relates to collective-barganining rights. Another affects the pay, health insurance, life insurance, and annual and sick leave benefits of these employees. Yet another continues these employees under the Civil Service Retirement System, or the Federal Employees' Retirement System, as appropriate, after they have ceased to be Federal employees as a result of the implementation of the bill.

This provision has bypassed all the normal procedures set forth in Congress for the consideration of legislation. This specific proposal has never been considered, much less voted, on, by any of the committees of jurisdiction in either body of Congress.

71-059 O-87-28 (Pt. 22)

In this House, a number of committees, including Public Works, Post Office and Civil Service, and Government Operations, have a jurisdictional interest in the content of this proposal and should have had an opportunity to review it. This short-circuited process of coupling a major substantive proposal to the last legislative train leaving the station has denied the committees of this House the chance to look at this proposal and, applying their expertise, to offer suggestions on ways it might be approved.

I am convinced that any possible advantages from this proposal are more than offset by the potential for injury both to Federal employees and those who use the facilities in question.

Mr. PURSELL. Mr. Speaker, I take exception to the conference committee report language on the issue of gasoline refueling vapor controls included in the HUD chapter. In doing so, I concur with the comments of Mr. CARR—and other colleagues—that the conference report clearly changes the intent of the language the House Appropriations Committee approved earlier.

The House report required that before the Environmental Protection Agency issued a Notice of Proposed Rulemaking regarding vapor controls. EPA would provide Congress with all data, analyses, reports and other relevant material to adequately assure that such a nationwide regulatory program is necessary, appropriate and cost-beneficial. We were concerned that EPA has not developed sufficient data upon which to base a judgment for a nationwide program regulating motor vehicles or service stations or both.

What has emerged from the conference committee, however, not only fails to recognize the concerns of the House Appropriations Committee, but also could be counterproductive to our intentions. Instead of EPA being required to provide Congress all the relevant documents before issuing any proposed refueling control regulation, the conference report "urges" that EPA propose rulemaking "as soon as possible." How can the EPA give thoughtful consideration to all the factors we have identified if they are instructed to do a hurry-up job with issuing the regulation?

The reason I supported the House language requiring EPA to give Congress an opportunity to review the facts is that the consequences of whatever the control strategy adopted are certain to be enormous.

Mr. Speaker, environmental health and safety issues are important to all of us here and it is because of this deep concern that the House language required EPA to report on their finding and to openly discuss the assumptions and risks associated with the control options before acting.

The language in the conference report is worse than no guidance by the Congress on this issue. It tells EPA to act speedily on a decision that should be made only after careful consideration of the safety issue and a careful assessment of need and realistic benefits—and could effectively preclude a review by the Congress. It is for these reasons that I object to the language in the conference report.

Mr. UDALL. Mr. Speaker, the conference report on the fiscal year 1987 continuing appropriations bill makes an important clarification regarding the assistance provided the newest member of the American political family, the Commonwealth of the Northern Mariana Islands. It provides that the terms of the assistance are those included in the Omnibus Insular Areas Act of 1986, which authorized and requires the assistance.

I appreciate the cooperation of the very able chairman of the Appropriations Subcommittee on Interior, SID YATES, and the ranking minority member, RALPH REGULA, in working out the clarification. It indicates their continuing sensitivity to the unique situations of the U.S. insular areas.

The need for the clarification was created by an amendment by the other body to the Interior and related agencies appropriations bill. A proviso in the Administration of Territories section could have been misinterpreted to apply terms to the assistance which were proposed by the administration but which were not approved in Public Law 99-396.

If such a misinterpretation were implemented, it would not only have contradicted the authorization, it could have also conflicted with the covenant which established the Federal relationship with the commonwealth. The committee report and subsequent statements of sponsors of the proviso made clear that such a misinterpretation would be contrary to intent; but there were indications that it may have been implemented anyway.

The Congress did not approve all of the terms proposed by the administration because they were technically faulty; conferred new and objectionable authority on the Secretary of the Interior to defer guaranteed appropriated spending; permitted any of the enacted terms to be changed without congressional approval; and included overly broad requirements and disputed understandings. Public Law 99-396 corrected these deficiencies.

The conference report modified the language of the proviso to make it consistent with Public Law 99-396 and apply only the terms of the assistance set forth in that law. Among the terms proposed by the administration, the law approved the schedule and purposes of the payments which will be provided on a guaranteed basis through fiscal year 1992.

It did not approve the so-called performance standards recommended by the administration or authority for the administration to withhold any of the assistance. However, performance standards which were proposed but not specifically approved may be followed to the extent indicated in my statement on that act and as have been or may be mutually agreed by the administration and the Commonwealth, such as, for example, the performance standard regarding the development of the necessary capital development plan.

Further, if the administration believes the performance standards are not being met, it can request approval from Congress to withhold payments of assistance under Public Law 99-396. Withholding can only take place upon enactment of a bill authorizing withholding.

The consideration of such a bill would enable the Congress to specifically consider the proposed performance standard at issue in the context of the disputed positions of the administration and the Commonwealth on it. This process will preserve the self-government the Commonwealth is guaranteed in the covenant and will prevent the Department of the Interior from compromising it.

This process will also preserve the fiscal responsibility intent of the performance standards, which the Commonwealth has committed to meeting to the greatest extent possible, reasonable, and intended by Congress. We appreciate the efforts of the officials who developed the proposed terms but are resolute that they should be implemented only as Congress intends.

I am confident that the capable officials of the Interior Department will understand the need for this and that it does not detract from their responsibility to oversee lawful expenditure of the assistance. We feel as strongly that the Commonwealth government should expend the assistance as the law requires as we do that the ways for the Federal Government to ensure this are only those provided in the law, with disputes resolved by law—action we intend to take if necessary.

Mr. ROE. Mr. Speaker, I know that the conferees have worked long and hard on House Joint Resolution 738 and I want to commend them for their efforts.

This bill contains strong support in the area of science and technology particularly in our Nation's space program. It offers some creative and helpful solutions to the pressing problems which have beset the space agency since the loss of the space shuttle *Challenger* early this year.

As my colleagues are well aware, the Committee on Science and Technology has thoroughly investigated the *Challenger* accident and all of the impacts it has had on our access to space. There is no question that this Nation needs a replacement orbiter. At this time, we are ready to move forward to procure this orbiter and reconstitute our space program.

House Joint Resolution 738 contains the funding that is required to accomplish these objectives. Furthermore, this funding will not decimate our other space programs as so many had feared. This bill contains a very clear signal that bears repeating. That is, the space shuttle is a national asset and its replacement is a national priority. If this Congress is to be judged by its accomplishments, this message is of the utmost importance.

There are many other provisions in this bill worthy of mention but suffice to say that, as far as the space program is concerned, this is a piece of legislation for which we should all have unreserved support. It represents what can be done in an area where there is widespread bipartisan agreement and a mutual sense that this is a time requiring the leadership of the Congress.

In this year of great budgetary uncertainty I believe our conferees have acted with great vision for the future of our space program.

Mr. FUQUA. Mr. Speaker, I express my strong support of House Joint Resolution 738 and I call on my colleagues to join me.

In this year when deficit reduction and other budgetary pressures have dominated the national agenda I am greatly pleased that this Congress has taken the time to recognize the problems which need to be addressed in our Nation's Space Program. House Joint Resolu-

tion 738 provides funding for a replacement for the space shuttle *Challenger* which was lost January 28. It also provides the necessary funding to modify the existing shuttle fleet and return it to flight status.

Mr. Speaker, the backup in scientific, commercial, and defense payloads that has occurred as a result of the accident provides strong testimony for the dependence we have developed on our access to space. I commend my colleagues on the Appropriations Committee for sharing in this recognition and for working out in conference the funding necessary to restore this access to space. This bill provides the entire funding for the replacement orbiter and will allow us to build this orbiter in a cost-effective manner without impacting future NASA budgets.

In other areas of research and development this bill provides funding for the major initiatives that Congress has strongly supported. The Space Station Program contains the funding necessary to commence the development phase leading to a deployment date of 1994. The Advanced Communications Technology Satellite Program has been funded at a level that will allow a launch readiness date of 1990. All of the many other science and applications initiatives have been accommodated with no serious impacts.

Mr. Speaker, this legislation is significant and has great merits for our Nation's Space Program. I commend the conferees on developing a bill that addresses these needs so well. I ask all my colleagues to join me in passing House Joint Resolution 738.

Mr. PORTER. Mr. Speaker, I would like to address a critical issue which has arisen regarding the Title X Family Planning Program. There are several points which I feel it is essential to clarify.

As you may know, the Office of Population Affairs of the Department of Health and Human Services [DHHS] has, for the past few weeks, been threatening to publish new guidelines for the implementation of title X services. These new guidelines would, in reality, represent a significant change in the family planning services provided to those whom Title X is designed to serve.

My first problem with the proposed guidelines is one of timing. As we are all too well aware, Congress has been struggling for weeks to reach agreement on the essential legislation necessary to keep this country going. The proposed changes were announced by HHS only a short time before we originally were scheduled to adjourn. These changes are not merely administrative alterations, they are mutations of policy that should, by their very nature, reflect congressional intent and be subject to thorough discussion and debate. I certainly have no objections to any worthwhile issue being debated, but I would also submit that such a substantive change as this be one that Congress have the opportunity to fully discuss.

Mr. Speaker, in addressing the merits of this issue, I would like to remind my colleagues of the purpose of the Title X Program, which has been providing contraceptive services and information to nearly 5 million women per year in order to lower the incidence of unintended pregnancy, to improve maternal health by doing so, and to prevent recourse to abortion. That was its original purpose and has held true for nearly 17 years. The current guidelines, which translate congressional intent into implementation by Title X clinics of their services, have been in place for over 5 years. In accordance with the medical ethical standards promulgated by the American College of Obstetricians and Gynecologists, the guidelines require that women seeking information about the management of an unintended pregnancy be given nondirective counseling and referrals when requested on all of their legal medical options, including prenatal care, adoption, and abortion. This mandate constitutes the essence of informed choice—to require less would contravene a woman's right or ability to make a fully informed decision about her reproductive health care.

The proposed guidelines would do just that. They would, by allowing providers to pick and choose among the options upon which they counsel women, condone the withholding of basic factual information from these women. This is unconscionable. As you can see, Mr. Speaker, at the very least this issue deserves far more debate.

The DHHS is also proposing to change the Title X funding allocation formula which could wreak havoc with some of the projects currently receiving funds. I would again submit that more time is necessary for discussion before such a decision is made which could have far-reaching effects at the local level.

The language adopted by the Labor-HHS-Education conferees, and published in that conference report, clearly addresses the issue of timing on both of these proposed changes. As an active participant in the conference, I joined by colleagues in directly the Secretary of HHS to maintain the status quo by administering the Title X Program for fiscal year 1987 in the same manner, and under the same allocation formula, which governed its operations for fiscal year 1986. In fact, I even offered more specific language, but was assured by my colleagues that the directive, "in the same manner," explicitly retained by the committee, would cover both the guidelines and allocation formula contigencies.

I would welcome further debate on these issues, Mr. Speaker, at a more appropriate time and proper legislative forum, preferably during discussion of the reauthorization bill. Until that time, however, it would be ill-advised to make any such changes.

Mr. NELSON of Florida. Mr. Speaker, I rise in strong support of House Joint Resolution 738 and I urge my colleagues to do the same.

I want to recognize, in particular, the major benefits this bill has for our Nation's Space Program. As my colleagues are well aware, the *Challenger* accident of January 28 has had a profound impact on our world leadership position in space. This setback has been made all the worse by our inability to resolve the situation in a timely manner. We have agonized over the questions of whether a replacement orbiter was needed, where the money was to come from, and what the future role of man in space would be. Meanwhile, foreign competition has made major gains in scientific, commercial, and other uses of space.

This bill provides the guidance that has been lacking over the past 9 months and makes clear in no uncertain terms that the Congress is willing to assume the leadership role that is needed at this critical juncture. First, this bill recognizes that the Nation needs a replacement orbiter. Furthermore, this is a national need, not just a NASA need. This bill provides for a replacement orbiter without harming the other space programs that are needed to regain our national preeminence in space.

Second, this bill provides funding for the other cr· al activities needed to complete the modification to the existing shuttle fleet which have been identified as a result of the *Challenger* accident.

Third, this bill eases a major budgetary problem that has arisen with respect to the payment to NASA for services that were planned to be provided to DOD. The interruption in the flight rate that has been introduced by the accident has temporarily impacted the scheduled reimbursable payments that are essential to the stability and continuity in our space transportation system, and this bill would provide the missing resources for NASA.

Finally, this bill reflects the priorities in space research and development that are contained in the House-passed authorization bill. The bill sends a strong signal that we should move ahead with such initiatives as the space station and other space science and applications programs that have contributed so greatly to our national heritage.

Mr. Speaker, I am proud to voice my support for House Joint Resolution 738. It provides budgetary solution to some of the gravest problems we have faced in the past 25 years of pioneering in space. This is a bill we can all support and I am confident that with this legislation, together with the authorization bill passed on the House floor on October 15, we can get our Space Program back on track.

Mr. PETRI. Mr. Speaker, among the billions of dollars appropriated by this legislation is a relatively small amount, $7.1 million, for continuing the Leadership in Educational Administration Development Act or [LEAD] for a second year. This represents a wise investment in our Nation's schools. I want to thank especially the gentlemen from Kentucky [Mr. NATCHER], Massachusetts [Mr. CONTE], and Illinois [Mr. PORTER], as well as the Senator from Florida [Mr. CHILES], for preserving funding for this program, which is only now getting underway.

The LEAD Program begins at a timely moment. Funding of LEAD training and technical assistance centers in each State coincides with a growing public appreciation of the important contributions school administrators can make to educational excellence.

In recent years, the role of the administrator as educational leader has been overshadowed by other issues. Events outside the schools have challenged or undercut the administrator. Even the recent educational reform movement has seemed to focus on things other than school administration, such as State curriculum mandates or teacher quality. Only recently has the role of the school administrator returned to the spotlight of public interest.

An increasing number of recent studies

identify the principal as the single figure most responsible for school quality. Accumulating experience with educational reform and school improvement programs confirms that the key to a good school is a good school administrator. This research and experience has also added to our knowledge about the skills and behavior that characterize effective principals.

Although there is no unique core of knowledge in educational administration, there is reason to believe that the sorts of basic skills known to be required of mid-to upper-level managers in businesses and other private organizations are similar to those that school administrators need in order to be effective. These include the basics of supervision, performance assessment, staffing and selection approaches, how to delegate, goal setting, planning, budgeting, and policy development. Yet most school administrators lead public organizations. As such they are responsible, in ways private sector managers are not, for the management of change and the realization of public values. This gives principals added responsibilities.

The current research on effective businesses, schools, and other organizations centers on the long-argued distinction between management and leadership. The ground-breaking work of James MacGregor Burns first clarified the distinction between the role of manager, whose responsibilities focus on negotiating fair "exchanges" or transactions with employees, and the role of leader, whose efforts are centered on transforming the organization.

The value or importance of transactional leaders, who keep things moving on a day-to-day or moment-to-moment basis is not to be denied. But major organizational changes, and especially those that make mediocre organizations excellent, are said to be created not by such transactional managers but by transformational leaders. These leaders have a vision of where the organization should be headed and possess the knowledge and skills to lead the organization in the direction of that vision.

The role of an effective school administrator is far more complex than that of the passive manager. Principals in effective schools understand that they must be not only active transactional managers but transformational leaders as well. To carry out these roles effectively, principals must possess appropriate motivation and cognitive abilities. They must be able to understand the key situational factors that help determine the kinds of actions that are appropriate and guilde strategic culture-shaping activities. And they must have the behavioral skills to apply their abilities and take directed action.

In each of these areas, the administrator's competence is subject to improvement through leadership training. Effective training and technical assistance centers can provide administrators with the knowledge and skills necessary for them to be both good managers and leaders capable of transforming schools into models of excellence. That is my goal for every LEAD academy.

Thank you, Mr. Speaker.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. PORTER. Mr. Speaker, I object to the vote on the ground that a quorum is not present, and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 235, nays 172, not voting 25, as follows:

□ 2135

The Clerk announced the following pairs:

On this vote:

Mr. Gray of Pennsylvania for, with Mr. St Germain against.

Mr. Nichols for, with Mr. Hansen against.

Mr. Campbell for, with Mr. Oxley against.

Mrs. MARTIN of Illinois, Messrs. FOGLIETTA, TAUKE, ROBINSON, BARTON of Texas, APPLEGATE, COYNE, HENDON, and BADHAM,

and Mrs. MEYERS of Kansas changed their votes from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The text of the amendment is as follows:

Senate amendment No. 19: Page 7, line 13, strike the following language:

For carrying out the Low Income Home Energy Assistance Program as authorized by title XXVI of the Omnibus Budget Reconciliation Act of 1981, as amended, $1,986,000,000; and

Activities authorized by "Construction Industry Labor Law Amendments of 1985" as passed by the House of Representatives on April 17, 1986.

MOTION OFFERED BY MR. NATCHER

Mr. NATCHER. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. NATCHER moves that the House recede from its disagreement to the amendment of the Senate numbered 19 and concur therein with an amendment, as follows:

Restore the matter stricken by said amendment amended to read as follows:
and

Activities authorized by the "Construction Industry Labor Law Amendments of 1985" as passed by the House of Representatives on April 17, 1986.

Mr. CLAY. Mr. Speaker, I rise in support of the motion to insist on the House's position on H.R. 281. This provision enacts the construction industry labor law amendments as previously passed by this body by a vote of 229 to 173. As the debate on this bill reaches its conclusion, I want to reiterate the importance of this legislation. H.R. 281 is narrowly drawn and focused so as to ensure that prehire contracts, like all other contracts, are binding upon both parties who enter into such agreements. Despite the inflated rhetoric and distorted interpretations we have heard concerning H.R. 281, the sole effect of this legislation is to require employers to live up to contractual agreements they have voluntarily entered into. The amendment does not permit common situs picketing or secondary boycotts. Nor does it impose compulsory union membership on any employee or affect any Federal or State law regarding the payment of union dues. But as the House recognized when we overwhelmingly passed H.R. 281, if workers are to have a meaningful right to bargain collectively, employers as well as workers must be bound by their contractual promises.

Presently, workers in the construction industry are being subjected to harsh and unfair treatment as the result of a recent turn of events in labor-management relations. Twenty-five years ago, Congress enacted legislation promising construction workers a fair opportunity to engage in collective bargaining. But Congress' promise of a fair chance at organizing for the purpose of protecting their job interests, no longer exists. Recent NLRB rulings and court decisions have nullified congressional intent.

Specifically, H.R. 281 will restrict "double breasting" which is a legal loophole that has substantially undermined the right of construction workers to organize and bargain collectively. Contractors who have signed a union agreement are permitted to establish a second operation that differs from the original only in that it is not covered by a union contract. The employer then transfers work from its union company to its nonunion company.

The sanctity of the bargaining agreement has been eroded in other ways as well. Section 8(f) authorizes a contractor and union to enter into a prehire agreement. A prehire agreement is one voluntarily reached by an employer and a union prior to the hiring of a full complement of employees. Such a provision is needed because employment in the construction industry is necessarily short term and transitory. In return for access to a pool of skilled employees, a contractor agrees that the work will be performed in accordance with a union contract. Today an employer can literally walk away from an otherwise legally binding contract unless the union can meet the impossible burden of proving majority support at all worksites, regardless of the duration of the projects. The very nature of construction work is one of brief, limited time spans; 3 to 6 months is the average for work on a project. It is insane to require union members to vote every 3 months in order to prove they constitute a majority, as the Congress recognized in 1959.

H.R. 281 corrects these abuses by providing that prehire agreements are binding unless there is a vote by workers to decertify the union. It eliminates the use of double breasting as a means of avoiding the requirements of collective bargaining agreements by making such agreements applicable to all businesses operated by a single employer within a specific geographical area. H.R. 281 seeks only to restore to construction workers the rights which Congress recognized and guaranteed in 1959.

The unique problems of the construction industry have not changed, neither should our commitment to the collective bargaining rights of construction workers. H.R. 281 was passed by the House of Representatives by more than 50 votes on April 17. Similar legislation has been pending in the Senate since March. Nevertheless a few Members of the other body have effectively prevented that body from even considering it. By reaffirming the position we have taken on the continuing resolution regarding this issue and thereby enacting H.R. 281, we have the opportunity to ensure a meaningful right to engage in collective bargaining for workers in the construction industry. I urge you to support this motion.

Mrs. ROUKEMA. Mr. Speaker, I rise in opposition to the amendment in disagreement.

I have stated here before that I consider it highly objectionable that the issues raised by H.R. 281, the Construction Industry Labor Law Amendments of 1985, were included in the context of a continuing resolution. I consider it totally inexcusable that this continuing resolution is being delayed or put at risk because of the insertion of this amendment. This is major and controversial legislation.

Such controversial, nongermane amendments have no place in an appropriations bill. The use of such a tactic is even more outrageous when the Senate has never considered the amendments. The Senate has long had a counterpart bill to H.R. 281 and has had many opportunities to bring it up for a vote. However, the proponents of the bill have declined to bring it up for a vote on the floor, apparently because they feel that they would have been unsuccessful.

Such circumstances make the use of these tactics even more inexcusable. Regardless of how you feel about the merits of H.R. 281, I hope you will agree with me that the House should not be monkeying around with this continuing resolution as a back door way to get through legislation which it knows the Senate has never considered and probably wouldn't have passed. Let there be no mistake about it, the legislative language of H.R. 281 would be making major revisions to the National Labor Relations Act and should be carefully considered by both Houses of Congress through the normal deliberative process.

Mr. Speaker, this alone would be reason enough to vote against this amendment. However, what's more, I do not believe that the way in which this section was included in the continuing resolution carries any legal weight. We do not add the language of H.R. 281, that would be legislating in an appropriations bill. What we did was to add money to enforce the provisions of H.R. 281, even though that bill has not been signed into law. For detailed reasons which I have clearly outlined in earlier floor statements, I strongly believe, and have been advised by my committee legal counsel, this will not have the force of law even if we wanted it to.

Now, I know that my colleagues across the aisle will argue that it does. But, that just shows up my point exactly. The legislative history of this section is entirely unclear, thereby leaving it up to the courts to decide what we mean by this backdoor reference to H.R. 281. I can just see the lawyers lining up to get into court saying that if Congress really meant to pass H.R. 281 it could have done so outright. Mr. Speaker, this is no way to legislate.

Mr. HAWKINS. Mr. Speaker, I rise in support of the motion. The continuing resolution as passed by the House contained language which would effectively express the will of the House regarding the status of the provisions of H.R. 281, the Construction Industry Labor Law Amendments of 1985. As my colleagues will recall the House first passed the original version of H.R. 281 on April 17, 1986 by a vote of 229 to 173. Since the will of the House has been so clearly expressed on each of two occasions we should tonight do no less than to continue to insist on House position.

My colleagues I know the hour is late and that all of us wish to move on to other efforts but I believe that we would regret our haste if we failed to support the positions which we as an institution have so clearly defined. H.R. 281, the so-called antidouble breasting bill desperately needs to be passed and while the language as contained in the continuing resolution is conformed to the strictures and constrains inherent in any appropriations measure, the intent of this provision to insure clear

compliance with the requirement in the underlying measure (H.R. 281) is clear.

In 1959, Congress granted construction industry unions and employers special rights. They were intended to stablize labor relations within the industry and protect the ability of workers to enjoy the benefits of collective bargaining. By permitting employers to avoid bargaining agreements on which they have voluntarily agreed, through the practice of double breasting, would destablize labor relations in the construction industry and would deny to workers the rights Congress has guaranteed.

Mr. Speaker, this is an important piece of legislation we are enacting and I urge my colleagues to support the motion and to restate in no uncertain terms the clear intent of the House on the enactment of H.R. 281.

Mr. MURTHA. Mr. Speaker, I rise in support of the motion to insist on the House position on H.R. 281 as contained in the House-passed version of the continuing resolution. This provision enacts the construction industry labor law amendments as passed by the House of Representatives on April 17, 1986.

The House has expressed its intent on this measure on two occasions and there should no doubt that by this action the Congress clearly intends the permanent enactment of this important improvement in labor law.

Mr. RINALDO. Mr. Speaker, I rise in strong support of H.R. 281. The continuing appropriations bill enacts H.R. 281 as passed by the House.

This measure is absolutely necessary in order to close loopholes in Federal labor laws which have permitted some unscrupulous employers to avoid their legal obligations under union contracts. In 1959, Congress recognized the need for legislation to modify industrial union representation procedures to fit the construction industry. This legislation, the Landrum-Griffin Act, included section 8(f), which allowed for prehire agreements in the construction industry. Due to misinterpretations by the National Labor Relations Board and the courts, employers now may repudiate these contracts once a full complement of workers has been hired for a project. H.R. 281 would simply force employers who sign a prehire agreement to live up to its terms once workers have been hired.

H.R. 281 is needed to restore the true intent of Congress to protect construction workers' right to union representation. Some opponents to H.R. 281 erroneously assert that it would violate workers' right to choose whether or not to join a labor union. In fact, the bill would not in any way change current Federal law. Under the National Labor Relations Act, no employee can be forced to join a union as a condition of employment, even if he works under a union contract. This protection of an employee's right to choose whether or not to join a union would be preserved under H.R. 281.

Another loophole that would be closed by this bill is the practice of double breasting, which enables a contractor who has signed a collective-bargaining agreement with a union to establish a second, parallel company that is nonunion. The employer can then transfer work from the union operation to the nonunion shop, reducing this obligation to comply with union contract provisions. H.R. 281 would eliminate this practice by making union contracts applicable to all businesses operated by a single employer within the geographic area covered by the agreement.

This bill does not expand the rights of organized labor under the Federal labor laws, nor does it impose any unfair burden on construction contractors. It simply eliminates unfair labor practices that have been allowed to develop outside the scope of our existing laws. By eliminating double breasting and the abrogation of prehire agreements, this legislation will ensure fair dealing between employers and workers in the construction industry. I, therefore, urge that the provisions of H.R. 281 be preserved in the continuing appropriations bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Kentucky [Mr. NATCHER].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of the amendment is as follows:

Senate amendment No. 23, page 9, line 9: Strike the following language:

SEC. 108. (a) AMENDMENTS TO FOOD SECURITY ACT OF 1985.—Effective with respect to each of the 1987 through 1990 crops, section 1001 of the Food Security Act of 1985 (7 U.S.C. 1308) is amended by—

(1) striking out paragraph (1), (2), and (3), and inserting in lieu thereof the following:

"(1) For each of the 1987 through 1990 crops, the total amount of deficiency payments (excluding any deficiency payments described in paragraph (2)(B)(iv) of this section) and land diversion payments that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 (7 U.S.C. 4121 et seq.) for wheat, feed grains, upland cotton, extra long staple cotton, and rice may not exceed $50,000.

"(2)(A) For each of the 1987 through 1990 crops, the total amount of payments set forth in subparagraph (B) that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, extra long staple cotton, rice, honey, and (with respect to clause (iii)(II) of subparagraph (B)) other commodities, when combined with payments for such crop described in paragraph (1), shall not exceed $250,000.

"(B) As used in paragraph (A), the term 'payments' means—

"(i) any part of any payment that is determined by the Secretary of Agriculture to represent compensation for resource adjustment (excluding land diversion payments) or public access for recreation;

"(ii) any disaster payment under one or more of the annual programs for a commodity established under the Agricultural Act of 1949;

"(iii)(I) any gain realized by a producer from repaying a loan for a crop of wheat, feed grains, upland cotton, rice, or honey at the rate permitted under section 107D(a)(5), 105C(a)(4), 103A(a)(5), 101A(a)(5), or 201(b)(2), respectively, of the Agricultural Act of 1949, or (II) any gain realized by a producer from repaying a loan for a crop of any other commodity at a lower level than the original loan level established under the Agricultural Act of 1949;

"(iv) any deficiency payment received for a crop of wheat or feed grains under section 107D(c)(1) or 105C(c)(1), respectively, of the Agricultural Act of 1949 as the result of a reduction of the loan level for such crop under section 107D(a)(4) or 105C(a)(3) of such Act;

"(v) any loan deficiency payment received for a crop of wheat, feed grains, upland cotton, or rice under section 107D(b), 105C(b), 103A(b), or 101A(b), respectively, of the Agricultural Act of 1949; and

"(vi) any inventory reduction payment received for a crop of wheat, feed grains, upland cotton, or rice under section 107D(g), 105C(g), 103A(g), or 101A(g), respectively, of the Agricultural Act of 1949.

Such term shall not include loans or purchases, except as specifically provided for in this paragraph.

"(C) The total amount of loans on a crop of honey that a person may have outstanding at any one time under the annual program established for such crop under the Agricultural Act of 1949 may not exceed $250,000 less the amount of payments, as described in paragraph (1) and subparagraphs (A) and (B) of this paragraph, received by such person for the crop year involved.

"(3) Notwithstanding the foregoing provisions of this section, if the Secretary of Agriculture determines that any of the limitations provided for in paragraph (2) will result in a substantial increase in the number or dollar amount of loan forfeitures for a crop of a commodity, will substantially reduce the acreage taken out of production under an acreage reduction program for a crop of a commodity, or will cause the market prices for a crop of a commodity to fall substantially below the effective loan rate for the crop, the Secretary shall adjust upward such limitation, under such terms and conditions as the Secretary determines appropriate, as necessary to eliminate such adverse effect on the program involved.";

(2) adding at the end of subparagraph (A) of paragraph (5) the following: "Such regulations shall provide that the term 'person' does not include any cooperative association of producers that markets commodities for producers with respect to the commodities so marketed for producers."; and

(3) in paragraph (6), striking out "lands owned" and inserting in lieu thereof "lands or animals owned", and inserting after "lands are farmed" the following: "or animals are husbanded".

(b) APPLICATION OF AMENDMENTS.—The amendments made by subsection (a) shall not apply with respect to any payment or loan received under any agreement or contract made before the date of enactment of this Act.

(c) REVISION OF REGULATIONS.—(1)(A) The Secretary of Agriculture shall review the regulations in effect on the date of enactment of this Act that define "person" under section 1001 of the Food Security Act of 1985 and related regulations in effect on such date otherwise affecting the payment limitations under such section, to determine ways in which such regulations can be revised to better ensure the fair and reasonable application of limitations and eliminate fraud and abuse in the application of such payment limitations.

(B) The Secretary also shall review the amendments to section 1001 of the Food Security Act of 1985 made by this section.

(2) Based on the reviews conducted under paragraph (1), the Secretary of Agriculture

shall submit to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives, not later than March 1, 1987, a report on such reviews and—

(A) with respect to the matters reviewed under paragraph (1)(A), proposed regulations or amendments to regulations, to take effect not earlier than October 1, 1987, that will meet the objectives with respect to limitations specified in paragraph (1)(A); and

(B) with respect to the matters reviewed under paragraph (1)(B), recommendations on legislative changes to section 1001 of the Food Security Act of 1985 that the Secretary determines are necessary or appropriate.

MOTION OFFERED BY MR. CONTE

Mr. CONTE. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. CONTE moves that the House insist on its disagreement to the amendment of the Senate numbered 23.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CONTE. Mr. Speaker, I am frankly amazed that this payment limitation provision still remains in disagreement.

I'm more than amazed. I'm flabbergasted.

This provision is so watered down now, I can't even call it the tip of an iceberg. It's just an ice cube. But it will help us to put the freeze on these multimillion-dollar boondoggles we call "farm support payments."

I want to thank my chairman, and all of my fellow House conferees for their unyielding support for the House-passed payment limitation language. We all have our problems with it. I, for one, would like to see it tightened up a lot more. But at a time when 40 percent of the payments we're making exceed the current $50,000 limitation, and at a time when we're headed back home to tell our small, family farmers what we're doing to help them out, I don't know how you can face them without having this language enacted.

We've got new, special legislative relief in this continuing resolution for certain cotton, rice, wheat, and peanut growers. Who knows what new loopholes we just opened in that CFTC reauthorization?

We've got a new, six-page, expensive agricultural disaster relief provision in this agriculture chapter, but the biggest "disaster" has yet to be addressed.

You all know the issues. We have all the figures and facts we need to make a decision here. But, in case any Members have been stranded on some desert island for the last 10 months, let me just review a few of the most noteworthy items that are so common nowadays, they don't even make the front pages anymore.

July 22—The New York Times—COST OF FARM LAW MIGHT BE DOUBLE ORIGINAL ESTIMATE—The vast majority of income and price support payments are going to the largest and wealthiest farmers, who are not suffering from the farm depression.

July 25—The Baltimore Sun—FARMERS TO GET $30 BILLION; CALIFORNIA GROWER REAPS MILLIONS—A single California farming operation will harvest $20 million in Federal subsidies this year, part of a bumper crop of multimillion-dollar payments that the Government is laying out.

September 2—The Los Angeles Times—BILLIONS IN WRONG TROUGHS—Federal aid is not reaching the ones in trouble. It is instead lining the pockets of a rich minority who are making it harder for others to make it.

About one-third of last year's Federal aid went to farmers with annual incomes of more than $250,000 and net worths exceeding $900,000.

Fully two-thirds of deficiency payments, meant to prop up farm income, went to farmers who were wealthier than the average U.S. taxpayer.

July 5—The Kansas City Times (It's not just the eastern press that's eating this stuff up!)—FARMERS SIDESTEPPING FARM BILL PAYMENT LIMIT.—Some farmers have split corporate farm operations into 15 or 20 new operations qualifying for hundreds of thousands in Government payments.

August 3—Des Moines Register—MORE FARMERS BEATING $50,000 SUBSIDY CUTOFF . . . $100,000 REORGANIZATIONS REPORTED LAST YEAR—The Des Moines Register also printed a virtual how-to-do-it manual entitled "How Farmer Investors Triple Their Government Payments."

August 1—The Lubbock (TX) Avalanche Journal—CERTIFICATES WORTH MILLIONS READIED—Hundreds of cotton merchants, textile mills, and cooperatives today become eligible for certificates that will reach millions of dollars redeemable for stored cotton.

August 15—The Christian Science Monitor—FARMERS CARVE UP FARMS TO REAP FEDERAL MONEY—If the United States wants more farms, they're easy to create. One farm in Kings County, CA, turned into 31 farms this year. One scheme involves turning four farms into a dozen.

"They call that a Mississippi Christmas Tree", says the executive director of the Kings County ASCS Office.

I could go on all day with these. I've been getting letters from all across the country, filled with examples of how neighboring farms, here and abroad, are getting millions of dollars in subsidies.

There's one about the rice farm in Glenn and Butte Counties, CA. Five Pakistanis are partners. Only one lives in the United States, so USDA just mails checks totaling over $100,000 to the others in Pakistan.

These guys are farming the U.S. Government today. Who knows how many more there will be before we return for the 100th session?

We all know there are 100 loopholes in that 1985 farm bill for every person in this room.

Most of us are crazy to be running for re-election. We ought to retire or take up part-time investing in some of these cotton and rice farms. Under current law, I bet I could make my two huntin' dogs partners.

I bet I could count in all my distant relatives in Italy. I bet, if I sent a telegram to Secretary Gorbachev and the Soviet Central Committee, they'd want to be cut in, too. They don't want our wheat, but I bet they'd be willing to take the CCC.

We could all promise Uncle Sam that we won't grow anything, and see how much that would get us.

We could trade certificates like baseball cards. We could probably take out loans to grow jelly beans. Anything we couldn't sell, we'd forfeit or export, depending on where we'd get the largest subsidies.

All I'm talking about here is a $250,000 limitation on payments. This C.R. is replete with caps, fences, floors, and ceilings on everything from Superfund to VA doctors to NASA's space station.

We can go ahead and vote on this. But let the record show who votes to keep the gravy train running on its $30 billion track.

Let the record show who would rather be cutting biomedical research and housing for the elderly across the board to make sure Boswell gets his $20 million.

This vote will serve as the perfect test of the spending priorities of this Congress as reflected in this continuing resolution.

Let's send this language back to the other body tonight. They've had weeks to come up with further improvements or restrictions but not one amendment was offered, Mr. Speaker. They wouldn't budge in that conference, and neither should we.

I urge my colleagues' support for my motion to insist on the House position. Let's start putting the yoke on this subsidy madness today.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Massachusetts [Mr. CONTE].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of the amendment is as follows:

Senate amendment No. 59, page 61, line 18: Insert the following language:

SEC. 106. The Administrator of the General Services Administration, under section 210(h) of the Federal Property and Administrative Services Act of 1949, as amended, shall acquire, by means of a lease of up to 30 years duration, space for the U.S. courts in Tacoma, Washington at the site of Union Station, Tacoma, Washington.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 59 and concur therein with an amendment, as follows:

In lieu of the matter inserted by said amendment, insert the following:

SEC. 115. GENERAL SERVICES ADMINISTRATION.

FEDERAL BUILDINGS FUND

LIMITATIONS ON AVAILABILITY OF REVENUE

The revenues and collections deposited into the Fund established pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(f)), shall be available for necessary expenses of real property management and related activities not otherwise provided for, including operation, maintenance, and protection of federally owned and leased buildings; rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies (including space adjustments) in connection with the assignment, allocation and transfer of space; contractual services incident to cleaning or servicing buildings and moving; repair and alteration of federally owned buildings, including grounds, approaches and appurtenances; care and safeguarding of sites; maintenance, preservation, demolition, and equipment; acquisition of buildings and sites by purchase, condemnation, or as otherwise authorized by law; conversion and extension of federally owned buildings; preliminary planning and design of projects by contract or otherwise; construction of new buildings (including equipment for such buildings); and payment of principal, interest, taxes, and any other obligations for public buildings acquired by purchase contract, in the aggregate amount of $2,385,856,000 of which (1) not to exceed $125,548,000 shall remain available until expended for construction of additional projects as authorized by law at locations and at maximum construction improvement costs (including funds for sites and expenses) as follows:

New Construction:

Alabama: Jasper, Federal Building, $3,376,000.

New Jersey: Paterson, Federal Building (site and design), $1,500,000.

New Mexico: Columbus, Border Station, $2,680,000.

Pennsylvania: Wilkes-Barre, Federal Building (Social Security Administration), $20,672,000.

South Carolina: Columbia, Federal Building, Courthouse, Claim, $1,057,000.

Construction Projects, less than $500,000, $1,000,000:

Purchase: New York: Wellesley Island, Border Station, $1,925,000.

Other Selected Purchases, including options to purchase, $93,338,000: *Provided*, That each of the immediately foregoing limits of costs on new construction projects may be exceeded to the extent that savings are effected in other such projects, but by not to exceed 10 per centum: *Provided further*, That all funds for direct construction projects shall expire on September 30, 1988, and remain in the Federal Buildings Fund except funds for projects as to which funds for design or other funds have been obligated in whole or in part prior to such date: *Provided further*, That claims against the Government of less than $50,000 arising from direct construction projects, acquisitions of buildings and purchase contract projects pursuant to Public Law 92-313, be liquidated with prior notification to the Committees on Appropriations of the House and Senate to the extent savings are effected in other such projects; (2) not to exceed $270,222,000, which shall remain available until expended, for repairs and alterations: *Provided further*, That funds in the Federal Buildings Fund for Repairs and Alterations shall, for prospectus projects, be limited to the amount by project as follows, except each project may be increased by an amount not to exceed 10 per centum unless advance approval is obtained from the Committees on Appropriations of the House and Senate for a greater amount:

Repairs and Alterations:

Arizona: Phoenix, Federal Building, $762,000.

California: San Diego, Old Federal Building, $1,576,000; San Diego, Federal Building, Courthouse, $1,178,000; San Francisco, Post Office, Courthouse, $1,683,000; San Francisco, Burton Federal Building, $20,000,000.

Colorado: Denver, Federal Building, Courthouse, $8,540,000.

District of Columbia: Federal Building, New Post Office, $1,700,000; Federal Building #6, $1,213,000; Federal Building #8, $1,886,500; Federal Building #9, $1,712,500; Federal Building #10A, $1,121,000; General Accounting Office, $3,552,000; Justice, $599,000; State, $2,765,000; Steam Distribution System, $8,796,000.

Hawaii: Honolulu, Kalanianaole Federal Building, Courthouse, $1,850,000.

Illinois: Chicago, Railroad Retirement Board, $5,200,000.

Kentucky: Louisville, Post Office, Courthouse, $1,500,000.

Missouri: Kansas City, Federal Building, $4,408,000; St. Louis, Federal Building (Mart), Phase I, $20,000,000; Kansas City, 601 E. 12th, $997,000; Kansas City, 1500 Bannister, $2,560,000; St. Louis, 4300 Goodfellow, $2,176,000.

Nevada: Las Vegas, Federal Building, Courthouse, $2,197,000.

Oregon: Portland, Federal Building, $12,069,000.

Texas: Dallas, Federal Building, $1,600,000; Dallas, Terminal Annex, $4,600,000.

Utah: Salt Lake City, Post Office, Courthouse, $675,000.

Virginia: Arlington, Pentagon, $7,000,000.

Wisconsin: Milwaukee, Federal Building, Courthouse, $2,799,000.

Wyoming: Casper, Federal Building, Courthouse, $1,923,000.

Minor Repairs and Alterations, $141,584,000: *Provided further*, That additional projects for which prospectuses have been fully approved may be funded under this category only if advance approval is obtained from the Committees on Appropriations of the House and Senate: *Provided further*, That all funds for repairs and alterations prospectus projects shall expire on September 30, 1988, and remain in the Federal Buildings Fund except funds for projects as to which funds for design or other funds have been obligated in whole or in part prior to such date; (3) not to exceed $131,442,000 for payment on purchase contracts entered into prior to July 1, 1975; (4) not to exceed $985,000,000 for rental of space; (5) not to exceed $753,219,000 for real property operations; (6) not to exceed $57,090,000 for program direction and centralized services; and (7) not to exceed $63,335,000 for design and construction services which shall remain available until expended: *Provided further*, That for the purposes of this authorization, buildings constructed pursuant to the Public Buildings Purchase Contract Act of 1954 (40 U.S.C. 356), the Public Buildings Amendments of 1972 (40 U.S. C. 490), and buildings under the control of another department or agency where alterations of such buildings are required in connection with the moving of such other department or agency from buildings then, or thereafter to be, under the control of the General Services Administration shall be considered to be federally owned buildings: *Provided further*, That none of the funds available to the General Services Administration shall be available for expenses in connection with any construction, repair, alteration, and acquisition project for which a prospectus, if required by the Public Buildings Act of 1959, as amended, has not been approved, except that necessary funds may be expended for each project for required expenses in connection with the development of a proposed prospectus: *Provided further*, That funds available in the Federal Buildings Fund may be expended for emergency repairs when advance approval is obtained from the Committees on Appropriations of the House and Senate: *Provided further*, That amounts necessary to provide reimbursable special services to other agencies under section 210(f)(6) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(f)(6)) and amounts to provide such reimbursable fencing, lighting, guard, booths, and other facilities on private or other property not in Government ownership or control as may be appropriate to enable the United States Secret Service to perform its protective functions pursuant to 18 U.S.C. 3056 as amended, shall be available from such revenues and collections: *Provided further*, That the Administrator of General Services is authorized under section 210(h) of the Federal Property and Administrative Services Act of 1949, to acquire a building not to exceed 250,000 sq. ft., constructed or acquired by or on behalf of the State of Florida or a political subdivision thereof, by lease not to exceed 30 years, in Miami, Florida, on such terms and conditions as he deems appropriate. These terms and conditions may include an option to permit the Federal Government, if the Administrator deems that it is in the best interest of the Federal Government, to execute a succeeding lease: *Provided further*, That the Administrator of General Services is authorized, under section 210(h) of the Federal Property and Administrative Services Act of 1949, to acquire a building not to exceed 600,000 sq. ft., constructed or acquired by or on behalf of the State of Illinois or a political subdivision thereof, by lease not to exceed 30 years, in Chicago, Illinois, on such terms and conditions as he deems appropriate. These terms and conditions may include an option to permit the Federal Government, if the Administrator deems that it is in the best interest of the Federal Government, to execute a succeeding lease: *Provided further*, That revenues and collections and any other sums accruing to this fund during fiscal year 1987 excluding reimbursements under section 210(f)(6) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 490(f)(6)) in excess of $2,385,856,000 shall remain in the Fund and shall not be available for expenditure except as authorized in appropriation Acts: *Provided further*, That notwithstanding this or any other provision of this Act, Section 623 of the Treasury, Postal Service, and General Government Appropriations Act as contained in this Act shall apply only to the rural electrification program in the State of Alaska.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

Mr. WALKER. Mr. Speaker, reserving the right to object, I am trying to figure out just where we are. Do I understand that we are on Senate amendment 59?

Mr. WHITTEN. That is correct.

Mr. WALKER. Is it the intention of the gentleman from Mississippi to take the time so that we have a chance to discuss this amendment a little bit so that we can get a vote on it? I do not want it run through here by unanimous consent.

Mr. WHITTEN. Certainly we are going to have a chance, and I shall discuss it myself.

Mr. WALKER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi [Mr. WHITTEN] will be recognized for 30 minutes, and the gentleman from Massachusetts [Mr. CONTE] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Mississippi [Mr. WHITTEN].

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the first part of this having to do with public buildings reflects the viewpoint of the House on this matter. It is in true disagreement with the Senate.

I offer that because it does represent the House position, and at the time of the conference there is no way, apparently, for the conferees to get together.

FEDERAL BUILDINGS FUND

The amendment which I offered makes funds available for the annual operation of the Federal buildings fund, under the General Services Administration. Both the House and Senate resolution had made funds available for construction and repair and alteration projects as well as paying the rent and providing cleaning services.

This amendment provides for funding of all new construction projects which were included in the House passed bill (H.R. 5294), and further provides for the lease construction of the Miami, FL., and the Chicago, IL, projects. This amendment mandates that the Administrator of GSA take immediate action on the buildings in Chicago and Florida so that the new buildings can be acquired as soon as practicable.

This amendment also provides for the high priority repair and alteration projects which have been identified as having serious deficiencies such as asbestos, PCB's, and fire safety.

Those projects which GSA informed the conferees could not be accomplished in fiscal year 1987 were deleted by the conferees. This action reduces the outlays below the Senate outlay ceiling.

The second part I mentioned earlier, and that has to do with the REA. May I say that in connection with the desire of REA associations to pay off their present debt and refinance at a lower rate, I had a discussion with the Secretary of the Treasury, Mr. Baker.

We reached an agreement that $2 billion of the outstanding debt could be refinanced. I find, without knowledge to me or other members of the committee, that in this bill a provision was added, that so far as I have been able to find out was represented by some people as being only a demonstration project in Alaska and would not apply to the rest of the country.

Looking at the statement from the budget director, and looking at explanations of it, it is evident that the provision goes much further than that.

Mr. Speaker, may I say to my colleague from Pennsylvania that I have added this revision: That notwithstanding this or any other provision of this act, section 623 of the Treasury, Postal Service, and General Government Appropriations Act as contained in this act shall apply only to the rural electrification program in the State of Alaska.

So I am clarifying the provision in line with what it should be and what I thought it was.

May I say again, until tonight, I was unaware that this provision was in the Treasury-Post Office section.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman.

Mr. WALKER. Mr. Speaker, the statement that the gentleman just read, where does that come from?

Mr. WHITTEN. The language is in the amendment that I sent to the desk. The language I read to you I prepared myself, with the help of the staff.

Mr. WALKER. Well, do I understand that the amendment No. 59 from the Senate is being modified by the language the gentleman has now sent to the desk?

Mr. WHITTEN. Not modified, but added to.

Mr. WALKER. Well, that is a modification, I would say to the gentleman. That is a totally different position from what the House was brought a few minutes ago.

The gentleman seems to be amending the conference report with this amendment on the floor. That is a very unusual procedure, I would say to the gentleman.

Mr. WHITTEN. Mr. Speaker, may I say in this particular instance, a nongermane amendment is made in order by the rule. So my amendment is in order and this is the only place I could offer it. It is to correct a situation that happened without our knowledge or consent.

Mr. WALKER. If the gentleman would yield, so in other words, by waiving all points of order out here earlier, we have allowed the gentleman now to come in with a nongermane amendment, added after the conference report has been adopted, and totally modify the language that came to us from the Senate.

□ 2145

I would say to the gentleman that that is just a totally unacceptable position.

Mr. WHITTEN. May I say I do not know how the gentleman feels about the REA association, but I believe three-fourths of the House here does not want it to be saddled with restrictions with the position that was taken in the Alaska case. My amendment would limit the Alaska case to that case only and only to a demonstration project and the provisions could not be applied to the rest of the country, which apparently the budget office is expected to do if we do not step in.

Mr. WALKER. Well, if the gentleman would yield, it is my understanding that the original language would have allowed some of the rural co-ops that are in good shape to opt out of the system and pay off their debt, opt out of the system and go out and become a part of the private sector. What the gentleman is attempting to do is end the provision that was in the bill that would have allowed them to do that. In other words, keep them under the wing of the Federal Government.

I understand why the gentleman might want to do that. It is not exactly the kind of reform we are attempting to achieve in the House.

Mr. WHITTEN. May I say that my agreement with the Secretary of the Treasury over the telephone had to do with paying this off without precluding them from ever borrowing again. The Alaska situation says that if you ever pay off, you are out of luck, you have lost your source of financing.

That is what we wish to correct here and let the provision be limited to this one cooperative in Alaska and not apply to the rest of the country.

Mr. CONTE. Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I take the time because the REA situation disturbs me because that is a very unusual process to use. But the other thing that I have is a question about this particular amendment.

Can someone from the committee tell me what the cost of this particular amendment is in terms of the number of buildings that are going to be built by the GSA across the country? Can the chairman tell us what this particular amendment costs us?

Mr. Speaker, I would be glad to yield to the gentleman from Massachusetts or anyone who can tell me the cost of this amendment, that would be welcome at this point.

Mr. CONTE. The gentleman from Pennsylvania is referring to the original House position. As passed the House, the Federal Buildings Fund included $3.4 million for a Jasper, Alabama building, $2.5 million for Miami, FL, for design of a new Federal building, and $32 million for design and site acquisition for a new building in Chicago, IL, and $1.5 million for Paterson, NJ, for site and design.

Mr. WALKER. So if I understood correctly, the cost of this particular amendment to the taxpayers is $40 million in new buildings approximately?

Mr. CONTE. At this point.

Mr. WALKER. Yes, at this point. And as I understand it, the $32 million in Chicago is only for the site, that we may well have in fact about maybe a-couple-of-hundred-million-dollar building that we are dealing with there that we are putting in place with this amendment.

Mr. CONTE. As I understand, if you read the text of the pending motion, you will find that the Chicago building is authorized to be constructed through lease opportunity purchase program.

Mr. WALKER. No; and/or construction. I saw some language in it that indicated that we may have to construct that building as well.

Mr. CONTE. No.

Mr. WALKER. This is the GSA Administrator.

Mr. CONTE. It includes discretionary language in the bill which allows the lease opportunity purchase of the Chicago and Miami buildings.

Mr. WALKER. The gentleman did not mention the Miami building when he read off his list.

Mr. CONTE. Yes, I did.

Mr. WALKER. The gentleman did mention that? And that is $2.5 million.

Mr. Speaker, I am just trying to ascertain just how much pork we have down in this particular amendment. It seems from what I am led to understand we dump quite a bit of pork into this particular amendment. The only chance that the House is going to have to vote on some of these pork barrel projects is to vote against receding and concurring with the Senate. I am trying to establish just how much it is.

I understood there was also a good deal of money in there for repairing buildings and some things beyond that as well.

Mr. CONTE. If the gentleman will yield.

Mr. WALKER. I will be glad to yield.

Mr. CONTE. The repairs and alterations contained in this motion were requested by the administration. I am trying to be very fair with the gentleman and forthright in answering his questions. The $2.5 million for design of the Miami, FL, and the $32 million for design and site acquisition of the Chicago building were taken out of the bill. Direct Federal funding was replaced by a lease purchase program.

Mr. WALKER. Well, I am a little confused. If it is for design, why is it going over to a lease account?

Mr. CONTE. It was dropped. I had that in the forward part of my statement. Direct Federal funding for the Chicago building has been dropped now. It is authorized through a lease program.

Mr. WALKER. It is $32 million for a lease in Chicago now.

Mr. CONTE. No, there are no direct Federal moneys for the design or construction of this project.

Mr. WALKER. If so, it is an expensive lease.

Mr. CONTE. Now, in Chicago and in Miami, a non-Federal entity will construct a building, and the Federal Government will lease the property for 30 years with an option to purchase for a nominal price at the termination of the lease.

Mr. WALKER. Then why are we putting $32 million in this bill for that particular lease?

Mr. CONTE. That is gone. The $32 million for Chicago and the $2.5 million for Miami are not in this motion.

Mr. SHAW. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I would be glad to yield to the gentleman from Florida.

Mr. SHAW. I thank the gentleman for yielding.

Mr. Speaker, I do not think that the money is actually here in the bill.

Mr. CONTE. How many times can I say it? It is gone.

Mr. SHAW. I would like to read from the language itself. It says,

> The Administrator of the General Services Administration is authorized under section 210(h) of the Federal Property Administration Service Act of 1949 to acquire a building not to exceed 250,000 square feet constructed or acquired by or on behalf of the State of Florida or a political subdivision thereof by lease not to exceed 30 years in Miami, Florida, on such terms and conditions as he deems appropriate. These terms and conditions may include an option to permit the Federal Government if the Administrator deems that it is necessary in the best interests of the Federal Government to execute a succeeding lease.

What this does, this simply sets up the authorization. There is no money.

The SPEAKER pro tempore (Mr. Russo). The time of the gentleman from Pennsylvania has expired.

Mr. CONTE. Mr. Speaker, I yield 2 additional minutes to the gentleman from Pennsylvania.

Mr. SHAW. Mr. Speaker, will the gentleman continue to yield?

Mr. WALKER. I yield to the gentleman from Florida.

Mr. SHAW. I thank the gentleman for yielding.

I would like to speak for just 1 minute on the project in Miami, FL, and the only project that I am here to speak on this evening.

We have a situation down there that is extraordinarily dangerous. This project is to acquire space in which to house the U.S. Attorneys Office, which is located a number of blocks, almost a quarter of a mile away from the Miami courthouse. With the tremendous number of drug cases and the dangerous conditions that exist down there, it is very vital that the U.S. attorneys office, together with some of the DEA officers and others, be right next to the existing court facilities.

They presently occupy a leased building, in which I would say the security in the building is minimal. There are other offices in the building. It is not a safe condition.

I think that makes the Miami project extremely important, and I certainly support it.

Plus I think from the dollars-and-cents standpoint it makes a lot of sense.

Mr. WALKER. I would simply make the point that what we have now understood is that we now have another authorization for spending buried down in an appropriations bill.

One of the problems that many of us have around here who serve on authorizing committees is we are wondering why the Appropriations Committee goes to conference or by themselves decides to do the authorizing for us. Why could not these kinds of leases and so on go through the appropriate committees? Why do we have to have them brought to us as part of an appropriation bill? Once again those of us who do not happen to serve on the Appropriations Committee are left to try to figure these things out on the House floor, and it is very, very difficult for us to even find them, let alone to understand them in this kind of an atmosphere. I would simply suggest to the Members that we have as much as a $40 million item here, and we ought to vote "no" on receding and concurring to the Senate. The Senate did not do the country any particular favor in this particular amendment.

Mr. WHITTEN. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, I would like to say two or three things. First, these buildings have been authorized by the legislative committee. Second, and I repeat it again, a continuing resolution is both

a legislative bill as well as an appropriations bill. It has authority to legislate and to appropriate. I wish we did not have to handle these matters, but we do have that authority.

Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. ROYBAL].

Mr. ROYBAL. I thank the gentleman for yielding.

Mr. Speaker, I'll try to explain the situation that actually exists. The amendment as offered by Chairman WHITTEN makes funds available for the annual operation of Federal buildings, funds now under the General Services Administration. Both the House and the other body's resolutions have made funds available for construction, repair, and maintenance of various projects.

The conferees, however, could not agree on which projects should be included in the bill. This amendment provides for funding for all new construction projects which were included in the House-passed bill except two. Those two, Mr. Speaker, include Miami, FL, and Chicago.

The conferees on the part of the Senate refused to accept those two buildings. We accepted, both the House and the Senate's recommendation for the construction of all buildings, alteration of other buildings, and all repairs that could be done next year. We set aside both the Miami building and the Chicago building to be built under a lease-purchase agreement which means that when and if they are built, the Federal Government will lease them and will eventually own the buildings.

Those two buildings are not included in buildings funded under amendment No. 59, which also provides for the high priority repair and alteration of projects which have been identified as having serious deficiencies such as asbestos, PCB's, and fire safety. Those projects which GSA informed the conferees could not be accomplished in fiscal year 1987 were deleted by the conferees. In other words, we kept only those buildings that could be started and perhaps even finished in this coming year.

This action reduced outlays below the Senate outlay ceiling, which was the purpose of this deletion.

That was accomplished in the conference, and the amendment proposed by Chairman WHITTEN fully supports the House position. I strongly urge the support of the amendment.

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from Alaska, [Mr. YOUNG].

Mr. YOUNG of Alaska. I thank the gentleman for yielding time to me.

Mr. Speaker, I support the motion of the committee chairman.

Mr. Speaker, a section of the Treasury-Postal Service-General Government appropriation title of the continuing resolution establishes a new and completely optional program under which individual Rural Electrification Act [REA] borrowers may elect to prepay their REA-guaranteed Federal financing bank loans. Any REA borrower which so elects will not be eligible in the future for any loan under the REA program. Future system needs will have to be financed by private capital for borrowers who choose to refinance under this section.

Chugach Electric Association, an REA cooperative, serves approximately 50 percent of the consumers in my State. Chugach would like to refinance their outstanding federal loans under this provision and is willing to withdraw from the REA loan programs in return. In view of the questions which have been raised concerning this provision, I support Chairman WHITTEN's amendment which will limit this section's operation to REA borrowers in the State of Alsaka.

Under the Whitten amendment, Alaskan co-ops would be eligible under the Privitization Demonstration Program provided in this section. After Congress has reviewed the operation of this provision and Chugach's refinancing experience, Congress may choose to broaden the class of those eligible under this section in the next session.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I will insert at this point in the RECORD a letter from Jim Miller to Senator TED STEVENS in support of the original conference agreement.

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, October 14, 1986.

Hon. TED STEVENS,
Committee on Appropriations, U.S. Senate, Washington, DC.

DEAR TED: The Administration supports the amendment you sponsored to the Continuing Resolution which would establish a privatization demonstration program for electric and telephone Rural Electrification Administration (REA) borrowers with outstanding REA guaranteed Federal financing Bank (FFB) loans. This program will provide an option to such borrowers to repay all outstanding REA-guaranteed FFB loans, without a prepayment premium, providing certain conditions are met.

Borrowers electing this option would be required to repay all outstanding REA insured and guaranteed FFB loans and to forego future REA program eligibility. Under the demonstration program, any outlay savings would be in addition to the $2 billion estimate for FFB refinancing by REA borrowers under the Reconciliation Bill.

We believe that your amendment provides an important opportunity for REA borrowers to make the voluntary transition from reliance on REA lending assistance to private capital markets. Under current law, this opportunity is virtually nonexistent. We therefore urge adoption of your amendment.

Sincerely yours,
JAMES C. MILLER III,
Director.

□ 2200

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from Michigan [Mr. DINGELL].

Mr. DINGELL. Mr. Speaker, I rise to engage my colleague, Mr. SMITH of Iowa, in a colloquy regarding the section of the continuing resolution relating to the fairness doctrine.

Am I correct that this provision would require the FCC to consider alternative means of administering and enforcing the fairness doctrine and to report to Congress by September 30, 1987?

Mr. SMITH of Iowa. If the gentleman will yield, Mr. Speaker, the gentleman is correct.

Mr. DINGELL. Am I further correct that the conferees do not intend this provision or any provision in the statement of the managers to authorize or permit the FCC to repeal or materially revise the obligation contained in section 315 of the Communications Act requiring broadcasters to provide reasonable opportunity for discussion of conflicting views on issues of public importance?

Mr. SMITH of Iowa. I believe the provision in the bill merely directs the FCC to study alternative ways of administering and enforcing the doctrine, and to forward to Congress for its consideration any recommendations it may have for improving the manner in which the doctrine is administered and enforced. It was my personal understanding and intent that the FCC should do nothing to usurp the Congress' role in any reexamination of this doctrine.

Mr. DINGELL. Mr. Speaker, I thank my dear friend, the gentleman from Iowa [Mr. SMITH].

Mr. Speaker, I take this opportunity to reiterate my strong support for the fairness doctrine. I applaud the conferees in their efforts to prevent the FCC from repealing or materially revising this doctrine by sending the agency back to the drawing board to study alternative ways to administer and to enforce this vital democratic protection.

I also commend the distinguished gentleman from Michigan [Mr. CARR], who was very instrumental in protecting the public's interest in this matter.

Mr. Speaker, I rise in support of this legislation.

Under the Communications Act, broadcasters receive licenses that permit them to utilize a valuable public resource. As a consequence, they are required to act as public trustees and to abide by the requirements of the Fairness Doctrine. This Doctrine furthers the substantial government interest embodied in the first amendment—that the public re-

ceive contrasting viewpoints on issues of public importance. As the Supreme Court noted in upholding the constitutionality of the Fairness Doctrine in the Red Lion case:

It is the right of the viewers and listeners, not the right of the broadcasters, which is paramount * * *. It is the purpose of the first amendment to preserve an uninhibited marketplace of ideas in which truth will ultimately prevail, rather than to countenance monopolization of that market, wheter it be by the Government itself or a private licensee * * *. It is the right of the public to receive suitable access to social, political, esthetic, moral, and other ideas and experiences which is crucial here. That right may not constitutionally be abridged either by Congress or by the FCC.

In the Red Lion case, the highest court also responded to the argument that the Fairness Doctrine violates the broadcasters' allegedly unabridgeable first amendment right to put on the air anything they see fit, holding that:

Where there are substantially more individuals who want to broadcast than there are frequencies to allocate, it is idle to posit an unabridgeable First Amendment right to broadcast comparable to the right of every individual to speak, write, or publish.

The broadcast industry characterized by scarcity, by a vast excess of demand over the available supply of spectrum. The increase in the number of broadcast stations has done nothing to alleviate this condition of scarcity, as indicated by the still increasing price of broadcast properties, and the number of comparative renewal cases pending at the FCC. In the face of this scarcity, Government must license broadcasters if any are to be heard at all.

Scarcity exists in all markets, but the broadcast market can function only if the Government grants licenses for the exclusive use of particular portions of the spectrum. Fairness Doctrine obligations, and the general obligation to act as a public trustee of the Nation's airwaves, are a reasonable quid pro quo for this service.

The following remarks provide a fuller justification of the constitutionality of the Fairness Doctrine:

IMPOSING A FAIRNESS DOCTRINE ON BROADCASTERS IS CONSTITUTIONAL

Since the advent of broadcasting, the Fairness Doctrine has been an essential element of a regulatory scheme designed to ensure that broadcasters operate in the public interest. We are making that obligation unambiguously part of the Communications Act. Our action is fully consistent with the First Amendment.

Sixteen years ago, the Supreme Court unanimously upheld the Fairness Doctrine against First Amendment challenge in *Red Lion Broadcasting Co. v. FCC*, 395 U.S. 367 (1969). The Court held that in the context of broadcasting, the rights of the viewing public to hear contrasting viewpoints on issues of public importance, not the rights of broadcasters, were paramount, and that the Fairness Doctrine was both a permissible and effective means of vindicating those rights. The fact that far more people were willing and able to engage in broadcasting than could possibly be accommodated by the limited spectrum available justified the regulatory scheme Congress requiring that those granted licenses to serve as fiduciaries or trustees obligated to present the views of those who are excluded from the airways. The factual predicate of scarcity—a greater number of individuals wishing to broadcast than available frequencies—remains present today, and *Red Lion's* conclusion that the Fairness Doctrine is constitutional thus remains valid. This conclusion is reinforced by an examination of the Fairness Doctrine in practice, which reveals that the Doctrine serves to increase speech on issues of public importance.

I. CONGRESS HAS MANDATED THAT BROADCASTERS ACT AS PUBLIC TRUSTEES AND OPERATE TO PROVIDE BALANCED PRESENTATION OF PUBLIC ISSUES

Red Lion was not the beginning of the principle that broadcasters, who receive a valuable public resource for free, are required as a consequence to act as public trustees and thereby mandated to present diverse viewpoints on important issues. The concept was and is at the core of the public interest standard of the Communications Act.

The early experience with radio showed that with unfettered competition for use of the airwaves, no one could effectively broadcast. Instead, all were drowned out.[1] As a result, the broadcasting industry demanded government allocation of the spectrum.[2] In response to this request, Congress provided for federal regulation of broadcasting and required that licenses be granted on the basis of the "public interest". In one of the first actions under the public interest standard, the Federal Radio Commission, predecessor of the Federal Communications Commission, found that it was in the public interest for broadcasters to present opposing views on controversial issues.[3]

The Supreme Court's acceptance of public interest regulation of broadcasters dates back nearly as far.[4] In *National Broadcasting Co. v. United States*,[5] the Court first rejected an argument that public interest regulation of broadcasting violated the First Amendment. The Court concluded that since government must choose among licensees, denial of a license on a basis "comprehended within the statutory criterion of 'public interest' " was not a denial of free speech.[6]

That the "scarcity" of broadcast frequencies allows imposition of public interest obligations upon broadcasters was also first recognized in *National Broadcasting Co.* This scarcity is not based simply on the number of electronic outlets, but on the number of those who seek broadcast frequencies compared to the number of frequencies available. Thus, in *NBC*, Justice Frankfurter observed that

"freedom of utterance is abridged to many who wish to use the limited facilities of radio. Unlike other modes of expression, radio inherently is not available to all. That is its unique characteristic, and that is why, unlike other modes of expression, it is subject to governmental regulation." [7]

An obvious implication of the *NBC* court's holding that licenses may be denied on the basis of public interest criteria is the recognition that broadcast licensees may, under the First Amendment, be affirmatively required to serve the public interest generally rather than simply seeking private gain.[8] Perhaps the clearest judicial articulation of that principle occurred twenty years ago in *Office of Communication of United Church of Christ* v. *FCC*, 359 F.2d 994 (D.C. Cir. 1966). In the course of ordering the FCC to conduct a hearing sought by representatives of the listening public to examine charges of racial and religious discrimination and fairness doctrine violations by a licensee, the court, speaking through then Judge Burger, said:

"A broadcaster has much in common with a newspaper publisher, but he is not in the same category in terms of public obligations imposed by law. A broadcaster seeks and is granted the free and exclusive use of a limited and valuable part of the public domain; when he accepts that franchise it is burdened by enforceable public obligations. A newspaper can be operated at the whim or caprice of its owners; a broadcast station cannot. After nearly five decades of operation the broadcast industry does not seem to have grasped the simple fact that a broadcast license is a public trust subject to termination for breach of duty." [9]

Three years later, when the case was again before the Court of Appeals, Judge Burger again recognized the role of broadcasters as fiduciaries:

"[B]y whatever name of classification, broadcasters are temporary permittees—fiduciaries—of a great public resource and they must meet the highest standards which are embraced in the public interest concept. The Fairness Doctrine plays a very large role in assuring the public resource granted to licensees at no cost will be used in the public interest."[10]

In its most recent pronouncement on the issue, the Supreme Court, in *FCC* v. *League of Women Voters of California*,[11] again endorsed the regulatory scheme selected by Congress and recognized the "substantial governmental interest []" in "insuring adequate and balanced coverage of public issues" served by the Fairness Doctrine. *Id.* at 3118.

II. THE CONSTITUTIONAL RATIONALE OF RED LION APPROVING THE CONGRESSIONAL SCHEME REMAINS VALID

In *Red Lion Broadcasting Co. v. FCC*, the Court surveyed fifty years of broadcasting history, including twenty years of experience with the Fairness Doctrine, and found the Doctrine constitutional. The court observed that:

"[o]nly a tiny fraction of those with resources and intelligence can hope to communicate by radio at the same time if intelligible communication is to be had." [12]

Thus, "where there are substantially more individuals who want to broadcast than there are frequencies to allocate, it is idle to posit an unabridgeable First Amendment right to broadcast comparable to the right of every individual to speak, write or publish." [13] Instead, the public interest standard applicable to broadcasters makes paramount the rights of viewers:

"[B]ecause of the scarcity of radio frequencies, the Government is permitted to put restraints on licensees in favor of others whose views should be expressed on this unique medium. But the people as a whole retain their interest in free speech by radio, and their collective right to have the medium function consistently with the ends and purposes of the First Amendment. It is the right of the viewers and listeners, not the right of the broadcasters, which is paramount." [12]

This paramount interest of the public, as well as the interest of those speakers denied broadcast frequencies, rendered constitutional a decision to treat broadcasters as "prox[ies] of fiduciar[ies]" [15] for the community at large as well as for who "would

Footnotes at end of article.

otherwise, by necessity, be barred from the airwaves".[16]

It is noteworthy that in *Red Lion* broadcasters argued, much as critics of the Fairness Doctrine argue today, that technological developments since the *National Broadcasting Co.* decision had reduced the scarcity of broadcast facilities to the point where the challenged rules were no longer a permissible attempt to further other First Amendment values and increase opportunities for speech. In responding to these contentions, the Court did not emphasize, and indeed barely even discussed, the absolute number of broadcast facilities in particular markets. Instead, it observed that "comparative hearings between competing applicants for broadcast spectrum space are by no means a thing of the past."[17] The Court thus indicated that it was mainly concerned with scarcity relative to demand, not some shortage of outlets. The Court made this clear by noting that "nothing in this record or in our own researches convinces us that the resource is no longer one for which there are more immediate and potential uses than can be accommodated . . .".[18]

Demand for broadcast frequencies still exceeds supply and governmental licensing and regulation is necessary to resolve competing claims to these frequencies.[19] There remains a dearth of open spectrum,[20] and the most obvious measure of relative demand for broadcast frequencies, the economic value of the valuable license conveyed by the government, is such that millions to hundreds of millions of dollars are paid for television stations.[21] The basic premises of *Red Lion*'s First Amendment analysis thus remain intact. It is as true today as in 1969 that "comparative hearings between competing applicants for broadcast spectrum are by no means a thing of the past."[22]

Subsequent cases have consistently reaffirmed the scarcity and public trustee rationales while upholding regulation of broadcasters against First Amendment attack. Four years after *Red Lion*, in *Columbia Broadcasting System, Inc. v. DNC*,[23] the Court reiterated the scarcity rationale for broadcast regulation:

"The broadcast media pose unique and special problems not present in the traditional free speech case. Unlike other media, broadcast is subject to an inherent physical limitation. Broadcasting frequencies are a scarce resource; they must be portioned out among applicants."[24]

Recognizing that the Fairness Doctrine was sufficient to ensure that journalistic discretion by a licensee was exercised in the public interest,[25] the Court agreed with the broadcasters that they had the right to refuse advocacy advertising on public issues.

In FCC v. National Citizens Committee for Broadcasting,[26] the Court upheld Commission regulations prohibiting cross-ownership of newspapers and broadcast stations against First Amendment challenge. While conceding that the regulations were "designed to further the First Amendment goal of achieving diversity of information," both broadcasters and newspapers argued that the rules violated the First Amendment rights of newspaper owners. In response, the Court observed that:

"The physical limitations of the broadcast spectrum are well known. Because of problems of interference between broadcast signals, a finite number of frequencies can be used productively; this number is far exceeded by the number of persons wishing to broadcast to the public. In light of this physical scarcity, government allocation and regulation of broadcast frequencies are essential as we have often recognized. . . . We see nothing in the First Amendment to prevent the Commission from allocating licenses so as to promote the 'public interest' in diversification of the mass communications media."[27]

That this still represents the view of the Supreme Court is confirmed by its 1981 opinion in *CBS, Inc. v. FCC*.[28] While *NCCB* emphasized the scarcity rationale in upholding broadcast regulation, *CBS, Inc. v. FCC* unequivocally reaffirmed that broadcasters must still be considered public trustees whose licenses are conditioned upon continued service in the public interest. In *CBS*, the Court upheld a limited right of access of federal candidates to broadcasting facilities established in 47 U.S.C. § 312(a)(7). In rejecting the broadcasters' First Amendment challenge, the Court cited *United Church of Christ* and again reaffirmed that "a licensee is 'granted the free and exclusive use of a limited and valuable part of the public domain; when he accepts that franchise, it is burdened by enforceable public obligations.' " 453 U.S. at 395, *quoting United Church of Christ*, 359 F.2d at 1003.[29] The Court recognized that the federal candidate access section of the Communications Act "represents an effort by Congress to ensure an important resource—the airwaves—will be used in the public interest." *Id.* at 397.

Thus, arguments by opponents of the Fairness Doctrine that the Supreme Court has undermined the constitutional underpinnings for the Doctrine are misplaced. The Supreme Court has consistently reaffirmed that the scarcity of broadcast frequencies—the scarcity relative to demand for frequencies which necessitates governmental licensing—allows such reasonable regulations.[30] The notion that a broadcaster is a public trustee has similarly been reaffirmed.

III. THE FAIRNESS DOCTRINE IS CONSTITUTIONAL BECAUSE IT INCREASES SPEECH ON IMPORTANT ISSUES

The conclusion that *Red Lion* is still valid is reinforced by an examination of the day-to-day workings of the Fairness Doctrine. In fact, rather than operating to restrict speech, the Fairness Doctrine increases speech on issues of public importance. The Fairness Doctrine has effectively served the substantial government interest recognized in *League of Women Voters* in guaranteeing that the public receives contrasting viewpoints on controversial issues of public importance, and has also vindicated the interests of non-media speakers in airing their viewpoints. The Supreme Court, based upon twenty years of experience with the Doctrine, found this to be the case in *Red Lion*, as did the Federal Communications Commission in 1974.[31]

No changes in circumstances have undermined these conclusions. The Fairness Doctrine has created substantial opportunities for expression by those "who wish to exercise their freedom of speech even though they are not members of the press."[32] While the Fairness Doctrine does not confer upon any particular group or individual a right to air their views,[33] both the courts[34] and the Commission have recognized that broadcasters should, as one means of complying with fairness obligations, allow speakers to present their own views directly to the public.[35]

The Fairness Doctrine has thus provided significant opportunities for individual and group expression both formally and by providing individuals and community groups with leverage in informal negotiations with broadcasters for coverage of opposing views on critical issues.[36] Through such negotiations, groups and individuals have obtained free and paid advertising time as well as opportunities to appear on news programs and talk shows.[37] Indeed, in its recent *Report*, the Commission points to cases in which groups have used the Fairness Doctrine in order to obtain advertising time which would otherwise have been denied.[38] Without the Fairness Doctrine, it is doubtful that many broadcasters would even discuss reasonable requests from individuals or groups seeking to present their views. In recent Congressional hearings, several groups testified that, if not for the Fairness Doctrine, they would not have been granted access to broadcasting facilities.[39]

Opponents of the Doctrine have seized upon the "findings" in the Commission's recent Fairness Doctrine *Report* that the Doctrine inhibits speech. But the Commission ignored the well-documented use of the Fairness Doctrine by countless individuals and groups seeking to air their views. The failure of the Commission to appreciate that formal and informal use of the Fairness Doctrine has created countless opportunities for expression, as well as its failure to take into account the speech added by uncontested compliance with the Doctrine, totally undermines the Commission's conclusion that the Fairness Doctrine "overall lessens the flow of diverse viewpoints."[40]

The Commission's attempt to establish a "chilling effect" is also flawed. The Supreme Court in *Red Lion* found that the risk of chill was speculative.[41] Eleven years ago, in an inquiry very similar to that recently undertaken by the Commission, the Commission examined the issue of whether or not the Fairness Doctrine reduced the amount and quality of coverage of controversial issues of public importance. After two years of study consuming thousands of staff hours, *in which the Commission reviewed claims very similar to those offered in the FCC's recent proceeding, the Commission found "no credible evidence of a chilling effect."*[42]

Despite these prior findings, the FCC in its recent Fairness Doctrine *Report* purported to find evidence that the Fairness Doctrine chilled broadcast speech. The FCC's evidence, however, consists solely of broadcasters' accounts of the effects of the Fairness Doctrine. As indicated, the Commission failed to realistically discuss, much less weigh, evidence in the record demonstrating that various individuals and groups had used the Fairness Doctrine in order to obtain broadcast time. Perhaps most importantly, however, the Commission failed to discuss why the allegations of broadcasters were any more persuasive in this proceeding than they were when they were presented to the Supreme Court in *Red Lion* and to the FCC in the early seventies. Further, as the Court recognized in *Red Lion*, but the Commission ignored, "if licensees should suddenly prove timorous, the Commission is not powerless to insist that they give adequate and fair attention to public issues."[43]

The credibility of claims that the Fairness Doctrine reduces speech is further undermined by examination of the day-to-day operation of the Doctrine. In fact, vindication of competing First Amendement interests in the broadcasting realm by the Fairness Doctrine is achieved with minimal intrusion into the editorial discretion of broadcasters, since the Commission and the courts have

carefully circumscribed the scope of the Doctrine in order to minimize any intrusion. Before the FCC will even ask a broadcaster to comment upon a Fairness Doctrine complaint, the complainant must present "detailed and specific evidence"[44] on a variety of issues[45] sufficient to establish a *prima facie* violation. This *prima facie* evidence requirement is carefully designed to "weed out those complaints that would burden broadcasters without sufficient likelihood that a countervailing benefit will be gained."[46] A broadcasters' judgment must simply be in good faith and reasonable in order to be upheld. As one journalist put it, the FCC will question a broadcaster only when the "station's position is so 'off the wall' that no reasonable person could accept it."[47]

Only a tiny portion of complaints result in any FCC action whatsoever. For example, in 1980, the FCC requested only 28 broadcasters to respond to Fairness Doctrine and political broadcasting complaints even though the Commission received an estimated 20,000 complaints in all, while six cases were decided against the station involved.[48] In such cases, broadcasters were simply advised to meet their Fairness Doctrine obligations through additional programming.[49] The Commission's deference to broadcasters has been reinforced by the courts, which have carefully protected the rights of broadcasters and have scrutinized the FCC's decisions more closely than those of other regulatory agencies.[50]

Finally, arguments as to the "chilling effect", such as those found in the Commission's Fairness *Report*, erroneously assume that this type of "finding" would suffice to establish a First Amendment violation. However, a "chill" can only arise from an unwillingness on the part of broadcasters to air both sides of an issue, an unwillingness to act as a public trustee to vindicate the substantial government interest in the balance of information reaching the public. In fact, broadcasters need only fear the consequences of decisions to present only one side of an issue in their overall programming. A broadcaster who acts according to the standards of his or her profession, on the other hand, has nothing to fear from the Fairness Doctrine, since it is only applied in the most egregious cases of imbalance.[51]

The chill argument is thus an attempt to clothe the First Amendment language a refusal on the part of broadcasters to fulfill the commitments they gave in return for the free grant of a valuable public privilege. As a matter of First Amendment jurisprudence, however, government may legitimately seek such a *quid pro quo* for grant of public privileges. This recognition is not limited to the context of broadcasting, [52] but extends to other activities protected by the First Amendment. In *Buckley v. Valeo*, 424 U.S. 1 (1976), the Supreme Court first struck down as violative of the First Amendment limitations on campaign expenditures in the Federal Election Commission Act. However, it then upheld those same limitations on expenditures of candidates who accepted public financing of their campaigns.[53]

FOOTNOTES

[1] The Navy reported to the United States Senate that:

[C]alls of distress from vessels imperiled on the sea go unheeded or are drowned out in the etheric bedlam produced by numerous stations all trying to compete at once. . . . It is not putting the case too strongly to state that the situation is intolerable, and is continually growing worse.

[8] This concept actually predates the Communications Act of 1934. The requirement that broadcasters be regulated in the "public interest, convenience and necessity" was included in the original statute affecting broadcasting, the Radio Act of 1927. Herbert Hoover, in 1924, argued that broadcasters should be public trustees:

"Radio Communications is not to be considered as merely a business carried on for private gain, for private advertisement, or for entertainment of the curious. It is a public concern impressed with the public trust and is to be considered primarily from the standpoint of public interest to the same extent and upon the basis of the same general principles as our other public utilities."

Hearings on H.R. 7357 Before the House Comm. on Merchant Marine & Fisheries, 68th Cong. 1st Sess. 10 (1924). In 1930, the Federal Radio Commission stated that: "[although] [t]he conscience and judgment of a station's management are necessarily personal, . . . the station itself must be operated as if owned by the public. . . . It is as if people of a community should own a station and turn it over to the best man in sight with this injunction: 'Manage this station in our interest.' . . . The standing of every station is determined by that conception."

[19] The initial involvement of government in the selection of broadcast licensees limits the relevance of one of the overriding concerns of First Amendment jurisprudence: the necessity of preserving the full independence of the press and individual speakers for government oversight. For example, in *Miami Herald Publishing Co. v. Tornillo*, 418 U.S. 241 (1974), the Supreme Court held that statute which provided for a right to respond to newspaper attacks upon candidates for public office was unconstitutional. In striking down the statute, the Court emphasized the "governmental coercion" involved in enforcing such a right of reply, 418 U.S. 255, as well as the level of governmental interference in the operation of the press that such a right would entail. In his concurring opinion, Justice White adverted to the "virtually insurmountable barrier between government and the print media insofar as government tampering in advance of publication with news and editorial content is concerned", 418 U.S. at 259. Such concerns are obviously of limited relevance in the context of broadcasting. The rigid wall separating government and the printed press does not exist, since the Federal Communications Commission must, of necessity, select among competing applicants for available broadcast frequencies and licenses must be renewed every three years. More positively, the government's involvement in broadcasting presents the opportunity for government to creatively fashion regulatory regimes in order to vindicate a range of First Amendment interests left unprotected by a strict separation between government and the system of freedom of expression.

[20] In other contexts, the FCC itself has acknowledged that there is a "scarcity of spectrum." *See, e.g., FM Subsidiary Communications Authorizations*, 55 RR 2d (P&F) 1607, 1613 n.19 (1984), *rev'd on other grounds, People of the State of California v. FCC*, No. 85-1112 (D.C. Cir., August 22, 1986). *See also* "FCC Discovers That Carving Up the Spectrum Isn't What It Used To Be," National Journal, May 19, 1984, at 983. The Commission recently spent almost two years to resolve competing claims for the same spectrum lodged by the cellular radio industry, providers of land mobile service, public safety officials, and proponents of a mobile satellite service. *See Report and Order in Gen. Docket Nos. 84-1231, 84-1233, and 84-1234*, FCC 86-333 (released September 26, 1986).

[21] Independent VHF stations have recently sold for as much as $450 million in Boston, $510 million in Los Angeles, and more than $700 million in New York. *See* "Changing Hands 1985," *Broadcasting*, January 27, 1986, at 91-110, for a review of the record $5,668,261,073 worth of broadcast station sales during 1985.

[22] *Red Lion*, 395 U.S. at 396. Approximately 150 comparative hearing cases involving radio and television authorizations are now pending before the FCC. *Broadcasting*, June 16, 1986 at 49. In the 1985 *Fairness Report*, the FCC argued that the amount and type of information sources in what it calls the "information services marketplace" are significant, diverse, and expanding. General Fairness Obligations of Broadcast Licensees, 102 FCC 2d 193, 197-221 (1985) (*"Report"*). None of that discussion, however, has anything to do with, or undercuts the fundamental facts that a broadcaster receives a license or that there is a greater demand to broadcast than there are frequencies available.

[23] 412 U.S. 94 (1973).

[24] *Id.* at 101.

[25] The Court observed that:

"It was reasonable for Congress to conclude that the public interest in being informed required periodic accountability on the part of those who are entrusted with the use of broadcast frequencies, scarce as they are. In the delicate balancing historically followed in the regulation of broadcasting Congress and the Commission could appropriately conclude that the allocation of journalistic priority should be concentrated in the licensee rather than diffused among many. This policy gives the public some assurance that the broadcaster will be answerable if he fails to meet its legitimate needs. *Id.* at 125."

[26] 436 U.S. 775 (1978).

[27] *Id.* at 799.

[28] 453 U.S. 367 (1981).

[29] The Court's language in *CBS, Inc. v. FCC*, as well the inescapable fact of governmental licensing of broadcasting indicate that the argument that the Fairness Doctrine imposes an unconstitutional condition on the grant of broadcast licenses and upon the exercise of First Amendment rights is without merit. As *CBS, Inc. v. FCC* indicates, such an argument is simply inapplicable in the context of broadcasting. In fact, the Court has found that imposing conditions such as those embodied in the Fairness Doctrine advances, rather than inhibits First Amendment values. The Court observed in *Red Lion* that:

"To condition the granting or renewal of licenses on a willingness to present representative community views on controversial issues is consistent with the ends and purposes of those constitutional provisions forbidding the abridgment of freedom of speech and freedom of the press. 395 U.S. at 394."

Similarly, in *FCC v. NCCB*, the Court rejected an argument that the Commission's cross-ownership restrictions "unconstitutionally condition[ed] receipt of a broadcast license upon forfeiture of the right to publish a newspaper," noting, *inter alia*, that the purpose and effect of the regulations was "to promote free speech, not to restrict it." 436 U.S. at 800-801. The import of these cases is that the government may properly impose conditions on a broadcast license, such as the condition embodied

in the Fairness Doctrine, where these restrictions further First Amendment values.

[30] Most recently, in *FCC v. League of Women Voters of California*, the Court reiterated that: "[t]he fundamental distinguishing characteristic of the new medium of broadcasting that, in our view, has required some adjustment in First Amendment analysis is that '[b]roadcasting frequencies are a scarce resource [that] must be portioned out among applicants.' 104 S.Ct. at 3116, *quoting Columbia Broadcasting System, Inc. v. Democratic National Committee, 412 U.S. at 101.*"

[31] *Fairness Report*, 48 FCC 2d 1 (1974).

[32] *New York Times Co. v. Sullivan*, 376 U.S. 254, 266 (1964).

[33] *As noted infra*, under the Fairness Doctrine the FCC accords broadcasters substantial discretion in determining how to meet their Fairness Doctrine obligation in any particular case.

[34] *See Columbia Broadcasting System, Inc. v. Democratic National Committee*, 412 U.S. at 111-112, 131; *Cf. Red Lion*, 395 U.S. at 392 n. 18 (noting importance of expression of opposing views by persons who actually believe them).

[35] For example, the Commission has stated that: "As a public trustee [the broadcaster] must present representative community views and voices on controversial issues which are of importance to his listeners . . . and this means also that some of the voices must be partisan. A licensee policy of excluding partisan voices and always itself presenting views in a bland inoffensive manner would run counter to the 'profound national commitment that debate on public interest issues should be uninhibited, robust, and wide open.' "

Democratic National Committee, 25 FCC 2d 216, 222-23 (1970). *See also Cullman Broadcasting Co.*, 40 FCC 576, 577 (1963) (where licensee permits use of its facilities for expression of one viewpoint on a controversial issue, reasonable opportunities must be afforded for "presentation of contrasting views by spokesman by other responsible groups).

[53] *See* 424 U.S. at 85-104; *see also Regan v. Taxation With Representation of Washington*, 461 U.S. 540 (1983) (holding that government may condition tax-exempt status on absence of lobbying activities).

Mr. CONTE. Mr. Speaker, I yield 30 seconds to the gentlewoman from Nebraska [Mrs. SMITH].

Mrs. SMITH of Nebraska. Mr. Speaker, I think it should be understood very clearly that when we vote on this amendment No. 59, it will include Mr. WHITTEN's amendment clarifying the intent of section 311 regarding REA. For many of us this is extremely important. This project was designed only for Alaska, and it is very important that we clarify the fact that it does not apply to the rest of the country.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri [Mr. YOUNG].

Mr. YOUNG of Missouri. Mr. Speaker, I rise in strong support of the gentleman from Mississippi, the Honorable JAMIE WHITTEN, chairman of the House Appropriations Committee, in insisting that the House recede and concur with the Senate amendment No. 59 with an amendment.

Mr. Speaker, briefly, the language contained in the House version of the appropriations bill making appropriations for the General Services Administration deals rationally with the budget of the General Services Administration Federal buildings fund. The House version, as opposed to the Senate version, attempts to strengthen the Government's position with respect to ownership of Federal buildings as opposed to the continued leasing of space to house Federal departments and agencies across the country. Mr. Speaker, a key concern to the House Committee on Public Works and Transportation has been the considerable expansion in the leasing program of the General Services Administration. Expenditures for leased space have increased from $364 million in 1975 to the current level of approximately $1 billion in fiscal year 1986. However, the $1 billion requested in fiscal year 1986 for the leasing of space by the Government represents only a partial payment since the gross commitment of all General Services outstanding leases currently total approximately $2.9 billion. The omission of lease commitments for all future years from the executive branch grossly understates leasing costs.

Mr. Speaker, the House version of the legislation dealing with the General Services Administration provides for: The construction of a new Federal building in Jasper, AL, at a cost of $3.3 million which was approved by the House Committee on Public Works and Transportation on December 16, 1985; construction of a building in Patterson, NJ, at a cost of $7.6 million which was approved by the House Committee on Public Works and Transportation on December 16, 1985; construction of a Federal building in Wilkes Barre, PA, at a cost of $20.6 million which was approved by the House Committee on Public Works and Transportation on December 11, 1985; construction of a border station in Columbus, NM, at a cost of $2.6 million which was approved by the committee on June 25, 1985; construction of a Federal building in Miami, FL, at a cost of $42 million on June 25, 1986; and lastly, construction of a Federal building in Chicago, IL, at a cost of $209 million on December 11, 1985. Mr. Speaker, the House Committee on Public Works and Transportation carefully scrutinized the General Services Administration budget and readjusted some of their priorities. We authorized only repair and alteration projects in their budget which we felt were critical and related to health and safety for our Federal workers and those projects which were gravely needed projects around the country.

Mr. Speaker, the Senate to the contrary basically accepted the administration's budget which only continues to escalate our leasing bill annually. We must correct this situation and the House bill attempts to assist in this endeavor. Further, the Senate bill contains 17 repair and alteration projects which have not been authorized by the House Committee on Public Works and Transportation and are not considered high priority projects in terms of the General Services Administration.

Mr. Speaker, the conferees of the House recognized the financial impact the construction of the Federal building in Chicago, IL, and the Federal building in Miami, FL, could have on the financial capability of the Federal buildings fund of the General Services Administration; therefore, the House conferees determined the appropriate manner to provide for the construction of these badly needed Federal buildings was to authorize the administration of the General Services Administration to acquire a building not to exceed 250,000 square feet in Miami, FL, by lease for a term not to exceed 30 years on such terms and conditions as he deems appropriate. The same authorization is contained in this legislation by authorizing the acquisition of a 600,000-square-foot building in Chicago, IL, by lease not to exceed 30 years. At this time, I feel it is important to point out that it is the intent of the House Committee on Public Works and Transportation that such leases should contain purchase options so that title to the property can be obtained at the most early timeframe.

Mr. Speaker, to conclude, the House version of the Treasury, Postal Service appropriations bill previously approved by the House is far superior to the similar bill passed by the Senate

with respect to the General Services Administration and I strongly urge my colleagues to support the chairman of the House Committee on Appropriations, the Honorable JAMIE WHITTEN, in rejecting the Senate position and supporting the House position.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Wisconsin [Mr. OBEY].

Mr. OBEY. Mr. Speaker, I simply want to congratulate the chairman for taking the action that he has taken on this amendment to clarify the situation that existed with respect to REA's.

The SPEAKER pro tempore (Mr. RUSSO). The question is on the motion offered by the gentleman from Mississippi [Mr. WHITTEN].

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 301, nays 106, not voting 25, as follows:

□ 2220

Mr. DAVIS changed his vote from "yea" to "nay."

Mr. WEBER and Mr. HERTEL of Michigan changed their votes from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore (Mr. RUSSO). The Clerk will designate the next amendment in disagreement.

The text of the amendment is as follows:

Senate amendment No. 60: Page 61, line 19, strike the following language:

SEC. 143. None of the funds appropriated by this Act or any other Act shall be used for the processing of any application for a certificate of label approval for imported distilled spirits, malt beverages, or wine under section 205(e) of the Federal Alcohol Administration Act, unless each application is accompanied by appropriate documentation.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House insist on its disagreement to the amendment of the Senate numbered 60.

PREFERENTIAL MOTION OFFERED BY MR. LOWRY OF WASHINGTON

Mr. LOWRY of Washington. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. LOWRY of Washington moves that the House recede from its disagreement to Senate amendment No. 60 and concur therein.

The SPEAKER pro tempore. The gentleman from Mississippi [Mr. WHITTEN] will be recognized for 30 minutes, and the gentleman from Ohio [Mr. REGULA] will be recognized for 30 minutes.

PARLIAMENTARY INQUIRIES

Mr. LOWRY of Washington. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. LOWRY of Washington. Mr. Speaker, my point of parliamentary inquiry would be on the division of time, on which point I would request the customary one-third if both managers of the bill are of the opposite position from mine.

The SPEAKER pro tempore. Is the gentleman from Ohio [Mr. REGULA] in favor of the motion?

Mr. REGULA. Yes, I am, Mr. Speaker.

The SPEAKER pro tempore. The gentleman from Washington [Mr. LOWRY] qualifies and is entitled to 20 minutes.

The gentleman from Mississippi [Mr. WHITTEN] will be recognized for 20 minutes; the gentleman from Ohio [Mr. REGULA] will be recognized for 20 minutes; and the gentleman from Washington [Mr. LOWRY] will be recognized for 20 minutes.

Mr. GEKAS. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. GEKAS. Mr. Speaker, did I understand, when the Clerk read the motion that was submitted to the desk, that it was a motion to concur in the Senate amendment or to recede? I did not understand exactly what the motion was.

The SPEAKER pro tempore. The preferential motion was a motion to recede from disagreement and to concur in the Senate amendment.

Mr. GEKAS. I thank the Chair.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Mississippi [Mr. WHITTEN].

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. MRAZEK].

Mr. MRAZEK. Mr. Speaker, we face a serious health risk in the United States of America that results from the fact that there are thousands of different exporters of wine, beer and distilled spirits. There are 900 different exporters of wine in Austria. There are more than 16,000 different exporters of wine in Italy.

Unfortunately, we learned last year, with the deaths of over 30 Italian consumers of Italian wine, that was contaminated with enough antifreeze that their body temperature would have been kept at about 120 degrees at 75 degrees below zero Fahrenheit.

The problem relates to the fact that different additives and ingredients are used to sweeten some of these beverages that are exported to the United States and, thankfully, no American has as yet died, but earlier this year, in hearings chaired by my good friend and colleague, the gentleman from New York [Mr. HORTON] of the Committee on Government Operations, we learned that BATF does not have the resources or the tools to monitor or test for thousands of different exporters, particularly of small vineyards and products that may, in fact, be contaminated. There may, in fact, be wines contaminated right now on the shelves of stores across this Nation.

The first resource and the first step that we think is required from a health and safety standpoint is simply to stipulate that the country of origin that produces these wines certify compliance for any wine exported from that nation to the United States. They certify compliance that it meets the United States' standards.

I must point out to you that every single one of the nations in the European Economic Community already requires that the U.S. Government certify compliance for any beverage, distilled from alcohol or any wine or any beer produced in this country; they require that we, in fact, already comply with their domestic standards.

All we are talking about is parity. All we are talking about is reciprocity.

There are a couple of States in the United States, such as Washington and Pennsylvania, that have what are called gray market industries in dealing with wine, beer and distilled spirits. They are concerned about the fact that this amendment might impede their ability to buy products overseas, bring them to their States and sell them.

□ 2230

The bottom line is our amendment takes into account their concerns. All we are asking for is that the government of origin where these wines, beers and other distilled spirits are produced certify compliance with U.S. standards and provide a list of ingredients of what is in those beverages.

It is a simple health and safety issue. We have attempted to deal with the gray market States and that is the bottom line here.

Chairman ROYBAL has handled this issue through the Appropriations Subcommittee of Treasury and Postal Service very ably. All we ask of you is to support the House position that we carried to the conference with the U.S. Senate.

Mr. McGRATH. Mr. Speaker, will the gentleman yield?

Mr. MRAZEK. I yield to my friend, the gentleman from New York.

Mr. McGRATH. Mr. Speaker, I thank the gentleman for yielding.

I want to associate myself with the statement of my colleague, the gentleman from New York and Long Island.

Mr. LOWRY of Washington. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we have before us what is meant to be a well-intended health issue, which frankly is not a health issue at all. As a matter of fact, the only effect it would have on health would be an antihealth issue.

The unintended effect of the Mrazek language that is in the CR that we are asking that we recede to the Senate who has refused to go along with, is that it will require our States to choose to do different, to go through monopolistic liquor distributors. It will require that our States that choose to go to a competitive market and buy on competition at a savings of $20 million to the State of Pennsylvania, at a savings in 9 months of $4.9 million to the State of Washington, meeting totally the BATF requirements of an independent laboratory study, or you cannot get a label, meaning that totally it will say that you cannot do that. You have to go through the monopolistic distributor that is named by the producer.

Now, that is the end result of this.

The difference, for instance, in the price that would have to be paid by the Washington State Liquor Control Board would have to pay if the Mrazek language prevails is $62.90 more per case for Grand Marnier; $19 more per case for Johnny Walker Black; $15.40 more per case for Cutty Sark. And where does that money go? That money goes to the monopoly distributor that the end result of this language would require to do.

Again I want to state that the Bureau of Alcohol, Tobacco and Firearms, requires that every alcoholic beverage sold in this country has a label and the only way you can get that is to meet their requirements, which in our case means an independent laboratory study which this would knock out. That is the unintended end result of this, and I know the gentleman did not intend that.

Mr. DICKS. Mr. Speaker, will the gentleman yield?

Mr. LOWRY of Washington. I yield to the gentleman from Washington.

Mr. DICKS. Mr. Speaker, I want to say to my friend from Washington that I am pleased that he offered this amendment, and just to make it very clear, this amendment was adopted on a voice vote without very much debate in the Appropriations Committee. I do not believe members of the Appropriations Committee were well informed about the substance of this amendment.

Now, just to make sure everybody understands what we are asking you to do here, a motion to recede and concur means that we would strike out the Mrazek amendment and concur in the Senate position, which was that this was a bad idea and a bad amendment.

My friend from Washington has made the point here, and this is a most important point, that if you adopt the Mrazek amendment, what you are doing is creating a monopoly for the importers of these various brands. You are creating a monopoly.

Now with the parallel market in Europe, the States that have controlled liquor can buy on the parallel market for a vastly reduced cost to the consumers of the various States.

This amendment, I can understand the gentleman from New York, if I represented——

Mr. MRAZEK. This is to protect consumers from adulterated beverages.

Mr. DICKS. Mr. Speaker, the gentleman from New York is out of order.

The SPEAKER pro tempore. (Mr. RUSSO). The gentleman from Washington has the time. The Chair will inform the Members that the gentleman from New York has time remaining on his own time. The gentleman from Washington has time remaining and the gentleman from Ohio has 20 minutes remaining.

Right now the gentleman from Washington in the well controls the time and he has yielded to the gentleman from Washington.

The Chair would ask Members to kindly respect the courtesies of other Members who are speaking.

Mr. DICKS. Mr. Speaker, I want to answer the charge, the charge of the gentleman from New York on safety. The Bureau of Alcohol, Tobacco, and Firearms has set up a procedure whereby this liquor was brought in from the parallel market and tested independently. The cost of the test was paid for by the importer. We had an acceptable safety procedure, but under the Mrazek amendment that safety procedure is no longer allowed; I think that is a serious mistake. The Mrazek amendment should be defeated because it is anticompetitive.

Mr. REGULA. Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. HORTON].

Mr. HORTON. Mr. Speaker, I rise in opposition to the motion to recede and concur with the Senate and I rise in support of the House position. I do this for a number of reasons. This provision is very important to the health and safety of American citizens and to the ability of our Government to insure that alcoholic beverages shipped to the United States comply with U.S. ingredient laws.

Mr. Speaker, everybody is throwing facts around. I want to tell you something. No one every asked the General Accounting Office to check on wines coming into this country until I did this year. The GAO made a report which was very condemning of the BATF and also the FDA and said that they did not have the proper procedures. The Government Operations Committee, based on that report, had a hearing shared by the gentleman from Georgia [Mr. BARNARD]. It was a good hearing. I testifed, as others did.

Just recently, that committee and the Government Operations Committee has issued a report condemning both those agencies because we do not have the proper procedures, we do not have a way to check and test on the wines that are coming here.

Now, let me tell you what happened. Last year we found that wine from Australia has diethylene glycol, which is DEG. It is similar to the primary additive in automobile antifreeze. When it is added to wines, this toxic substance can affect the taste, making it sweeter and thereby dramatically reducing the more costly natural fermentation time that might otherwise be required. Diethylene glycol is not permissible in the U.S. wines or in wines sold in the United States at any level whatsoever; yet almost 100 foreign wines sold in the United States have thus far been found to contain varying levels of this substance. Not one American wine of the literally hundreds tested has been found to contain even a trace of DEG.

Our committee's hearings proved an important point; namely, that our Government lacks sufficient information to adequately test and monitor imported wine and alcoholic beverage products. We further discovered that we are the only nation that lacks such information and does not now require the documentation specified in the continuing resolution. All of our trading partners require ingredient documentation of American alcoholic beverage producers when these producers ship and sell their wines overseas.

I believe the American public is entitled to the same health and safety protection that the filing of ingredient information with our Bureau of Alcohol, Tobacco and Firearms can help facilitate.

Mr. Speaker, this is an important measure and I urge my colleagues to send our conferees back to the Senate with a strong signal that Americans deserve the same information on foreign alcoholic beverages sold in this country that are required of American producers when they sell abroad.

Mr. LOWRY of Washington. Mr. Speaker, will the gentleman yield?

Mr. HORTON. I am glad to yield to the gentleman from Washington.

Mr. LOWRY of Washington. Mr. Speaker, is it not true that the wine the gentleman was talking about came in through the authorized distributors that are the monopolies that the Mrazek amendment would protect? That is how the wine got in here.

Mr. HORTON. Mr. Speaker, I take back my time. The wine did not come in that way. As a matter of fact, the way we found out about it was that Canada tipped our people off. We did not have the documentation which we should have had. We do not have it to this day and we do need it.

I think this is a very important amendment. I think we should support the House position and do not support the Senate position.

Mr. LOWRY of Washington. Mr. Speaker, if the gentleman will yield further, how could it get into this country if it is not through those monopolized authorized distributors? It is the only way it can get in.

Mr. MRAZEK. Mr. Speaker, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from New York.

Mr. MRAZEK. Mr. Speaker, I think it is important for everyone to understand that we are not talking about manufacturer or distributor compliance. We are talking about compliance by the country of origin.

Every single one of the nations in Europe that export wines to the United States of America require that we, the U.S. Government, certify compliance with their standards domestically before we can market any of our products there. All we are suggesting is parity and reciprocity.

The system has broken down here in this country. For thousands upon thousands of small exporters of products here to this country and States like Washington want to buy cheap and sell high and they make revenue in their States that way.

I am not trying to suggest that should be curtailed, but this is a health and safety issue.

Mr. HORTON. Mr. Speaker, the problem is that we do not have the information available to support and back up our agencies, the BATF and the FDA.

Now, the FDA has said to the BATF that you can have the authority and they have given them the authority to do it.

Mr. Speaker, I urge a no vote on the amendment.

Mr. REGULA. Mr. Speaker, I yield 7 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Speaker, I am strongly opposed to the amendment offered by the gentleman from New York [Mr. MRAZEK] and I therefore urge all Members to vote in favor of the preferential motion proposed by the gentleman from Washington [Mr. LOWRY].

In my judgment, the amendment purports to address potential health hazards of certain wine, beer, and spirit imports; nevertheless, its real purpose is to preclude the importation of parallel or gray market imports of these products.

I am not sure how the amendment works. The amendment in itself is a fairly harmless one sentence amendment which was the reason it was slipped through without notice until it got into conference. It is clearly not a matter of the jurisdiction of the Appropriations Committee; nevertheless, we find it in an appropriations bill, so I am not sure how it works; but I understand that the importer would have to get a certificate either from the country of origin or the producer itself. That means that the only importers who could obtain that documentation without great difficulty would be the so-called authorized distributors around whose operations the amendment of the gentleman from New York attempts to build a fence.

□ 2245

In other words, those importers who purchase wine, beer, and spirits from independent sellers abroad will be prohibited from such imports in the future, or they will have to pay much higher prices for them, and whatever price the authorized importers will be able to charge will be raised up to slightly under what that newer, higher price for the independent sellers will be set at.

There are parallel importers who are now offering a better price alternative to consumers of imported beverages. There are State-owned liquor stores who are seeking to save State funds by purchasing parallel imports. It gives them a better markup. These people are providing some competition to those authorized dealers who would otherwise have a monopoly, and would under the Mrazek amendment have a monopoly of sales of these items in the United States.

The gray market issue is being disguised as an issue designed to protect the consumer from liquor imports containing harmful substances. Yet I am informed that none of the contaminated wine that has entered this country was a gray market purchase. If there is a way to protect consumers from harmful substances in liquor imports that would protect the rights of parallel importers as well, I for one would be all for it.

I do not want to make liquor purchases more attractive, but I would like to see that the consumers are protected, and particularly the State agencies who tend to be the largest consumers or largest single purchasing consumers of these particular products. I believe that in prohibiting parallel imports we would create a precedent that would aid those who are attempting to eliminate all parallel imports in the future. I am sure that that is a precedent that most of us do not want. Gray market purchases have not caused substantial business losses for authorized dealers. They have given many consumers an opportunity to purchase goods that they would not otherwise be able to purchase.

I believe that this amendment is a simple exercise in fence-building. It builds fences around authorized importers, it builds walls around certain enterprises, and fences out other enterprises. I think that had it been handled in the regular order that there would have been time for the committees of this House of normal jurisdiction to do their usual good work on it. Stuffed as it is into a continuing resolution as a part of an appropriations bill, I think that the Mrazek amendment should be defeated, and the Lowry amendment should be supported.

Mr. MRAZEK. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from New York.

Mr. MRAZEK. I thank the gentleman for yielding.

Mr. Speaker, we all benefit from the prepared statement that the gentleman read to us, which I would only submit that he might not have read to us if he had a chance to attend the hearings chaired by my colleague, the gentleman from Georgia [Mr. BARNARD], and where my colleague, the gentleman from New York [Mr. HORTON] testified, and where clearly, if he was one of the people who drank the adulterated wine, that may be on shelves now in the United States, wherever it came from, whether it came from gray market——

Mr. FRENZEL. Mr. Speaker, reclaiming my time, first of all, as I understand it, there has not been a showing that this was gray market wine, or that it was parallel imported wine. Therefore, what the gentleman is doing is throwing up economic barriers so that some citizens, some enterprises, will have privilege in our economy, and others will not.

As pointed out by the two gentlemen from Washington, it may in fact be that we have reduced the safety testing on these imported spirits. I think that until the proper committees of jurisdiction can present a bill that is not a midnight rider on a continuing resolution, we would do far better to approve the amendment of the gentleman from Washington [Mr. LOWRY].

Mr. LOWRY of Washington. Mr. Speaker, I yield 8 minutes to the gentleman from Pennsylvania [Mr. GRAY].

Mr. GRAY of Pennsylvania. Mr. Speaker and colleagues, I rise in support of the motion made by our colleague, the gentleman from Washington [Mr. LOWRY], to recede to the Senate with respect to the Mrazek amendment.

Briefly, I would like to point out to my colleagues that this provision would not provide an added safeguard to protect the health and safety of our citizenry as claimed. If in fact we could be assured that by this provision no contaminated or otherwise bad wine or liquor would come into the United States, I would be fully supportive of it. Unfortunately, the health and safety of our citizenry is not—and I repeat, not—at issue here tonight.

The sum effect of this provision is to create a very exclusive club of distilled-spirit importers, a club which I might add would become impenetrable should this particular provision be adopted tonight.

The fact is, Mr. Speaker, that this is a provision to establish a monopoly, plain and simple. It has absolutely no impact on health or safety. It would effectively prohibit any importer other than the manufacturer's exclusive representative from selling distilled spirits in the United States.

How does it do this, you might ask. Well, the Mrazek language requires that the manufacturer's ingredients list accompany any imported alcoholic beverage coming into the United States. Unfortunately, only—only—the manufacturer's designated importer would be privy to such information. This is primarily because the ingredient list is essential to the trade secret.

Now, many Members might ask, "Why is BILL GRAY opposing this provision?" Well, let me tell them why. The Commonwealth of Pennsylvania by State law has a monopoly statewide on the acquisition of all distilled spirits consumed within the State. As such, the State liquor board spent more than $750 million on distilled spirits last year, more than any other single entity in the Nation.

Simply stated, my State's ability, as in the case of Washington, Alaska, and some other jurisdictions, to secure the best possible price for consumers would be jeopardized by the approval of this amendment. That, Mr. Speaker, is what the provision is all about, the elimination of competition, not the health, not the safety, of Americans.

In fact, and please listen to this, the irony of this entire matter is that the very people who are protected by this provision, the manufacturers and their importers, are the very same people who brought in the contaminated alcoholic beverages that are used to justify the need for the provision.

There is not a single parallel market importer responsible for bringing a contaminated bottle of liquor or wine into the United States—not one. So therefore the provision is going to create a monopoly on the basis of health and safety, and where did any contaminated wine come from? From the very same people who are going to be protected by the amendment.

This amendment also has the potential of setting a very dangerous precedent by protecting a certain class of manufacturers and importers, where in fact we do not treat others, most notably in the area of sporting goods, electronic items, and literally millions of dollars in other imported items.

□ 2255

Mr. Speaker, this has nothing to do with health, it has nothing to do with safety because the very illustration used to justify this was brought in by the same people who would be protected. It has to do with giving a monopoly to one group.

So I would urge you to support the Lowry motion. This is bad public policy.

Mr. HORTON. Mr. Speaker, will the gentleman yield?

Mr. GRAY of Pennsylvania. I yield to my friend, the gentleman from New York.

Mr. HORTON. Mr. Speaker, the only point I would make is that this does affect the safety and health of American citizens and we are not dealing with sporting goods, we are dealing with food products.

Mr. GRAY of Pennsylvania. I would like to respond.

Let me just tell you why, folks, this has nothing to do with health or safety, because if it did then what we would do in this amendment is require independent testing of everybody, including the distributors, the ones who put the ingredients in it. We would test them. But it does not, so therefore it is really not a health and safety issue.

Mr. GAYDOS. Mr. Speaker, will the gentleman yield?

Mr. GRAY of Pennsylvania. I yield to my colleague, the distinguished gentleman from Pennsylvania [Mr. GAYDOS].

Mr. GAYDOS. Mr. Speaker, I thank my colleague for yielding. Let me emphasize to my colleagues that $20 million, and I repeat $20 million is a substantial amount to throw indiscriminately against the consumers in Pennsylvania.

We have talked about this as if it is so important, that health and safety is an authentic issue. If that is true, we in Pennsylvania in particular, and I am sure in Washington and other controlled States would like to have an opportunity to testify in detail before the committee. I understand the committee hearings were very limited. I understand that the participation was limited in those hearings. I am personally very familiar with health and safety serving on the Health and Safety Subcommittee in another aspect on the Education and Labor Committee. That does not seem to be the issue here.

We are talking about an exclusive distributor, one that is going to make a profit, and that profit is going to be made at the expense of Pennsylvania, and Pennsylvania, as we all know, has contributed her share to this economy in this Nation under very great duress and difficult circumstances, and $20 million is a lot of money to the taxpayers of Pennsylvania.

Mr. GRAY of Pennsylvania. Mr. Speaker, again I would say to the gentleman and to this body, if public health were the real issue, the amendment would require independent testing, not simply a label by the monopoly that makes it all right.

Why does it not have independent testing of everything brought in? Because it has nothing to do with health and safety and it has to do with protecting one class, and that is the distributors, by saying you can put a label up, and put the ingredients on.

If we are serious about health, if we are serious about safety, then let us require testing of all of it.

Mr. MRAZEK. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, I have been fascinated to listen to the discussion by the gentlemen who seem to represent primarily two States, the State of Washington and the State of Pennsylvania.

The marketing of alcoholic beverages in those two States is a monopoly. Who do you think serves on the State liquor control board in the State of Washington? Do you think it is Mother Teresa? Do you think Eleanor Roosevelt once served on that board?

Think about the State liquor control authorities in your States. It is incredible, I know, but true, that Ralph Nader never served on a State liquor control board in any State in the United States of America.

The bottom line is there is a monopoly in these two States, and they seem to view this issue strictly in terms of financial resources for those particular States, and I can understand why they do.

But again, anyone who attended the hearings of the Government Operations Committee and listened to the stories of the people who died from drinking adulterated wine, and regardless of how it gets into the United States of America, is not as important as the fact that it may already be here. I think we have to at least, I think it is fair to at least require the government of origin, not the manufacturer, and we have heard some specious arguments here tonight about the manufacturer or the distributor requiring documentation. We are not asking for documentation by the distributor or the manufacturer. We are simply asking for the same documentation that the U.S. Government is required to supply to every single nation in the European Economic Community when we wish to export any of our alcoholic products to those nations.

Mr. Speaker, I yield whatever time is required to the gentleman from California [Mr. ROYBAL], chairman of the Subcommittee on Treasury and Postal Service of the Committee on Appropriations.

Mr. ROYBAL. Mr. Speaker, I want to let it be known that I like the State of Pennsylvania and the State of Washington. But I also want to point out that the language that is being proposed strikes out the language that was passed by the full Committee on Appropriations and also the language approved by the House. That is the exact language that went to conference and the language that we finally brought back again in disagreement to the House today.

We made every effort to reach a compromise. In fact, at one particular point we offered compromise language that was worked out by all of the principals that are involved. But the other body had their own compromise language. They proposed theirs to us and we ours to them, and each in individual votes turned the languages down.

So the only thing we had left is the language that we now have before us which actually says that none of the funds appropriated by this act or any other act shall be used for the processing of any application for a certificate of label approval for imported distilled spirits, malts, beverages or wine under section 205, unless each application is accompanied by appropriate documentation. The language is clear and simple.

Then in discussions and in debate in the conference committee we spent a great deal of time trying to reach an agreement. We were told that a committee of the House did, in fact, have hearings, and that those hearings definitely indicated that there was a serious problem with regard to the importation of alcoholic beverages to the United States. We concluded, based on that testimony, that it was necessary to protect the health and safety of the American consumers, and that it was imperative to ensure that all imported distilled spirits, wine and malt beverages should comply with the U.S. standard of purity and identity.

When that was done by the full committee it was done in good faith, recommending something that we actually believed would require those individuals or firms that imported these spirits into the United States, to comply with the U.S. standards of purity and identity. We had no idea that we were going to get into this controversy.

But the truth of the matter is that there is a great difference of opinion, but if this amendment is adopted there will be no language at all. The problem then will persist, and if it is true that the problem with regard to adulterated liquor is present in this country, then I think we have a responsibility to do something about it.

□ 2305

Mr. GAYDOS. Mr. Speaker, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman.

Mr. GAYDOS. Let me ask one very simple question: The very essence, and I repeat, the very essence of a controlled State is that a State takes upon itself the responsibility to test its product, to keep liquor out of the way from minors, to make sure it is sold in proper places, proper containers.

Health and safety, as far as the State of Pennsylvania is concerend, if those that held the hearings would have asked us, we would have testified, in no uncertain terms. We do practice it. That is one of the basic essences of a State having control.

So I suggest to my friend in the well that that aspect of it is not proper to elongate on, and I am going to suggest this to my good friend: The fact is we are talking about money, we are talking about revenue. It is unfair to force Pennsylvania and Washington to utilize some exclusive importer and pay him that profit; that is not fair.

Mr. ROYBAL. Well, I am not talking about money and profit when I am talking about making it necessary for those who import liquors into the United States to comply with the U.S. standards of purity. I do not think that that is asking too much.

Mr. GAYDOS. Mr. Speaker, if my friend would yield, may I ask one practical question. If this amendment were in today and if we had passed it, we successfully as a group adopted it, is it a fact yes or no, whether or not the Italian situation where we had some detrimental wine, poison wine, would that have been corrected and would that have been prevented from being part of that consumed in this country, under this amendment?

The answer has to be no, I believe.

Mr. ROYBAL. That is exactly where the controversy lies.

Mr. Speaker, I yield to the gentleman from Texas [Mr. GONZALEZ].

Mr. GONZALEZ. Mr. Speaker, I have a question. The discussion has centered mostly on the question of the importation of wine; but what about beer?

My district has the only two main producing breweries in the Southwest. Now, we have competition from foreigners; Mexico and Milwaukee.

The only thing I know is that sometimes it is charged that the Mexican beer has a little bit of tequila in it. Now, what effect will this amendment or this legislation, if approved, have on the beer, on the breweries, the Lone Star of Texas and the Pearl Brewery of San Antonio? And the Shiner Brewery of Shiner, TX.

Mr. ROYBAL. Mr. Speaker, I do not think that the Lone Star State will be affected by any language in this bill.

Mr. GONZALEZ. It would not affect it; OK.

Mr. HORTON. Mr. Speaker, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman.

Mr. HORTON. Mr. Speaker, we are making light of a very serious matter. Now I asked the General Accounting Office to study this problem as to whether or not, first, did we have the facilities, and second, did we have the agencies that would check and make certain that we did not have consumed in this country Austrian wine, which had DEG; or Italian wine, which had methanol; both of which can kill.

We were told in the GAO report, and it is available; it was made public and it was before the subcommittee; we were told that they did not have the ability to make those kind of decisions.

We may not think that this is perfect language, and we may be concerned about our States, and I can understand that; but I think there is a very serious health and safety problem.

Whether Members were at the hearings or not, the GAO report did condemn these two agencies. The Government Operations Committee has issued a report concerned about the safety and health of Americans consuming foreign products.

I think that this documentation that is required in the House language would be very helpful to make certain that we do not have the types of wines coming in that are contaminated. It would give our agencies a better handle to make certain that those wines did meet our standards.

Mr. ROYBAL. Mr. Speaker, I feel that the controversy, regardless of facts or points made in debate, will just continue to exist.

The truth of the matter is that this was done through the regular process; passed by the subcommittee, passed by this House, and we in conference held to the position of the House. Now it is back before the House again. The House can do its will, and whatever it does, the chairman of the subcommittee and the full committee will then act accordingly.

I firmly believe that since our exporters must comply with the requirements of the importing country, and in an effort to protect the health and safety of American consumers, I feel that we are asking them to do the very same thing that we have to do when we export our liquor into their countries.

There is nothing unusual about that; I think that what they ask us to do protects their people, and we want Americans protected likewise.

I yield back the balance of my time.

Mr. REGULA. Mr. Speaker, I yield 1 minute to the gentleman from Florida [Mr. SHAW].

Mr. SHAW. Mr. Speaker, we have heard a lot of conversation about State monopolies and monopolies of the distributors coming into this country; but I think that the position was well set forward by the gentleman from Minnesota.

What we are really talking about doing is creating a separate monopoly that is going to run the price of liquor up of distilled beverages and wines and malt liquors. That is exactly what we are talking about.

If we want to start creating monopolies on appropriation bills, I think we are in an area where we really should not be. I think this has a whole other arena.

What we are talking about is running the price up for the consumer. That is exactly what we are talking about; there has not been one shred of evidence that has been presented on this floor tonight, or as far as I know, at any hearings that say that the problems and possible contaminations are going to be solved by the Mrazek situation.

I support the gentleman from Washington [Mr. LOWRY] and I would certainly hope that we would vote yes on the Lowry amendment.

Mr. LOWRY of Washington. Mr. Speaker, I yield 2 minutes to the gentleman from Florida [Mr. GIBBONS].

Mr. GIBBONS. Mr. Speaker, I think we ought to stop and figure out where we are. It is 11:15 on Wednesday evening, and this is an appropriations bill—is that right? You would not know it.

This is a whiskey and wine price fixing bill, and I do not know where it came from. If this bill had followed the normal pattern of practice, of bills for the last 200 years, it would have ended up in the Ways and Means Committee, and in my Trade Subcommittee, and you would have been spared this long thing. We would have had a hearing and we would have worked it all out, and we would probably have seen exactly where we are.

I am afraid my friend from New York is about to have the paternity of a little offspring that he would not want to admit he had here inadvertently. This is a whiskey/wine price fixing bill, through the guise of labeling. That is all it is.

Now, if the gentleman from New York will withdraw his amendment here and bring it into our committee next year, we will give him a full and fair hearing on the thing; bring in all the witnesses; Seagram's and everybody else who are involved in this, and we will get right down to the business of the situation.

At 11:15 in the evening, on an appropriations bill, that has never had a proper hearing in a proper committee, and there is no bill in the Congress—I have never seen a bill in the Congress on this subject—I think we ought to adopt the Lowry amendment and put it into this.

The SPEAKER pro tempore. (Mr. RUSSO). The Chair would inform the Members that the gentleman from New York [Mr. MRAZEK] has 2 minutes remaining, the gentleman from Washington [Mr. LOWRY] has 6 minutes remaining, and the gentleman from Ohio [Mr. REGULA] has 8 minutes remaining.

Mr. REGULA. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. FAZIO]

Mr. FAZIO. Mr. Speaker, this is, as the gentleman from New York [Mr. HORTON] says, a very important issue; certainly health and safety is involved.

Obviously, there are some other issues involved, and it does relate to

trade. When the Italian wine adulteration occurred, a number of people died in Italy; California wine producers, United States wine producers with Italian surnames lost market share, lost business because people could not tell the difference between California and Italian wine.

This is not an effort to be anticompetitive; this is an effort to be competitive.

We are asking for reciprocity. We are asking for equity.

□ 2315

We are asking for the same standards that apply to California and New York and, indeed, U.S. beer, wines, and liquor to be applied to those we import. What is good for the importers should be good for the exporters. We are not asking for anything special. In fact, we have gone as far as we can, as the gentleman from California [Mr. ROYBAL] said, to accommodate our critics from the true monopolies, those States that do run their own businesses and do not permit private competition. They do have true monopolies, and they keep the prices up for the benefit of revenue and they are putting aside public health, I think. In order to be fair, we said let the manufacturer, let the country of origin, somebody give us a certificate that requires they meet the same standards we have to meet, and that compromise was rejected in the Senate and therefore does not appear beside this bill as report language, as it should.

So at this late hour I would simply urge to stick with the committee. I would appreciate that. I think the California and other U.S. vintners and distillers would as well.

Mr. LEWIS of California. Mr. Speaker, will the gentleman yield?

Mr. FAZIO. I would be happy to yield to my friend.

Mr. LEWIS of California. I thank the gentleman for yielding.

As my colleagues know, VIC FAZIO and I seldom agree in the House. Clearly he needs some credibility when we are talking about competition. But having said that, in this case the gentleman is exactly right. I want to associate myself with his remarks. It is very apparent that there are those overseas who tried to shut our markets, tried to create unfair competition overseas. It should be a two-way street.

Clearly, in this case, clearly the gentleman from Washington has some special interests and California has none. We do appreciate the comments of the gentleman from California [Mr. FAZIO] and I am glad to rise in support of his position.

Mr. FAZIO. I appreciate the gentleman from California in more ways than I can say.

Mr. LOWRY of Washington. Will my friend from California in the well yield?

Mr. FAZIO. I would be happy to yield to my friend from Washington.

Mr. LOWRY of Washington. I thank the gentleman for yielding.

Now I always agree with the previous two statements of the gentleman from California, both of them. California obviously has no special interests, and that is why so many people from California speak on this.

Mr. FAZIO. How many people from California have spoken on this? Just two.

Mr. LOWRY of Washington. More than that. Is it not true that the adulteration of the wine, the illegal products put into the wine was done by the manufacturers that the Mrazek language would have given the documentation? The bank robbers watching the bank? Is that what it does?

Mr. FAZIO. If I could respond, I think the intent of this language is to prevent any adulterated products from any source, whether it comes through a gray market to a State or directly through an importer.

Mr. REGULA. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MRAZEK. Mr. Speaker, I yield back the balance of my time.

Mr. LOWRY of Washington. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the preferential motion offered by the gentleman from Washington [Mr. LOWRY].

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HORTON. Mr. Speaker, I object to the vote on the ground that a quroum is not present and make the point or order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were— yeas 297, nays 113, not voting 22, as follows

□ 2330

Messrs. MARTINEZ, SMITH of Florida, KILDEE, WOLPE, TRAXLER, SOLARZ, BOEHLERT, SAVAGE, and AKAKA changed their votes from "yea" to "nay."

Messrs. MURPHY, ALEXANDER, CALLAHAN, BEILENSON, MARLENEE, MOLINARI, FRANKLIN, DUNCAN, LUNGREN, and GLICKMAN changed their votes from "nay" to "yea."

So the preferential motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The Clerk will designate the next amendment in disagreement.

The text of the amendment is as follows:

Senate amendment No. 117; Page 63, line 18, insert the following language:

SEC. 163. Notwithstanding any legislative or judicial requirement, the Office of Surface Mining Reclamation and Enforcement may delay the finalization of the proposed rulemaking amending Parts 773 and 778 of the Code of Federal Regulations as published in the Federal Register on April 5, 1985 (50 FR 13724) until March 31, 1987.

□ 2340

MOTION OFFERED BY MR. REGULA

Mr. REGULA. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Motion offered by Mr. REGULA:

Mr. REGULA moves that the House recede from its disagreement to the amendment of the Senate numbered 117 and concur therein with an amendment, as follows:

In lieu of the matter proposed by said amendment, insert the following:

SEC. 155. Section 5 of the Outer Continental Shelf Lands Act (43 U.S.C. 1334) is amended (without regard to the limitation contained in section 102) by adding at the end the following new subsection:

"(j)(1) Any rig, platform, or other structure used for the purpose of exploration or production of oil and gas on the Outer Continental Shelf south of 49 degrees North latitude shall be built—

"(A) in the United States either by a United States chartered corporation or by a joint venture between a United States chartered corporation and a foreign corporation, with at least 50 percent of total man hours expended in the United States; and

"(B) from articles, materials, or supplies at least 50 percent of which by cost, shall have been mined, produced, or manufactured, as the case may be, in the United States.

"(2) The requirements of paragraph (1) shall not apply to any rig, platform, or other structure which was built, which is being built, or for which a building contract has been executed, on or before October 1, 1986, and shall expire with respect to any rig, platform, or other structure for which either the bidding or award process has commenced on or after September 30, 1991.

"(3) The Secretary may waive—

"(A) the requirement in paragraph (1)(B) whenever the Secretary determines that 50 percent of the articles, materials, or supplies for a rig, platform, or other structure cannot be mined, produced, or manufactured, as the case may be, in the United States; and

"(B) the requirement in paragraph (1)(A) upon application, with respect to any classification of rigs, platforms, or other structures on a specific lease, when the Secretary determines that at least 50 percent of such classification, as calculated by number and by weight, which are to be built for exploration or production activities under such lease will be built in the United States in compliance with the requirements of paragraph (1)(A).".

Mr. REGULA (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Ohio?

There was no objection.

PARLIAMENTARY INQUIRY

Mr. FRENZEL. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. FRENZEL. Mr. Speaker, I am opposed to the bill. If no more important Member claims that title, am I allowed 20 minutes of debate?

The SPEAKER pro tempore. The gentleman from Minnesota [Mr. FRENZEL] is entitled to 20 minutes.

The gentleman from Ohio [Mr. REGULA] will be recognized for 20 minutes, the gentleman from Mississippi [Mr. WHITTEN] will be recognized for 20 minutes, and the gentleman from Minnesota [Mr. FRENZEL] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio [Mr. REGULA].

Mr. REGULA. Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota [Mr. OBERSTAR].

Mr. OBERSTAR. I thank the gentleman for yielding time to me.

Mr. Speaker, I ask unanimous consent to offer an amendment that is at the desk to the motion offered by the gentleman from Ohio [Mr. REGULA].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

Mr. WALKER. Mr. Speaker, reserving the right to object, I will yield to the gentleman from Minnesota under my reservation in order to explain his amendment.

Mr. OBERSTAR. I thank the gentleman.

Mr. Speaker, the amendment deals with language that is already in the continuing resolution which provides for health coverage of retirees affected by the LTV bankruptcy.

The language that is in the CR affects only those workers in steel. My proposed amendment would affect retirees who are laid off by the same bankruptcy but who worked for Iron Ore Mining Co., in northern Minnesota and who are not covered by the language in the CR.

About 1,000 employees who, if the amendment were adopted, would, and it would apply to no other company in bankruptcy, 1,000 employees who would be allowed to be considered by the referee in bankruptcy to have their health premiums included in the proceedings in bankruptcy. It is simply an equalizing amendment.

If the gentleman will yield further, this is not the ideal circumstance or vehicle in which to make this amendment, this offering. It is under unusual circumstances, but these are unfortunate people. There are many of my constituents who were caught in that bankruptcy who were in the waiting room in health clinics and a few who were in the operating rooms who were told their health benefits were cut off.

This will not restore health benefits automatically but will allow them the opportunity to have their say in court along with those retirees in the steel industry.

Mr. WALKER. I thank the gentleman for his explanation.

Mr. Speaker, further reserving the right to object, I would say to the gentleman that I have a great deal of sympathy for what he is attempting to do and I congratulate him for trying to help these people in his district. However, we are developing a pattern here of adding extraneous amendments onto amendments in disagreement. I think it is a bad pattern for this House to undertake.

Therefore, Mr. Speaker, I am constrained to object.

The SPEAKER pro tempore. Objection is heard.

Mr. REGULA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I will not take a lot of time. This is billed as "Buy America," but what it really should be called is "Joint Venture America."

This is an amendment that I am proposing that would allow Americans to participate in the construction of the drilling rigs that will be used on the Outer Continental Shelf of the United States. It does not include Alaska. But it does include other areas.

What the amendment would propose to say is that any of the drilling rigs that are used on this land that is owned by all of the people of these United States, that beyond the 3-mile limit, it is a source of a very important resource to us; namely, petroleum products, that these rigs would contain 50 percent of the materials bought in the United States, 50 percent of the labor would come from the United States.

We recognize in the interest of competition that there should be a period of time certain so that Congress can readdress the problem. It is a policy issue. Therefore, the amendment includes a 5-year sunset provision. That would be well if we had that in a lot of the legislation we pass.

In addition, it allows the Secretary of the Interior to waive these requirements in the event the materials required are not available in the United States for any reason, or in the event that two rigs are on the same lease, the Secretary could allow one rig to be totally built overseas provided the other rig was built entirely in the United States.

I think it is a very reasonable approach. It is not 100 percent; it is saying 50 percent that should be constructed here. It does not apply to any ships or vessels so it has no impact on the Jones act.

The net result of this is that a company could have the jacket, the part that goes down under the water constructed overseas and have the platform, which is the high technology part of it, constructed in the United States so long as 50 percent of the materials and labor were United States.

Now, you might say is there any precedent for this. Well, the precedent is that the oil companies got put in the Outer Continental Shelf regulations, a provision that only 100 percent of U.S. companies can drill on the OCS. Not 50 percent; 100 percent of any drilling on the Outer Continental Shelf as to be U.S. companies.

They also provide that only American labor, 100 percent of American labor has to be on these drilling rigs. Only American ships can haul the oil that is produced on the Outer Continental Shelf by the American companies. Even the oil has to be taken into the ports in the United States has to be sold in the United States unless the President waives that requirement. Except in the case of Alaska, there is no requirement for our waiver.

I would point out that even now the oil companies are lobbying with the support of the administration to require that 50 percent of the oil that goes into SPRO be produced in the United States. The same thing we are asking for on drilling rigs. Also the oil companies are lobbying to require an oil import fee to encourage the consumption of U.S. petroleum.

What I am saying is that fair is fair. What we are saying, in effect, with this amendment is that if you are going to use a drilling rig on the United States' own land, owned by all the people, at least 50 percent of that rig ought to be produced in the United States.

The important issue is that we maintain the capability technologically to produce these rigs. It means in terms of national security that we will be able, prospectively, to produce that are needed in a period of crisis. Oil is, obviously, absolutely essential to the United States' national security. It means that we maintain some jobs in this country and it means that we maintain competition of our overseas competitors.

It is important in terms of balance of payments. I would point out to the Members that Korea is one of the major exporters of drilling rigs to the United States. That Korea, in 1981, had a $300-million balance of payments in favor of Korea versus the United States. Five years later in 1986 it is $7 billion and it is going up. I think if we are concerned about the balance of payments, if we are concerned about jobs, if we are concerned about national security, if we are concerned about maintaining technological capability in the United States, that this is a very modest amendment.

It is simply saying that we should have joint ventures. In fact, the language includes a provision for joint ventures and it is saying that at least let us give the United States a shot at half the cost of producing these in terms of labor, in terms of materials, and in doing so, we maintain our technological capability. You might say, "Are there facilities?" The answer is, yes, there are at least six locations on the west coast that could be available in a short time. In the most recent bid, three American companies bid so the capability is there.

□ 2350

I think what we are proposing in this amendment is very reasonable. It is not 100 percent. It is 50 percent joint venture America. I hope that my colleagues will support this approach.

Certainly if we are going to have drilling done 100 percent by American companies with 100 percent American labor, hauled on 100 percent American ships, sold in America, the least we can do is provide that those big rigs are 50 percent United States.

Mr. WHITTEN. Mr. Speaker, I have no further requests for time.

Mr. FRENZEL. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, I rise in strong opposition to the amendment offered by the gentleman from Ohio to the conference report on House Joint Resolution 738 which was reported in true disagreement by the appropriations conference.

The amendment would require that rigs, platforms, or other structures used in oil and gas operations be built in the United States of at least 50-percent U.S. labor and 50-percent domestic material.

This is the same Buy America amendment which has come up repeatedly and was last rejected on the reconciliation package. In the name of "preserving competitiveness" of U.S. steel fabricators, the amendment would severely damage the economic viability of offshore oil and gas operators and threaten the markets of other U.S. companies bidding in foreign procurement markets. Finally, broader overall U.S. trade policy objectives would be threatened, if this amendment were enacted.

At the recently concluded meeting of the GATT, we, along with our trading partners, agreed to eliminate new protectionist measures (the standstill agreement). If we violate this ministerial commitment by adopting new trade restrictions, we will be inviting other countries to yield to protectionist pressures or to seek retaliation through measures aimed at restricting our exports. It will risk all of our efforts to negotiate a satisfactory agreement at the Uruguay round.

This amendment will also hamper U.S. efforts to open foreign government procurement markets to U.S. exports. We are currently involved in negotiations aimed at expanding coverage of the Government Procurement Code. However, our credibility with our trading partners will be compromised if we enact new "buy national" restrictions at the same time we are trying to negotiate limitations on such practices.

Mr. Speaker, this provision has never been considered by the Committee on Ways and Means which has jurisdiction over import restrictions. If we were not circumventing the formal appropriations process, I suspect a point of order would lie against this amendment.

I oppose thwarting normal legislative procedures to enact additional special interest provisions. The administration is already engaged in numerous efforts to ensure that trade in fab-

ricated steel products is fair and equitable. We have voluntary restraint agreements with the major steel exporting countries and action has been taken by the Commerce Department against dumping and subsidy practices with respect to these products. Commerce has determined dumping duties of 8 percent against Japan and 17 percent against Korea on drill jackets and piles. A 4-percent countervailing duty was found against Korea on same.

It is patently unfair to restrict purchases of the oil and gas industry, already under considerable economic stress because of oil prices, in order to address unrelated problems in the steel industry. I urge my colleague to defeat the amendment offered by the gentleman from Ohio to the continuing resolution.

I submit for the record letters from three Cabinet members, each expressing the objections of the administration to the Regula amendment. Each also cites good economic arguments against the amendment:

THE U.S. TRADE REPRESENTATIVE,
Washington, July 15, 1986.

Hon. JAMIE L. WHITTEN,
Chairman, Committee on Appropriations, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: I am writing in regard to the Outer Continental Shelf "Buy America" amendment which may be offered in the Subcommittee on Interior to the Department of Interior appropriation bill for fiscal year 1987. This amendment would require that 50 percent of the materials and supplies on vessels and structures used for exploration and production activities on the Outer Continental Shelf be of domestic origin and these structures be built in the United States. I expressed opposition to this provision last year when it was offered as part of the fiscal year 1986 Interior Department Appropriations bill and the Omnibus Budget Reconciliation bill. My position has not changed.

First, it will result in significantly increased costs for exploration and development of offshore oil and gas resources. Drilling activity has already fallen to historic lows in the United States. This further negative factor will exacerbate the problem with implications for our energy supply security in the future.

Second, it is possible that the amendment, if adopted, could lead to foreign retaliation which could affect other sectors of the U.S. economy. U.S. oil producers already face potential "buy national" laws which are under consideration in the United Kingdom, Norway, the Netherlands and Denmark. If the United States were to adopt a "Buy America" provision, foreign governments would be less willing to resist similar provisions, and would be likely to retaliate against U.S. products. Such retaliation would hurt other sectors of the U.S. economy, since any retaliation would not be confined to the oil equipment sector.

Third, this kind of "Buy America" legislation is contrary to United States obligations under the General Agreement on Tariffs and Trade (GATT). Under Article III.4, the United States is committed to maintaining national treatment for products covered by the agreement. Eliminating foreign access to the U.S. market for any product used by domestic oil companies in connection with exploration activities on the Outer Continental Shelf would violate this agreement and could ultimately require the United States to compensate injured parties in sectors not related to drilling. We cannot expect our trading partners to uphold their obligations in the face of blatant violations such as those represented by this amendment.

Finally, I am concerned that enactment of such legislation will undermine the U.S. position of leadership in expanding and strengthening the international trading system. We are currently engaged in an effort to renegotiate the Government Procurement Code, with the goal of improving the competitive process by which governments procure goods and expanding the coverage of the Code. If successful, these efforts will provide even greater access for American goods, and the jobs which support them, to foreign markets. However, our credibility would be sorely tested if we are put in the position of calling for greater access to foreign markets while, at the same time, placing new restrictions on access to our own markets.

In summary, the Administration believes the potential negative economic and employment consequences of this amendment are overwhelming and far outweigh the intended benefits of the amendment. For these reasons, the Administration is strongly opposed to this amendment. I appreciate your taking the time to consider these concerns and urge that the amendment be rejected.

The Office of Management and Budget advises that, from the standpoint of the President's program, there is no objection to the submission of this report to the Congress.

Sincerely,

CLAYTON YEUTTER.

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, October 15, 1986.

Hon. SILVIO O. CONTE,
Ranking Minority Member, Committee on Appropriations, U.S House of Representatives, Washington, DC.

DEAR MR. CONTE: Based on our preliminary analysis and representations made by the conferees, we urge adoption of the Conference Report.

During the course of negotiations, the conferees made substantial progress toward meeting the objections raised by the Administration. In particular, the Conference Report reasonably holds the line on most spending; provides funding for defense and foreign assistance that has been agreed on with representatives of the Administration; provides essential aid for Contras and for Central America; and includes the carefully negotiated agreement on arms control.

However, to make the resolution acceptable to the President, I also urge Congress to delete two provisions that are in true disagreement. Both of these provisions—the so-called "Buy American-Outer Continental Shelf" and "Double Breasting" provisions—have been opposed consistently and most strongly by the Administration.

Sincerely yours,

JAMES C. MILLER III,
Director.

THE SECRETARY OF COMMERCE,
Washington, DC, October 2, 1986.

Hon. JAMIE L. WHITTEN,
Chairman, Committee on Appropriations, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: I wish to convey in the strongest terms my opposition to section 114 of H.R. 5234, the fiscal-year 1987 Interior and Related Agencies Appropriations bill. H.R. 5234 was adopted on September 25, 1986 by the House as part of H.J. Res. 738, the fiscal-year 1987 continuing appropriations resolution.

Section 114 would require that oil exploration and production vessels and platforms for use on the Outer Continental Shelf of the United States be constructed in the United States and comprise materials and supplies at least fifty-percent of U.S. origin.

"Buy America" legislation of this sort is contrary to our obligations under the GATT, which requires that the United States provide national treatment for covered products of other signatories. If this provision were enacted, our trading partners would certainly demand compensation, or retaliate against an equivalent amount of trade.

More likely, and more critical, is the prospect of reciprocal legislation by our trading partners. U.S. oil producers already are facing "buy national" problems in the United Kingdom, Norway, the Netherlands and Denmark. If the United States were to enact this provision, these and other governments would find it difficult to resist pressure to reciprocate with exclusion or severe limitation of U.S. exploration and production equipment in foreign countries. Why should they uphold their obligations to us if we violate our obligations to them in this blatant fashion?

I urge your help in striking this provision from any continuing appropriations bill enacted by the Congress.

Sincerely,

MALCOLM BALDRIGE,
Secretary of Commerce.

Mr. Speaker, I reserve the balance of my time.

Mr. REGULA. Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania [Mr. MURTHA].

Mr. MURTHA. Mr. Speaker, I cannot add anything more to the brilliant speech of the gentleman from Ohio [Mr. REGULA], and I just hope that the Members will vote for Buy America.

Mr. FRENZEL. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida [Mr. GIBBONS].

Mr. GIBBONS. Mr. Speaker, in 3 minutes, the Government will be entirely out of money. There will be no appropriations for anything to happen from now on.

That is a disgrace. But this would further add to the disgrace. What are we talking about? We are talking about an appropriations bill. I do not blame my fine friends on the Committee on Appropriations if they cannot get their legislation enacted anywhere. They bring it in a crisis time here and say, take it or leave it, fellows. We

have got the power; hold your nose and swallow it.

That is what they are saying to us. That is exactly what they are saying to us. There is not a bill introduced in this Congress dealing with this subject. Why? Because they know they cannot get it passed through regular process unless they logroll it on something like this.

If it comes to the Committee on Ways and Means, as it would come in its normal, natural process, we will give it a fair, full hearing before we hang it. But they do not choose to come that way. They come through the back door, as the Government collapses.

There is no free lunch in this world. There is no free lunch in trade. If we take this kind of unilateral action after we have pledged not to do this, our trading partners can take the same kind of action against us, not against something like this, but against our farm products and against our other products.

You are not getting anything for this. You are getting it through the back door. It should not be enacted and may I remind my colleagues, as the Government collapses here without any money, that the President has threatened to veto this continuing resolution if this particular matter is in it.

Now, you may want to call his bluff. A lot of times I get a couple of snorts in me and I want to call his bluff, too.

□ 2400

But that is not the thing to do. We ought to be here appropriating. We should not be legislating in a substantive manner. If the people who support this kind of legislation have not got enough guts to bring it to the floor in the form of a bill, in the form of an amendment, then it ought to be rejected here at 12 o'clock midnight on the night the Government ran out of money.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. Bosco].

Mr. BOSCO. Mr. Speaker, I know the hour is late and I am only going to speak for less than a minute, but in all due respect to the preceding speaker, I might say that the Trade Subcommittee is not the only committee in this Congress that deals with these matters. In fact, the Outer Continental Shelf Act was authorized by the Merchant Marine and Fisheries Committee. That committee has held hearings on this matter. There is a bill before the Congress. I introduced it myself and that committee on two occasions voted out language very similar to the measure that we have before us.

I might say relative to this issue of free trade, I have voted partially upon the advice of the preceding speaker against every protectionist piece of legislation that we have had here in the Congress; but free trade has to also be fair trade.

This summer the International Trade Commission found by unanimous vote of the International Trade Commission that both Korea and Japan have unfairly traded in this very area of offshore oil rigs.

The Interstate Commerce Commission imposed penalties in the form of tariffs on both Korea and Japan for injuring United States workers and businesses by their actions.

Mr. Speaker, this is a limited measure. I think it will help remedy a trade problem that we now have. I certainly support the amendment offered by the gentleman from Ohio.

Mr. REGULA. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, I will not take a lot of time. I would just like to say, where is the trade bill that this House passed? Now we are at the last minute and we still have not seen a trade bill.

To the previous speaker who said that we have to have access to our foreign partners, count the number of American cars in Japan, folks.

We are asking for a very, very meager amendment here, 50 percent labor, 50 percent material. You find a pipe mill or a tube mill still operating in this country. We have opened the gates and we will have no domestic oil industry, let alone the infrastructure to produce it.

I say, stand on this thing. It is not a bluff to the President. We should have had a trade bill out of here. This Congress should be ashamed of itself for not having it. We should pass this amendment.

Mr. FRENZEL. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Texas [Mr. ARMEY].

Mr. ARMEY. Mr. Speaker, I do not need 2 minutes. All I want to tell you is that the gentleman from Florida is absolutely right. He is a great American. I agree with every word the gentleman said, and I ask for everybody to vote this motion down.

Mr. REGULA. Mr. Speaker, I yield 2 minutes to the gentleman from Colorado [Mr. STRANG].

Mr. STRANG. Mr. Speaker, I know it is late, but let me tell you what is happening in the drilling world, in the oil drilling world. We are having the stuffing kicked out of us and Lone Star Steel in the State of Texas is in bankruptcy; Colorado Fuel and Iron had the worst quarter they ever had. Why? Because our trading partners are violating the voluntary restraint agreements. They are violating them by a factor of 100 percent.

Why do we owe them the courtesy of our infatuation with free trade when we can have a "Buy American" which is 50–50 and give American steelmakers an opportunity to recover, rather than to go completely down the tube.

Mr. WHITTEN. Mr. Speaker, I am in support of this provision.

Mr. Speaker, I have no further requests for time.

Mr. REGULA. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. FRENZEL. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The question is on the motion offered by the gentleman from Ohio [Mr. REGULA].

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. FRENZEL. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 264, noes 133, not voting 35, as follows:

[Roll No. 475]

□ 0015

Mr. WATKINS and Mr. TALLON changed their votes from "aye" to "no."

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The Clerk will designate the final amendment in disagreement.

The text of the amendment is as follows:

Senate Amendment No. 124, page 71, line 13: insert the following language:

TITLE VII

METROPOLITAN WASHINGTON AIRPORTS

SEC. 701. SHORT TITLE AND TABLE OF CONTENTS.

This title may be cited as the "Metropolitan Washington Airports Act of 1986".

TABLE OF CONTENTS

Sec. 701. Short title.
Sec. 702. Findings.
Sec. 703. Purpose.
Sec. 704. Definitions.
Sec. 705. Lease of Metropolitan Washington airports.
Sec. 706. Capital improvements, construction, and rehabilitation.
Sec. 707. Airports authority.
Sec. 708. Federal employees at the Metropolitan Washington airports.
Sec. 709. Relationship to and effect of other laws.
Sec. 710. Authority to negotiate extension of lease.
Sec. 711. Separability.
Sec. 712. Nonstop flights.

SEC. 702. FINDINGS.

The Congress finds that—

(1) the two federally owned airports in the metropolitan area of Washington, District of Columbia, constitute an important and growing part of the commerce, transportation, and economic patterns of the Commonwealth of Virginia, the District of Columbia, and the surrounding region;

(2) Baltimore/Washington International Airport, owned and operated by the State of Maryland, is an air transportation facility that provides service to the greater Metropolitan Washington region together with the two federally owned airports, and timely Federal-aid grants to Baltimore/Washington International Airport will provide additional capacity to meet the growing air traffic needs and to compete with other airports on a fair basis;

(3) the Federal Government has a continuing but limited interest in the operation of the two federally owned airports, which serve the travel and cargo needs of the entire Metropolitan Washington region as well as the District of Columbia as the national seat of government;

(4) operation of the Metropolitan Washington Airports by an independent local agency will facilitate timely improvements at both airports to meet the growing demand of interstate air transportation occasioned by the Airline Deregulation Act of 1978 (Public Law 95-504; 92 Stat. 1705);

(5) all other major air carrier airports in the United States are operated by public entities at the State, regional, or local level;

(6) any change in status of the two airports must take into account the interest of nearby communities, the traveling public, air carriers, general aviation, airport employees, and other interested groups, as well as the interests of the Federal Government and State governments involved;

(7) in recognition of the limited need for a Federal role in the management of these airports and the growing local interest, the Secretary has recommended a transfer of authority from the Federal to the local/State level that is consistent with the management of major airports elsewhere in the Nation;

(8) an operating authority with representation from local jurisdictions, similar to authorities at all major airports in the United States, will improve communications with local officials and concerned residents regarding noise at the Metropolitan Washington Airports;

(9) a commission of congressional, State, and local officials and aviation representatives has recommended to the Secretary that transfer of the federally owned airports be as a unit to an independent authority to be created by the Commonwealth of Virginia and the District of Columbia; and

(10) the Federal interest in these airports can be provided through a lease mechanism which provides for local control and operation.

SEC. 703. PURPOSE.

(a) IN GENERAL.—It is therefore declared to be the purpose of the Congress in this title to authorize the transfer of operating responsibility under long-term lease of the two Metropolitan Washington Airport properties as a unit, including access highways and other related facilities, to a properly constituted independent airport authority created by the Commonwealth of Virginia and the District of Columbia, in order to achieve local control management, operation, and development of these important transportation assets.

(b) INCLUSION OF BWI NOT PRECLUDED.—Nothing in this title shall be construed to prohibit the Airports Authority and the State of Maryland from entering into an agreement whereby Baltimore/Washington International Airport may be made part of a regional airports authority, subject to terms and conditions agreed to by the Airports Authority, the Secretary, the Commonwealth of Virginia, the District of Columbia, and the State of Maryland.

SEC. 704. DEFINITIONS.

In this title—

(1) ADMINISTRATOR.—The term "Administrator" means the Administrator of the Federal Aviation Administration.

(2) AIRPORTS AUTHORITY.—The term "Airports Authority" means the Metropolitan Washington Airports Authority, a public body to be created by the Commonwealth of Virginia and the District of Columbia consistent with the requirements of section 707.

(3) EMPLOYEES.—The term "employees" means all permanent Federal Aviation Administration personnel employed on the date the lease under section 705 takes effect by the Metropolitan Washington Airports, an organization within the Federal Aviation Administration.

(4) METROPOLITAN WASHINGTON AIRPORTS.—The term "Metropolitan Washington Airports" means Washington National Airport and Washington Dulles International Airport.

(5) SECRETARY.—The term "Secretary" means the Secretary of Transportation.

(6) WASHINGTON DULLES INTERNATIONAL AIRPORT.—The term "Washington Dulles Inter-

national Airport" means the airport constructed under the Act entitled "An Act to authorize the construction, protection, operation, and maintenance of a public airport in or in the vicinity of the District of Columbia", approved September 7, 1950 (64 Stat. 770), and includes the Dulles Airport Access Highway and Right-of-way, including the extension between the Interstate Routes I-495 and I-66.

(7) WASHINGTON NATIONAL AIRPORT.—The term "Washington National Airport" means the airport described in the Act entitled "An Act to provide for the administration of the Washington National Airport, and for other purposes", approved June 29, 1940 (54 Stat. 686).

SEC. 705. LEASE OF METROPOLITAN WASHINGTON AIRPORTS.

(a) AUTHORITY TO ENTER INTO LEASE.—The Secretary is authorized to enter into a lease of the Metropolitan Washington Airports with the Airport Authority for a 50-year term and to enter into any related agreement necessary for the transfer of authority and property to the Airports Authority. Authority to enter into a lease and agreement under this section shall lapse two years after the date of the enactment of this title.

(b) PAYMENTS.—

(1) LEASE PAYMENTS.—The lease shall provide for the Airports Authority to pay to the general fund of the Treasury $150,000,000 over the term of the lease, in equal annual installments.

(2) RETIREMENT OBLIGATIONS.—

(A) DISCONTINUED SERVICE.—Not later than one year after the lease takes effect, the Airports Authority shall pay to the Treasury of the United States, to be deposited to the credit of the Civil Service Retirement and Disability Fund, an amount determined by the Office of Personnel Management to represent the actual added costs incurred by the Fund due to discontinued service retirement under section 8336(d)(1) of title 5, United States Code, of employees who elect not to transfer to the Airports Authority.

(B) UNFUNDED LIABILITY.—Not later than one year after the lease takes effect, the Airports Authority shall pay to the Treasury of the United States, to be deposited to the credit of the Civil Service Retirement and Disability Fund, an amount determined by the Office of Personnel Management to represent the present value of the differences between (i) the future cost of benefits payable from the Fund and due the employees covered under section 708(e) of this title that are attributable to the period of employment following the date the lease takes effect, and (ii) the contributions made by the employees and the Airports Authority under section 708(e). In determining the amount due, the Office of Personnel Management shall take into consideration the actual interest such amount can be expected to earn when invested in the Treasury of the United States.

(c) MINIMUM TERMS AND CONDITIONS.—The Airports Authority shall agree, at a minimum, to the following conditions and requirements in the lease:

(1) OPERATION OF AIRPORTS AS A UNIT.—The Airports Authority shall operate, maintain, protect, promote, and develop the Metropolitan Washington Airports as a unit and as primary airports serving the Metropolitan Washington area.

(2) AIRPORT PURPOSES.—The real property constituting the Metropolitan Washington Airports shall, during the period of the lease, be used only for airport purposes. For the purposes of this paragraph, the term "airport purposes" means a use of property interests (other than a sale) for aviation business or activities, or for activities necessary or appropriate to serve passengers or cargo in air commerce, or for nonprofit, public use facilities. If the Secretary determines that any portion of the real property leased to the Airports Authority pursuant to this Act is used for other than airport purposes, the Secretary shall (A) direct that appropriate measures be taken by the Airports Authority to bring the use of such portion of real property in conformity with airport purposes, and (B) retake possession of such portion of real property if the Airports Authority fails to bring the use of such portion into a conforming use within a reasonable period of time, as determined by the Secretary.

(3) AIP REQUIREMENTS.—The Airports Authority shall be subject to the requirements of section 511(a) of the Airport and Airway Improvement Act of 1982 and the assurances and conditions required of grant recipients under such Act as of the date the lease takes effect. Notwithstanding section 511(a)(12) of such Act, all revenues generated by the Metropolitan Washington Airports shall be expended for the capital and operating costs of such airports.

(4) CONTRACTS.—In acquiring by contract supplies or services for an amount estimated to be in excess of $200,000, or awarding concession contracts, the Airports Authority shall obtain, to the maximum extent practicable, full and open competition through the use of published competitive procedures. By a vote of seven members, the Airports Authority may grant exceptions to the requirements of this paragraph.

(5) CONTINUATION OF REGULATIONS.—

(A) IN GENERAL.—Except as provided in subparagraph (B), all regulations of the Metropolitan Washington Airports (14 C.F.R. part 159) shall become regulations of the Airports Authority on the date the lease takes effect and shall remain in effect until modified or revoked by the Airports Authority in accordance with procedures of the Airports Authority.

(B) EXCEPTIONS.—The following regulations shall cease to be in effect on the date the lease takes effect:

(i) section 159.59(a) of title 14, Code of Federal Regulations (relating to new-technology aircraft); and

(ii) section 159.191 of title 14, Code of Federal Regulations (relating to violations of Federal Aviation Administration regulations as Federal misdemeanors).

(C) OPERATIONS.—The Airports Authority may not increase or decrease the number of instrument flight rule takeoffs and landings authorized by the High Density Rule (14 C.F.R. 93.121 et seq.) at Washington National Airport on the date of the enactment of this Act and may not impose a limitation after the date the lease takes effect on the number of passengers taking off or landing at Washington National Airport.

(6) TRANSFER OF RIGHTS, LIABILITIES, AND OBLIGATIONS.—

(A) IN GENERAL.—Except as specified in subparagraph (B) of this paragraph, the Airports Authority shall assume all rights, liabilities, and obligations (tangible and incorporeal, present and executory) of the Metropolitan Washington Airports on the date the lease takes effect, including leases, permits, licenses, contracts, agreements, claims, tariffs, accounts receivable, accounts payable, and litigation relating to such rights and obligations, regardless whether judgment has been entered, damages awarded, or appeal taken. Before the date the lease takes effect, the Secretary shall also assure that the Airports Authority has agreed to cooperate in allowing representatives of the Attorney General and the Secretary adequate access to employees and records when needed for the performance of functions related to the period before the effectiveness of the lease. The Airports Authority shall assume responsibility for the Federal Aviation Administration's Master Plans for the Metropolitan Washington Airports.

(B) EXCEPTIONS.—The procedure for disputes resolution contained in any contract entered into on behalf of the United States before the date the lease takes effect shall continue to govern the performance of the contract unless otherwise agreed to by the parties to the contract. Claims for monetary damages founded in tort, by or against the United States as the owner and operator of the Metropolitan Washington Airports, arising before the date the lease takes effect shall be adjudicated as if the lease had not been entered into.

(C) PAYMENTS INTO EMPLOYEES' COMPENSATION FUND.—The Federal Aviation Administration shall remain responsible for reimbursing the Employees' Compensation Fund, pursuant to section 8147 of title 5, United States Code, for compensation paid or payable after the date the lease takes effect in accordance with chapter 81 of title 5; United States Code, with regard to any injury, disability, or death due to events arising before such date, whether or not a claim has been filed or is final on such date.

(D) COLLECTIVE BARGAINING RIGHTS.—The Airports Authority shall continue all collective bargaining rights enjoyed before the date the lease takes effect by employees of the Metropolitan Washington Airports.

(7) AUDITS.—The Comptroller General of the United States may conduct periodic audits of the activities and transactions of the Airports Authority in accordance with generally accepted management principles, and under such rules and regulations as may be prescribed by the Comptroller General. Any such audit shall be conducted at such place or places as the Comptroller General may deem appropriate. All books, accounts, records, reports, files, papers, and property of the Airports Authority shall remain in possession and custody of the Airports Authority.

(8) CODE OF ETHICS.—The Airports Authority shall develop a code of ethics and financial disclosure in order to assure the integrity of all decisions made by the board and its employees.

(9) RESTRICTION ON USE OF CERTAIN REVENUES.—Notwithstanding any other provision of law, no landing fee imposed for operating an aircraft or revenues derived from parking automobiles—

(A) at Washington Dulles International Airport may be used for maintenance or operating expenses (excluding debt service, depreciation, and amortization) at Washington National Airport; or

(B) at Washington National Airport may be used for maintenance or operating expenses (excluding debt service, depreciation, and amortization) at Washington Dulles International Airport.

(10) GENERAL AVIATION FEES.—The Airports Authority shall compute the fees and charges for landing general aviation aircraft at the Metropolitan Washington Airports on the same basis as the landing fees for air carrier aircraft, except that the Airports Authority may require a minimum landing fee not in excess of the landing fee for aircraft weighing 12,500 pounds.

(11) OTHER TERMS.—The Secretary shall include such other terms and conditions applicable to the parties to the lease as are consistent with and carry out the provisions of this title.

(d) SUBMISSION TO CONGRESS.—The Secretary shall submit the lease entered into under this section to Congress. The lease may not take effect before the passage of (1) 30 days, or (2) 10 days in which either House of Congress is in session, whichever occurs later.

(e) ENFORCEMENT OF LEASE PROVISIONS.—The district courts of the United States shall have jurisdiction to compel the Airports Authority and its officers and employees to comply with the terms of the lease. An action may be brought on behalf of the United States by the Attorney General, or by any aggrieved party.

SEC. 706. CAPITAL IMPROVEMENTS, CONSTRUCTION, AND REHABILITATION.

(a) IMPROVEMENTS.—It is the sense of the Congress that the Airports Authority should—

(1) pursue the improvement, construction, and rehabilitation of the facilities at Washington Dulles International Airport and Washington National Airport simultaneously; and

(2) to the extent practicable, cause the improvement, construction, and rehabilitation proposed by the Secretary to be completed at both of such Airports within 5 years after the earliest date on which the Airports Authority issues bonds under the authority required by section 707 of this title for any such improvement, construction, or rehabilitation.

(b) SECRETARY'S ASSISTANCE.—The Secretary shall assist the three airports serving the Washington, D.C. metropolitan area in planning for operational and capital improvements at those airports and shall accelerate consideration of applications for Federal financial assistance by whichever of the three airports is most in need of increasing airside capacity.

SEC. 707. AIRPORTS AUTHORITY.

(a) Powers Conferred by Virginia and the District of Columbia.—The Airports Authority shall be a public body corporate and politic, having the powers and jurisdiction as are conferred upon it jointly by the legislative authority of the Commonwealth of Virginia and the District of Columbia or by either of the jurisdictions and concurred in by the legislative authority of the other jurisdiction, but at a minimum meeting the requirements of this section.

(b) PURPOSE.—The Airports Authority shall be—

(1) independent of the Commonwealth of Virginia and its local governments, the District of Columbia, and the Federal Government; and

(2) a political subdivision constituted solely to operate and improve both Metropolitan Washington Airports as primary airports serving the Metropolitan Washington area.

(c) GENERAL AUTHORITIES.—The Airports Authority shall be authorized—

(1) to acquire, maintain, improve, operate, protect, and promote the Metropolitan Washington Airports for public purposes;

(2) to issue bonds from time to time in its discretion for public purposes, including the purposes of paying all or any part of the cost of airport improvements, construction, and rehabilitation, and the acquisition of real and personal property, including operating equipment for the airports, which bonds—

(A) shall not constitute a debt of either jurisdiction or a political subdivision thereof; and

(B) may be secured by the Airports Authority's revenues generally, or exclusively from the income and revenues of certain designated projects whether or not they are financed in whole or part from the proceeds of such bonds;

(3) to acquire real and personal property by purchase, lease, transfer, or exchange, and to exercise such powers of eminent domain within the Commonwealth of Virginia as are conferred upon it by the Commonwealth of Virginia;

(4) to levy fees or other charges; and

(5) to make and maintain agreements with employee organizations to the extent that the Federal Aviation Administration is so authorized on the date of enactment of this title.

(d) CONFLICT-OF-INTEREST PROVISIONS.—The Airports Authority shall be subject to a conflict-of-interest provision providing that members of the board and their immediate families may not be employed by or otherwise hold a substantial financial interest in any enterprise that has or is seeking a contract or agreement with the Airports Authority or is an aeronautical, aviation services, or airports services enterprise that otherwise has interests that can be directly affected by the Airports Authority. Exceptions to requirements of the preceding sentence may be made by the official appointing a member at the time the member is appointed if the financial interest is fully disclosed and so long as the member does not participate in board decisions that directly affect such interest. The Airports Authority shall include in its code developed under section 705(c)(8) of this title the standards by which members will determine what constitutes a substantial financial interest and the circumstances under which an exception may be granted.

(d) BOARD OF DIRECTORS.—

(1) APPOINTMENT.—The Airports Authority shall be governed by a board of directors of 11 members, as follows:

(A) 5 members shall be appointed by the Governor of Virginia;

(B) three members shall be appointed by the Mayor of the District of Columbia;

(C) two members shall be appointed by the Governor of Maryland; and

(D) one member shall be appointed by the President with the advice and consent of the Senate.

The Chairman shall be appointed from among the members by majority vote of the members and shall serve until replaced by majority vote of the members.

(2) RESTRICTIONS.—Members shall (A) not hold elective or appointive political office, (B) serve without compensation other than for reasonable expenses incident to board functions, and (C) reside within the Washington Standard Metropolitan Statistical Area, except that the member appointed by the President shall not be required to reside in that area.

(3) TERMS.—Members shall be appointed to the board for a term of 6 years, except that of members first appointed—

(A) by the Governor of Virginia, 2 shall be appointed for 4 years and 2 shall be appointed for 2 years;

(B) by the Mayor of the District of Columbia, 1 shall be appointed for 4 years and 1 shall be appointed for 2 years; and

(C) by the Governor of Maryland, 1 shall be appointed for 4 years.

(4) REMOVAL OF PRESIDENTIAL APPOINTEES.—A member of the board appointed by the President shall be subject to removal by the President for cause.

(5) REQUIRED NUMBER OF VOTES.—Seven votes shall be required to approve bond issues and the annual budget.

(f) BOARD OF REVIEW.—

(1) COMPOSITION.—The board of directors shall be subject to review of its actions and to requests, in accordance with this subsection, by a Board of Review, of the Airports Authority, established by the board of directors. The Board of Review shall consist of the following, in their individual capacities, as representatives of users of the Metropolitan Washington Airports:

(A) 4 members of the House of Representatives from a list provided by the Speaker of the House;

(B) 4 members of the Senate from a list provided by the President pro tempore of the Senate; and

(C) one member chosen alternately from members of the House of Representatives and members of the Senate, from a list provided by the Speaker of the House or the President pro tempore of the Senate, respectively.

Two members of the Board of Review shall elect a chairman. A member of the House of Representatives or the Senate from Maryland or Virginia and the Delegate from the District of Columbia may not serve on the Board of Review.

(2) TERMS.—Members of the Board of Review appointed under subparagraphs (A) and (B) of paragraph (1) shall be appointed for terms of 6 years, except that of the members first appointed one member under each of subparagraphs (A) and (B) shall be appointed for a term of two years and one member under each of subparagraphs (A) and (B) shall be appointed for a term of four years. Members of the Board of Review appointed under subparagraph (C) shall be appointed for terms of 2 years. A vacancy in the Board shall be filled in the same manner in which the original appointment was made. Any member appointed to fill a vacancy before the expiration of the term for which his or her predecessor was appointed shall be appointed only for the remainder of such term.

(3) PROCEDURES.—The Board of Review shall establish procedures for conducting its business. The procedures may include requirements for a quorum at meetings and for proxy voting. The Board shall meet at least once each year and shall meet at the call of the chairman or 3 members of the Board. Any decision of the Board of Review under paragraph (4) or (5) shall be by a vote of 5 members of the Board.

(4) DISAPPROVAL PROCEDURE.—

(A) SUBMISSION REQUIRED.—An action of the Airports Authority described in subparagraph (B) shall be submitted to the Board of Review at least 30 days (or at least 60 days in the case of the annual budget) before it is to become effective.

(B) ACTIONS AFFECTED.—The following are the actions referred to in subparagraph (A):

(i) the adoption of an annual budget;

(ii) the authorization for the issuance of bonds;

(iii) the adoption, amendment, or repeal of a regulation;

(iv) the adoption or revision of a master plan, including any proposal for land acquisition; and

(v) the appointment of the chief executive officer.

(C) 30-DAY DISAPPROVAL PERIOD.—If the Board of Review does not disapprove an

action within 30 days of its submission under this paragraph, the action may take effect. If the Board of Review disapproves any such action, it shall notify the Airports Authority and shall give reasons for the disapproval.

(D) EFFECT OF DISAPPROVAL.—An action disapproved under this paragraph shall not take effect. Unless an annual budget for a fiscal year has taken effect in accordance with this paragraph, the Airports Authority may not obligate or expend any money in such fiscal year, except for (i) debt service on previously authorized obligations, and (ii) obligations and expenditures for previously authorized capital expenditures and routine operating expenses.

(5) REQUEST FOR CONSIDERATION OF OTHER MATTERS.—The Board of Review may request the Airports Authority to consider and vote, or to report, on any matter related to the Metropolitan Washington Airports. Upon receipt of such a request the Airports Authority shall consider and vote, or report, on the matter as promptly as feasible.

(6) PARTICIPATION IN MEETING OF AIRPORTS AUTHORITY.—Members of the Board of Review may participate as nonvoting members in meetings of the board of the Airports Authority.

(7) STAFF.—The Board of Review may hire one staff person, to be paid by the Airports Authority. The Airports Authority shall provide such clerical and support staff as the Board may require.

(8) LIABILITY.—A member of the Board of Review shall not be liable in connection with any claim, action, suit, or proceeding arising from service on the Board.

(g) CERTAIN ACTIONS TO BE TAKEN BY REGULATION.—Any action of the Airports Authority changing, or having the effect of changing, the hours of operation of or the type of aircraft serving either of the Metropolitan Washington Airports may be taken only by regulation of the Airports Authority.

(h) LIMITATION ON AUTHORITY.—If the Board of Review established under subsection (f) is unable to carry out its functions under this title by reason of a judicial order, the Airports Authority shall have no authority to perform any of the actions that are required by subsection (f)(4) to be submitted to the Board of Review.

SEC. 708. FEDERAL EMPLOYEES AT THE METROPOLITAN WASHINGTON AIRPORTS.

(a) EMPLOYEE PROTECTION.—Not later than the date the lease under section 705 takes effect, the Secretary shall ensure that the Airports Authority has established arrangements to protect the employment interests of employees during the 5-year period beginning on such date. These arrangements shall include provisions—

(1) which ensure that the Airports Authority will adopt labor agreements in accordance with the provisions of subsection (b) of this section;

(2) for the transfer and retention of all employees who agree to transfer to the Airports Authority in their same positions for the 5-year period commencing on the date the lease under section 5 takes effect except in cases of reassignment, separation for cause, resignation, or retirement;

(3) for the payment by the Airports Authority of basic and premium pay to transferred employees, except in cases of separation for cause, resignation, or retirement, for 5 years commencing on the date the lease takes effect at or above the rates of pay in effect for such employees on such date;

(4) for credit during the 5-year period commencing on the date the lease takes effect for accrued annual and sick leave and seniority rights which have been accrued during the period of Federal employment by transferred employees retained by the Airports Authority; and

(5) for an offering of not less than one life insurance and three health insurance programs for transferred employees retained by the Airports Authority during the 5-year period beginning on the date the lease takes effect which are reasonably comparable with respect to employee premium cost and coverage to the Federal health and life insurance programs available to employees on the day before such date.

(b) LABOR AGREEMENTS.—

(1) ADOPTION.—The Airports Authority shall adopt all labor agreements which are in effect on the date the lease under section 705 takes effect. Such agreements shall continue in effect for the 5-year period commencing on such date, unless the agreement provides for a shorter duration or the parties agree to the contrary before the expiration of that 5-year period. Such agreements shall be renegotiated during the 5-year period, unless the parties agree otherwise. Any labor-management negotiation impasse declared before the date the lease takes effect shall be settled in accordance with chapter 71 of title 5, United States Code.

(2) CONTINUATION.—The arrangements made pursuant to this section shall assure, during the 50-year lease term, the continuation of all collective bargaining rights enjoyed by transferred employees retained by the Airports Authority.

(c) RIGHTS OF TERMINATED EMPLOYEES.—Any transferred employee whose employment with the Airports Authority is terminated during the 5-year period beginning on the date the lease under section 705 takes effect shall be entitled, as a condition of any lease entered into in accordance with section 705 of this title, to rights and benefits to be provided by the Airports Authority that are similar to those such employee would have had under Federal law if termination had occurred immediately before such date.

(d) ANNUAL AND SICK LEAVE.—Any employee who transfers to the Airports Authority under this section shall not be entitled to lump-sum payment for unused annual leave under section 5551 of title 5, United States Code, but shall be credited by the Airports Authority with the unused annual leave balance on the date the lease under section 705 takes effect, along with any unused sick leave balance on such date. During the 5-year period beginning on such date, annual and sick leave shall be earned at the same rates permitted on the day before such date, and observed official holidays shall be the same as those specified in section 6103 of title 5, United States Code.

(e) CIVIL SERVICE RETIREMENT.—Any Federal employee who transfers to the Airports Authority and who on the day before the date the lease under section 705 takes effect is subject to subchapter III of chapter 83 of title 5, United States Code, or chapter 84 of such title shall, so long as continually employed by the Airports Authority without a break in service, continue to be subject to such subchapter or chapter, as the case may be. Employment by the Airports Authority without a break in continuity of service shall be considered to be employment by the United States Government for purposes of such subchapter and chapter. The Airports Authority shall be the employing agency for purposes of such subchapter and chapter and shall contribute to the Civil Service Retirement and Disability Fund such sums as are required by such subchapter and chapter.

(f) SEPARATED EMPLOYEES.—An employee who does not transfer to the Airports Authority and who does not otherwise remain a Federal employee shall be entitled to all of the rights and benefits available under Federal law for separated employees, except that severance pay shall not be payable to an employee who does not accept an offer of employment from the Airports Authority of work substantially similar to that performed for the Federal Government.

(g) ACCESS TO RECORDS.—The Airports Authority shall allow representatives of the Secretary adequate access to employees and employee records of the Airports Authority when needed for the performance of functions related to the period before the date the lease under section 705 takes effect. The Secretary shall provide the Airports Authority access to employee records of transferring employees for appropriate purposes.

SEC. 709. RELATIONSHIP TO AND EFFECT OF OTHER LAWS.

(a) OTHER LAWS.—In order to assure that the Airports Authority has the same proprietary powers and is subject to the same restrictions with respect to Federal law as any other airport except as otherwise provided in this title, during the period that the lease authorized by section 705 of this title is in effect—

(1) the Metropolitan Washington Airports shall be considered public airports for purposes of the Airport and Airway Improvement Act of 1982 (49 App. U.S.C. 2201 et seq.); and

(2) the Acts entitled "An Act to provide for the administration of the Washington National Airport, and for other purposes", approved June 29, 1940 (54 Stat. 686), "An Act to authorize the construction, protection, operation, and maintenance of a public airport in or in the vicinity of the District of Columbia", approved September 7, 1950 (64 Stat. 770), and "An Act making supplemental appropriations for the support of the Government for the fiscal year ending June 30, 1941, and for other purposes", approved October 9, 1940 (54 Stat. 1030), shall not apply to the operation of the Metropolitan Washington Airports, and the Secretary shall be relieved of all responsibility under those Acts.

(b) INAPPLICABILITY OF CERTAIN LAWS.—The Metropolitan Washington Airports and the Airports Authority shall not be subject to the requirements of any law solely by reason of the retention by the United States of fee simple title to such airports or by reason of the authority of the Board of Review under section 707(f).

(c) POLICE POWER.—The Commonwealth of Virginia shall have concurrent police power authority over the Metropolitan Washington Airports, and the courts of the Commonwealth of Virginia may exercise jurisdiction over Washington National Airport.

(d) PLANNING.—

(1) IN GENERAL.—The authority of the National Capital Planning Commission under section 5 of the Act of June 6, 1924 (40 U.S.C. 71d) shall not apply to the Airports Authority.

(2) CONSULTATION.—The Airports Authority shall consult—

(A) with the National Capital Planning Commission and the Advisory Council on Historic Preservation before undertaking any major alterations to the exterior of the main terminal at Washington Dulles International Airport, and

(B) with the National Capital Planning Commission before undertaking development that would alter the skyline of Washington National Airport when viewed from the opposing shoreline of the Potomac River or from the George Washington Parkway.

(e) OPERATION LIMITATIONS.—

(1) HIGH DENSITY RULE.—The Administrator may not increase the number of instrument flight rule takeoffs and landings authorized for air carriers by the High Density Rule (14 C.F.R. 93.121 et seq.) at Washington National Airport on the date of the enactment of this title and may not decrease the number of such takeoffs and landings except for reasons of safety.

(2) ANNUAL PASSENGER LIMITATIONS.—The Federal Aviation Administration air traffic regulation entitled "Modification of Allocation: Washington National Airport" (14 C.F.R. 93.124) shall cease to be in effect on the date of the enactment of this title.

SEC. 710. AUTHORITY TO NEGOTIATE EXTENSION OF LEASE.

The Secretary and the Airports Authority may at any time negotiate an extension of the lease entered into under section 705(a).

SEC. 711. SEPARABILITY.

Except as provided in section 707(h), if any provision of this title or the application thereof to any person or circumstance is held invalid, the remainder of this title and the application of such provision to other persons or circumstances shall not be affected thereby.

SEC. 712. NONSTOP FLIGHTS.

A person may not operate an aircraft nonstop in air transportation between Washington National Airport and another airport that is more than 1,000 statute miles away from Washington National Airport.

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN moves that the House recede from its disagreement to the amendment of the Senate numbered 124 and concur therein with an amendment, as follows:

In lieu of the matter proposed by said amendment, insert the following:

TITLE VI—METROPOLITAN WASHINGTON AIRPORTS

SEC. 6001. SHORT TITLE.

This title may be cited as the "Metropolitan Washington Airports Act of 1986".

SEC. 6002. FINDINGS.

The Congress finds that—

(1) the two federally owned airports in the metropolitan area of Washington, District of Columbia, constitute an important and growing part of the commerce, transportation, and economic patterns of the Commonwealth of Virginia, the District of Columbia, and the surrounding region;

(2) Baltimore/Washington International Airport, owned and operated by the State of Maryland, is an air transportation facility that provides service to the greater Metropolitan Washington region together with the two federally owned airports, and timely Federal-aid grants to Baltimore/Washington International Airport will provide additional capacity to meet the growing air traffic needs and to compete with other airports on a fair basis;

(3) the Federal Government has a continuing but limited interest in the operation of the two federally owned airports, which serve the travel and cargo needs of the entire Metropolitan Washington region as well as the District of Columbia as the national seat of government;

(4) operation of the Metropolitan Washington Airports by an independent local agency will facilitate timely improvements at both airports to meet the growing demand of interstate air transportation occasioned by the Airline Deregulation Act of 1978 (Public Law 95-504; 92 Stat. 1705);

(5) all other major air carrier airports in the United States are operated by public entities at the State, regional, or local level;

(6) any change in status of the two airports must take into account the interest of nearby communities, the traveling public, air carriers, general aviation, airport employees, and other interested groups, as well as the interests of the Federal Government and State governments involved;

(7) in recognition of a perceived limited need for a Federal role in the management of these airports and the growing local interest, the Secretary has recommended a transfer of authority from the Federal to the local/State level that is consistent with the management of major airports elsewhere in the Nation;

(8) an operating authority with representation from local jurisdictions, similar to authorities at all major airports in the United States, will improve communications with local officials and concerned residents regarding noise at the Metropolitan Washington Airports;

(9) a commission of congressional, State, and local officials and aviation representatives has recommended to the Secretary that transfer of the federally owned airports be as a unit to an independent authority to be created by the Commonwealth of Virginia and the District of Columbia; and

(10) the Federal interest in these airports can be provided through a lease mechanism which provides for local control and operation.

SEC. 6003. PURPOSE.

(a) IN GENERAL.—It is therefore declared to be the purpose of the Congress in this title to authorize the transfer of operating responsibility under long-term lease of the two Metropolitan Washington Airport properties as a unit, including access highways and other related facilities, to a properly constituted independent airport authority created by the Commonwealth of Virginia and the District of Columbia, in order to achieve local control, management, operation, and development of these important transportation assets.

(b) INCLUSION OF BWI NOT PRECLUDED.—Nothing in this title shall be construed to prohibit the Airports Authority and the State of Maryland from entering into an agreement whereby Baltimore/Washington International Airport may be made part of a regional airports authority, subject to terms and conditions agreed to by the Airports Authority, the Secretary, the Commonwealth of Virginia, the District of Columbia, and the State of Maryland.

SEC. 6004. DEFINITIONS.

In this title—

(1) ADMINISTRATOR.—The term "Administrator" means the Administrator of the Federal Aviation Administration.

(2) AIRPORTS AUTHORITY.—The term "Airports Authority" means the Metropolitan Washington Airports Authority, a public body to be created by the Commonwealth of Virginia and the District of Columbia consistent with the requirements of section 6007.

(3) EMPLOYEES.—The term "employees" means all permanent Federal Aviation Administration personnel employed on the date the lease under section 6005 takes effect by the Metropolitan Washington Airports, an organization within the Federal Aviation Administration.

(4) METROPOLITAN WASHINGTON AIRPORTS.—The term "Metropolitan Washington Airports" means Washington National Airport and Washington Dulles International Airport.

(5) SECRETARY.—The term "Secretary" means the Secretary of Transportation.

(6) WASHINGTON DULLES INTERNATIONAL AIRPORT.—The term "Washington Dulles International Airport" means the airport constructed under the Act entitled "An Act to authorize the construction, protection, operation, and maintenance of a public airport in or in the vicinity of the District of Columbia", approved September 7, 1950 (64 Stat. 770), and includes the Dulles Airport Access Highway and Right-of-way, including the extension between the Interstate Routes I-495 and I-66.

(7) WASHINGTON NATIONAL AIRPORT.—The term "Washington National Airport" means the airport described in the Act entitled "An Act to provide for the administration of the Washington National Airport, and for other purposes", approved June 29, 1940 (54 Stat. 686).

SEC. 6005. LEASE OF METROPOLITAN WASHINGTON AIRPORTS.

(a) AUTHORITY TO ENTER INTO LEASE.—The Secretary is authorized to enter into a lease of the Metropolitan Washington Airports with the Airports Authority for a 50-year term and to enter into any related agreement necessary for the transfer of authority and property to the Airports Authority. Authority to enter into a lease and agreement under this section shall lapse two years after the date of the enactment of this title.

(b) PAYMENTS.—

(1) LEASE PAYMENTS.—The lease shall provide for the Airports Authority to pay to the general fund of the Treasury annually an amount, computed using the GNP Price Deflator, to equal $3,000,000 in 1987 dollars. The Secretary and the Airports Authority may renegotiate the level of lease payments attributable to inflation costs every ten years.

(2) RETIREMENT OBLIGATIONS.—

(A) DISCONTINUED SERVICE.—Not later than one year after the lease takes effect, the Airports Authority shall pay to the Treasury of the United States, to be deposited to the credit of the Civil Service Retirement and Disability Fund, an amount determined by the Office of Personnel Management to represent the actual added costs incurred by the Fund due to discontinued service retirement under section 8336(d)(1) of title 5, United States Code, of employees who elect not to transfer to the Airports Authority.

(B) UNFUNDED LIABILITY.—Not later than one year after the lease takes effect, the Airports Authority shall pay to the Treasury of the United States, to be deposited to the credit of the Civil Service Retirement and Disability Fund, an amount determined by the Office of Personnel Management to represent the present value of the difference between (i) the future cost of benefits payable from the Fund and due the employees covered under section 6008(e) of this title that are attributable to the period of employment following the date the lease takes effect, and (ii) the contributions made by the employees and the Airports Authority under section 6008(e). In determining the amount due, the Office of Personnel Management shall take into consideration

the actual interest such amount can be expected to earn when invested in the Treasury of the United States.

(c) MINIMUM TERMS AND CONDITIONS.—The Airports Authority shall agree, at a minimum, to the following conditions and requirements in the lease:

(1) OPERATION OF AIRPORTS AS A UNIT.—The Airports Authority shall operate, maintain, protect, promote, and develop the Metropolitan Washington Airports as a unit and as primary airports serving the Metropolitan Washington area.

(2) AIRPORT PURPOSES.—The real property constituting the Metropolitan Washington Airports shall, during the period of the lease, be used only for airport purposes. For the purposes of this paragraph, the term "airport purposes" means a use of property interests (other than a sale) for aviation business or activities, or for activities necessary or appropriate to serve passengers or cargo in air commerce, or for nonprofit, public use facilities. If the Secretary determines that any portion of the real property leased to the Airports Authority pursuant to this Act is used for other than airport purposes, the Secretary shall (A) direct that appropriate measures be taken by the Airports Authority to bring the use of such portion of real property in conformity with airport purposes, and (B) retake possession of such portion of real property if the Airports Authority fails to bring the use of such portion into a conforming use within a reasonable period of time, as determined by the Secretary.

(3) AIP REQUIREMENTS.—The Airports Authority shall be subject to the requirements of section 511(a) of the Airport and Airway Improvement Act of 1982 and the assurances and conditions required of grant recipients under such Act as of the date the lease takes effect. Notwithstanding section 511(a)(12) of such Act, all revenues generated by the Metropolitan Washington Airports shall be expended for the capital and operating costs of such airports.

(4) CONTRACTS.—In acquiring by contract supplies or services for an amount estimated to be in excess of $200,000, or awarding concession contracts, the Airports Authority shall obtain, to the maximum extent practicable, full and open competition through the use of published competitive procedures. By a vote of seven members, the Airports Authority may grant exceptions to the requirements of this paragraph.

(5) CONTINUATION OF REGULATIONS.—

(A) IN GENERAL.—Except as provided in subparagraph (B), all regulations of the Metropolitan Washington Airports (14 C.F.R. part 159) shall become regulations of the Airports Authority on the date the lease takes effect and shall remain in effect until modified or revoked by the Airports Authority in accordance with procedures of the Airports Authority.

(B) EXCEPTIONS.—The following regulations shall cease to be in effect on the date the lease takes effect:

(i) section 159.59(a) of title 14, Code of Federal Regulations (relating to new-technology aircraft); and

(ii) section 159.191 of title 14, Code of Federal Regulations (relating to violations of Federal Aviation Administration regulations as Federal misdemeanors).

(C) OPERATIONS.—The Airports Authority may not increase or decrease the number of instrument flight rule takeoffs and landings authorized by the High Density Rule (14 C.F.R. 93.121 et seq.) at Washington National Airport on the date of the enactment of this Act and may not impose a limitation after the date the lease takes effect on the number of passengers taking off or landing at Washington National Airport.

(6) TRANSFER OF RIGHTS, LIABILITIES, AND OBLIGATIONS.—

(A) IN GENERAL.—Except as specified in subparagraph (B) of this paragraph, the Airports Authority shall assume all rights, liabilities, and obligations (tangible and incorporeal, present and executory) of the Metropolitan Washington Airports on the date the lease takes effect, including leases, permits, licenses, contracts, agreements, claims, tariffs, accounts receivable, accounts payable, and litigation relating to such rights and obligations, regardless whether judgment has been entered, damages awarded, or appeal taken. Before the date the lease takes effect, the Secretary shall also assure that the Airports Authority has agreed to cooperate in allowing representatives of the Attorney General and the Secretary adequate access to employees and records when needed for the performance of functions related to the period before the effectiveness of the lease. The Airports Authority shall assume responsibility for the Federal Aviation Administration's Master Plans for the Metropolitan Washington Airports.

(B) EXCEPTIONS.—The procedure for disputes resolution contained in any contract entered into on behalf of the United States before the date the lease takes effect shall continue to govern the performance of the contract unless otherwise agreed to by the parties to the contract. Claims for monetary damages founded in tort, by or against the United States as the owner and operator of the Metropolitan Washington Airports, arising before the date the lease takes effect shall be adjudicated as if the lease had not been entered into.

(C) PAYMENTS INTO EMPLOYEES' COMPENSATION FUND.—The Federal Aviation Administration shall remain responsible for reimbursing the Employees' Compensation Fund, pursuant to section 8147 of title 5, United States Code, for compensation paid or payable after the date the lease takes effect in accordance with chapter 81 of title 5, United States Code, with regard to any injury, disability, or death due to events arising before such date, whether or not a claim has been filed or is final on such date.

(D) COLLECTIVE BARGAINING RIGHTS.—The Airports Authority shall continue all collective bargaining rights enjoyed before the date the lease takes effect by employees of the Metropolitan Washington Airports.

(7) AUDITS.—The Comptroller General of the United States may conduct periodic audits of the activities and transactions of the Airports Authority in accordance with generally accepted management principles, and under such rules and regulations as may be prescribed by the Comptroller General. Any such audit shall be conducted at such place or places as the Comptroller General may deem appropriate. All books, accounts, records, reports, files, papers, and property of the Airports Authority shall remain in possession and custody of the Airports Authority.

(8) CODE OF ETHICS.—The Airports Authority shall develop a code of ethics and financial disclosure in order to assure the integrity of all decisions made by its board of directors and employees.

(9) RESTRICTION ON USE OF CERTAIN REVENUES.—Notwithstanding any other provision of law, no landing fee imposed for operating an aircraft or revenues derived from parking automobiles—

(A) at Washington Dulles International Airport may be used for maintenance or operating expenses (excluding debt service, depreciation, and amortization) at Washington National Airport; or

(B) at Washington National Airport may be used for maintenance or operating expenses (excluding debt service, depreciation, and amortization) at Washington Dulles International Airport.

(10) GENERAL AVIATION FEES.—The Airports Authority shall compute the fees and charges for landing general aviation aircraft at the Metropolitan Washington Airports on the same basis as the landing fees for air carrier aircraft, except that the Airports Authority may require a minimum landing fee not in excess of the landing fee for aircraft weighing 12,500 pounds.

(11) OTHER TERMS.—The Secretary shall include such other terms and conditions applicable to the parties to the lease as are consistent with and carry out the provisions of this title.

(d) SUBMISSION TO CONGRESS.—The Secretary shall submit the lease entered into under this section to Congress. The lease may not take effect before the passage of (1) 30 days, or (2) 10 days in which either House of Congress is in session, whichever occurs later.

(e) ENFORCEMENT OF LEASE PROVISIONS.—The district courts of the United States shall have jurisdiction to compel the Airports Authority and its officers and employees to comply with the terms of the lease. An action may be brought on behalf of the United States by the Attorney General, or by any aggrieved party.

SEC. 6006. CAPITAL IMPROVEMENTS, CONSTRUCTION, AND REHABILITATION.

(a) IMPROVEMENTS.—It is the sense of the Congress that the Airports Authority should—

(1) pursue the improvement, construction, and rehabilitation of the facilities at Washington Dulles International Airport and Washington National Airport simultaneously; and

(2) to the extent practicable, cause the improvement, construction, and rehabilitation proposed by the Secretary to be completed at both of such Airports within 5 years after the earliest date on which the Airports Authority issues bonds under the authority required by section 6007 of this title for any such improvement, construction, or rehabilitation.

(b) SECRETARY'S ASSISTANCE.—The Secretary shall assist the three airports serving the Washington, D.C. metropolitan area in planning for operational and capital improvements at those airports and shall accelerate consideration of applications for Federal financial assistance by whichever of the three airports is most in need of increasing airside capacity.

SEC. 6007. AIRPORTS AUTHORITY.

(a) POWERS CONFERRED BY VIRGINIA AND THE DISTRICT OF COLUMBIA.—The Airports Authority shall be a public body corporate and politic, having the powers and jurisdiction as are conferred upon it jointly by the legislative authority of the Commonwealth of Virginia and the District of Columbia or by either of the jurisdictions and concurred in by the legislative authority of the other jurisdiction, but at a minimum meeting the requirements of this section.

(b) PURPOSE.—The Airports Authority shall be—

(1) independent of the Commonwealth of Virginia and its local governments, the Dis-

trict of Columbia, and the Federal Government; and

(2) a political subdivision constituted solely to operate and improve both Metropolitan Washington Airports as primary airports serving the Metropolitan Washington area.

(c) GENERAL AUTHORITIES.—The Airports Authority shall be authorized—

(1) to acquire, maintain, improve, operate, protect, and promote the Metropolitan Washington Airports for public purposes;

(2) to issue bonds from time to time in its discretion for public purposes, including the purposes of paying all or any part of the cost of airport improvements, construction, and rehabilitation, and the acquisition of real and personal property, including operating equipment for the airports, which bonds—

(A) shall not constitute a debt of either jurisdiction or a political subdivision thereof; and

(B) may be secured by the Airports Authority's revenues generally, or exclusively from the income and revenues of certain designated projects whether or not they are financed in whole or part from the proceeds of such bonds;

(3) to acquire real and personal property by purchase, lease, transfer, or exchange, and to exercise such powers of eminent domain within the Commonwealth of Virginia as are conferred upon it by the Commonwealth of Virginia;

(4) to levy fees or other charges; and

(5) to make and maintain agreements with employee organizations to the extent that the Federal Aviation Administration is so authorized on the date of enactment of this title.

(d) CONFLICT-OF-INTEREST PROVISIONS.—The Airports Authority shall be subject to a conflict-of-interest provision providing that members of the board and their immediate families may not be employed by or otherwise hold a substantial financial interest in any enterprise that has or is seeking a contract or agreement with the Airports Authority or is an aeronautical, aviation services, or airport services enterprise that otherwise has interests that can be directly affected by the Airports Authority. Exceptions to requirements of the preceding sentence may be made by the official appointing a member at the time the member is appointed, if the financial interest is fully disclosed and so long as the member does not participate in board decisions that directly affect such interest. The Airports Authority shall include in its code developed under section 6005(c)(8) of this title the standards by which members will determine what constitutes a substantial financial interest and the circumstances under which an exception may be granted.

(e) BOARD OF DIRECTORS.—

(1) APPOINTMENT.—The Airports Authority shall be governed by a board of directors of 11 members, as follows:

(A) five members shall be appointed by the Governor of Virginia;

(B) three members shall be appointed by the Mayor of the District of Columbia;

(C) two members shall be appointed by the Governor of Maryland; and

(D) one member shall be appointed by the President with the advice and consent of the Senate.

The Chairman shall be appointed from among the members by majority vote of the members and shall serve until replaced by majority vote of the members.

(2) RESTRICTIONS.—Members shall (A) not hold elective or appointive political office, (B) serve without compensation other than for reasonable expenses incident to board functions, and (C) reside within the Washington Standard Metropolitan Statistical Area, except that the member appointed by the President shall not be required to reside in that area.

(3) TERMS.—Members shall be appointed to the board for a term of 6 years, except that of members first appointed—

(A) by the Governor of Virginia, 2 shall be appointed for 4 years and 2 shall be appointed for 2 years;

(B) by the Mayor of the District of Columbia, 1 shall be appointed for 4 years and 1 shall be appointed for 2 years; and

(C) by the Governor of Maryland, 1 shall be appointed for 4 years.

(4) REMOVAL OF PRESIDENTIAL APPOINTEES.—A member of the board appointed by the President shall be subject to removal by the President for cause.

(5) REQUIRED NUMBER OF VOTES.—Seven votes shall be required to approve bond issues and the annual budget.

(f) BOARD OF REVIEW.—

(1) COMPOSITION.—The board of directors shall be subject to review of its actions and to requests, in accordance with this subsection, by a Board of Review of the Airports Authority. Such Board of Review shall be established by the board of directors and shall consist of the following, in their individual capacities, as representatives of users of the Metropolitan Washington Airports:

(A) two members of the Public Works and Transportation Committee and two members of the Appropriations Committee of the House of Representatives from a list provided by the Speaker of the House;

(B) two members of the Commerce, Science, and Transportation Committee and two members of the Appropriations Committee of the Senate from a list provided by the President pro tempore of the Senate; and

(C) one member chosen alternately from members of the House of Representatives and members of the Senate, from a list provided by the Speaker of the House or the President pro tempore of the Senate, respectively.

The members of the Board of Review shall elect a chairman. A member of the House of Representatives or the Senate from Maryland or Virginia and the Delegate from the District of Columbia may not serve on the Board of Review.

(2) TERMS.—Members of the Board of Review appointed under subparagraphs (A) and (B) of paragraph (1) shall be appointed for terms of six years, except that of the members first appointed, one member under each of subparagraphs (A) and (B) shall be appointed for a term of two years and one member under each of subparagraphs (A) and (B) shall be appointed for a term of four years. Members of the Board of Review appointed under subparagraph (C) shall be appointed for terms of two years. A vacancy in the Board shall be filled in the same manner in which the original appointment was made. Any member appointed to fill a vacancy before the expiration of the term for which his or her predecessor was appointed shall be appointed only for the remainder of such term.

(3) PROCEDURES.—The Board of Review shall establish procedures for conducting its business. The procedures may include requirements for a quorum at meetings and for proxy voting. The Board shall meet at least once each year and shall meet at the call of the chairman or 3 members of the Board. Any decision of the Board of Review under paragraph (4) or (5) shall be by a vote of 5 members of the Board.

(4) DISAPPROVAL PROCEDURE.—

(A) SUBMISSION REQUIRED.—An action of the Airports Authority described in subparagraph (B) shall be submitted to the Board of Review at least 30 days (or at least 60 days in the case of the annual budget) before it is to become effective.

(B) ACTIONS AFFECTED.—The following are the actions referred to in subparagraph (A):

(i) the adoption of an annual budget;

(ii) the authorization for the issuance of bonds;

(iii) the adoption, amendment, or repeal of a regulation;

(iv) the adoption or revision of a master plan, including any proposal for land acquisition; and

(v) the appointment of the chief executive officer.

(C) 30-DAY DISAPPROVAL PERIOD.—If the Board of Review does not disapprove an action within 30 days of its submission under this paragraph, the action may take effect. If the Board of Review disapproves any such action, it shall notify the Airports Authority and shall give reasons for the disapproval.

(D) EFFECT OF DISAPPROVAL.—An action disapproved under this paragraph shall not take effect. Unless an annual budget for a fiscal year has taken effect in accordance with this paragraph, the Airports Authority may not obligate or expend any money in such fiscal year, except for (i) debt service on previously authorized obligations, and (ii) obligations and expenditures for previously authorized capital expenditures and routine operating expenses.

(5) REQUEST FOR CONSIDERATION OF OTHER MATTERS.—The Board of Review may request the Airports Authority to consider and vote, or to report, on any matter related to the Metropolitan Washington Airports. Upon receipt of such a request the Airports Authority shall consider and vote, or report, on the matter as promptly as feasible.

(6) PARTICIPATION IN MEETINGS OF AIRPORTS AUTHORITY.—Members of the Board of Review may participate as nonvoting members in meetings of the board of the Airports Authority.

(7) STAFF.—The Board of Review may hire two staff persons to be paid by the Airports Authority. The Airports Authority shall provide such clerical and support staff as the Board may require.

(8) LIABILITY.—A member of the Board of Review shall not be liable in connection with any claim, action, suit, or proceeding arising from service on the Board.

(g) CERTAIN ACTIONS TO BE TAKEN BY REGULATION.—Any action of the Airports Authority changing, or having the effect of changing, the hours of operation of or the type of aircraft serving either of the Metropolitan Washington Airports may be taken only by regulation of the Airports Authority.

(h) LIMITATION ON AUTHORITY.—If the Board of Review established under subsection (f) is unable to carry out its functions under this title by reason of a judicial order, the Airports Authority shall have no authority to perform any of the actions that are required by paragraph (f)(4) to be submitted to the Board of Review.

SEC. 6008. FEDERAL EMPLOYEES AT THE METROPOLITAN WASHINGTON AIRPORTS.

(a) EMPLOYEE PROTECTION.—Not later than the date the lease under section 6005 takes effect, the Secretary shall ensure that the Airports Authority has established arrangements to protect the employment interests of employees during the 5-year period beginning on such date. These arrangements shall include provisions—

(1) which ensure that the Airports Authority will adopt labor agreements in accordance with the provisions of subsection (b) of this section;

(2) for the transfer and retention of all employees who agree to transfer to the Airports Authority in their same positions for the 5-year period commencing on the date the lease under section 6005 takes effect except in cases of reassignment, separation for cause, resignation, or retirement;

(3) for the payment by the Airports Authority of basic and premium pay to transferred employees, except in cases of separation for cause, resignation, or retirement, for 5 years commencing on the date the lease takes effect at or above the rates of pay in effect for such employees on such date;

(4) for credit during the 5-year period commencing on the date the lease takes effect for accrued annual and sick leave and seniority rights which have been accrued during the period of Federal employment by transferred employees retained by the Airports Authority; and

(5) for an offering of not less than one life insurance and three health insurance programs for transferred employees retained by the Airports Authority during the 5-year period beginning on the date the lease takes effect which are reasonably comparable with respect to employee premium cost and coverage to the Federal health and life insurance programs available to employees on the day before such date.

(b) LABOR AGREEMENTS.—

(1) ADOPTION.—The Airports Authority shall adopt all labor agreements which are in effect on the date the lease under section 6005 takes effect. Such agreements shall continue in effect for the 5-year period commencing on such date, unless the agreement provides for a shorter duration or the parties agree to the contrary before the expiration of that 5-year period. Such agreements shall be renegotiated during the 5-year period, unless the parties agree otherwise. Any labor-management negotiation impasse declared before the date the lease takes effect shall be settled in accordance with chapter 71 of title 5, United States Code.

(2) CONTINUATION.—The arrangements made pursuant to this section shall assure, during the 50-year lease term, the continuation of all collective bargaining rights enjoyed by transferred employees retained by the Airports Authority.

(c) RIGHTS OF TERMINATED EMPLOYEES.—Any transferred employee whose employment with the Airports Authority is terminated during the 5-year period beginning on the date the lease under section 6005 takes effect shall be entitled, as a condition of any lease entered into in accordance with section 6005 of this title, to rights and benefits to be provided by the Airports Authority that are similar to those such employee would have had under Federal law if termination had occurred immediately before such date.

(d) ANNUAL AND SICK LEAVE.—Any employee who transfers to the Airports Authority under this section shall not be entitled to lump-sum payment for unused annual leave under section 5551 of title 5, United States Code, but shall be credited by the Airports Authority with the unused annual leave balance on the date the lease under section 6005 takes effect, along with any unused sick leave balance on such date. During the 5-year period beginning on such date, annual and sick leave shall be earned at the same rates permitted on the day before such date, and observed official holidays shall be the same as those specified in section 6103 of title 5, United States Code.

(e) CIVIL SERVICE RETIREMENT.—Any Federal employee who transfers to the Airports Authority and who on the day before the date the lease under section 6005 takes effect is subject to subchapter III of chapter 83 of title 5, United States Code, or chapter 84 of such title shall, so long as continually employed by the Airports Authority without a break in service, continue to be subject to such subchapter or chapter, as the case may be. Employment by the Airports Authority without a break in continuity of service shall be considered to be employment by the United States Government for purposes of such subchapter and chapter. The Airports Authority shall be the employing agency for purposes of such subchapter and chapter and shall contribute to the Civil Service Retirement and Disability Fund such sums as are required by such subchapter and chapter.

(f) SEPARATED EMPLOYEES.—An employee who does not transfer to the Airports Authority and who does not otherwise remain a Federal employee shall be entitled to all of the rights and benefits available under Federal law for separated employees, except that severance pay shall not be payable to an employee who does not accept an offer of employment from the Airports Authority of work substantially similar to that performed for the Federal Government.

(g) ACCESS TO RECORDS.—The Airports Authority shall allow representatives of the Secretary adequate access to employees and employee records of the Airports Authority when needed for the performance of functions related to the period before the date the lease under section 6005 takes effect. The Secretary shall provide the Airports Authority access to employee records of transferring employees for appropriate purposes.

SEC. 6009. RELATIONSHIP TO AND EFFECT OF OTHER LAWS.

(a) OTHER LAWS.—In order to assure that the Airports Authority has the same proprietary powers and is subject to the same restrictions with respect to Federal law as any other airport except as otherwise provided in this title, during the period that the lease authorized by section 6005 of this title is in effect—

(1) the Metropolitan Washington Airports shall be considered public airports for purposes of the Airport and Airway Improvement Act of 1982 (49 App. U.S.C. 2201 et seq.); and

(2) the Acts entitled "An Act to provide for the administration of the Washington National Airport, and for other purposes", approved June 29, 1940 (54 Stat. 686), "An Act to authorize the construction, protection, operation, and maintenance of a public airport in or in the vicinity of the District of Columbia", approved September 7, 1950 (64 Stat. 770), and "An act making supplemental appropriations for the support of the Government for the fiscal year ending June 30, 1941, and for other purposes", approved October 9, 1940 (54 Stat. 1030), shall not apply to the operation of the Metropolitan Washington Airports, and the Secretary shall be relieved of all responsibility under those Acts.

(b) INAPPLICABILITY OF CERTAIN LAWS.—The Metropolitan Washington Airports and the Airports Authority shall not be subject to the requirements of any law solely by reason of the retention by the United States of the fee simple title to such airports or by reason of the authority of the Board of Review under subsection 6007(f).

(c) POLICE POWER.—The Commonwealth of Virginia shall have concurrent police power authority over the Metropolitan Washington Airports, and the courts of the Commonwealth of Virginia may exercise jurisdiction over Washington National Airport.

(d) PLANNING.—

(1) IN GENERAL.—The authority of the National Capital Planning Commission under section 5 of the Act of June 6, 1924 (40 U.S.C. 71d) shall not apply to the Airports Authority.

(2) CONSULTATION.—The Airports Authority shall consult—

(A) with the National Capital Planning Commission and the Advisory Council on Historic Preservation before undertaking any major alterations to the exterior of the main terminal at Washington Dulles International Airport, and

(B) with the National Capital Planning Commission before undertaking development that would alter the skyline of Washington National Airport when viewed from the opposing shoreline of the Potomac River or from the George Washington Parkway.

(e) OPERATION LIMITATIONS.—

(1) HIGH DENSITY RULE.—The Administrator may not increase the number of instrument flight rule takeoffs and landings authorized for air carriers by the High Density Rule (14 C.F.R. 93.121 et seq.) at Washington National Airport on the date of the enactment of this title and may not decrease the number of such takeoffs and landings except for reasons of safety.

(2) ANNUAL PASSENGER LIMITATIONS.—The Federal Aviation Administration air traffic regulation entitled "Modification of Allocation: Washington National Airport" (14 C.F.R. 93.124) shall cease to be in effect on the date of the enactment of this title.

SEC. 6010. AUTHORITY TO NEGOTIATE EXTENSION OF LEASE.

The Secretary and the Airports Authority may at any time negotiate an extension of the lease entered into under section 6005(a).

SEC. 6011. SEPARABILITY.

Except as provided in section 6007(h), if any provision of this title or the application thereof to any person or circumstance, is held invalid, the remainder of this title and the application of such provision to other persons or circumstances shall not be affected thereby.

SEC. 6012. NONSTOP FLIGHTS.

PERIMETER RULE.—An air carrier may not operate an aircraft nonstop in air transportation between Washington National Airport and another airport that is more than 1,250 statute miles away from Washington, National Airport.

Mr. LEHMAN of Florida (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

Mr. SNYDER. Mr. Speaker, reserving the right to object, I would like to

ask the gentleman from Florida, since he wants to dispense with reading the amendment, what changes he had made in the proposal as passed by the Senate.

Mr. LEHMAN of Florida. Mr. Speaker, will the gentleman yield?

Mr. SNYDER. I yield to the gentleman from Florida.

Mr. LEHMAN of Florida. Mr. Speaker, I have made three, two main proposals. One is to index the lease agreement according to the Consumer Price Index, so that instead of paying $3 million a year for 50 years, you will pay additional money according to the increase in the Consumer Price Index, which I estimate will now run, instead of $150 million, over $400 million for the cost of the airport.

Mr. SNYDER. That is one. What are the other two?

Mr. LEHMAN of Florida. The other amendment is the new perimeter rule. An air carrier may not operate an aircraft nonstop in air transportation between Washington National Airport and another airport that is more than 1,250 statute miles away from Washington National. This increases it from 1,000 miles.

□ 0025

Mr. SNYDER. What is the third one?

Mr. LEHMAN of Florida. The third one is that the members of the oversight committee are now divided equally between the Appropriations Committee and the authorizing committee members, two and two on each body instead of four in each body without designation.

Mr. SNYDER. Mr. Speaker, I would like to ask the gentleman, further reserving the right to object, on the last item are you familiar with the opinion of the Justice Department that this would render the oversight body unconstitutional and wipe it out?

Mr. LEHMAN of Florida. I am not aware of that being unconstitutional, and I am willing to leave it as it is in our changes.

Mr. SNYDER. But you have not left it the way it is.

Mr. Speaker, I will withdraw my reservation of objection, but I would like to be recognized at the proper time to get 20 minutes in opposition to the motion.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. SNYDER. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, did I understand correctly that one of the changes made is to increase the radius from the airport? Is the gentleman familiar with any kind of hearings that were held on that particular proposal?

Mr. SNYDER. Of course, a lot of hearings were held in the Subcommittee on Aviation of the Committee on Public Works and Transportation and that was dealt with some. But there are 33 States who tend to lose service out of National if that proposal is agreed to, and we will address that in the opposition time.

Mr. WALKER. I thank the gentleman. I was having trouble hearing. Did the gentleman hear there are no changes in the labor provisions as they relate to this particular bill?

Mr. SNYDER. That is my understanding.

Mr. LEHMAN of Florida. Mr. Speaker, will the gentleman yield?

Mr. SNYDER. I will be glad to yield to the gentleman from Florida to address that question.

Mr. LEHMAN of Florida. Mr. Speaker, the gentleman is correct, there are no changes in the labor provisions.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Florida?

PARLIAMENTARY INQUIRY

Mr. CONTE. Mr. Speaker, reserving the right to object, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. CONTE. Mr. Speaker, is it permissible to separate or divide the question on the perimeter rule?

The SPEAKER pro tempore. The answer is in the negative. In the form submitted the proposed House amendment is not divisible.

Mr. CONTE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. SNYDER. Mr. Speaker, further reserving the right to object, I yield to the gentlewoman from Maryland [Mrs. BYRON].

PARLIAMENTARY INQUIRY

Mrs. BYRON. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentlewoman will state it.

Mrs. BYRON. Mr. Speaker, I am opposed to the gentleman's motion, and under the rules is the gentleman from Kentucky [Mr. SNYDER] allocated time?

The SPEAKER pro tempore. We have not come to that point as yet. We now have a unanimous-consent request propounded by the gentleman from Florida to dispense with further reading of the motion. We must clear that matter first.

Mr. SNYDER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The Chair would now ask the gentleman from Florida [Mr. LEHMAN] and the gentleman from Massachusetts [Mr. CONTE] if they are both in support of the motion, and if they are, then a third Member would be entitled to 20 minutes in opposition.

Is the gentleman from Florida in favor of the motion?

Mr. LEHMAN of Florida. I am, Mr. Speaker, and I have no objection.

Mr. SNYDER. Mr. Speaker, I request 20 minutes in opposition.

The SPEAKER pro tempore. The gentleman from Kentucky [Mr. SNYDER] will be recognized for 20 minutes; the gentleman from Florida [Mr. LEHMAN] will be recognized for 20 minutes; and the gentleman from Massachusetts [Mr. CONTE] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida [Mr. LEHMAN].

Mr. LEHMAN of Florida. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, my motion to amendment No. 124 would insert the "Metropolitan Washington Airports Act of 1986" into the resolution.

This amendment would authorize an independent public authority to operate National and Dulles Airports, and would give this new airport authority the ability to privately finance badly needed improvements at both airports.

This amendment is essentially the same as was reported out of the House Aviation Subcommittee of the Public Works and Transportation Committee; and is essentially the same as has been passed by the other body.

It provides for a 50-year lease, not a transfer or giveaway.

It also provides for continuing congressional review over the major decisions of the new airport authority. A Congressional Board will still have veto power over the new airport authority's: annual budget; issuance of bonds; regulations; master plan; and the naming of the Chief Executive Officer.

The one significant change that I have made to the Senate bill language would be that the lease payments to the Federal Government would be indexed to cover inflation. This is a significant money issue. It means that, assuming inflation runs at 4 percent a year over the period of the lease—50 years—the total lease payments to the Federal Government will total about $460 million instead of the $150 million required in the Senate bill.

I think making these payments inflation proof is fair to the Federal taxpayers, and I have been told the administration has no object to this.

Mr. Speaker, we all know that National and Dulles Airports need major capital improvements. We are running out of terminal and parking space at Dulles and National has been a longtime nightmare. A price tag of $700 million has been set to bring these facilities up to first-class standards.

We must undertake these capital improvements and, in my view, the fastest and most fair way—without giving up congressional control—is to pass this legislation. I urge its adoption.

Mr. CONTE. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania [Mr. COUGHLIN].

Mr. COUGHLIN. Mr. Speaker, I rise in strong support of the motion authorizing the lease of Washington National and Dulles International Airports to an independent airport authority. I urge a "yea" vote.

Let me begin by reiterating a point often made by Transportation Secretary Elizabeth Hanford Dole, and one voiced by several former administrations as well—that the U.S. Government should not be in the business of operating an airport. The proposal we are considering, today, provides the Government with a prime opportunity to pass this burdensome responsibility to capable hands—hands which would be freed of financial restraints and, therefore, able to perform the repair and expansion work so badly needed.

Much of the discussion surrounding the proposal to lease National and Dulles has centered on the notion that Congress is giving up something we own. This proposal maintains our ownership through a long-term lease. This is not a giveaway; the Federal Government will receive an estimated $460 million from the airport authority in payments over the term of the lease.

In addition, the motion provides continued congressional control over both airports. Congress would retain oversight through a Board of Review made up of nine Members of Congress. This Board would have the right to overturn major decisions of the airport authority such as: the annual budget, insuance of bonds, regulations, master plan, and appointment of the Chief Executive Officer.

National and Dulles Airports need about $700 million in capital improvements. Leasing the two airports would shift this financial responsibility from the already overburdened shoulders of the Federal Government to the private sector.

The newly created airport authority would have the ability to float bonds, a right granted to all other independently operated airports, and would also be eligible to receive grant money from the AIP [Airport Improvement Program] fund, another luxury currently available to all other airports. Long-term financial planning would replace temporary fixes. It is time to get the Government out of the airport business and to lease the airports to an authority explicitly created to finance the almost $1 billion of needed improvements.

National and Dulles are the only two air carrier airports operated by the Federal Government. This unique situation has yielded two of the most outdated and inadequate commercial airports in the Nation as they have continually been placed at the bottom of the list when it comes to funding. Given the need for a change and the current financial constraints, the solution is a lease. The lease of National and Dulles Airports is endorsed by State and local officials, airlines, business organizations, business aircraft associations, and airport employees. The lease was passed by a sizable margin in the other body. Employees of the airports would be protected, the present number of flights would be fixed, and the airport authority would be required to perform simultaneous improvements at both airports. With so little time left in the 99th Congress, adoption of this motion is the only hope of obtaining the improvements so greatly needed at National and Dulles.

I urge a "yea" vote.

□ 2435

Mr. SNYDER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am sorry that I have to rise in opposition to this motion.

I am concerned that the motion to recede and concur with an amendment now before us has the potential of adversely affecting the air service of many States. Thirty-three to be exact.

A number of years ago a decision was made by the Federal Aviation Administration that air carriers should only provide nonstop air service between National Airport and airports within a 1,000-mile perimeter. The rationale for this regulation was that National should be a medium- to short-haul airport to be supplemented with long-haul flights from Dulles International.

The other body attached an amendment to the continuing resolution which would establish the 1,000-mile perimeter in law rather than by regulation. The conferees were unable to agree on this provision and therefore it has been reported back to the House in disagreement along with other provisions dealing with the lease of National and Dulles Airports to an independent airport authority.

The gentleman's motion to reduce and concur with an amendment would change the Senate provision to allow additional flights beyond the 1,000-mile perimeter from National. The effect of this amendment is to place in jeopardy the service that we now have within the 1,000-mile perimeter.

As my colleagues know, National Airport has capacity constraints which limit the number of aircraft operations that can be accommodated. Right now the airport is filled up. If we adopt the gentleman's amendment, and additional flights are allowed beyond 1,000 miles, we must logically expect that additional airports beyond the perimeter will gain service.

Since there is no forseeable capacity expansion at National, the slots necessary to serve those airports outside the 1,000-mile perimeter will have to come out of the hide of airports and cities within the perimeter. Some medium-size communities that are east of the Mississippi can expect to lose air service under this provision.

Under the amendment, 33 States would become candidates to lose air service to Washington in order to accommodate nonstop flights between National and points outside the existing 1,000-mile perimeter. Furthermore, if the perimeter is changed, we can expect pressure to increase aircraft operations which certainly would not only affect safety at National but also affect noise levels.

The airport transfer proposal in the Senate-reported resolution recognizes that these airports are to be operated as a unit and should complement one another. By setting a perimeter at 1,000 miles, Dulles will accommodate the long-haul market and National will serve medium- and short-haul city pairs. This is current policy, it is good policy, and we should not place National in a position of competing with Dulles. I would also point out to my colleagues from the State of Maryland that if the perimeter rule is expanded, National would also be competing with Baltimore-Washington International Airport for long-haul traffic.

In addition, Mr. Speaker, the motion to recede and concur with an amendment would specify that two Public Works members and two Appropriations Committee members serve on the Board of Review, and like Members from the other body.

This whole scheme is shaky to begin with, based on constitutionality.

We have a letter from the Department of Justice dated August 6, 1986, to Chairman MINETA, which is some six pages long, which says that when you do this that you will not withstand the constitutionality scrutiny, because it is the Board of Review would be in effect a legislative branch arm exercising jurisdiction over independent airports authority in direct violation of INS versus Chadha, the recent Supreme Court case.

Now if in effect the Justice Department is right, and this change that they have made in this amendment is ruled unconstitutional for the Board of Review, this Congressional Board of Review, which was going to be a user's, to be appointed by the Speaker and by the President of the Senate will no longer exist, and the airport authority will do what it wants to do because that will no longer be in existence.

In addition, let me suggest to you, and I do not want to use all the time because others want to speak against

it; we have a very interesting letter from the Arlington County, Virginia Board, and they tell us what they want to do if that oversight committee is put out of business: They want to lower the slot number from 37 an hour; they want to stop night flights entirely; they want to discontinue anything that makes any noise over their area.

I just want to say to you, my friends, those of you who fly out of National, prepare to go to Dulles; they will shut the place down. Mr. Speaker, I reserve the balance of my time.

Mr. LEHMAN of Florida. Mr Speaker, I yield 3 minutes to the gentleman from Virginia [Mr. SISISKY].

Mr. SISISKY. Mr. Speaker, I thank the gentleman for recognizing me and first of all, I would like to thank the gentleman from Kentucky [Mr. SNYDER] and also the gentleman from California [Mr. MINETA] for the great hearings they had on this bill.

Now things have changed tonight; there is no question about it, but I have got to tell you something that I think you should know. All of us in this House, all of us, ought to be ashamed of ourselves. We ought to be ashamed of ourselves.

This Nation's Capital, this beautiful Capital, served by the airports that we have today—I would defy anyone that leaves from the commuter terminal at Washington National to look at any bus station in the smallest community in the United States, and try to compare that—we ought to be ashamed of ourselves.

The growth at Dulles Airport. I realize that the amendments that went on here tonight certainly chain some of this to you. I have been working on the floor all day, talking to Members, and I know that I will be criticized for saying this out in public. Shame.

You know what the worry is? Are we going to have our parking. Parking! I can tell you, you are going to have your parking. You are going to have your parking.

Now you talk about 33 States that may decline in air service. You do not know that. I am not in favor of the amendments. I am in favor of the bill that the subcommittee reported out. This late hour, this is all we have. Please, I beg of you, let this go through; let us see what the other body does.

This is our last chance, in my opinion. Everybody says next year is another year. It took almost 9 days for the other body to pass this piece of legislation. I beg of you, do not let this opportunity pass by you.

Will it help Virginia? That is another argument. Certainly it will help Virginia, but those of you who live in northern Virginia know full well that they will grow with or without the modernization of this airport. Do not let your constituents, or visitors to this country, come into airports such as this.

I ask you to pass the motion the chairman has presented tonight.

Mr. CONTE. Mr. Speaker, I yield 5 minutes to the gentleman from Virginia [Mr. WOLF].

Mr. DENNY SMITH. Mr. Speaker, will the gentleman yield?

Mr. WOLF. I yield to the gentleman from Oregon.

Mr. DENNY SMITH. Mr. Speaker, I rise in strong support of the motion to recede and concur with the Senate in the leasing of National and Dulles Airports to an independent regional authority.

I initially thought the transfer a bad idea. I worried that too much authority would be granted to a regional body whose ties to local politics would cause it to neglect the special transportation needs of the Nation's Capital.

This is not the case. Nothing in the present lease proposal supports my initial concerns. The airport authority is to be entirely independent of State and local government and is to be overseen by a congressional review board. The Federal Government will retain oversight and ownership of the land and facilities. The only change will be that the private sector will foot the bill for all of the improvements.

The bottom line on this measure is $700 million. It will take at least that much to bring National and Dulles into the 1980's. By leasing the airports to an independent authority, improvements will be done quickly since they will be financed by raising capital from private sources through revenue bonds.

Congress isn't going to appropriate that kind of money for airport improvements, and shouldn't. Besides, $700 million represents only the tip of the iceberg in spending over the life of each airport.

Future long-term development of the Washington area is going to require things like conveniently located reliever airports to handle business and general aviation traffic. The new airport authority is the type of organization we need to study and carry out such plans.

Under this plan, Congress retains enough control of the airports to deal with any unseen pitfalls resulting from this transfer of authority, and we are relieving the Federal Government of over $700 million of future cost.

We are getting our cake and eating it too. I can't think of much better circumstances under which to get the Federal Government out of a business in which it doesn't belong.

I strongly urge my colleagues to support the move to lease National and Dulles Airports to an independent authority. It represents a sound financial solution to a continuing drain on Federal dollars. The beauty of the deal is that Congress retains its control without spending a dime.

Mr. WOLF. Mr. Speaker, obviously this is a difficult issue, and it is late at night. Let me make a couple points.

All of you in this Chamber, your husbands and your wives and your sons and your daughters fly into this airport. This is the mess that we have; only 680 acres. The facilities are a mess.

Not many people in this Chamber know, but Jim Wilding, who operates these airports, and FRANK WOLF fought hard to extend the runway. There was a 500-foot overrun. The FAA requirements call for at least 1,000 feet, and there was 500 feet, and your families were coming in at this airport.

I fought to have this runway extended. I saw nobody in the Congress acting on this; I saw no oversight hearings saying, "Let's do something about this airport." You just kept flying in and flying out, and your families were in danger.

We fought and we extended the runway; but it is only 750 feet. It ought to be 1,000 feet. I see no action being taken in this body, and today we can do it by transferring these airports.

As NORM said just a minute ago, the parking. The parking is protected. Secretary Dole made that point very clear.

□ 0045

Third, I saw the first. This is a scarce list. This House cannot be demagoged and frightened and scared away. This is a scare list. Do not buy it. There is nothing that says that these flights will be canceled. There is nothing that says these flights will be canceled, and I ask you do not believe it.

Mr. GLICKMAN. Mr. Speaker, will the gentleman yield?

Mr. WOLF. I yield to the gentleman from Kansas.

Mr. GLICKMAN. I thank the gentleman for yielding.

Mr. Speaker, safety is really the issue here. This airport operates at a marginal level of safety, everybody in this room knows it. You talk to the pilots who fly you in from all over the country, and they will tell you that as well. The fact of the matter is the current system does not allow that airport to be improved. Safety is in question. One of these days there is going to be another major crash at that airport, and we ought to at least transfer the authority to a group who has the ability, the wherewithal and the money to improve it.

So therefore, I support the gentleman's position.

Mr. WOLF. I thank the gentleman.

I do not want it on my conscience that something like this could happen. I ask you to help us make a change.

Second, the terminal will be moved out to connect with the Metro stop. Whoever designed the Metro stop to come a couple of hundred yards from the terminal did not make any sense.

They will bring the Metro stop and the terminal together. There will be underground parking, it will be covered, it makes sense.

Last, with regard to Dulles Airport, in 1981 Dulles had 2.1 million passengers. As a result of the efforts that have been made, Dulles has now reached 5.5 million passengers, and next year it will be 8.5 million passengers.

I spoke to a Member the other day, and he told me he parked at the airport and had to park on the grass. There is no parking.

What this airport authority will do will build a new midfield terminal, with 48 gates at Dulles Airport to make it a first-class airport.

The last question is this: for those of you in this body who voted for Gramm-Rudman-Hollings-Mack, and others, let me tell you you are not prepared to put up $750 million to make the improvements. The citizens of the regional airport authority are prepared to do that. We are giving you the best deal possible. We are going to improve those airports, make them first-class airports and make them safe, and we are going to pay them our of regional airport authority bonding.

I have great respect for the gentleman from Kentucky. I am sorry that Mr. SNYDER is retiring. It pains me to be against him.

But I ask all the Members of this body to do the right thing, to rise and support this airport transfer bill so that we can improve National Airport, make it a first-class airport, improve the parking, move the terminal over whereby you can reach the Metro, make it an airport that is safe for everyone to fly into and make the necessary improvements at Dulles Airport.

I ask for a "yes" vote.

Mr. PARRIS. Mr. Speaker, will the gentleman yield to me?

Mr. WOLF. I yield to the gentleman from Virginia.

Mr. PARRIS. I thank the gentleman for yielding.

Mr. Speaker, I rise in strong support of this measure. I thank my colleague from Virginia for the enormous time and energy that he has put into this measure.

Mr. WOLF. I thank my colleague for his comments.

Ladies and gentlemen, I would appreciate your help and support.

Mr. SNYDER. Mr. Speaker, I yield 2 minutes to the gentleman from Maryland [Mr. DYSON].

Mr. DYSON. Mr. Speaker the gentleman from Virginia just indicated that we have to live with Gramm-Rudman. I do not think there is anybody more aware of that than I am.

The Grace Commission estimated conservatively that these airports were worth well over $300 million. Yet the Secretary of Transportation has endorsed this amendment which would approve the transfer of both Dulles and National Airports for $150 million. It is unconscionable that Congress would approve such a giveaway in a time of $200 billion deficits.

Mr. Speaker, this is not a lease, it is a giveaway. I think it is wrong in this day and age. We do not have that kind of money to give away. We do have to live with Gramm-Rudman.

Mr. Speaker, those of us from Maryland or at least those of us who have constituents who live along the Potomac have a very real problem with allowing the flights to come in and out with no guarantee under this proposal that the present noise restrictions will be maintained, none whatsoever.

So our constituents would have to put up with this noise from 6:30 in the morning until 10:30 every night and have no guarantees that they will not be drowned out by the noise coming from about 1,000 aircraft which take off and land at National every day.

Mr. Speaker, I urge my colleagues to vote "no" on the motion to recede.

I thank the gentleman from Kentucky.

Mr. LEHMAN of Florida. Mr. Speaker, I yield 2 minutes to the gentleman from Maryland [Mr. MITCHELL].

Mr. MITCHELL. Mr. Speaker, I urge support of the motion. Every time I fly into National or fly out, I say three Hail Marys because it is just that dangerous. I was vehemently opposed to this legislation in the beginning. It was a ripoff. It was a giveaway.

However, it has now been perfected so that we have a lease arrangement and there will be sufficient incomes coming in to take care of business.

Insofar as the noise is concerned. I do not think this legislation will increase the noise.

My God, we have been battling with FAA for years over noise and nothing has happened. Maybe we will get a shot for our Marylanders under this new arrangement.

It just makes sense, it makes sense.

Someone raised the question about the airport in Baltimore. We will handle our own. Baltimore-Washington International, we will handle our own no matter what arrangement takes place here.

It makes sense.

We had no business trying to run it. We have done a bad job in running it. Change it around, vote for the motion and make some sense out of this legislation.

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia [Mr. GINGRICH].

Mr. GINGRICH. I thank the gentleman for yielding.

Mr. Speaker, this is a very important vote on a very important idea. The amendment as designed is cluttered and imperfect. It includes a perimeter rule which should not be written into law. Frankly, I wish that language were not in the amendment.

However, despite its imperfections this proposal is historic. Tonight we have a chance to get the Federal Government out of a business it has no business being in. The very scale and complexity of this continuing resolution should remind all of us that managing legitimately Federal activities is a big enough job. It is time to allow a regional authority to do a regional job, that of managing airports.

Furthermore, the fact is very simple: We do not have the money, we are not going to have the money for the Federal Government to be directly involved in modernizing those airports.

Mr. SNYDER. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from Kentucky.

Mr. SNYDER. I thank the gentleman for yielding.

Mr. Speaker, there are $3.5 million unobligated in the trust fund.

Mr. GINGRICH. I understand the gentleman's point, but I think all of us understand the reality, as does the gentleman, that that trust fund is not going to be tapped during the period of Gramm-Rudman, trying to get to a balanced budget.

So the question is simple: Do we allow the regional authority to both run the airport, getting it away from our attention and not cluttering us, and do we allow the regional authority to borrow the money, thus not having ourselves burdened?

Finally, I would say to all of you we are far better off, as the gentleman from Virginia, Mr. WOLF, said, to make sure that we allow someone to do the necessary job of being safe. We have not done the job we should have at National. We are not going to do the job we should at National. I think the regional authority will.

This is a historic vote. I would strongly urge you with all of its imperfections to nonetheless vote for this amendment and send it back to the Senate and let us get on with the business of a historic transfer.

Mr. SNYDER. Mr. Speaker, how much time does each Member have?

The SPEAKER pro tempore (Mr. GRAY of Illinois). The gentleman from Kentucky [Mr. SNYDER] has 13 minutes remaining, the gentleman from Massachusetts [Mr. CONTE] has 10 minutes remaining, and the gentleman from Florida [Mr. LEHMAN] has 12 minutes remaining.

Mr. SNYDER. Mr. Speaker, I yield 4 minutes to the gentlewoman from Maryland, Mrs. BYRON.

Mrs. BYRON. Mr. Speaker, I rise in opposition to the Warner-Trible amendment to transfer Washington National and Dulles Airports to a regional authority. There is no one in the Virginia delegation I respect more than FRANK WOLF but I cannot agree with him on this.

The measure would establish an airport authority that is no more than in-

different to the environmental impacts of National Airport's Potomac River flight path on local communities. Intended to liberate the airports from unnecessary Federal controls, the legislation swiftly eliminates even the existing local noise limitations; noise restrictions which are critical when you have jet aircraft as a neighbor. I have no pretty picture as those who are for this giveaway do. How can you have a picture of noise pollution? During a normal north operations day, approximately 600,000 people are subjected to as many as three overflights a minute, or between 800 and 1,000 flights daily. Acoustical studies show that the jet noise constantly exceeds EPA livable noise standards. If adopted, this legislation would only make a bad situation worse.

Maryland residents have been calmly assured that the regional authority will benefit them, giving them more control over airport policies such as noise. This is simply not realistic. Since 1967, aircraft have been instructed to use the Potomac River corridor as the flight path at National. That does not go over Virginia but over Maryland. Despite increased population changes to that path, no alternative route has been implemented to reflect the change. In fact, skyscrapers have been built on the Virginia side of the path to make what appears to be an even more intentional effort to shift the environmental burden over Maryland. It is naive, at best, to assume that a regional authority, dominated by Virginia interest, will be willing to equitably address this problem.

Furthermore, and perhaps even more serious, is the weak language in the bill allowing the authority to modify or revoke existing nighttime noise limitations. Again, I cite the majority interest on the authority. I am concerned that the airport authority, trying to make improvements to National, will find it necessary to suspend the nighttime noise restriction, creating a 24-hour noise problem in the Washington metropolitan area. And increase the number of flights. I have asked again and again just to keep the noise at existing levels. To keep the slots at 37 per hour. Regardless of the good intentions to create an equitable airports transfer bill, the measure fails to acknowledge the serious impact of constant jet aircraft noise. For this reason, I urge you to oppose the passage of this transfer.

Mr. LEHMAN of Florida. Mr. Speaker, I yield 3 minutes to the gentleman from Michigan [Mr. FORD].

Mr. FORD of Michigan. Mr. Speaker, I share some of the apprehensions that have been expressed here but without trying to take an issue on whether the airport should ultimately turn over to regional authority or not, I want to tell you this is the wrong way to do it.

The best example of why this is a wrong way of doing it is that there are about 800 people that nobody yet has said anything about. That is the Federal employees at these two airports who, at some magic date in 1987 if the steamroller kept going, will suddenly not be Federal employees anymore but they will be employed by some new agency as a subdivision of the government of Virginia in conjunction with an agreement with the District of Columbia.

Now, I would give the writers of this bill over at the Department of Transportation an "A" for effort in trying to make it appear, and indeed convincing a number of the employees, that they have taken care of their problems. It took my civil service lawyers only 5 minutes to look at their efforts and discover that they get an "E" for the results.

Now, what would have happened if this bill had not been tacked on in the middle of the night to this measure over in the other body is that, when the Transportation Committee finished with the bill, it would have come for a short term to my committee where we could have dealt with the transition of these people from their status as Federal employees to becoming some form of hybrid State employee.

To suggest, for example, that you can have that transit authority out there in Virginia change the pension laws of the Federal Government so that a Federal employee at the airport who now has 10 or 15 years can retire when they would have and collect their retirement from the Federal system is poppycock. We will have to, if it is the will of the Congress, to strain and do that, we will have to for the first time make it possible to tack employment with something other than the Federal Government to Federal Government employment for retirement purposes.

□ 0100

I am sure that you have been told by the proponents of this bill that it is not necessary to go through the committee system, but that is why we have a committee system.

And then after we had worked on it, I am told that the bill would have gone to Mr. BROOKS' Government Operations Committee, because of disposing of Federal buildings over there or some other reason.

I know of no one on my committee who would have tried to delay. We could not under this kind of referral anyhow. But I also know that my subcommittees get involved, because of the number of problems you have when you change the status of these people and it is not handled in just one place. They range from health benefits to leave benefits to retirements to pay benefits to promotional benefits, retention benefits, and it goes on and on and on. We would have given it consideration and we could have written some sensible way to handle this matter.

I suspect that if the House accepts the Senate package in this bill tonight and this goes into effect, in a short time we will have to run through some legislation very quickly when the employees begin to ask the questions that we are raising now.

I urge you to vote it down and take it up in its regular order, in the regular way it should be considered, by the committees of jurisdiction.

Mr. CONTE. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas [Mr. ARMEY].

Mr. ARMEY. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, the Metropolitan Washington Airports Act represents a great leap forward for the concept of privatization. And that's good news not only to the area's residents and air travelers, but to the country as a whole. That's because National and Dulles airports share the distinction of being the Nation's only federally owned civilian airports.

Hopefully, 50 years from now—when Congress will be faced with extending the lease on National and Dulles—Members will ask themselves why it was ever necessary for the Federal Government to own and control civilian airports in the first place. The simple fact is that our Federal Government was not designed nor is it suited to the task of running the day to day operations of civilian airports.

Transferring control of the airports to an independent authority will put these airports on the same footing as all others in the country. It gets the Federal Government out of the day-to-day operation and management of civilian airports, and puts this control into the hands of those who are more interested in seeing these airports run in the safest and most efficient manner possible.

As we are all aware, National and Dulles are in need of significant capital improvements. Rather than throw limited Federal funds at the airports and tell them to do what they can, this legislation will allow the type of coordinated long-range planning necessary to keep the airports safe and efficient into the future. It also allows the airports to float the bonds to pay for the necessary improvements, as opposed to saddling taxpayers at large or raiding the airport trust fund for the money.

Mr. Speaker, the benefits we'll see as a result of this transfer will serve as an indication that the concept of privatization is one which should be pursued in a host of other areas as well. For just as our Federal Government is not suited to run a civilian airport, it is involved in areas that can be much more efficiently and productively carried out by the private sector or, as in this case, by local authorities.

Mr. Speaker, I rise in strong support of this historic amendment.

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from Florida [Mr. SHAW].

Mr. SHAW. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I think for just a mo-

ment it is necessary for us to look at exactly what we have. At National we have a beautiful example of art decor with art decor technology. That airport has not expanded or done anything significant since the fifties. It is still there. The gentleman from Virginia spoke a minute ago about it being an embarrassment. It is an embarrassment as a front door to the Nation's Capital.

You look out at Dulles, and it is a miscarriage of technology. The airport drastically needs to be upgraded. We need better than what we have here in the Nation's Capital, and we are not going to get it under Gramm-Rudman. I think the gentleman from Georgia [Mr. GINGRICH] pointed that out beautifully. We are not going to get it without the transfer.

Now the question that has been raised on a number of occasions is: Is this a give-away? Obviously, it is not a give-away. The Federal Government is going to be compensated, and it is a lease agreement. But even if it was a give-away, for one moment just think what is public property supposed to be. Public property is what it does for the public, and it is not adequately serving the public.

By this transfer we can bring it into a situation where it will adequately satisfy the public needs.

The last question, and perhaps the most important question, particularly with regard to National is the question of safety. National Airport is certainly not an airport that you would design or even open under today's safety requirements. It needs to be upgraded.

My brother, who is a pilot for one of the largest airlines in the country, once stated to me that it was exciting flying into National Airport. Well, I do not want to come into an airport that is exciting to fly into. I want to come into one that is safe.

The last point that I would like to cover is the question of whether or not a regional authority is going to be sensitive to regional needs and regional concern and the regional environment. Of course, it will even be more sensitive to that.

Mr. SNYDER. Mr. Speaker, I yield myself such time as I may consume.

Mr. FLIPPO. Mr. Speaker, will the gentleman from Kentucky yield?

Mr. SNYDER. I yield to the gentleman from Alabama.

Mr. FLIPPO. Mr. Speaker, we heard a lot of discussion tonight about the lack of a safe airport there and whether or not there is any way to improve it other than to transfer it to a regional authority.

I would like to ask the gentleman from Kentucky if there has been anyone considering perhaps the sale of the landing rights out there that seems to be divided up among the airlines. They seem to control who and how many landings we have out there. Has anyone, in the gentleman's opinion, considered the sale of those landing rights to get the money to make this airport a safer operation?

Mr. SNYDER. As far as I know, there has been no consideration to the sale of landing rights with the money to go to the Federal Government.

They are out there peddling slots between different airlines, and the airlines are picking up several millions of dollars on the sale to others for which they never paid.

I understand Mr. CARR will address that issue of how we are going to pay for improving it just a little bit later. There is about $3 or $4 billion in the trust fund.

Mr. Speaker, I yield 3 minutes to the distinguished chairman of the Committee on Public Works and Transportation, the gentleman from New Jersey [Mr. HOWARD].

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. HOWARD. I yield to the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, tomorrow we will not come in at 10 a.m.; we will come in at noon.

Mr. HOWARD. Mr. Speaker, I thank the majority leader.

Mr. Speaker and my colleagues, I would like to say I had not intended to speak on this issue, but I was watching it from my office, and I heard some statements that were made to which I thought I ought to respond, statements regarding the terrible condition of these airports that we have.

We heard the word "shame." We have had some responsibility in this area and it is our shame that these airports are in this poor condition; and it is a shame that the authorizing committees that had the responsibility have not done something to make these airports more modern and more safe; and the only thing we can do is give it up to some other authority and they then will be able to put in these improvements. We cannot do it in the Congress because we need about $700 million to do this job and have fine airports here.

Well, every time you or your constituents buy an airline ticket, 8 percent of the cost of that goes into the Airport Development Trust Fund, a trust fund to improve airports all across this country. They paid that money. That money has gone into the trust fund, but a lot of it is just sitting there unable to be used because of the smoke and mirrors that we have been doing around here about the budget and the Budget Act and meeting Gramm-Rudman. That money has been paid by the people to improve the airport.

How much? Is there $700 million in that fund? No. There is $4.3 billion sitting there. The money has already been paid. If we free up that money, we can fix these airports. The authorizing committees are ready to deal with it, and that is the way to go, not with this amendment here tonight.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, has the gentleman's committee ever authorized the expenditure of funds from the trust fund for National Airport?

Mr. HOWARD. No. We have not given much money there because we have not been able to use the money that we have, because the Budget Committee, playing as I said in the smoke and mirrors game, has put that on budget and then used it to presume that we have a 4.3 percent lower deficit than what we really have. The money has been paid for that purpose. I think we ought to face up to it and use the money for that purpose.

Mr. LEHMAN of Florida. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. CARR].

Mr. CARR. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I want to congratulate my good friend and colleague on the subcommittee [Mr. WOLF]. He has pressed this issue diligently and relentlessly. I happen to think the gentleman is wrong, but he has done a good job as a legislator.

But the fact of the matter is we all know that the airports need some help. But this is not the method of doing it.

I want to associate myself with the remarks of the gentleman from New Jersey, the chairman of the Public Works Committee [Mr. HOWARD]. The gentleman is absolutely right. The money is available to fix these airports.

Ladies and gentlemen, I included in our subcommittee and you voted for on this House floor earlier this year a provision which would release $50 million, just $50 million, of the $4.3 billion surplus in the Airport Trust Fund to help these two airports out.

Why? Because when you buy a ticket at National or when you buy a ticket at Dulles, you pay into the trust fund. But you know there is a provision in the law that says these two airports shall not receive from the trust fund.

□ 0110

So the bill you passed, the Transportation Appropriations bill you passed earlier this year released a small $50 million to pick it up; to help fix them up. You know the administration downtown choked on it. The Senate choked on it and they took it out of the bill. They are not really interested in fixing up these airports. The money is there, the means are there, the will

is there from this body. They do not have the will.

This administration has never sent up a request to this House or this body for us to appropriate the money they say is needed to fix up these airports.

The SPEAKER pro tempore. The time of the gentleman from Michigan [Mr. CARR] has expired.

Mr. SNYDER. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. CARR].

Mr. CARR. I thank the gentleman.

The point of the matter is that this administration is not interested so much in fixing up the airports as they are in a philosophy. A philosophy that says a local, regional authority ought to control the access to our Nation's Capital by air.

I know that the people in Virginia and the people on the authority would be good people and they would administer it well, but you and I both know, over time, the local politics of northern Virginia would assert itself on that airport.

Members of the House, we have the money, it has been paid for. Let us release the money, let us fix those airports up for all of our constituents.

Mr. LEHMAN of Florida. Mr. Speaker, I yield 2 minutes to the gentleman from Maryland [Mr. HOYER].

Mr. HOYER. I thank the gentleman for yielding me this time.

Mr. Speaker, Maryland has been ambivalent about this bill as you well know. Ambivalent because there are those of us who represent the Washington metropolitan area who want to see the best possible airports in our region just as you want to see the best possible airports in your region.

In Maryland we were concerned about the competition with the Baltimore-Washington International Airport. We believe we have spent, we know we have spent approximately $200 million to fix up that airport in State funds. We want to make sure that we were treated fairly in this entire process.

I will tell you the Governor of our State, our secretary of transportation, and the next Governor of our State is in favor of this bill because they believe that we have, in the process of the consideration of this bill, been treated fairly.

Now what does this bill do? The FAA owns two airports in the United States of America and only two. These two. The FAA is in the regulatory business, not in the operating of airports business. Again, I was ambivalent as a member of the commission that proposed this legislation, and was an opponent and had a different structure, but this is the structure that has been proposed. I believe that my local constituents will be better off under this legislation.

There is, however, a congressional board which is established by this. There is some question, I understand that, but that board has been established to make sure that the Nation's interest, the congressional interest was attended to in the consideration of how these two airports are operated.

In addition, I share Mr. FORD's concern about our Federal employees and have followed this issue carefully. I have here a letter from the American Federation of Government Employees which supports this legislation, believing that the protections written into this legislation do in fact help them, support them, and protect them.

But I am also convinced that if there is any problem, WILLIAM FORD of the State of Michigan will make sure those employees are protected in follow-on legislation next year.

Mr. Speaker, this legislation is clearly not perfect; it is controversial. But as the gentleman from Virginia, Mr. SISISKY, indicated, we have been a long time trying to get to the end of getting the FAA, a regulatory body, out of the business of operating two airports. This is our opportunity, let us seize it.

Mr. CONTE. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. BADHAM].

Mr. BADHAM. Mr. Speaker, I rise in strong support of this legislation.

Mr. CONTE. Mr. Speaker, I yield 1 minute to the gentlewoman from Nebraska [Mrs. SMITH].

Mrs. SMITH of Nebraska. I thank the gentleman for yielding time to me.

Mr. Speaker, I rise in strong support of this provision, which would lease National and Dulles Airports to an independent airport authority.

I think it's high time that the Federal Government got out of the Washington-area airport business.

And I have the sneaking suspicion that a majority of our constituents feel the same way. Perhaps this is why the Congress hasn't been willing to pump any money into keeping the airports in good shape.

Both airports need new terminals, new parking facilities, and various other improvements. To get National and Dulles in good working order will cost the taxpayers at least $700 million over the next 5 years.

Well, we obviously don't have $700 million to spend.

Should we, then, continue on our present path, and just let these airports deteriorate until they are completely unusable?

I think what we have before us today is a fair- and well-reasoned solution.

The airports would be leased to an independent airport authority for 50 years, with an option to renew. The airport authority would be governed by an independent board appointed by the Governors of Virginia and Maryland, the Mayor of the District of Columbia, and the President.

For those who are concerned that local authorities won't be able to efficiently run the airports, the Congress would retain some oversight responsibilities through a board of review.

Lease payments would total $150 million, which is more than the Federal Government's unrecovered investment in the property.

The badly needed renovations at the airports would be financed through private bond issue or through airport and airway improvement grants, just as they are at other airports across the country.

Mr. Speaker, there is no reason for the American taxpayers to foot the bill for $700 million in renovations for these two airports.

There is no practical reason why the Federal Government should be involved in the day-to-day operations of these airports at all.

Let's be sensible. Let's be economical.

Let's turn these airports over to local control—where they belong.

Mr. CONTE. Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia [Mr. BATEMAN].

Mr. BATEMAN. Mr. Speaker, I rise in strong support of the bill.

Mr. CONTE. Mr. Speaker, I yield 1 minute to the gentleman from Alabama [Mr. DICKINSON].

Mr. DICKINSON. I thank the gentleman for yielding to me this time.

Mr. Speaker, I rise in support of the proposed legislation. I have been flying in and out of this airport for 22 years waiting for them to do something to improve it. There might be money in the trust fund but they have not come forward to develop the airport.

This looks like a pretty free deal to me; it looks like a fair deal. They are going to sell bonds, the authority will, and the areas of interest that we are concerned with, whether it be the employees, whether it be the parking for the Members, whether it be the safety features, whether it be congressional control, these have been addressed in the proposed legislation.

I think it is a good deal, and I urge all of my colleagues to support it.

Mr. SNYDER. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois [Mr. RUSSO].

Mr. RUSSO. I thank the gentleman for yielding to me.

Mr. Speaker, if the question is money, I think it is a bogus issue. It has been answered by saying there is $4.3 billion in a trust fund and if you have the guts to do it, pay for it and we can do it; it will not cost anybody any money.

If you are worrying about costing the Federal Government any money

you think that the tax-exempt bonds are not being picked up by the taxpayers of this country, whether it is an expenditure in the appropriation process or the tax expenditure process? It costs the Federal Government money. So do not use that argument; it is a bogus argument. You know it, I know it, and maybe the people out there do not understand it, but you are not fooling anybody.

It is important that the job get done and we can pay for it. If we want to create a bonding authority within the Government, we have the authority to do it. We can issue our own bonds or we can leave certain parts of the airport to some city and give them the bonding authority. So that can be handled.

The question is, and if there is a question of safety, then we have a responsibility to fix up that airport and make it safe; not tomorrow but today.

The bottom line question is: Do you trust the District of Columbia and the State government of Virginia over the Congress of the United States? If you do, it may be a little joke to some of you, but if you do, then you vote for this motion. But if you are concerned about vigorous oversight and making sure that there is responsibility in running these airports, then you keep that authority with the Congress of the United States and fund the dollars necessary to make it a safe airport.

It is the Nation's airport, not a regional authority's airport. It is our airport in this country and every taxpayer has an interest in it and we ought to make sure it gets picked up and done well.

□ 1068

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of this motion to concur in the amendment of the Senate, with some modifications, relating to the transfer of National and Dulles Airports. This transfer would take the form of a long-term lease to a new airport authority, and would represent a major improvement in the way these airports are currently financed.

Mr. Speaker, my colleagues on the Transportation Appropriations Subcommittee will attest to the fact that I have long complained about the conditions at National Airport. When you look back at the hearing record, you see me using words like "disgrace," "embarrassment," and "sinkhole" in connection with that facility. And those are the words left after the bad ones were edited out.

It is clear that National Airport has long exceeded its capacity to safely and efficiently accommodate the passengers and aircraft who use it. Transportation access ranges from inconvenient to nonexistent, baggage and gate facilities are seriously overtaxed, and the physical structure itself has long outlived its usefulness.

For years, I have been saying that we need to construct a two-level access terminal, with one level for arrivals and the other for departures, as is common at most large-city terminals. And I have consistently voiced my complaints against the genius who put the National Airport metro stop so far away from the terminal, with no means of access except across multiple lanes of traffic.

Mr. Speaker, we are all familiar with these problems. And we all know what it will take to solve them. The solution is simple—more money.

It will take approximately $280 million to make the improvements needed at National Airport—to build a two level terminal, to connect the Metro to the terminal with an underground walkway and moving sidewalk, to expand the terminal facilities. Does the Federal Government have that kind of money? Of course not.

Does the Federal Government have the $480 million it will take to build the midfield terminal at Dulles, build another runway, and expand parking and other supporting facilities? Of course not.

Mr. Speaker, this provision is very simple. It is, in its essence, a financing mechanism. It does not give up ownership of these airports—that remains, ultimately, in the Federal Government. It does not give up congressional control and oversight—that remains in a Congressional Board of Review.

Instead, this provision will enable a new airport authority to issue bonds to finance the $700 million worth of improvements that need to be made at these two airports.

Mr. Speaker, what we will be doing is receiving $460 million in rent payments, while it is the airport authority's responsibility to come up with $700 million in improvements. That seems like a fair exchange to me, and I urge the adoption of this motion.

Mr. RUSSO. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. RUSSO. Mr. Speaker, I would just like to ask the gentleman a few questions.

Does the gentleman say that we do not have enough money in the trust fund to pay for it?

Mr. CONTE. We have enough money in the trust fund, if the other airports in the country and the NAS plan needs don't get it first.

Mr. RUSSO. Will the gentleman answer this question: Have we been paying 8 percent on airline ticket fees in order to pay for the money in the trust fund?

Mr. CONTE. Yes; we have.

Mr. RUSSO. So the question is not money.

Mr. CONTE. I supported the gentleman from Michigan [Mr. CARR], when he tried to take $50 million from the trust fund to improve National Airport.

That proposal got whacked in the other body and was dropped in conference. But I go back to the authorizing committee, the Committee on Public Works. Not once, not once has that committee ever authorized any money from the trust fund for National Airport.

Mr. RUSSO. Mr. Speaker, is it not a fact that we can create a bonding authority and do the same thing ourselves, issue the same bonds in the same kind of dollars and the same money we are talking about? We do not have to turn it over to another regional area? We can do everything you want to do in this amendment ourselves. What is the answer to that?

Mr. CONTE. Mr. Speaker, I love my good friend, but for 28 years, I have been going into and out of National Airport and no one has done anything to improve it. It is a disgrace to the Nation.

Mr. SNYDER. Mr. Speaker, how much time is remaining?

The SPEAKER pro tempore. The gentleman from Kentucky [Mr. SNYDER] has 2 minutes remaining; the gentleman from Florida [Mr. LEHMAN] has 5 minutes remaining; and the gentleman from Massachusetts [Mr. CONTE] has 1 minute remaining.

Mr. SNYDER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I recognize the lateness of the hour. I just want to say this: If there is any Member here who thinks that there will be a congressional board of review after it has been doctored up in this amendment, come look here at the 9-page letter from the Department of Justice. It will not exist.

If there is any Member here who wants to know what the plans are for the Washington National Airport, come look at this page-and-a-half letter from the Arlington County, VA, Office of the County Board.

I am here to tell you that I am not going to be here next year. I am trying to take care of you. It is just that simple.

So I suggest that you look after your own best interests. You are not going to have a congressional board of review. The way it came out of the subcommittee chaired by the gentleman from California [Mr. PANETTA], you would have. They passed on that. When you go naming these particular committee members, you lose it under Chadha. That is what they say in these 9 pages.

I am just here to suggest to you that you are going to lose it all because you are anxious to get out tonight and are anxious to go home. I do not blame

you; I am anxious to go home, too, and I do not relish what you have to go home to in your campaigns, but on the other hand, you had best not take this on faith. There is only one book that I take on faith, and they did not write it here tonight.

Mr. LEHMAN of Florida. Mr. Speaker, I yield 1 minute to the gentleman from Mississippi [Mr. WHITTEN], the distinguished chairman of the full committee.

Mr. WHITTEN. Mr. Speaker, I have prepared a continuing resolution for 24 hours and conferred with the majority leader in the other body. They agree that they will call this resolution up tomorrow morning early and go through the night if necessary to get us through tomorrow.

I mention this because there may be a vote on this, but I will bring it up as soon as the vote on this matter is over.

Ms. MIKULSKI. Mr. Speaker, I rise to raise serious concerns about the failure of the conference committee to include a provision to deal with the noise problem in Montgomery and Prince Georges Counties in the legislation authorizing the transfer of National and Dulles Airports.

Many concerns which the State of Maryland originally had with the proposed transfer have been resolved to the State's satisfaction. The noise isue, unfortunately, has not.

During a normal day, flights along the north path out of National Airport reach a level of three flights a minute over Montgomery County. That means that there are as many as 300 flights a day over this particular path. The decibel level from these flights in turn often exceeds the livable noise standards set by the Environmental Protection Agency.

This situation has affected the quality of life for suburban Washington residents who live in Maryland. In many cases, it prevents them from having neighborhoods where they can get any peace and quiet, and in still others it has hurt property values because of the constant roar of flights from National.

Currently, a nightime noise limitation regulation prevents any aircraft operations for major aircraft out of National between 10 p.m. and 7 a.m. Regrettably, this carefully crafted noise compromise is significantly weakened by the legislation in the airport transfer legislation.

Under the terms of the conference report, the airports' regional authority would have the power to modify or revoke this protective measure. While no one can be certain that the new authority would suspend this rule, I am concerned that it will want to do so in order to increase the airports' revenues through increased flights.

In addition, by taking control of the airports away from the Federal Government, I am troubled that the regional authority could be subject to some kind of court challenge on a nightime noise provision which the San Francisco Airport authority faces as a non-Federal entity.

If the Metropolitan Washington Airports' Regional Authority faces similar litigation, it could have a far less chance of defending itself in court than if the noise restriction were directly enforced by the Federal Aviation Administration.

Finally, many Montgomery County residents rightfully complain that the Federal Aviation Administration often is failing to enforce the high-density rule at National Airport. This regulation limits the number of noncommuter air flights out of National to 37 flights an hour.

The Maryland congressional delegation shares the concerns of our Montgomery citizens on this very serious issue. Earlier this year, we wrote to Representative NORMAN MINETA, chairman of the House Aviation Subcommittee, earlier this year, asking him to begin an investigation on this issue. While his subcommittee has yet to complete this study, it is my strong hope that they do so in the near future so we can take action to remedy this situation.

Mr. Speaker, while we have been unable to resolve this issue during the 99th Congress, I am sure it will be a high priority for our delegation and myself in the next Congress.

The people of Montgomery and Prince Georges Counties deserve a healthy quality of life, free from unreasonable aircraft noise and excessive flights which could pose a safety risk to their neighborhoods.

And while this bill does not deal with this issue properly, my colleagues should know that it will be a very high priority for me in the future. The State of Maryland has negotiated in good faith on this transfer legislation and the citizens of Maryland deserve relief from the burden they bear from National's aircraft noise.

Mr. HAMMERSCHMIDT. Mr. Speaker, it is clear that National and Dulles Airports need improvements. Anyone who has used these two airports can plainly see that they have problems. The terminals at National are old, temporary facilities that need renovation. Dulles needs a modern midfield terminal to accommodate a dramatic increase in airlines and passengers using that facility. Both airports could use more parking spaces. And National Airport could benefit from a total revamping in order to ease access for both automobile and Metro passengers.

Some might prefer to keep the airports under Federal control and finance the improvements out of the Aviation Trust Fund. But unfortunately, that is not likely to happen in the near future. Given the current budget deficit, the funds needed for airport improvements are just not made available.

That is why I support an amendment to the continuing resolution. This amendment would transfer operating control over National and Dulles Airports to a local authority. This amendment is substantially the same as the airport transfer bill (H.R. 5398) which was marked up and approved by the Aviation Subcommittee on August 11.

Although I initially had problems with the airport transfer bill, I believe it has been improved significantly and now deserves your support.

I understand that one concern of Members is that by leasing these airports to a local authority, we would be losing control over them. But, in fact, under this bill exactly the opposite is true. We will have more control than before. For example, under this bill:

The number of flights at National cannot be cut back by the local authority at all. Flights can be reduced by the Federal Aviation Administration [FAA] only for reasons of safety. This contrasts with the present system where the FAA can reduce National flights, by regulation, for any reason.

A passenger cap cannot be used as a way to cut back on the number of flights at National. Right now, if annual passenger levels top 16 million, the FAA would have to start limiting flights.

A board of review composed of Congressmen is created to protect the interests of all users of the two airports. This board would have veto power over the local authority's annual budget and master plan. It could veto any regulation of the local authority such as rules on service levels, noise, or parking. At present, pressure on FAA seems to be our only way to influence events at the two airports.

It has been estimated that $700 million will be needed to make all necessary improvements. Obviously, the Federal Government cannot foot that bill. The airport transfer amendment will allow the local authority to issue tax-free bonds to finance these improvements. A Federal corporation, which we had considered, can only issue taxable bonds. Taxable bonds would substantially increase the ultimate cost of the financing and place many necessary improvements out of reach.

In short, the airport transfer amendment is good for the airports, good for the Congress, and good for the country. The administration, the airlines, and local community officials all support it. I urge my colleagues to support it as well.

Mr. LEHMAN of Florida. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida [Mr. LEHMAN].

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SNYDER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 250, and nays 135, not voting 47, as follows:

□ 0145

Mr. RICHARDSON and Mr. GONZALEZ changed their votes from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Hallen, one of its clerks, announced that the Senate agrees to the amendment of the House to the amendment of the Senate to the bill (H.R. 5484) "An Act to strengthen Federal efforts to encourage foreign cooperation in eradicating illicit drug crops and in halting international drug traffic, to improve enforcement of Federal drug laws and enhance interdiction of illicit drug shipments, to provide strong Federal leadership in establishing effective drug abuse prevention and education programs, to expand Federal support for drug abuse treatment and rehabilitation efforts, and for other purposes," with an amendment.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2127, ESTABLISHMENT OF U.S. BOXING COMMISSION

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 99-1006) on the resolution (H. Res. 595) providing for the consideration of the bill (H.R. 2127) to establish a U.S. Boxing Commission, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 5705, PROTECTING AND PROVIDING FOR ENHANCEMENT OF THE RESOURCES OF THE COLUMBIA RIVER GORGE

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 99-1007) on the resolution (H. Res. 596) providing for the consideration of the bill (H.R. 5705) to protect and provide for the enhancement of the resources of the Columbia River Gorge, and for other purposes, which was referred to the House Calendar and ordered to be printed.

DEMOCRATIC WHIP MEETING

(Mr. FOLEY asked and was given permission to address the House for 1 minute.)

Mr. FOLEY. Mr. Speaker, with apologies to the minority, and by popular request, I would like to make the announcement out of order that the Democratic whip meeting will be at 10:30 rather than at 9 o'clock.

FURTHER CONTINUING APPROPRIATIONS, 1987

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations be discharged from further consideration of the joint resolution (H.J. Res. 753) making further continuing appropriations for the fiscal year ending September 30, 1987, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Mississippi?

Mr. DANNEMEYER. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman from Mississippi [Mr. WHITTEN] a question. Is there anything in this continuing resolution that is not in the previous continuing resolutions that have been passed?

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman from Mississippi.

Mr. WHITTEN. Mr. Speaker, this does nothing except extend the present continuing resolution 24 hours, nothing else.

Mr. DANNEMEYER. I am sorry, Mr. Speaker. I could not hear the gentleman's response.

Mr. WHITTEN. Mr. Speaker, this is an extension of the present continuing resolution for 24 hours, not the one that we just voted on.

Mr. DANNEMEYER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 753

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the joint resolution of October 11, 1986 (Public Law 99-465) is hereby amended by striking out "October 15, 1986" and inserting in lieu thereof "October 16, 1986".

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. DANNEMEYER. Reserving the right to object, Mr. Speaker, the gentleman made a unanimous-consent request to bring up this continuing resolution for 24 hours.

The SPEAKER pro tempore. That is correct, and the Chair put the question, "Is there objection?" No one objected, and the joint resolution was passed.

Mr. DANNEMEYER. Reserving the right to object, Mr. Speaker, I want the question put with respect to whether or not the House is going to pass this continuing resolution for 24 hours.

The SPEAKER pro tempore. Does the gentleman have a parliamentary inquiry which he wants to state?

Mr. DANNEMEYER. I reserve the right to object, Mr. Speaker.

The SPEAKER pro tempore. Does the gentleman request that the question be put on passage?

Mr. DANNEMEYER. That is correct, Mr. Speaker.

The SPEAKER pro tempore. Without objection, the Chair can vacate the previous action, but the joint resolution had been read a third time and passed, and a motion to reconsider had been laid on the table.

The Chair wants to be fair with everyone. It is late, and the gentleman's request really comes too late.

Mr. DANNEMEYER. I was on my feet, Mr. Speaker, looking for an opportunity.

VACATING THE VOTE BY WHICH HOUSE JOINT RESOLUTION 753, FURTHER CONTINUING APPROPRIATIONS, 1987, WAS PASSED

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the vote be vacated.

The SPEAKER pro tempore. Without objection, the vote will be vacated.

There was no objection.

The SPEAKER pro tempore. The question in on the passage of the joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. DANNEMEYER. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 260, noes 97, not voting 75, as follows:

[Roll No. 477]

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

HOUR OF MEETING ON TODAY

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 noon today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

ORDER OF BUSINESS

Mr. RIDGE. Mr. Speaker, I ask unanimous consent that the 30-minute special order of the gentleman from Utah [Mr. NIELSON] earlier entered

into be vacated, and that he be granted a 5-minute special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COMMUNICATION FROM HON. JIM KOLBE, MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from Hon. JIM KOLBE:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, October 14, 1986.

Hon. THOMAS P. O'NEILL,
Office of the Speaker,
Washington, DC.

DEAR MR. SPEAKER: This is to notify you, pursuant to Rule L (50) of the Rules of the House of Representatives, that a member of my staff has been served with a deposition subpoena issued by the Superior Court of Arizona in Tucson.

After consultation with the General Counsel to the Clerk, I will notify you of my determination as required by the House Rule.

Sincerely,

JIM KOLBE,
Member of Congress.

TRIBUTE TO MICHAEL I. FUTERMAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. HORTON] is recognized for 5 minutes.

Mr. HORTON. Mr. Speaker, I rise today to pay tribute to Michael I. Futerman of Rochester, NY, who will soon be awarded the Mickey Marcus Award for outstanding service to his community.

From his childhood escape from the nightmare of the Holocaust, through his 6 active and bloody years fighting for freedom and the birth of the great nation of Israel, and through his early years in America building both a business of size and integrity and a family of honor and love, one word personifies the character of Michael I. Futerman: Dedication.

Mike went to Palestine with his family from Poland in 1935. The oldest at age 7, he was joined by his brothers, Eliezer and Naphtali, who were 5 and 2, respectively. At 15, he joined the Haganah, which later became part of the Israeli Army.

For 6 long years he bore arms and fought for the establishment of the Jewish state. He served actively as a member of the Chativat Carmeli—the Carmel Brigade—and participated in the battles for Acre and the Northern Lebanese border. In 1948, his brother Eliezer, having distinguished himself in school by matriculating early, joined the Palmach, the commando arm of the new Israeli Army. Tragically, at the age of 17, he fell in battle against Syrian-backed Palestinian forces on a remote hillside fortress called Nebi Yusha.

In April 1952, Mike was finally released from the army. Distressed by the loss of his brother, he decided to visit America. From his earliest days, he had been fascinated by all aspects of the motor vehicle. He eventually got into automotive work in Erie, PA.

Two years later, Michael Futerman moved to Rochester. In the 30-year period since arriving in Rochester, he has built Hahn Automotive Warehouses into a huge multimillion dollar business serving the entire eastern seaboard.

Mike has had good fortune in his private life as well. He met a lovely Polish Jewish girl, Sara, and was married shortly thereafter. They have three beautiful children—Daphne, a social worker in New York City and a graduate of Case Western University; Eli, who has joined his father in the family business; and Rina, who, this summer, married Daniel Chessin of Rochester. Eli's wife, Peggy, who is from Annapolis, recently blessed Mike and his wife with their first grandchild.

For his entire life, Michael has been devoted to Israel and to the survival of Judaism. Both he and his wife Sara—herself a victim of the Holocaust and an inmate of Auschwitz—have dedicated their lives to Zionism and community service.

Mike has served on the Board of Synagogue Beth El for more than 15 years. He chaired the scholarship fund and the rituals committee. He has also been on the board of the J.C.C., the Jewish day school, and the Jewish home, as well as the board of governors. He has served for nearly 4 years as treasurer of the federation, and was elected vice president of the organization earlier this summer.

Mike is a well-known, dedicated, and cherished member in Rochester and Rochester's Jewish Community. His devotion and spirit are above reproach. His selection as the recipient of the Mickey Marcus Award is well deserved and is to be congratulated.

WHAT PATRIOTISM MEANS TO ME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. HUTTO] is recognized for 5 minutes.

Mr. HUTTO. Mr. Speaker, patriotism frequently is a difficult word to define. The Noncommissioned Officers Associations sponsored an essay competition on the topic "What Patriotism Means to Me." That competition was won by TSgt. George A. Moore, a recent graduate of the Tactical Air Command Noncommissioned Officers Academy at Tyndall Air Force Base in my hometown of Panama City, FL.

Maj. Gen. Ted Rees, who is a good friend of most of us in the Congress, is now serving as commander of the air defense weapons center at Tyndall, Ted felt that Sergeant Moore's essay deserves to be read by as many people as possible. I agree.

Sergeant Moore's essay is a thoughtful and touching composition that reaches the very heart of patriotism in America and is an excellent example of how the people who serve in America's Armed Forces feel about our country. For the men and women in uniform, patriotism is a very real concept. Actually, it is more than a concept—it's a way of life.

Mr. Speaker, I am submitting Sergeant Moore's essay for reprinting in the CONGRESSIONAL RECORD, and commend it to my colleagues as a source of inspiration during the times in this body when the hour is late and energy is at a low ebb. It will help us to remember that, with all our problems, we still live in and serve the greatest of all nations on Earth.

WHAT PATRIOTISM MEANS TO ME

How can I tell you in words just what Patriotism means to me? I can't, really, because mere words could never express my feelings. If I were an artist, I'd have no trouble. I'd paint a portrait of Patriotism that would reveal my innermost emotions.

I'd start with a canvas as large as the imagination so that I'd have room to include all the things that come to mind, and indeed, there are many. In some parts, my canvas would be coarse in texture, as was our country in its beginning; in other parts, it would be closely woven, maybe as fine as the silks and satins used in the making of our national flag today.

For my colors, I'd choose pure whites, blood reds, and royal blues: all symbols of our freedom. But my palette would need a thousand hues to accurately portray the sights and sounds of Americans and our way of life. My brushes? Some thick and strong, to paint the determination, fighting spirit, and raw courage that plain, simple people found within themselves when they built America. Of course, I'd need a few very fine brushes to color in the fragile elements: independence, democracy, and honor.

My subject would certainly be people, for that is what it's all about. In one corner, an American farmer, working this great land as did his father before him. He doesn't know much about the world situation, but he's a believer in his fellow man. Not far away there's a young serviceman, away from home for the first time. He's reading a letter from his folks and feels proud to be able to help defend and protect them. Just above, you'll find a kitchen table with Mom, Dad, Grandparents, and all the kids, their heads bowed in prayer as they pray to God for that young man's safe return.

Across the top is a parade, maybe it's the Fourth of July or Memorial Day. Flags are everywhere, and on the other side of the street is an old man wearing a faded and outdated uniform. He beams with pride and renders a hearty salute as the colors pass, and if you look close, you'll see tears welling up from inside. His left hand firmly grasps the hand of a small child, full of wonder at the procession.

Scattered about are hundreds of other people: factory workers, old couples, children. They're holding hands across our nation, keeping it strong and safe, and ready to fight for their beliefs. Don't worry. You're right there with those people, eager and enthusiastic.

That's what Patriotism would look like if I could only show it to you. Oh yes, somewhere around the middle of my portrait, you'll find me standing tall and proud. I'm only a small part of Patriotism, but Patriotism is a big part of me.

GEORGE A. MOORE,
TSgt, USAF, 4th Combat Support Group,
Seymour Johnson AFB, NC.

A TRIBUTE TO THE HONORABLE DAVID S. MONSON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Utah [Mr. NIELSON] is recognized for 5 minutes.

GENERAL LEAVE

Mr. NIELSON of Utah. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their re-

marks on the subject of my special order this evening.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Utah?

There was no objection.

Mr. NIELSON of Utah. Mr. Speaker, I would like to take a few minutes of time to address the subject of my good friend, DAVID MONSON, who is retiring from Congress this year.

Mr. Speaker, at this time I yield to the gentleman from California [Mr. DREIER].

Mr. DREIER of California. Mr. Speaker, I would like to, at 11 minutes after 2 o'clock in the morning here on the east coast, to compliment my distinguished colleague for taking out this special order concerning a very special person, DAVE MONSON.

I first became aware of DAVE MONSON's candidacy because a close relative of his happens to be a constituent of mine. I was very pleased that in a close election, he joined us here as a Member of the 99th Congress, and he has done a spectacular job.

In his first term, DAVE has served as a member of the Committee on Science and Technology, the Committee on Government Operations, and most recently as a member of the Committee on Public Works and Transportation.

He has a very distinguished 14-year career of public service. He was elected as a young man and is retiring at this point from public office still as a young man; and there is no doubt in my mind that with his credentials as a certified public accountant that he will go on to a very bright career.

He was very good to come to this Congress with that unique perspective; that of being a CPA, because as we all know, one of the reasons that many of us came to the Congress is to address the fiscal crisis that the United States of America is facing.

DAVE MONSON consistently utilized his background in addressing every single fiscal issue that we faced, and it was a real honor for me as a Member of the 99th Congress to serve with him, and I wish him all the best, and would like to compliment again my colleague from Utah for taking out this special order.

Mr. NIELSON of Utah. Mr. Speaker, I'd just like to take a minute to pay tribute to a dear friend and colleague who will soon be leaving the House. Although DAVE MONSON has been here a short time he has made a significant impact on this body and served the State of Utah well.

DAVE's public service career began at an early age when he was first elected to statewide office at the age of 28. DAVE ran for Utah State auditor and won against the well known Salt Lake County auditor. After serving successfully for 4 years in that capacity, DAVE was twice elected as Utah's Lieutenant Governor. Again DAVE faced tough races against candidates that were more well known and again DAVE MONSON prevailed serving 8 years as Lieutenant Governor. When Dan Marriott decided to retire from Congress 2 years ago, DAVE took up the challenge, ran for the seat, and again defeated a candidate that was well known and well financed. I think DAVE has proved that he is a tough campaigner and a dedicated public servant.

Now after 14 years of distinguished service to the State of Utah, DAVE has decided to leave public life for the private sector. He will be missed by me and his other colleagues. I have enjoyed working with him and feel that he has quickly adapted to the responsibilities and the rigorous schedule of congressional life. I have found him always to be eager and cooperative. DAVE has the ability to articulate his knowledge of the issues. He has been an able spokesman for Utah while serving in Congress.

His committee assignments have served the State of Utah well. There have been a number of important issues affecting Utah for which legislation has been channeled through DAVE's committees. His committees have included Public Works and Transportation, Government Operations and Science and Technology. DAVE has made his presence felt on all three committees.

We in the Utah delegation will miss DAVE as he has become an integral member of our team. DAVE has worked well with JIM HANSEN and me as well as our two distinguished Senators. We have appreciated DAVE's enthusiasm and hard work in assuring the people of Utah have been well represented during his sojourn in the U.S. House of Representatives.

I would like to wish DAVE, his lovely wife Julie and their five children best wishes in their future endeavors. I hope that we will see DAVE back in public life again. He will be greatly missed by his friends on both sides of the aisle.

Mr. MILLER of Ohio. Mr. Speaker, in the course of our everyday legislative business we often do not get the opportunity to recognize the efforts of our own colleagues. Today, I would like to recognize my Republican colleague, DAVE MONSON, as he plans to retire from his political career in Congress at the close of this 99th session.

Although he has served in this legislative body for only 2 years representing Utah's Second District, he has done an outstanding job for his constituents and the Nation. At the ripe young age of 41, DAVE has a wealth of political experience behind him serving 4 years as Utah State auditor, 8 years as State Lieutenant Governor, and now 2 years as a U.S. Congressman. With such a remarkable record, I am certain DAVE will continue to meet with much success in the years ahead.

I am thankful for having the pleasure of working with DAVE, and I welcome the chance to wish him the very best in his future endeavors.

Mr. FUQUA. Mr. Speaker, I appreciate this opportunity to say a few words in tribute to our colleague, DAVE MONSON, who is retiring. DAVE has served admirably and well as a member of the Committee on Science and Technology, which I have the honor to chair.

DAVE has established a distinguished career in State and Federal Government service and has well served the people of Utah. He brought to the Science and Technology Committee the same dedication and quickly learned the intricacies of the myriad of issues facing the committee each year.

He is a fine public servant and I wish him the best of luck in the years to come.

Mr. RUDD. Mr. Speaker, I rise to pay tribute to Congressman DAVID S. MONSON, who is retiring from Congress. He came to Congress after strenuous effort, to represent the people of Utah in a highly energetic and ethical manner.

During his term he saw an opportunity to better serve his State and Nation by shifting to the Public Works and Transportation Committee. In that committee's highway reauthorization bill, DAVE worked to ensure small States got their fair share of funding to maintain their highways. He was also able to obtain help for flood repair resulting from the overflow of the great Salt Lake in Utah.

I became better acquainted with Congressman MONSON from my position on the Energy and Water Subcommittee of Appropriations. That subcommittee has jurisdiction over funding for the Central Utah project. There have been efforts in the past 2 years to reduce funding for the central Utah project. DAVE, along with his colleagues from Utah, was able to maintain funding for the Central Utah project in order to keep that project on track and on schedule.

I know that DAVE has also been very active in his position on the Science and Technology Committee. I thank him for his efforts toward an honest and complete investigation of the shuttle accident. I also appreciate his desire to keep our vital Space Program going.

Congressman DAVID MONSON displays great ability and I know that he will continue to rise in stature in his future endeavors. It has been a pleasure knowing DAVE, and I wish him all the best.

Mr. HORTON. Mr. Speaker, as we approach the final hours of the 99th Congress, it is our unfortunate duty to say goodbye to a number of well-qualified Members of the House. One such Member is DAVID MONSON, who, after only 2 years, has decided to move on to greener pastures off Capitol Hill.

I had the opportunity to work closely with DAVE on the Government Operations Committee, on which I serve as the ranking minority member. His participation in both the full committee and on the Legislation and National Security Subcommittee were invaluable during the 99th Congress. His background in accounting and his experience as Utah's State auditor were especially helpful in fulfilling the Government Operations Committee's responsibilities.

Mr. Speaker, it is always a disappointment to lose qualified Members. It is especially

tragic when that Member has the youth and energy as well as the political acumen to make such a tremendous contribution like DAVE.

I am sure that DAVE will be a huge success in whatever he elects to do following his short but notable stint as the Congressman for Utah's Second Congressional District. My wife Nancy and I wish DAVE and his wife Julianne and children the very best in all their future endeavors.

Mr. FAUNTROY. Mr. Speaker, I am pleased to participate in this special order honoring Congressman DAVID S. MONSON for his distinguished record of service in this body.

As chairman of the Congressional Task Force on Haiti, it has been a distinct pleasure to have worked with Congressman MONSON, a valued member of the task force. Congressman MONSON has made vital contributions to the creation and work of this bipartisan task force on Haiti.

In April of this year, Congressman MONSON joined with me on a fact finding mission to Haiti. During that mission, Congressman MONSON demonstrated strong compassion and determination to assist the Haitian nation in what we all hope will be a transition to democracy and economic recovery.

As a result of that visit, a bipartisan consensus was developed to formulate a package of aid and trade that could mutually benefit Haiti and the United States of America. Legislation was drafted and has been passed by this Congress to accomplish these objectives. Without DAVID MONSON's sensitivity, commitment, and tenacity, passage of these measures would not have been possible. Not only am I grateful but I am sure that I am expressing the sentiments of millions of Haitian citizens.

Congressman MONSON's role was crucial in the work of the Congressional Task Force on Haiti and his has been an historic contribution. I am very proud to have served with the distinguished gentleman from Utah and wish him all the best.

Mr. HANSEN. Mr. Speaker, I am pleased to be able to pay tribute to our esteemed colleague, the Congressman from Salt Lake City, UT, DAVID MONSON. While his departure will be a loss to us all, I am sure that my colleagues share my sentiment that DAVE'S return to private life will be very rewarding.

There is a lot I could say about Congressman MONSON. His dedication to this country and his leadership on the Science and Technology Committee and the Public Works and Transportation Committee is considerable. DAVE's ability to work with Republicans and Democrats alike have earned him the respect and esteem of all of his colleagues in Washington.

I am grateful to have had the opportunity to work with such a competent and intelligent legislator. Although DAVE still has a full life ahead of him, he has demonstrated the wisdom and consideration of a seasoned statesman. I know that although DAVID MONSON is leaving this body, we will hear from DAVID MONSON again, carrying on the great tradition that he has already started in his life.

URGENT RELIEF FOR THE HOMELESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington [Mr. LOWRY] is recognized for 5 minutes.

Mr. LOWRY of Washington. Mr. Speaker, many hundreds of thousands of individuals and families in every community throughout our Nation are struggling to survive because their basic human needs for shelter, food, and health care are not being met. In the coming winter months, their very lives will be in jeopardy; some lives will be needlessly lost while others will continue to suffer. We have the moral obligation and the existing capacity to act immediately—the time is long overdue. For that reason, I have introduced urgent legislation to provide immediate relief to the homeless.

The Federal Government has utterly failed to respond to the unprecedented increase in homelessness. New York City, for example, spent more on meeting the needs of the homeless in 1 year than the Federal Government has spent over 3 years. Despite the efforts of local communities and voluntary organizations, the problem is growing worse and outstripping local resources. Less than 20 percent of emergency needs are currently being met and the record numbers of homeless, including children, are increasing.

I am aware that the root causes of homelessness go very deep and that this problem will not go away until we address those problems. In fact, I have introduced H.R. 1669, legislation intended to solve these more fundamental problems by establishing a National Endowment for the Homeless. I have also cosponsored many other proposals, including H.R. 5140, the Homeless Persons' Survival Act. I continue to support these efforts.

At this time, however, we must set the more fundamental issues aside, if only briefly, and take immediate action to avoid untold tragedies as the winter months set in. The legislation I have introduced is intentionally simple and straightforward. This bill would accomplish the following:

Establish within the U.S. Department of Health and Human Services an Interagency Office on Homelessness to coordinate and improve Federal efforts to assist the homeless.

Identify and make available underutilized Federal property and buildings for use as emergency shelters, and authorize $100 million in grants to shelter providers to use these existing underutilized resources; and

Make an emergency appropriation of an additional $250 million for the emergency food distribution and shelter program operated by private voluntary and charitable organizations under the auspices of the Federal Emergency Management Agency.

Our Nation has many priorities and problems to address. Many of us, including myself, would point to deficit reduction as a continuing priority—one which conflicts with many other priorities that require money and Federal resources. Most recently, a majority in this Congress determined that the drug problem is an overriding priority and decided to spend an increased amount of money to solve that problem despite the need for deficit reduction. The Reagan administration has determined that Pentagon spending is a priority that overrides the need for deficit reduction.

Meeting basic human needs should be at the top of our list of priorities. I am willing to spend money to save the lives of homeless people. Our Nation was founded on the basic value that we all have an obligation toward our communities and other people in our world. It is past time for us to once again uphold this fundamental value.

□ 0215

DESPITE THE CHEERING, OUR TRADE DEFICIT PROBLEMS PERSIST

The SPEAKER pro tempore (Mr. GRAY of Illinois). Under a previous order of the House, the gentleman from Pennsylvania [Mr. GAYDOS] is recognized for 60 minutes.

Mr. GAYDOS. Mr. Speaker, last week, with a great deal of cheering, the Commerce Department released figures for the merchandise trade deficit for the month of August which showed a significant decline from July's level.

I guess it's important to be able to cheer a merchandise trade deficit of a mere $13.3 billion when it follows a record-setting $18 billion from the previous month, but I personally don't see anything to cheer about.

I expect it's all relative. When you are grasping at straws to show that the trade picture is getting brighter, apparently a 1-month drop in the merchandise trade deficit is far more important than the fact that the annualized merchandise trade deficit is rapidly approaching the $175 billion level.

That figure, if it holds, would surpass the record merchandise trade deficit set in 1985 by no less than $30 billion. So it's easy to see that, to this administration, a 1-month drop must stand out as a vindication of its free trade-open door policy, no matter the impact on American manufacturers and American workers.

If you look at the long term, however, it is easy to see that the administration is jumping for joy a little too soon. The best way to describe the merchandise trade deficit pattern during the 12-month period between August 1985 and August 1986 is to say there was no pattern.

For example, in August 1985, the merchandise trade deficit was roughly $11 billion, a fairly favorable comparison to the $13.3 billion merchandise trade deficit for August 1986 that the administration is crowing about.

But, during that 1-year period, the monthly deficits were below the $13.3 billion level in only three other months—October 1985, $12 billion; February 1986, just over $12 billion; and April 1986, at $12 billion again.

In every other month, the merchandise trade deficit exceeded the $13.3 billion level by at least $1 billion. After the low in August 1985, there was a high of $16 billion in September. After the October low, the deficit increased gradually in November—just under $14 billion—and December—$15 billion—before hitting a new record in January 1986, $16-plus billion.

There was a downturn in February—as I mentioned—an increase in March, another

downturn in April, and a slight rise in May that remained constant in June before the huge surge in July.

Thus, a very erratic picture of the merchandise trade deficit over a month-by-month basis. If there has been any pattern at all in the yearly pattern from August 1985 to August 1986, then we should anticipate another surge of between $3 and $5 billion in the September 1986 merchandise trade deficit, not the rosy optimism projected by this administration.

But the fault doesn't lie only with this administration. Too many newspapers also have forced themselves into an editorial corner trying to justify the free trade proposition.

Just yesterday, a week after the Commerce Department made its jubilant announcement, the New York Times concurred that the huge decline in the merchandise trade deficit is a sure sign that we have turned the corner; that the 20-month decline in the value of the dollar is beginning to work its magic; and, according to itself, "There are scattered but unmistakable signs that America's trade picture is beginning to improve."

Of course, the New York Times, like this administration, feels compelled to say that America's trade picture is improving, even if it isn't. The Times editorial board has fought every initiative to preserve American industry for as long as I have been a Member of Congress.

It has taken a determined stand that America's ports must be open to all manner of foreign goods regardless of the impact of the unimpeded flow of foreign autos, radios, steel, microchips, and a host of other products on American jobs and American industry.

The New York Times editorial board seems to ignore the barriers, both tariff and nontariff, that are erected by these exporting nations so that we can't ship our goods to them.

They point to IBM, Xerox, and a handful of other companies that have established sales and manufacturing facilities in Japan and have acquired a share of the Japanese market.

Not every company has the resources of the time necessary to wait for the opening.

Well, despite the optimism of the New York Times and this administration, all is not well. American businesses are having difficulty competing against imported goods that are dumped and otherwise unfairly traded.

Thousands of American workers are still unemployed and are unable to get any kind of job that will enable them to support their families. Many of those unemployed are steelworkers who have taken jobs in the service sector of our economy.

Yes, they are earning some money, but they are not happy with the work.

And many are still unemployed although they have been idle for so long and have exhausted all of their benefits so that they are no longer even counted on the unemployment rolls.

This administration, as I have said time and time again, has been no help for those who need it, whether businessman or worker.

During the course of this administration and its lack of sensitivity to the American working men and women, unemployment has been higher on average than in previous years.

The national average jobless rate between 1981 and 1985 was 8.3 percent. That rate is substantially higher than the jobless rates in the 1970's, 6.2 percent, and the 1960's, 4.8 percent.

Between 1980 and 1985, 7.8 million jobs were created and the President and his advisers cheered. However, during the 5-year period from 1975 to 1980, 13.5 million jobs were created, nearly 6 million more.

But, in going back to my original theme, it is in the area of trade that this Nation has suffered most severely under the leadership—or lack of it—of this present administration.

The U.S. merchandise trade deficit last year, 1985, was 3½ times greater than it was in 1980. And, as I mentioned earlier, the projected merchandise trade deficit for 1986 is $175 billion or more, another record setter.

In terms of manufactured goods, we have come full circle. In 1980, the United States had a $12 billion surplus. Imagine, just 6 years ago, we were ahead of the game with regard to manufactured goods. Last year, we recorded a deficit in this category of $113 billion.

One of our strongest export items in recent years has been agricultural goods, but there, too, we have lost ground. In 1981, the peak year for the United States, we exported a record 43.8 billion dollars' worth of agricultural goods. In 1986, U.S. farm exports are expected to drop to $27.5 billion, a loss of $16.3 billion and the lowest level of farm exports since 1978.

Thus, with imports remaining relatively steady or rising slightly, the declines in agricultural exports have significantly cut into what has been a healthy agricultural trade surplus—exports exceeding imports annually by more than $10 billion between 1974 and 1985, and, in some years, more than double that amount.

But that is changing. The agricultural trade surplus for fiscal year 1986 is forecast at $7.5 billion, the lowest level since 1973.

And even more startling, the Commerce Department recently reported that farm imports exceeded farm exports by $348.7 million in May of this year, the first monthly agricultural trade deficit since August 1971.

Now, though, let's go back to the problems in the manufacturing sector. In the 5-year period between 1980 and 1985, exports of manufactured goods fell by 2.5 percent, while imports of those goods rose by an astounding and unaccountable 96 percent.

Last year, in fact, the import share of the U.S. market for some manufactured items was outrageous.

Imported apparel took 50 percent of the American apparel market;

Foreign-made autos took 23 percent of the American car market;

Imported machine tools captured 36 percent of the American market for machine tools and forced a major producer, Houdaille Industries, to quit that part of its business;

Foreign steel, shipped both directly to the United States and through other countries, is taking better than 23 percent of the American market in spite of the voluntary restraint agreements ordered by this administration—and I'll have more to say on steel in a few moments; and

Foreign-made shoes have taken more than 75 percent of the American shoe market.

And these numbers don't take into account those American industries that no longer exist in the United States because they have been squeezed out by foreign manufacturers who won a 100-percent share of the American market by dumping products in our markets without concern for profits or overhead costs.

For years, those of us in Congress who sought to help those beleaguered industries, such as steel, autos, textiles, and shoes, have been ignored by those Members representing the high-technology industries.

Well, today the problem is also theirs. Even in advanced technology products like semiconductors and telecommunications equipment, we are experiencing trade deficits.

The bottom line, insofar as manufactured goods is concerned, is that of the projected $175 billion merchandise trade deficit for 1986, manufactured goods will account for $146 billion, nearly 84 percent.

But that's only part of it. According to the Department of Commerce, the same people who are cheering the 1-month drop in the merchandise trade deficit, 2.3 million jobs in the manufacturing sector were displaced for trade-related reasons in 1984 alone, with a net loss of 1.1 million jobs for the economy as a whole.

Further, a recent Department of Labor study of displaced workers showed that between 1979 and 1984, 11.5 million workers lost their jobs to plant closures, slack work periods, or layoffs. It should be noted that during that particular 5-year period, America's trade deficit was growing by leaps and bounds.

One additional sidelight to that Labor Department study was that displaced steelworkers were among the hardest unemployed to retrain and place in new jobs.

Which leads me to my next point. In no industry is the loss of jobs directly related to imported goods more dramatic than in the American steel industry.

Some 10 or 12 years ago, nearly a half-million Americans were actively working in the American steel industry. And several hundred thousand others were working in industries that used our steel.

As of this past July, employment in the steel industry in the United States, including hourly wage and salaried employees, was 184,000, just over 35 percent of the number 10 years ago.

My own congressional district is reflective of that shrinkage. Six or seven years ago, there were more than 30,000 steelworkers working in active steel mills in my district. Imagine, 30,000 people actually earning their livelihood from steel.

Today, there are fewer than 5,000 steelworkers in my district. Actually the number is probably less than that. But, regardless, it represents a loss of more than 80 percent of the work force in a single industry.

And that does not include those people who benefited from an active steel industry, such as the people mining coal and iron ore, the people bringing those raw materials up the rivers by barge, and the people who fabricated the steel after it came out of the mills.

After all of the years that I have stood before this body to bring the fate of the steel industry to your attention, I feel like a punching bag.

For nearly all of my years in Congress, I have tried to get you, my colleagues, to un-

derstand the threat to our economy in general and our defense posture in particular, if we don't have an active and sustaining steel industry.

But, like the proverbial wall, I haven't gotten through to enough of you to make a difference.

In 1984, I thought we had a chance. The steel quota bill had 220 cosponsors, enough for sure passage in the House of Representatives, but we couldn't get the bill to the floor.

Instead, we settled for a program of voluntary restraint agreements on steel that was requested by the President and supported by a handful of people here in the Congress who believe that any trade is good, even if it hurts us.

So here we are some 2 years later. The President's program called for a steel import level of 18.5 percent, not including semifinished steel.

Well, I want to report to you that we are nowhere close to that number. In 1985, the first full year of the program, imported steel represented a quarter of the American market, 25.3 percent.

The administration was clapping its hands because there was a downward trend for the year as compared to 1984, when the import level was 26.4 percent of the U.S. market.

Terrific. Imports from 1984 to 1985 dropped a whole percentage point. But let's compare previous years. The 1985 level still topped the import level for the prior 10 years. In fact, it was the second highest level of penetration by foreign steel in the past decade.

The picture for 1986 doesn't look a whole lot better. Yes, it's true that import levels are below the 1984 and 1985 levels, but that doesn't mean we are in better shape.

The administration says not to worry. The voluntary restraint agreements cover a 5-year period and each permits a certain amount of front loading.

That means that steel-exporting nations can ship big now, but will have to restrict shipments in the future. But, what happens if the President decides that the program is working and decides that it isn't necessary to keep the VRA's in force for the full 5 years?

And don't believe it hasn't happened before. It has. I have been here in Congress long enough to see us complete a number of circles.

In 1969, we had a system of VRA's to control the flow of imported steel into the United States. It worked for as long as the administration truly supported and believed in the program.

Former President Nixon, who probably was more sensitive to the problems of the steel and auto industries, slapped a 10-percent surcharge on imported cars that worked for a while.

Former President Ford imposed quotas on specialty steel, but ignored the problems of the carbon steel industry. The end result, as I noted in 1976, was that Japan and others hurt by the specialty steel quota shifted to exporting carbon steel products.

Former President Carter extended the specialty steel quotas and devised the trigger-price mechanism in an attempt to control the surge in carbon steel products, but, as on August 30, 1978, I said:

We have been patient. We realized the TPM (Trigger Price Mechanism) was a new idea and would require time to become a tool, but, while imports are pouring in (imports then were running 30 percent higher in 1976 than in 1975), time is running out and our patience is wearing thin. If the TPM is a good tool, let's use it. If it isn't, throw it out and we'll get something else.

Well, we threw it out, but what we have in its place, the VRA's, aren't a whole lot better. And, as I said, only when an administration and a President stand firmly behind the program is there even a glimmer of a chance of success.

But, when the President sees it as a Band-Aid approach, then there is no way it will work as effectively as it could or should.

Nearly a decade ago, in the summer of 1977, I noted that:

For nearly 20 years, the United States has been at war. A silent war. A war fought not with weapons, but with wares. The struggle is economic, not military. It is a trade war. And we are losing it.

Several key U.S. industries have been pushed to the edge of extinction by foreign competitors taking advantage of predatory trade practices endorsed by their governments . . . and in the process hundreds of thousands of American workers have lost their jobs.

Why? Because the U.S. insisted on playing the game of international trade under different rules than our trading partners.

This is not the first time I have spoken on this issue. On July 8, 1971, I told the Congress then that our Nation was in a trade war and would be the loser if we continued our antiquated policies toward international trade. The jobs and futures of American workers were at stake, I said in 1971, and we would lose both if we continued to permit foreign manufacturers to glut the American market without regard to the ultimate consequences.

Those are the words I used in 1971 and in 1977. The tragic thing is that I am saying them today and they have just as much, and perhaps more, meaning as they did the first time I used them.

In the intervening years, we have lost more than a million jobs, as even the Commerce Department noted. In the intervening years, American industries have continued to lose shares of its own market to the point where several industries no longer exist and others are on the verge of elimination.

On December 10, 1981, speaking on the floor of the House as I am today, I said:

The penetration . . . of foreign steel . . . in the U.S. has averaged 22.3 per cent for the last three months and the administration is now attempting to negotiate a cease fire in the wholesale offensive against international trade agreements.

Meanwhile the crisis continues. When the congressional steel caucus first spoke on this steel war about three weeks ago, we had 52,000 steelworkers laid off. Today, we have an estimated 60,000.

When the caucus first spoke, we had 17,000 on short work weeks. Today, we have an estimated 20,000 . . . one tax-paying steelworkers is put out of work every 8 minutes and 15 seconds of every day this year because of apparently subsidized imports.

I know that figure isn't true today. I am sure that fewer steelworkers are put of work by imports today than in 1981 for one simple reason—there are many fewer steelworkers.

We have let opportunity after opportunity pass us by without taking action.

The naysayers cry: "Don't limit imports from foreign countries because then they will retaliate. They will close their markets to American goods."

That, my friends, is nonsense. Those foreign markets are already closed to many American products. The countries that export to the United States are not interested in buying American steel, or American autos, or American machine tools.

Why should they? They already buy from their own industries and still have enough extra production to ship the excess to the United States—good old Uncle Sugar, or Uncle Sucker, if you prefer.

We stand here giving aid to help those countries develop their industries which then compete with our industries. And because their governments too often support the industry, or own it in many cases, they don't have to worry about minor little items like profits or overhead costs.

We talk about American industry not being competitive. What rot. How can we be competitive if stockholders want a return on their investment or if a manager has to show an immediate and satisfactory profit?

The rules are different for American companies and it is time we recognized that fact and designed our trade requirements to provide for it.

Now, let me close with a story concerning the attitudes and approaches of other governments when their industries or people face difficult times.

Rice is a commodity we all associate with Japan. It is a basic part of the Asian diet and nearly two-thirds of Japanese farmers grow rice on small plots of land on a part-time basis.

Because rice is so important to Japan, the Japanese Food Agency buys rice from Japanese growers for more than $2,000 a metric ton, some 10 times the world price.

So far, nothing too surprising; right?

Well, believe it or not, the United States sells 1.7 billion dollars' worth of rice to Japan annually, a sizable portion of America's agricultural trade that I mentioned earlier in this speech.

Now the point of this story: This past August, according to a report in the Christian Science Monitor, the Japanese Government bowed to pressure from Japanese rice growers and shut the Japanese market to American rice.

To those who argue against trade limitations because of the threat of retaliation, what do you do in this case? This is a very simple example of a foreign nation closing its market to American goods in order to protect a heavily subsidized local industry.

Should we retaliate? Should we close our market to some Japanese product or all Japanese products until they reopen their rice market?

We must consider our interests, our industries. We cannot allow other nations to dictate the terms. That is a more deadly form of surrender than we can permit.

I yield to the gentleman from Ohio.

Mr. TRAFICANT. Mr. Speaker, it is late. The staff has always been so great and accommodating to us, but I wanted to take 30 seconds to commend the gentleman in the well, Mr. GAYDOS, he, and men like Mr. MURTHA, and other people concerned about the trade issue in this country and the job wars which we think are much more important than the star wars. We had hoped that we would be able to bring out a trade bill; we were not able to.

I think it is men like Mr. GAYDOS and Mr. MURTHA, and others who have been fighting so hard for so many years that maybe in the future this type of legislation will come forward.

Mr. GAYDOS. Let me just conclude my remarks by stating as a matter of record that all these years in talking about deficits, international deficits as far as trade, I remember in the House when they talked about a balance of trade deficit and we always answered by saying that "your trade deficit might be off, however, your balance of payments is right." Now, that is not the case. The philosophy prevails, the explanations, the conclusions, the international jargon that "you don't have to worry about whether it is trade balance of payments or what have you. The fact remains that now you can accept almost a $200 million trade deficit and the balance of payments," if you want to go that route, which is in the neighborhood of over $100 billion.

So, with these very "scary facts," for want of a better descriptive term, I conclude these remarks because of the late hour. I just want to remind my colleagues when they read the RECORD in the morning that it is a very serious problem; they should stop, pause, go back and reanalyze all of those arguments over the last 15 years regarding the balance of trade, balance of payments, and reappraise in their own minds as to what our position is in international world trade. I think maybe next year we will be able to get into an item and hopefully pass some legislation whereby we are going to address that fact once and for all.

I conclude finally by giving my personal commendation and respect to the majority leader, Mr. WRIGHT, who did manufacture and did put together in place a committee that ended up with a good trade bill, one that had, I think, a lot of teeth in it, one that was practically sound, and one that responded to the problem. That trade bill did not move. It moved out of the House, but it is not law today for many reasons, the other body did not take it up, and so forth, and probably it would have been vetoed.

So I hope next year we can do better.

TRIBUTE TO HON. STAN LUNDINE

The SPEAKER pro tempore (Mr. TRAFICANT). Under a previous order of the House, the gentleman from New York [Mr. STRATTON] is recognized for 60 minutes.

Mr. STRATTON. Mr. Speaker, I took this special order on behalf of the New York State delegation to pay tribute to our colleague, Mr. LUNDINE. STAN LUNDINE has served in this body for some 10 years and was selected by the Governor of New York, Governor Cuomo, to be his running mate as Lieutenant Governor in this election in the State of New York.

Mr. LUNDINE has served for some 10 years, as I have indicated, in this body. Prior to that time, he was the mayor of Jamestown, NY. He became a Member of Congress, having completed some 6 years as major in Jamestown, and ran in the congressional district that was encompassed by Jamestown. He had obviously remarkable political skills because his area was very heavily Republican, and yet he succeeded to become the first Democratic Congressman from that area in over 100 years.

I know the hour is late.

I just wanted to make one specific observation in connection with the gentleman from New York, Mr. LUNDINE. He put in the CONGRESSIONAL RECORD on October 9 a very detailed account of his service in this body, not to try to build up his status but to express some of the tasks and some of the concerns that he has pursued during his 10 years here in the House of Representatives. It is a very inspiring document, and one is impressed indeed to see the number of concerns. He was concerned about economic stabilization, he was concerned about the international debt and Trade and Financial Stabilization Act which Mr. GAYDOS and others have referred to earlier. He had recognized some of the need for changes in banking legislation. He has also pointed out that he felt that there were many lessons that he had learned here in the House which would be helpful to him when he hopefully becomes the Lieutenant Governor in the State of New York.

Mr. Speaker, I yield to my colleague from New York [Mr. MCHUGH].

Mr. MCHUGH. I thank the gentleman for yielding.

Mr. Speaker, I thank the dean of our New York delegation for yielding, and particularly for taking this time to honor our dear friend and colleague, STAN LUNDINE.

I am sure that we all have mixed emotions about STAN's departure from this House. He is leaving for the best of reasons, having been selected by Governor Cuomo as his candidate for Lieutenant Governor of New York. That decision was a tribute to both Mario Cuomo's judgment and STAN LUNDINE's talent. A better selection for Lieutenant Governor could not have been made. STAN will bring to that office a degree of competence and dedication that will be of enormous benefit to the people of New York and to the Governor himself. No doubt he will get a great deal of satisfaction from his new responsibilities and the increasing contributions he will make to our State. For all of those reasons we join with STAN and his wonderful wife, Sarah, in celebrating this new phase in their political and personal lives.

At the same time, we will also miss them very much. For more than 10 years STAN has been a valued Member of this institution, an intelligent, effective representative for both his New York constituents and our Nation. Members on both sides of the aisle respect STAN because he is a decent man and a serious legislator, one who is always thoughtful and workmanlike, a pragmatic politician who is nonetheless prepared to take unpopular positions if he believes them to be right. His low key, but determined leadership has been an example for us all.

To me, STAN has also been a close personal friend, an adviser and a confidant. We have had much in common politically, representing neighboring districts in upstate New York. In Washington, we have often worked together on such common interests as rural housing, economic development, and international institutions. We have had not only shared experiences, but also shared values and goals. This is one of the reasons I will so miss STAN's presence in the House, but it is also grounds for satisfaction in seeing him ascend to a high leadership position in Albany.

We are proud of STAN, grateful for the time he has spent with us, and we look forward to working with him in his new job. My wife Alanna joins me in extending to STAN and Sarah a fond farewell and in wishing them success and happiness in the challenging years that lie ahead.

Let me also extend my thanks to the staff for their patience and their professional service tonight and at all other times at hours like this.

I thank the gentleman for yielding.

Mr. STRATTON. I thank the gentleman for his comments.

The previous Lieutenant Governor in New York resigned the job because he felt that there was nothing to be done, no comments that he could make. But I think it is quite clear that the valedictory address that our colleague, Mr. LUNDINE, put into the RECORD would demonstrate that he is so much interested and concerned with many programs and many problems that he will find the job of Lieutenant Governor is not a dead end but

is going to be I feel very sure, a step to higher office in the years to come.

On behalf of my wife, Joan, we also extend to Sarah and STAN best wishes as they take on the new responsibilities in New York.

Mr. GREEN. Mr. Speaker, first let me thank the dean of our New York delegation, Mr. STRATTON, for arranging the time for this special order.

I rise tonight to pay tribute to my distinguished colleague from New York [Mr. LUNDINE], who will be moving on to other endeavors at the end of this Congress.

I first got to know the gentleman from New York [Mr. LUNDINE] when he was the mayor of Jamestown, NY, and I was the regional administrator of the U.S. Department of Housing and Urban Development in New York. I commend him for his years of outstanding service, not only to his district, but also to the State of New York, and the Nation.

His excellent work in education, economic development, particularly in the area of productivity, and the environment is especially noteworthy. Though we are from different parties, Mr. LUNDINE and I have often worked on the same side of these issues.

The gentleman from New York has been a thoughtful and innovative Member of this body. I know that he will make even greater contributions in the public sphere in the future, and I wish him the best of luck. He will be missed.

Mr. SEIBERLING. Mr. Speaker, I am pleased to join with my colleagues in this salute to STAN LUNDINE.

STAN will be leaving us at the end of the 99th Congress, but I have every confidence that he will not be leaving public service. Instead, he will become Lieutenant Governor of the State of New York, and may very well, I suspect, eventually move on to even higher office.

Gov. Mario Cuomo's confidence in STAN LUNDINE's capabilities is more than justified, Mr. Speaker, because STAN is one of the very best and the brightest that we have in the House of Representatives. After serving as mayor of Jamestown, NY since 1970, STAN was elected to represent the southern tier of New York State in the House in a special election in 1976. In his landslide victory, STAN became the first Democrat to represent his district since the days of the Reconstruction.

STAN is a forward-looking pragmatist who has focused his energies and expertise firmly on his efforts to promote a renewed competitiveness in American industry. As a Representative of one of the Midwest's older industrial areas, I know firsthand just how crucial the issues of competitiveness and productivity are to the Nation's industrial and economic future, and to the millions of Americans who rely on heavy industry for their jobs.

STAN is the author of legislation to promote labor-management councils to foster better cooperation between workers and manager. He is the preeminent expert in the Congress on productivity and its role in fostering greater American competitiveness in the global trade markets. Recognizing the crucial need for a business-labor-government partnership in fostering industrial growth, STAN has been a leader in congressional efforts to implement a national industrial policy.

STAN's legislative work has not concentrated solely on domestic issues. I think the Congress is slowly coming to recognize that this country does not exist in economic isolation from the rest of the world. In fact, the crushing debt burden borne by much of the Third World is a major threat to the political and economic stability of the world, and particularly to our own economic health. As chairman of the House Banking Subcommittee on International Development Institutions and Finance, STAN prodded his committee colleagues and the House to acknowledge the importance of this issue and to include provisions in the House-passed trade bill which seek to address the exchange rate and international debt problems facing the United States and the Third World.

Although always an advocate of a strong national defense, STAN recognizes what all-too-few of our colleagues do: That this Nation cannot stimulate productivity growth and preserve our industry if we continue to pour billions of dollars into the fiscal black hole of the Pentagon, consign the vast majority of our Federal R&D funds to projects of such dubious merit as the President's star wars fantasy, and send our best young scientists and engineers to work in an area which produces little of value to the domestic economy.

Mr. Speaker, it has been a pleasure and an education to work with STAN on the Northeast-Midwest Industrial Coalition, on the Environmental and Energy Study Caucus, and on the Democratic Study Group. It has also been a pleasure to work with STAN's wife, Sara Sibley, who is the director of the Ohio Governor's office here in Washington. I will always look back with pleasure at my association and friendship with STAN and Sara, and I wish them both the very best.

Mr. NOWAK. Mr. Speaker, I am pleased to join my colleagues in this tribute to Congressman STAN LUNDINE, who is completing more than a decade of service here in the House of Representatives.

Having worked side by side with him on a variety of issues during this period, I know our delegation will miss his soft-spoken, but informed, input and leadership here in Washington.

However, since STAN is seeking State office, both the citizens of New York and we in the congressional delegation may look forward to his insights and participation in the governmental process from another vantage point.

STAN LUNDINE's congressional record of service places him in the forefront of those who have sought persistently to achieve meaningful, workable solutions to the economic problems confronting industrialized States like ours. The western New York community, which STAN and I have the privilege to represent, has been hit hard particularly by a mix of Federal trade, monetary and fiscal policies that have adversely impacted on our heavy manufacturing job base.

STAN has been a leader in the effort to forge national industrial and trade policies that would improve our productivity and our competitiveness and has supported a continued role for targeted Federal economic development dollars to assist such hard-hit communities through this difficult economic transition period.

Hard-working, creative, and cooperative are only some of the adjectives describing the attributes that made STAN LUNDINE a successful mayor and later a Congressman. I am sure those talents will serve him well in his future endeavors. Tinged with the sadness that this great body will miss him, I happily wish him well as he seeks the challenge of yet another dimension of public service.

Mr. LAFALCE. Mr. Speaker, I would like to take this opportunity to commend my colleague from the New York State delegation, STAN LUNDINE, for his service to this Nation and wish him well in what I am sure will be a continuing record of distinguished public service in New York State.

My friendship with and regard for Mr. LUNDINE go back a long way. While we began our discussions of public policy issues as opponents on high school debate teams, in the Congress we have worked together for more than a decade to serve our constituents in New York and our country. Mr. LUNDINE has worked with enthusiasm and dedication for a goal which I share; reestablishing the Nation's industrial foundation and revitalizing America's industrial competitiveness. Together we have sought answers to the problems caused by the increased globalization of the economy and have attempted to confront the threats to American industry that are typified by our staggering trade deficit.

At this juncture, Mr. LUNDINE plans to pursue new opportunities in his public service career. With the competence and determination that he has demonstrated here, I am sure he will be able to play an effective role in any public office. In his last major address to Congress, Mr. LUNDINE provided the House with an articulate and comprehensive review of many policy issues confronting this institution. His remarks are the observations and insights of an experienced and thoughtful legislator. They call on us, the Members of Congress, to push ahead and build upon what he has accomplished. I plan to answer that call.

As I respectfully bid my friend farewell, I look forward to continuing the effort to revive the competitiveness of our industry in which he and I have engaged. In particular, I plan to continue to work for the eventual creation of the Council on Industrial Competitiveness for which we have so long advocated and which, with the help of Mr. LUNDINE, became part of the trade bill that passed the House this year. I also look toward advancing measures, of priority to Mr. LUNDINE and myself, that would promote entrepreneurship, encourage the practical application of technology and assist in the reestablishment of a strong economic foundation in this country.

Mr. LUNDINE well deserves the respect that he has attained as a Member of this institution. He has demonstrated the ability to identify the nature of complex problems and the courage to advance solutions. His attributes as a representative and a legislator are clearly recognized and highly appreciated by his colleagues and his constituents. His reelection record from a district comprised of voters pri-

marily registered with the other party, attests to the confidence he has been able to elicit.

As the chairman of the Subcommittee on Economic Stabilization, as a resident of New York, and as a Member of Congress, I would like to thank STAN LUNDINE for his great contributions. As a colleague and a friend, I would like to wish him success in the future.

Mr. ANNUNZIO. Mr. Speaker, I rise to join with my colleagues in paying tribute to the Honorable STANLEY N. LUNDINE, who is leaving the House of Representatives at the end of the 99th Congress, to run for Lieutenant Governor for the State of New York.

I have enjoyed working with STAN on the House Banking, Finance and Urban Affairs Committee, and I have come to know and respect him for his fairness, his knowledge, and his expertise in banking matters. He will be missed by all of us who have come to know him and have had an opportunity to work with him.

Before coming to Congress, Congressman LUNDINE received his law degree from New York University School of Law, served as the Chautauqua Public Defender from 1967 to 1969, and also served as mayor of Jamestown, NY, from 1969 to 1976.

Elected to Congress in 1976 in a special election, Congressman STAN LUNDINE has ably represented his constituents in the 34th Congressional District of the State of New York, and his many accomplishments as a Member of the House of Representatives are most worthy of recognition. He has served with distinction as the chairman of the Subcommittee on International Development Institutions and Finance of the House Banking, Finance and Urban Affairs Committee, and as a member of the Subcommittee on Economic Stability and the Subcommittee on Housing and Community Development. Congressman LUNDINE also has compiled an outstanding record of achievement as a member of the House Science and Technology Committee, and its Subcommittee on Energy Research and Production and its Subcommittee on Science, Research and Technology, and as a member of the Subcommittee on Human Services of the House Select Committee on Aging.

STAN LUNDINE is a fine legislator, who has provided exemplary service to his constituents and to the people of this Nation, and I extend to him my best wishes for continued success as he continues in his service to the people of the State of New York in devotion to the highest principles.

Mr. BOLAND. Mr. Speaker, I am pleased to join my colleagues in paying tribute to a valued Member of this House, Congressman STAN LUNDINE.

As this session draws to a close, we become more directly aware of the fact that many of our colleagues will not be returning to the next Congress, and I am glad we have this opportunity to honor STAN. STAN LUNDINE has chosen to step down as a Representative from New York to run for the office of Lieutenant Governor of the Empire State. STAN will leave Washington after a decade of diligent and productive service on behalf of his constitutents. Before winning a landslide victory in 1976, STAN had been a Jamestown City Public Defender and later the city's mayor. Since the late 1960's STAN has been known for his outstanding service to his upstate New York constituents.

In the House, STAN has a well-deserved reputation on both sides of the aisle as a highly effective leader who came to Washington with definite ideas he wanted to pursue and who leaves here with an impressive list of accomplishments. As chairman of the Banking Subcommittee on International Development Institutions and Finance and cochairman of the Democratic Caucus Trade Task Force, STAN has taken the lead on major issues affecting our international competitiveness and the International Monetary System which binds all nations. He has also made a number of important contributions in the fields of housing, trade, and the environment.

Mr. Speaker, the House of Representatives will miss the service and skills of STAN LUNDINE. I would like to wish STAN the best of luck when he takes office as the next Lieutenant Governor of the State of New York.

Mr. GEPHARDT. Mr. Speaker, I rise today to pay honor to a colleague, STAN LUNDINE, who ends his congressional career this week and seeks a new career with the New York State government.

I have had the distinct pleasure of working with STAN and am proud to call him more than a colleague, but my friend. Through the years, I have been impressed with his knowledge on a wide variety of issues and his extreme dedication.

STAN has been a staunch advocate of innovative, future oriented public policy. He has directed the Nation's attention to the need for strong economic growth. STAN has been ahead of his time because he understood that the future of our country lies in our economic stability. STAN chose some of the toughest areas—trade and banking—to become an expert in. He should be commended for taking a leading role in our effort to increase our country's productivity and enhance our competitiveness.

STAN is a tribute to the people he represents in the 34th District of New York, for these people closed their eyes to party identification and chose the most qualified person to represent them. It is no easy task for a Democrat to represent a Republican district. But STAN triumphed. He served his district and country well.

There is no greater challenge or gratification than serving in public office. I wish STAN all the best as he begins the next chapter in his life.

Mr. RUDD. Mr. Speaker, New York Congressman STAN LUDINE will be leaving this body at the end of this session. I personally want to extend my best wishes to him and also wish him well in his future endeavors.

STAN LUNDINE has a reputation in the House for being a soft-spoken, but dedicated, and persistent Member of Congress. He labors long and hard for the causes he believes in. Never a media hound nor in the glare of the spotlights, he has none-the-less proven to be a formidable foe on points of disagreement, while also being adept at the consensus politics that so often make legislative victories possible.

Mr. Speaker, STAN LUNDINE and I began our service in the House at almost the same point, 10 years ago. I value his friendship, respect his record, and believe he will continue to serve his country well in the years to come. Thank you.

Mr. BENNETT. Mr. Speaker, we will all miss STAN LUNDINE as he leaves the House for service in public office in the State of New York. We will miss him because of his able leadership here in securing better housing for the aged, in his achievements for small business and in other fields. Mostly, we will miss him as a friend because he has a great capacity for giving friendship, sincerely and helpfully, to all those about him.

Mr. FUQUA. Mr. Speaker, I appreciate this opportunity to say a few words about our retiring colleague, SAN LUNDINE. STAN has been a highly valued member of the House Committee on Science and Technology, which I have the honor to chair.

STAN always participated in the full range of issues considered by the committee but his work with innovation problems and solutions stands out in my mind. STAN has a keen mind and worked diligently to ensure that we addressed innovation issues of tremendous importance to our Nation's future.

He has served the people of New York well for the last 10 years and I wish him the very best of luck in November and in the years to come.

Mr. MANTON. Mr. Speaker, I want to join my colleagues in paying tribute to my good friend and colleague from New York, STAN LUNDINE, who is retiring from the House to run for Lieutenant Governor of New York. I also want to thank the dean of the New York delegation, SAM STRATTON, for organizing this special order for STAN LUNDINE.

Over the past 10 years, STAN LUNDINE has been a leader in the Congress on key issues of importance to the State of New York, including international trade, economic development, and housing. As chairman of the Banking Subcommittee on International Development Institutions and Finance, STAN has been effective in bringing these issues to the forefront debate in the Congress. As a member of the Banking Committee, I have had the privilege of working with STAN on many of these issues.

STAN has been a firm believer that the best solution to many of our economic problems is to improve productivity. In that regard, STAN has pushed hard for the creation of an industrial strategy that brings Government, management and labor together to map out a plan to improve our economic performance at home and our competitiveness abroad. The Omnibus Trade Reform bill approved by the House in May included a provision authored by STAN LUNDINE to establish an industrial competitiveness council to develop policies to increase productivity and the international competitiveness of U.S. industries. The council would be comprised of representatives from Government, business and labor.

STAN LUNDINE also took the lead on another extremely important international trade issue: Monetary reform. During the 99th Congress, STAN developed a brilliant legislative proposal, which I was proud to cosponsor, to stabilize and modernize our International Monetary system. This landmark legislation would

direct the President to convene an international conference on exchange rate reform and would create a strategic currency reserve that would be used to keep the dollar at a competitive exchange rate. STAN's initiative on monetary reform was also made part of the Ominibus Trade measure.

The House passed trade bill also included new policy initiatives to deal with the Third World debt crisis, and promote trade liberalization among the developing countries which were crafted by STAN LUNDINE.

As a member of the Housing Subcommittee, STAN has been extremely effective in improving rural housing programs. In 1984, STAN won approval of a landmark $15 million home repair program for rural homeowners.

Mr. Speaker, STAN LUNDINE should be proud of his distinguished career in Congress, and I am fortunate to have had the opportunity to serve with him. When the 99th Congress adjourns sine die, the House of Representatives will be losing an outstanding Member. However, the State of New York will gain an experienced and effective lawmaker. I want to extend my best wishes to STAN LUNDINE for what I know will be a successful future as New York's Lieutenant Governor.

SENATE BILL REFERRED

[Inadvertently Omitted from the CONGRESSIONAL RECORD of Friday, October 10, 1986]

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1209. An act to establish the National Commission to Prevent Infant Mortality; to the Committee on Energy and Commerce.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. RIDGE) to revise and extend their remarks and include extraneous material:)

Mr. HUNTER, for 60 minutes, today and October 16.

Mr. COURTER, for 60 minutes, October 16.

Mr. SILJANDER, for 60 minutes, on October 16, 17, and 18.

Mr. HORTON, for 5 minutes, today.

Mr. MCDADE, for 5 minutes, today.

The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:

Mr. ANNUNZIO, for 5 minutes, today.

Mr. HUTTO, for 5 minutes, today.

Mr. LOWRY of Washington, for 5 minutes, today.

Mrs. COLLINS, for 60 minutes, on October 16.

Mr. STRATTON, for 60 minutes, on October 16.

Mr. OBERSTAR, for 5 minutes, on October 16.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BADHAM, after rollcall 467 and 469.

Mr. HEFNER, on House Joint Resolution 738, in the House, today.

(The following Members (at the request of Mr. RIDGE) and to include extraneous matter:)

Mr. OXLEY.
Mr. GREEN.
Mr. MCKINNEY.
Mr. MCGRATH.
Mr. CONTE.
Mr. COURTER.
Mr. LIVINGSTON.
Mr. HILER in two instances.
Mr. BARTON of Texas.
Mr. COATS.
Mr. SMITH of New Jersey.
Mr. BATEMAN.
Mr. KEMP.
Mr. BROOMFIELD.
Mr. HANSEN.
Mr. BLAZ.
Mr. MCDADE.
Mr. MARLENEE.
Mr. LEACH of Iowa in two instances.

(The following Members (at the request of Mr. GONZALEZ] and to include extraneous matter:)

Mr. STALLINGS.
Mr. DYMALLY.
Mr. FLORIO.
Mr. MONTGOMERY.
Mr. STARK in two instances.
Mr. KILDEE.
Mr. LEHMAN of Florida.
Mr. FAUNTROY.
Mr. LAFALCE.
Mr. LEHMAN of California.
Mr. ROSTENKOWSKI.
Mr. MANTON.
Mr. LELAND.
Mr. KOLTER.
Mr. BARNES.
Mr. STRATTON.
Mr. BRYANT in two instances.
Mr. DINGELL.
Mr. ACKERMAN in two instances.
Mr. WYDEN.
Mr. KOLTER.
Mr. HAYES.
Mr. HAMILTON.
Mr. DERRICK.
Mr. DONNELLY.
Mr. RANGEL.
Mr. COLEMAN of Texas.

Mr. DOWNEY of New York.
Mr. GLICKMAN in two instances.
Mr. CHAPPELL in two instances.
Mr. MORRISON of Connecticut.
Mr. MAVROULES.
Mr. MACKAY.
Mr. GARCIA.
Mr. TORRICELLI in two instances.
Mr. GUARINI.

SENATE JOINT RESOLUTIONS

Joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 408. Joint resolution designating "American Physiologists Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 426. Joint resolution to designate the week of October 19 through 25, 1986, as "National CPR Awareness Week"; to the Committee on Post Office and Civil Service.

ENROLLED BILLS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2032. An act entitled the Government Securities Act of 1986;

H.R. 2205. An act to authorize the erection of a memorial on Federal land in the District of Columbia and its environs to honor members of the Armed Forces of the United States who served in the Korean war;

H.R. 2722. An act to amend title 13, United States Code, to eliminate the requirement relating to decennial censuses of drainage;

H.R. 2921. An act to authorize the Secretary of Agriculture to issue permanent easements for water conveyance systems in order to resolve title claims arising under acts repealed by the Federal Land Policy and Management Act of 1976, and for other purposes;

H.R. 3559. An act to amend the act establishing a Commission on the Bicentennial of the Constitution of the United States to clarify the status of employees of the Commission, to raise the limits of private contributions, and for other purposes;

H.R. 4116. An act to extend and improve the Domestic Volunteer Service Act of 1978;

H.R. 4354. An act to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal year 1987, and for other purposes;

H.R. 5299. An act to amend title 38, United States Code, to increase the rates of compensation and dependency and indemnity compensation for veterans and survivors, and to improve veterans' health-care, education, employment, housing, and national cemetery programs, and for other purposes; and

H.R. 5626. An act to make technical corrections in the Federal Employees Retirement System Act of 1986, and for other purposes.

SENATE ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The SPEAKER announced his signature to enrolled bills and joint resolutions of the Senate of the following title:

S. 209. An act to amend section 3718 of title 31, United States Code, to authorize contracts retaining private counsel to furnish legal services in the case of indebtedness owed the United States;

S. 1895. An act for the relief of Marlboro County General Hospital Charity, of Bennetsville, SC;

S. 2266. An act to establish a ski area permit system on national forest lands, and for other purposes;

S. 2506. An act to establish a Great Basin National Park in the State of Nevada, and for other purposes;

S. 2750. An act to establish a property tax fund for the Houlton Band of Maliseet Indians in furtherance of the Maine Indian Claims Settlement Act of 1980, and for other purposes.

S.J. Res. 169. Joint resolution to commemorate the bicentennial anniversary of the first patent and the first copyright laws;

S.J. Res. 232. Joint resolution to designate October 6, 1986, through October 10, 1986, as "National Social Studies Week";

S.J. Res. 299. Joint resolution to designate the week of December 7, 1986, through December 13, 1986, as "National Alopecia Areata Awareness Week";

S.J. Res. 304. Joint resolution to designate the week of November 16, 1986, through November 22, 1986, as "National Arts Week";

S.J. Res. 306. Joint resolution to designate the week beginning November 23, 1986, as "National Adoption Week";

S.J. Res. 308. Joint resolution to designate March 25, 1987, as "Greek Independence Day: A National Day of Celebration of Greek and American Democracy";

S.J. Res. 311. Joint resolution designating the week beginning November 9, 1986, as "National Women Veterans Recognition Week";

S.J. Res. 322. Joint resolution to designate December 7, 1986, as "National Pearl Harbor Remembrance Day" on the occasion of the anniversary of the attack on Pearl Harbor;

S.J. Res. 392. Joint resolution to designate the month of December 1986 as "Made in America Month";

S.J. Res. 396. Joint resolution to designate the week of October 26, 1986, through November 1, 1986, as "National Adult Immunization Awareness Week";

S.J. Res. 410. Joint resolution to designate the period commencing February 9, 1987, and ending February 15, 1987, as "National Burn Awareness Week";

S.J. Res. 414. Joint resolution to designate March 16, 1987, as "Freedom of Information Day"; and

S.J. Res. 418. Joint resolution to designate February 4, 1987, as "National Women in Sports Day."

BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills and joint resolutions of the House of the following title:

H.J. Res. 17. Joint resolution to consent to an amendment enacted by the legislature of the State of Hawaii to the Hawaiian Homes Commission Act, 1920;

H.J. Res. 438. Joint resolution to designate October 31, 1986, as "National Child Identification and Safety Information Day";

H.R. Res. 735. Joint resolution to designate December 11, 1986, as "National SEEK and Challenge Discovery Day";

H.R. 1593. An act to direct the Secretary of the Interior to release on behalf of the United States certain restrictions in a previous conveyance of land to the town of Jerome, AZ;

H.R. 2092. An act to amend the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal year 1987, and for other purposes;

H.R. 2182. An act to authorize the inclusion of certain additional lands within the Apostle Islands National Lakeshore;

H.R. 3005. An act to direct the Secretary of the Interior to convey certain lands, withdrawn by the Bureau of Reclamation for townsite purposes, to the Huntley Project Irrigation District, Ballentine, MT;

H.R. 3168. An act to require the Director of the Office of Management and Budget to prepare an annual report consolidating the available data on the geographic distribution of Federal funds, and for other purposes;

H.R. 4212. An act to provide for the reauthorization of the Deep Seabed Hard Mineral Resources Act, and for other purposes;

H.R. 4492. An act to permit the transfer of certain airport property in Algona, IA;

H.R. 4712. An act to provide for the restoration of the fishery resources in the Klamath River Basin, and for other purposes;

H.R. 4759. An act to authorize appropriations for fiscal year 1987 for intelligence and intelligence-related activities of the U.S. Government, the Intelligence Community Staff, and the Central Intelligence Agency Retirement and Disability System, and for other purposes;

H.R. 5073. An act to amend the Toxic Substances Control Act to require the Environmental Protection Agency to promulgate regulations requiring inspection for asbestos-containing material in the Nation's schools, development of asbestos management plans for such schools, response actions with respect to friable asbestos-containing material in such schools, and for other purposes; and

H.R. 5316. An act to amend title 28 of the United States Code to provide for the appointment of additional bankruptcy judges, to provide for the appointment of United States trustees to serve in bankruptcy cases in judicial districts throughout the United States, to make certain changes with respect to the role of United States trustees in such cases, and for other purposes.

ADJOURNMENT

Mr. STRATTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 27 minutes a.m.), under its previous order, the House adjourned until Thursday, October 16, 1986, at 12 noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. YATES: Committee of Conference. Conference report on H.R. 5234 (Rept. 99-1002). Ordered to be printed.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 5232. A bill relating to the guarantee of obligations under title XI of the Merchant Marine Act of 1936 for fishing vessels or fishery facilities; with amendments (Report. 99-1003). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOWARD: Committee of Conference. Conference report on S. 1128 (Rept. 99-1004). Ordered to be printed.

Mr. WHITTEN: Committee of Conference. Conference report on House Joint Resolution 738 (Rept. 99-1005). Ordered to be printed.

[Pursuant to an order of the House on October 16, 1986, the following reports were filed on October 15, 1986]

Mr. BONIOR: Committee on Rules. House Resolution 595. A Resolution providing for the consideration of H.R. 2127, a bill to establish a United States Boxing Commission, and for other purposes (Rept. 99-1006). Referred to the House Calendar.

Mr. BONIOR: Committee on Rules. House Resolution 596. A Resolution providing for the consideration of H.R. 5705, a bill to protect and provide for the enhancement of the resources of the Columbia River Gorge, and for other purposes (Rept. 99-1007). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follow:

By Mr. DUNCAN:

H.R. 5704. A bill to repeal section 134 of the Tax Reform Act of 1986, eliminating the deduction for State and local sales taxes; to the Committee on Ways and Means.

By Mr. WEAVER:

H.R. 5705. A bill to protect and provide for the enhancement of the resources of the Columbia River Gorge, and for other purposes; jointly to the Committees on Interior and Insular Affairs, and Agriculture.

By Mr. BIAGGI:

H.R. 5706. A bill to amend the Merchant Marine Act, 1920, to require vessels used to transport sewage sludge to be built in the United States; to the Committee on Merchant Marine and Fisheries.

By Mr. DIOGUARDI:

H.R. 5707. A bill to amend title 49 of the United States Code to prevent predatory pricing by motor common carrier; to the Committee on Public Works and Transportation.

By Mr. FUSTER (for himself, Mr. SEIBERLING, and Mr. UDALL):

H.R. 5708. A bill to entitle: "Caribbean National Forest Protection Act of 1986"; to the Committee on Interior and Insular Affairs.

By Mr. HOPKINS:

H.R. 5709. A bill to amend title 28, United States Code, to require the Attorney General to exchange information relating to crimes with the National Association of State Racing Commissioners and with State agencies authorized to regulate horse racing; to the Committee on the Judiciary.

By Mr. LOWRY of Washington:

H.R. 5710. A bill to establish an Interagency Office on Homelessness in the Department of Health and Human Services, to provide for the use of underutilized Federal buildings and property for emergency shelters, and to authorize the emergency appropriation of funds for the emergency food and shelter program administered by the Federal Emergency Management Agency;

jointly, to the Committees on Banking, Finance and Urban Affairs, and Public Works and Transportation.

By Mr. ST GERMAIN:

H.R. 5711. A bill to extend until June 30, 1987, the emergency acquisition and net worth guarantee provisions of the Garn-St Germain Depository Institutions Act of 1982; to the Committee on Banking, Finance and Urban Affairs.

By Mr. STARK (for himself and Mr. WAXMAN):

H.R. 5712. A bill to amend title XVIII of the Social Security Act to change the Medicare requirements for skilled nursing facilities based on recommendations of the Institute of Medicine; jointly, to the Committees on Ways and Means, and Energy and Commerce.

By Mr. LaFALCE:

H.R. 5713. A bill to amend the Federal Trade Commission Act to remove the restriction on the authority of the Federal Trade Commission over the business of insurance; to the Committees on Energy and Commerce.

By Mr. WATKINS:

H.R. 5714. A bill to provide for the economic protection of the infrastructure of basic American domestic industries deemed vital to American security interests at home and abroad; jointly, to the Committees on Armed Services, and Government Operations.

By Mr. WILLIAMS:

H.R. 5715. A bill for the purpose of efficient oversight of professional boxing and the establishment of minimum health and safety standards for boxing, and for other purposes; jointly, to the Committees on Energy and Commerce, and Education and Labor.

By Mr. WHITTEN:

H.J. Res. 752. Joint resolution making further continuing appropriations for the fiscal year ending September 30, 1987, and for other purposes; to the Committee on Appropriations.

H.J. Res. 753. Joint resolution making further continuing appropriations for the fiscal year ending September 30, 1987, and for other purposes; to the Committee on Appropriations.

By Mr. DINGELL:

H. Con. Res. 411. Concurrent resolution to correct a technical error in the enrollment of the bill S. 475; considered and agreed to.

By Mr. RODINO:

H. Con Res. 412. Concurrent resolution to make a correction in the enrollment of the bill S. 1200; considered and agreed to.

By Mr. SOLARZ (for himself, Mr. SOLOMON, and Mr. GILMAN):

H. Con. Res. 413. Concurrent resolution to provide for the display of the National League of Families POW/MIA flag in the Capitol rotunda; to the Committee on House Administration.

By Mr. ATKINS (for himself, Mr. SOLARZ, and Mr. LEACH of Iowa):

H. Res. 594. Resolution commending the Royal Thai Government for its extraordinary humanitarian contribution to the large, diverse refugee community in Thailand and for its continued willingness to remain a country of first asylum open to those fleeing repressive regimes in Indochina; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII.

Mr. RALPH M. HALL introduced a bill (H.R. 5716) for the relief of Henry Cousins; which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 382: Mr. WIRTH and Mr. CHANDLER.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 4469: Mr. Neal

EXTENSIONS OF REMARKS

HIGHWAY BEAUTIFICATION ACT

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. McEWEN. Mr. Speaker, the debate concerning implementation of the 1965 Highway Beautification Act in today's world continues to go on and on and on. I commend the following editorial by Mr. Vernon A. Clark, president of the Outdoor Advertising Association of America, to the attention of my colleagues and all those interested in this important issue. Mr. Clark's comments are in response to a Washington Post editorial entitled "Down With Billboards" September 27, 1986.

[From the Washington Post, Oct. 4, 1986]

BUT THE PUBLIC LIKES BILLBOARDS

(By Vernon A. Clark)

Your editorial "Down With Billboards" [Sept. 27] displayed a surprising lack of factual information about billboards.

The original Highway Beautification Act was designed to control billboards along rural and scenic highways, not ban them, as your editorial incorrectly states. The act also provided compensation for sign owners whose signs did not meet the new standards and thus had to be removed.

Today, along the roads controlled by the act, there are fewer signs than there were in 1965—680,120 fewer to be exact, according to the Federal Highway Administration. The number of signs along the controlled roads is down from nearly seven per two miles to only one per two miles. The sign-removal program is three-fourths complete, an excellent record for a taxpayer investment of only $200 million.

Under the 1965 law, states could pass a law banning billboards, and four have done so: Maine, Vermont, Alaska and Hawaii. Some residents of those states might argue that the states went too far. For example, in Vermont, the Steamtown Railroad Museum, one of the state's major tourist attractions, recently announced it was moving to a neighboring state because the billboard ban made it impossible to attract enough tourists to stay in business. And Maine, which banned them, recently bought a series of billboards in Massachusetts in an effort to lure tourists into Maine to see the fall foliage.

The Post has been listening to a small but vocal minority that doesn't want simply to control billboards, but to ban them. That would be contrary to the wishes of the American people. In a recent nationwide survey, nine of 10 Americans said they find billboards useful and informative. Even 57 percent of the environmentalists surveyed said billboards are not a very serious environmental concern. More important, however, 72 percent of Americans want to keep the present law or modify it to establish a freeze on the number of billboards and permit replacement when necessary.

The House version of the Surface Transportation Act now in conference contains some tough new controls. Far from voting to "keep the law as is," as you state, the representatives voted to freeze the number of billboards in commercial and industrial areas at their present level. The House bill also contains stiff penalties for violators. If a billboard owner illegally cuts a tree or trims vegetation in front of his sign, he will lose the sign. And the House bill does not prevent states or local communities from adopting even stricter sign ordinances. These are tough, but fair, provisions.

The Senate bill would ban all new billboards and would not even permit replacement. That means you can forget opening a new business along a federal highway if your business would depend on the motoring public.

The Post is not alone in sweeping aside the Fifth Amendment when discussing this issue. "Retreating environmentalists," as you describe them, have been advancing the idea in newspapers around the country that Congress should ignore the consitutional provision that requires the government to pay "just compensation" when it takes private property for public use. That is the ultimate question. Eventually, the Supreme Court will have to decide the issue. Until the court rules that the Fifth Amendment does not apply to the private property of billboard owners, "just compensation" should be paid whenever a sign that does not conform to the original act is taken down.

The Post would like a "tolerable compromise." We agree and believe the House bill already contains the necessary elements for that compromise.

WORLD FOOD DAY, 1986

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. GILMAN. Mr. Speaker, I am pleased to rise to focus the attention of this body on Thursday's observance of World Food Day.

Since 1979, the National Committee for World Food Day, under the leadership of its distinguished chairwoman, Patricia Young, and the auspices of the World Food and Agriculture Organization [FAO] has undertaken hundreds of projects and programs related to the world's hunger problem. Without World Food Day and the organization involved with its celebration, the groundswell needed that made America's response to the African famine possible never would have existed.

Yet, despite the impressive outpouring of support, the problem of world hunger persists. According to recent reports some 3 million people are at risk of starving in the southern region of the Sudan by the end of the year. UNICEF informs us that every 24 hours, 42,000 children under the age of 5 die as a result of hunger and related diseases.

These grim statistics underscore the critical need for a continued commitment of private and Government funds to ending hunger. But emergency relief aid is not enough. A concerted effort must be made to improve the deteriorating conditions that result in tragedy after tragedy—the same conditions that allow famine and starvation to persist and remain a reality in a world with more than enough resources to feed its population. It is time for us, for our Nation and the world of nations, to work to prevent disasters from occuring—to solve the problems which face Africa now.

Mr. Speaker, we have the ability, the technology and the wherewithall to end world hunger. All we need is the commitment. Accordingly, I urge my colleagues to help rally that kind of commitment.

A JEFFERSON MEETING ON VIRGINIA'S EASTERN SHORE

HON. HERBERT H. BATEMAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. BATEMAN. Mr. Speaker, in 1816 Thomas Jefferson wrote in a letter that the Constitution must be subject to examination and amendment from time to time, because "laws and institutions must go hand in hand with the progress of the human mind."

In that spirit, a Jefferson Meeting was organized and conducted at Northampton High School in Eastville, on the Eastern Shore of Virginia, on October 7 and 8, 1986. The enterprise was under the guidance of Mr. Douglas Coburn, social studies chairperson, and Mrs. Christine M. Black, assistant principal for instruction at Northampton High. Students from five secondary schools took part in the project.

The Jefferson Meeting consisted of a series of four debates on constitutional issues:

First. Should we have a national convention to propose amendments to the Constitution?

Second. Should the President have a single, 6-year term of office?

Third. Should the tenures of Federal judges and Supreme Court justices be limited?

Fourth. Should the President have line-item veto power?

The 38 students taking part in the debates went through extensive preparation and discussed these vital issues with a depth of understanding that was a credit to themselves and to their instructors.

I salute the organizers of the Jefferson Meeting and the students who took part in it. Theirs was an effort which in years ahead will pay rich dividends for our democracy. I hope that similar programs will be organized throughout the country, for I can think of no better way to foster an appreciation of our democratic institutions than to stimulate active debate of constitutional issues.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

The student participants in the Eastern Shore Jefferson Meeting were:

Northampton High School: Severn Rayfield, Lou Taylor, Perdita Savage, Aretha Press, Beth Connette, Schawa'ia Ames, Lisa Foeman, Alex Wilhelm, Bobbie Jo Sherwood, Tyeast Pettit, William Boatwright, Chip Little, Mychelle Brady, John Wescoat, Molly Gee, Leonard Spady, Sarah Kelly.

Nandua High School: Worth Saunders, Brandy Burton, Lenona Vinnie, P.G. Ross, Trip Basiden, Elizabeth Pruitt, Tom Hollandsworth, Mike Scott.

Arcadia High School: Tara Minke, Keith Ferry, Ryan Turner.

Broadwater Academy: Keith Ellis, Beth Watson, Van Tinkard, Chris Nicholson, John Abbot, Pete Boyer, Jennifer Scott, Bryan Englehart.

Cape Charles High School: Daren Mitchell and Paige Nuckols.

TRIBUTE TO ELIE WIESEL, NOBEL LAUREATE

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. KEMP. Mr. Speaker, peace, if it ever exists, will not be based on the fear of war, but on the love of peace. It will not be abstaining from an act, but the coming of a state of mind.

These words of a French Jew who lived through the Nazi era were quoted by Herman Wouk in "The Winds of War" and perfectly states the principles for which stands Elie Wiesel, the great Holocaust historian. In his own words, Elie points out that "indifference to evil is evil" and that the cause of human rights and justice requires our active opposition to injustice wherever it occurs.

Elie Wiesel has singlehandedly done more for the cause of human rights and true peace than any other individual we know. He is a survivor of the Holocaust who has made it his life's work "to bear witness, to testify" to ensure that the lessons of the Holocaust are not forgotten and is recognized by survivors as their symbol and their spokesman.

Elie has traveled the world to further the crusade for human rights and peace. He has written 25 books chronicling his observations of human rights violations which have garnered him more than 40 international awards and reached millions of readers around the world. Elie and his dedication to ending human suffering are the subject of more than 11 books.

Elie has dedicated his life to the betterment of humanity. He has accurately been described as "man of vision, author, poet, speaker, all for the love of mankind, the brotherhood of man, and the peace of the world." No one has done more to raise the awareness of the human rights situations of all citizens of the world. Once one has heard him speak, one comes away a person changed for the better.

I can think of no one more deserving than Elie Wiesel for the Nobel Peace Prize. Elie will use this award to continue his good work, his campaign against evil.

His campaign is mine. I am proud to call Elie and Marion Wiesel my friends, proud of the Nobel Committee for recognizing the importance of Elie's contribution to the cause of world peace and the lessons to be learned from history. I am delighted that the hard work that Elie's good friend and admirer, Sigmund Strochlitz, has put into the effort to nominate Elie for the prize each year has finally come to fruition and I am proud to have been the Congressman Sigmund approached to help him with his efforts in Congress.

This is a great day for humanity. Congratulations to Elie Wiesel, who will use this award in his continuing efforts to alleviate human suffering. The Nobel Prize is a long overdue recognition of his work and the importance of the message of peace he bears. The award will amplify his voice as the voice of remembrance and the conscience of humankind. The fact that this award comes at the close of the High Holy Days ushering in the new year of 5747 makes the award even more significant.

ANOTHER PLO LINK TO NICARAGUA?

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. COURTER. Mr. Speaker, in 1980 Nicaraguan Interior Minister Thomas Borge declared "We say to our brother Arafat that Nicaragua is his land and the PLO cause is the cause of the Sandinistas." The following day Arafat answered: "The triumph of the Nicaraguans is the PLO's triumph." Certain Sandinistas carried out operations with guerrillas in the Middle East even before coming to power in 1979, and reportedly granted the PLO training bases in Nicaragua after that year. The Swiss Review of World Affairs subsequently called Nicaragua the PLO's "most important base on the Latin American mainland."

I was therefore very interested in Marvin Smith's report of September 18 on the "Independent News" television network on what seems to be still another PLO link to the Sandinista government—investment in Aeronica, the national Nicaraguan airline.

Since the PLO's financing is a veiled but important matter in our understanding of international relations, I would like to place the Scott report before my colleagues for consideration.

File Arafat: Militarily and financially, Yasser Arafat's PLO is deeply involved in Nicaragua . . . and has a financial stake in that country's national airline . . .

Graphic/PLO assets $5 billion: Only one of the PLO's secret network of multi-billion dollar investments.

Map Maldive Islands: Following a 1984 visit by Arafat to the impoverished Maldive Islands, off the coast of India, the PLO helped get Maldive Airways off the ground.

Scott on CAM in newsroom: The PLO enlisted a Palestinian with a checkered past, including a conviction in Saudi Arabia for airline ticket fraud, to purchase aircraft for the fledgling airline in Australia and New Zealand. Other purchases were attempted in Greece and Tanzania.

Gazette Banner and Chyron: In 1984, the PLO middleman placed an ad in the Montreal Gazette, recruiting pilots and other personnel to relocate in the Maldives.

Banner Wall Street Journal and highlight quote: Two months ago, the Wall Street Journal quoted Khalil Wazir, identified as Arafat's top military commander, as saying the Maldive Airways venture was an effort to cooperate with the government of the Maldives.

File Daniel Ortega: But the Independent News has learned that it is also an effort to help the Nicaraguan Government of President Daniel Ortega . . . using Maldive Airways as a conduit to purchase aircraft for Aeronica—Nicaragua's national airline.

Which such purchases do not appear to be illegal, they would suggest a deeper PLO involvement in Nicaragua than previously believed.

Reportedly the PLO has a 25 percent interest in Aeronica . . . And one source believes some of the planes being bought by the PLO are being used in the Sandinistas battle against the Contra rebels.

File Francisco Campbell: Nicaragua's counselor for political affairs in Washington—Francisco Campbell—maintains "that's categorically false," and asserts "the PLO is not involved in Nicaraguas military in any capacity whatsoever". . . contrary to what that country's former deputy defense minister now a rebel Contra leader told a Costa Rican newspaper in 1983. Eden Pastora claimed PLO pilots are flying for the Nicaraguan Air Force and others operate radar installations.

File Arafat: PLO Chairman Arafat, who acknowledged loaning Nicaragua 10 million dollars in 1981, also confirmed PLO involved in that country.

Tilt of AP dispatch and highlight: This 1982 Associated Press dispatch quoted Arafat from a Beirut newspaper as saying the PLO has sent pilots to Nicaragua.

More of AP dispatch: While he did not explain their functions, he implied—said the report—that the pilots were reinforcing Nicaragua's Air Force, and, according to the account, Arafat had previously boasted that the PLO had scores of jet pilots, trained mostly by Lybia.

Map of Greenland and Dubner crash: Last year, in southeastern Greenland, a Fokker 27 plane being ferried from Europe, crashed accidentally and seemed to provide further evidence of the PLO's aircraft purchasing efforts for Nicaragua.

Shot of microwave dish: In a broadcast monitored by the American intelligence community, the voice of the PLO reported that Palestinian Air Force Pilot, Capt. Khalid Ahmad Atallah Samir was "martyred"—killed while carrying out his duty.

Shot of transcript: A transcript of the PLO report, found by INN in the Library of Congress, states that Khalid Samir's plane crashed while he was heading for Nicaragua. Another, unidentified crewmember was also killed, the PLO report said among the injured was Palestinian Air Force Lt. Sa'id Mansur.

Scott on CAM, in newsroom: The PLO, which routinely keeps its investment portfolio secret . . . and deals through dummy corporations and numbered bank accounts, denied having any interest in Aeronica . . . or buying any aircraft for that country.

But a recently declassified foreign intelligence report says emphatically, the PLO is purchasing aircraft for Nicaragua.

For the Independent News, this is Marvin Scott in NY.

ARISTIDES DE SOUSA MENDES: A HERO FOR ALL TIME

HON. HENRY A. WAXMAN
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. WAXMAN. Mr. Speaker, 2 months ago I was joined by 70 of my colleagues in sending a letter to the President of Portugal. We were writing about a man who has been dead for 32 years, who was a constituent of none of us, and was not even an American citizen. But he was a man who, by his actions, is a hero to all of us.

This man was Aristides de Sousa Mendes, a Portuguese diplomat who was presented with the chance to save the lives of tens of thousands of strangers. Despite the certain punishment he knew this would elicit, he did what he believed was right. Though he lost the favor of his government, lost his property, his family, and his ability to make a living, Dr. de Sousa Mendes gained the love and admiration of generations to come.

Mr. Speaker, for those who do not know this story, let me briefly sketch it. Dr. Aristides de Sousa Memdes do Amaral e Abranches belonged to an old and distinguished Portuguese family. A veteran diplomat who had served in Spain, Brazil, and the United States, he occupied the post of consul general in Bordeaux, France when war broke out between Germany and France.

As German tanks swept across France in the spring of 1940, Jews and others fleeing Nazism poured into Bordeaux, where the French Government had set up behind French lines. With German troops approaching the city, tens of thousands of refugees gathered at the consulate, seeking Portuguese visas for the only open escape route out of France—a trek over the Pyrenees to Spain and into neutral Portugal. They knew, correctly, that failure to get out of France would likely mean death.

The military government of Antonio de Oliveira Salazar had issued strict orders against giving visas to those fleeing Nazism, especially Jews. But after searching his conscience, de Sousa Mendes decided that he must break orders. He announced to the waiting refugees that all who wanted visas would get them, free of charge. He then worked around the clock for 3 days, stopping only to eat, producing 30,000 visas that carried their bearers to freedom.

When news of his actions reached Lisbon, de Sousa Mendes was dismissed from the diplomatic corps. Two diplomats were dispatched to Bordeaux to bring him home. Returning to Portugal by automobile, the party drove through the French border town of Bayonne. There they saw another large group of refugees at the Portuguese consulate, waiting in the desperate hope of being issued visas to cross the border. Over the objections of the officers accompanying him, de Sousa Mendes insisted on stopping and issuing visas to every refugee. Only then did he continue back to Portugal.

Once home, de Sousa Mendes discovered how dearly he would pay for his actions. Disgraced and forbidden to practice law, he was unable to make a living. Gradually, he was forced to sell off all his property. Most of his 14 children, also unable to make a living in Portugal, emigrated. Dr. de Sousa Mendes died penniless in 1954, unacknowledged by his government and almost unknown to the world.

For decades now, de Sousa Mendes' children have worked to clear their father's name. They have been aided only by some scholars of the Holocaust, the few journalists they have been able to interest in the case, and those people rescued by de Sousa Mendes whose whereabouts are known.

The first country to honor de Sousa Mendes was Israel. In 1967, Yad Vashem, the Martyrs and Heroes Remembrance Authority in Jerusalem, awarded him a gold medal inscribed with the Talmudic dictum: "One who saves a human life saves, as it were, a whole world."

But the primary goal of de Sousa Mendes' children—to have the Government of Portugal to honor him as a hero—remained unmet. Then early this year, my colleague TONY COELHO of California and I became aware of the case through publicity generated by Dr. de Sousa Mendes' youngest son John Abranches. Working with our colleagues GEORGE MILLER and PETE STARK of California, and with the help of Mr. Robert Jacobvidz at the East Bay Jewish Community Relations Council, we sponsored a letter to President of Portugal and a congressional resolution of praise for de Sousa Mendes.

The texts of the letter and resolution follow:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, August 1, 1986.

DEAR PRESIDENT SOARES: You may be aware of the case of Dr. Aristides de Sousa Mendes do Amaral e Abranches, a Portuguese consular official in Bordeaux, France, who saved 30,000 Jews and others in 1940 by issuing them Portuguese visas so they could flee the oncoming Nazi invasion. Students of the Holocaust regard him as one of the greatest humanitarians of that dark period in history.

Sadly, when the govenment of Portugal at the time learned of de Sousa Mendes' actions, it recalled him to Lisbon and removed him from the diplomatic corps. Disgraced and forbidden to practice law, he was unable to make a living and died penniless in 1954. Most of his fourteen children, also unable to earn a living in Portugal, emigrated.

It is our understanding that despite the dramatic change in your country since 1974, the heroism of Dr. de Sousa Mendes and the injustice subsequently done to him have never been publicly acknowledged. Knowing how you yourself suffered because of your deeply held beliefs, we feel sure you want to redress this situation, and in so doing call attention to a truly great figure in Portuguese history.

We urge you and your good offices to recognize the accomplishments of Dr. de Sousa Mendes and to seek ways to honor him appropriately.

Thank you for your attention to this matter. We look forward to your response.

Sincerely,

Henry A. Waxman, M.C., Charles Pashayan, Jr., M.C., Barney Frank, M.C., Tony Coelho, M.C., Claudine Schneider, M.C., Fernand J. St Germain, M.C., Pete Stark, M.C., Gerry E. Studds, M.C., Gary L. Ackerman, M.C., Les AuCoin, M.C., Helen Delich Bentley, M.C.

Edward P. Boland, M.C., Barbara Boxer, M.C., John Bryant, M.C., Albert G. Bustamante, M.C., Jim Courter, M.C., Ronald V. Dellums, M.C., Don Edwards, M.C., Joe Moakley, M.C., George Miller, M.C., Glenn M. Anderson, M.C., Anthony C. Beilenson, M.C., Thomas J. Bliley, Jr., M.C.

H.RES. 469

RESOLUTION PAYING SPECIAL TRIBUTE TO PORTUGUESE DIPLOMAT DR. DE SOUSA MENDES FOR HIS EXTRAORDINARY ACTS OF MERCY AND JUSTICE DURING WORLD WAR II

Whereas during the early days of World War II, France became the home of European refugees from Nazi persecution;

Whereas following the collapse of the French Republic in June 1940, thousands of refugees fled south to Bordeaux, away from invading armies;

Whereas the only escape route from France was over the Pyrenees Mountains through Spain to neutral Portugal;

Whereas Portuguese diplomats were under specific orders by the government of Antonio de Oliveira Salazar not to issue visas to Jews;

Whereas the Portuguese Consul to Bordeaux, Aristides de Sousa Mendes do Amaral e Abranches, remaining faithful to the dictates of his conscience, defied government orders and issued more than 30,000 Portuguese visas to stranded refugees, at least 10,000 of them Jews, saving them from almost certain death;

Whereas Portugal received international acclaim for its humanitarian treatment of Jews and other refugees during World War II:

Whereas Dr. de Sousa Mendes, the man responsible for saving more than 30,000 lives, was recalled to Lisbon, was dismissed from the Foreign Service, and, unable to practice law, died in poverty in 1954;

Whereas in 1967, Yad Vashem, the Martyrs and Heroes Remembrance Authority in Israel, posthumously awarded Dr. de Sousa Mendes a gold medal inscribed with the Talmudic dictum: "One who saves a human life saves, as it were, a whole world";

Whereas Israel's gratitude to Dr. de Sousa Mendes was again proclaimed in 1985 with

the planting of a tree in his name in the Garden of the Righteous at Yad Vashem in Jerusalem; and

Whereas Dr. de Sousa Mendes served as Portuguese Consul to San Francisco in the 1920's two of his children were born in California, and four of them are now residents and citizens of the United States: Now, therefore, be it

Resolved, That, as the United States pauses to celebrate the 100th birthday of the Statute of Liberty, a symbol of liberty and freedom to immigrants and refugees from around the world, the House of Representatives pays special tribute to Portuguese diplomat Dr. Aristides de Sousa Mendes do Amaral e Abranches for his extraordinary acts of mercy and justice during World War II.

SEC. 2. The Clerk of the House of Representatives shall transmit copies of this resolution to the President. The President is requested to transmit a copy of this resolution to the President of the Republic of Portugal and the President of the Assembly of the Republic of Portgual.

Several weeks after sending this letter, we received the following reply from President Soares of Portugal:

PRESIDÊNCIA DA REPÚBLICA,
September 9, 1986.

GENTLEMEN: The lifelong drama of Dr. Aristides de Sousa Mendes do Amaral e Abranches and the need to do him public justice has been for a long time in my mind. Your letter of August 1, for which I would like to thank you much, fully meets my feelings on this case.

I am, so, most pleased to inform you that, in recognition of Dr. de Sousa Mendes heroic behavior, which, I think, should be considered by all as a model of integrity and sacrifice in defence of the highest moral values, I intend to award him soon a high ranking Portuguese decoration.

Yours sincerely,

MARIO SOARES.

Although it is not yet certain exactly what kind of decoration this will be, or what if anything will be done to honor Dr. de Sousa Mendes in a more permanent manner, this is indeed a great step forward. For the de Sousa Mendes family, it means that after 46 years of waiting, their father will finally be a hero in his own land. For the rest of us, it means that a great humanitarian—an example to guide us in times of moral crisis—will be recognized.

Mr. Speaker, Congressman Coelho and I will continue to work with the de Sousa Mendes family and the government of Portugal to insure that Dr. de Sousa Mendes takes the place in history he deserves, and that his story serves as a model and inspiration for many generations to come.

IN MEMORY OF SENATOR CECILIA C. BAMBA OF GUAM

HON. BEN GARRIDO BLAZ

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. BLAZ. Mr. Speaker, it is with great sadness that I share with my colleagues the passing of a remarkable lady, a most distinguished public servant, a close personal friend, and a native daughter of my district—Senator Cecilia C. Bamba of the Territory of Guam. Her public service to the people of my Territory, and the respect with which they in turn held her, was without bounds.

I believe the eulogy of Senator George Bamba, her son, best shows the affection we felt for Chilang Bamba and I submit it for the RECORD at this point.

A TRIBUTE TO CECILIA C. BAMBA—DELIVERED BY SENATOR GEORGE BAMBA, OCTOBER 10, 1986

Before I begin, I would just like to say, welcome home, Mom; you are back with us, the people whom you've loved so much.

As we sit here today thinking thoughts of Mom, of the sadness we feel over her death, of the many happy and sad times we've shared with her throughout the years, we cannot help but feel a sense of emptiness in our lives. Indeed, while writing this eulogy, this tribute, I sat for many moments, my mind racing with thoughts of what I should say. Thoughts of how I could possibly portray what Chilang Bamba was like. Of what motivated her to accomplish all the good which she did for her people and for her island.

Let me begin with what I feel is the foundation of what her life symbolizes. To me, Mom's life is like a tapestry. A beautiful picture of how one individual who cares enough for her people, for her island to try to the best of her ability to make life a little easier, a little better. An individual who had the courage to try to right the injustices which she saw, to show compassion and kindness, not only by words but by deeds, to those who were less fortunate than she. And, to fiercely believe in God and the fact that it is through Him by which all good comes. Even if misfortune or tragedy should befall a person she always saw all the good which could come about. Someone once wrote that some people are devastated by misfortune, others grow because of their misfortune. They become better persons. No one can deny that Mom was this type of individual. As I take you through her tapestry, you will know and understand what I mean.

This tragedy, this misfortune, came very early in life for her. And I believe that this is the very fabric which molded her character. It is what laid the foundation for her to accomplish all which she did during her short time with us. Mom was born in 1934. While at a young age, her mother died along with her baby while giving birth. And then at the age of seven, her father was beheaded for trying to save an American pilot. A person who was a stranger to her and her family. All around her she saw the pain and suffering which so many families went through in those days. And I really feel that it is these events which shaped her values. For in the many years in which we spoke, she never once uttered a word of cruelty, of animosity, of jealously, of hatred toward anyone. Instead she spoke of a people who would help those who were suffereing, those who felt pain. I suppose to Mom all the good which she did was her way of repaying people for their kindness, their compassion, in her time of tragedy, during the days of her pain and suffering.

And so she began weaving her tapestry of life. First, in taking care of her brother Johnny, and in always looking after the well being of her youngest brother David. Even after she married my father and was raising her own children she always made sure that Johnny and David were taken care of. She sacrificed to give her brothers and her own children what we needed. She considered them an inseparable part of her and my father's own family. As long as I can remember she always worked hard helping my Dad trying to make a better life for us and for their own brothers and sisters.

I would be remiss if I did not say that she was just as equally responsible for all the good which Dad accomplished. For they saw their life's work as one. Whether it was in their civic or government duties, their work in our community, they always had a single purpose in mind. And that is to improve the quality of our lives. Between the two of them they showed a compassion which perhaps is unequalled to this day. Yes, we are proud of both of them. And we feel the warmth and the joy from people when they speak of the good which both of them did. We will always be proud of them. For in showing compassion and kindness to their fellow people, their motives were one and the same.

In reviewing her profile, I frankly did not know where to begin to list Mom's accomplishments. Her life is full of firsts. She was the first woman to be elected chairperson to a government board—The Guam Memorial Hospital Authority. Working with the afflicted and improving the quality of health care was something very dear to her heart. Maybe it was because she foresaw her own pain and suffering. For she believed that she had a duty to bring a little joy and compassion for those who were in need in their most tragic hour.

She was the first Chamorro woman to testify before the U.S. Senate. This was on the land claims bill. The paper wrote that she would most be remembered for this. But to Mom, it was just another cause for her to undertake, another injustice which had to be righted. We are glad that she was able to feel the joy of accomplishing what she fought long and hard for. She never once wavered in her belief that justice would prevail. This period was a difficult one for her. For it was during this time when she suffered another tragedy, the death of our Dad, her husband. But did that devastate Mom? Yes, she felt the pain and sorrow just as all of us did, but she doubled her effort and focused all her energy to completing her task. It was her way of expressing her thanks to the many people who showed compassion and kindness in her time of tragedy, in her time of pain.

No sooner than when her work was completed, she embarked on another task and that was to seek war reparations for her people. It is unfortunate that she will not be here to share in the ultimate success of her work. But she can basked in the joy that now there are many others who are carrying on the crusade to correct this injustice, this inequity. I know she was very grateful for this.

She was also the first spouse of a Senator to be elected to the Guam Legislature.

In addition to all her firsts, she founded or co-founded several organizations. Organizations such as the Guam Memorial Hospital Volunteers, the Guam Beauty Association and the Guam Landowners Association. She also held the presidencies or other leadership positions of practically all the civic organization on Guam. The last one was the Guam Rehabilitation & Workshop Center. This organization, as you know, helps the handicapped. It helps to provide employment opportunities for them. To make them feel that they are part of this great island. Yes, she had a special fondness for her work with them. For she always spoke of the ex-

pressions of pride and joy on their faces in the work which they had accomplished.

You ask perhaps what were her motives behind all her work. Well let me tell you that, there was only one motive for her—it was simply serving her people. She was not looking for personal gain. She only looked to do what was right for her people. It did not matter to her whether her efforts were noticed or whether she received awards or accolades, although there were many given. Her satisfaction came from seeing on the faces of people joy when before she saw sadness, and hope when before there was despair.

You are probably wondering with all her activities, with all her work, how did she have time for her family. Well, she did. She was always there for us. She was always there to counsel and to guide us in how we should live our daily lives. Always advising but never forcing us to set our goals, and on how to achieve them. She was always our source of strength when we were weak. It is this source of strength that today compels us to accept her death. To be thankful that we shared as a family the values which she cherished so much. I believe that it was her hope that the life she lived, the examples she set by her deeds, would somehow manifest itself upon us. As her children we have grown to realize these values which guided her life. The need for strength in the family in a time of crises, to flex but never to break, and to never utter an unkind word about anyone.

Mom was a deeply religious woman. She shared, just as all mothers do, a special and unique relationship with the Blessed Mother. Her profile lists all which she did for the Church. But there was one special act which she never failed to perform up until the day she could no longer physically do so and that, was to make the Cathedral a beautiful home for the Blessed Mother. It was her own little way of showing her appreciation for all the goodness she received throughout her life for her own home, for her own family. Even to the day she died she never wavered in her love for the Blessed Virgin Mary. Even as she lay weakened by the ravages of the cancer which afflicted her, she would struggle to say a prayer to her. It was in the Blessed Mother where Mom found her solace and peace. It was in her where she found the strength to accept life's uncertainties. Yes even to accept the inevitability of her own death.

From her friends and peers we sense an admiration in the goodness of her character; her warmth, trust and compassion for all. We sense their admiration for her courage and commitment to undertake and assist in the many civic and social duties and responsibilities with other Chamorro women like herself. She was always encouraging individual involvement, selflessness for the good of our people.

She believed that by taking an active interest, by caring, we will pass along to our children those inherent values that make up Guam's customs, traditions and culture. She was truly a manifestation of the spirit of the Chamorro. An indomitable spirit of love.

There is one special friend who came to see her at her hospital bed and who also came to see her when we had her viewing in California. Dr. Katherine Aguon asked if I would read a tribute from her to Mom. I told her that I'm sure Mom would not mind and that she probably would have liked it. I'd like to share her tribute with you now:

"A TRIBUTE TO CHILANG"

(By Dr. Katherine B. Aguon)

"Much in my heart will remain unsaid about Chilang because I could not expose all that I want over the waves of the ocean that separates us. I saw Chilang in her final days before death and it is my desire to express a few words about her.

"I truly feel that if there was, in this world, one person whom I can speak to unabashedly, it was Chilang. In our years at the Legislature, I discovered in her qualities of generosity, concern and love to her fellow-beings. She seeks to find what's in a person's heart, and then opened hers to pour out warmth and understanding. Always, she was able to see the sadness and joy in you and then provide that warmth we all longed for in our aloneness.

"Long were the hours we spent talking together about many problems—our work, our goals, our people, and our island. She was forever willing to lend a hand and always with a song of praise to someone who had hurt her.

"The years Chilang has spent in our midst had become a memory of nobility and distinction. We all have heard and know of her generosity and virtues of patience and compassion.

"There are those of us who gave little of the much which we have and give it for recognition and our hidden desires. Chilang had little and gave it all.

"Her record as a public and community servant is documented. She was the epitome of self-made person, someone who made it through the ranks, not merely in the professional sense but in the world of politics and business. From a housewife, and humble and unknown beginning, she soared and became a focus of encouragement to women and a much respected politician and businesswoman. To all of us, this feat bespeaks of a well-rounded, capable person. Indeed, Chilang, in her own way, was able to see the hidden purposes in all things and then built on these goals to achieve those things that are needed by our community. She was a great and talented person who deserved a place, a place in our hearts and in our minds.

"If you had seen Chilang in the final days before her death, you would have seen the joyful contentment beneath her trembling body. I knew in my heart she was ready to leave.

"Farewell, my friend. If in the twilight of memory we shall meet, we shall speak again together about our children, our island and people, our work, and, we shall build again, another world."

To us, her children, Mom has always had a special place in our hearts. It was easy for us to overlook her faults. Because in her we saw a good mother and a good wife. A person with courage, compassion, and love. We understand the suffering she went through. And it pains us so. We have lost the one person who has been our source of strength and inspiration for our family. We shall sorely miss all the happy times we shared. But we cherish the fact that she leaves behind a legacy and heritage, rich in a wealth of defined values and of belonging. She leaves for us that special kinship with people whom she has touched. This truly fills our hearts with joy and pride knowing that she was able to accomplish much during her short life. I hope and pray that we, all of us here, can continue her life's work. That we can emulate the goodness of her life. So that we too may be truly blessed.

There is one final weave in her tapestry which I would like to make. Reflecting on her life and in trying to capsulize all that she was, all which she stood for, I remember a little poem which was written many years ago which she felt symbolized the work my father did in his life. I guess it shows the oneness of their lives, the singleness of their purpose in life. It simply states: "I shall not pass this way again, any good I can do or any kindness that I can show, let me not defer or neglect it. For I shall not pass this way again."

Goodbye, Mom—esta que man alii hit yan hagu yan si Dad gi rainon mi you.

LEILA FOLLIES: 20TH ANNIVERSARY

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. WOLPE. Mr. Speaker, I want to pay special tribute to the Leila Hospital Women's Auxiliary in Battle Creek, MI, on the occasion of their 20th annual "Leila Follies."

Since 1967, when the first Leila Follies raised $1,300, the annual fundraising event has raised over $400,000. The women's auxiliary has used this money to purchase lifesaving equipment, x-ray and laboratory equipment, cardiac monitors, and other medical equipment for the benefit of patients of Leila Hospital. Twenty years ago a local artist, Maida Schwarzkopf, designed the Leila Follies logo with the inspirational inscription, "Love Life—Save Life." This theme has so obviously been in the hearts of all those who have given so selflessly of themselves and their time to make this annual fundraising event the success that it has become.

This year the Leila Hospital Women's Auxiliary will express its caring by purchasing a "Wellness" van in order to make diagnostic testing available throughout the entire greater Battle Creek area.

Mr. Speaker, my colleagues would be impressed not only by the commitment and dedication of the auxiliary members who organize the follies, but also by the participants who voluntarily share their talents to raise funds for hospital equipment. I am privileged to represent these constituents: Their caring is expressive of the best of America. I know my colleagues join me in wishing them all possible success.

THE 125TH ANNIVERSARY OF ST. PAUL'S ROMAN CATHOLIC CHURCH, GREENVILLE, JERSEY CITY

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. GUARINI. Mr. Speaker, I would like to share with the Members of this body the cele-

bration of the 125th year of the establishment of St. Paul's Roman Catholic Church, Greenville, in Jersey City, in the Hudson County area.

This parish has had special significance in my lifetime as I attended St. Paul's Grammar School for the first 6 years of my early education. I recall most vividly the dedication of Sister Veritas and Sister Ursula Marie, of the Sisters of Charity, who were my early teachers in the first and second grades, who gave me my earliest training in the basics and religion, and helped build the foundation of my life.

I recall vividly walking from my parent's home at 200 Neptune Avenue, Jersey City, in the parish, to early morning masses which I served as an altar boy for Father Thomas Monaghan.

St. Paul's parish with its religious leadership and wonderful parishioners indeed taught me to see the needs of others, to study hard, and to have the courage to work and fight for what good people believe in.

The good Sisters of St. Paul's Grammar School built an excellent foundation for the quality of education I was fortunate enough to receive. Indeed, St. Paul's School and Church taught their young people to think and communicate effectively, to teach the students about themselves, their heritage, and the problems of other cultures and other nations, preparing the students for work and further education and to help students meet their social and civic obligations.

On November 2, 1986, there will be a mass at St. Paul's Church at 12:30 p.m. with Most Rev. Jerome A. Pechillo, auxiliary bishop of Newark, and vicar of Hudson County, and priests who grew up in St. Paul's parish and are coming home to celebrate.

It will be my pleasure to join with them on this occasion. I have asked Father Joseph T. Slinger, pastor of St. Paul's Church, to assist me in preparing this brief history of this church and parish. He has provided the following information for which I am grateful:

In 1861, 25 years before the Statue of Liberty came to New York Harbor to serve as a beacon of freedom to immigrants, the Roman Catholic Parish of St. Paul was established on a hill overlooking that harbor. Founded initially by Passionist Fathers from St. Michael's Monastery, West Hoboken (now Union City), under the famed bishop of Newark, James Roosevelt Bayley, uncle of St. Elizabeth Seton, St. Paul's from the outset dedicated itself to its growing flock of Catholic families settling the celery farms in the small community of Greenville, which had not yet been incorporated into Jersey City, NJ.

There were 11 baptisms and 3 marriages in the first church, a 30-by-20-foot frame building, in the year 1862.

Four years later, the priests of the Diocese of Newark assumed responsibility for the parish and its growing congregation, and the first St. Paul's grammar school building was erected in 1871. Cornerstone for the existing church structure was laid in May 1887, during the Presidency of Grover Cleveland, and the completed edifice was dedicated in July 1888.

From those early beginnings, St. Paul's grew rapidly under a series of devoted pastors until, in 1915, the legendary Father (later Monsignor) Thomas Monaghan, who was to lead the parish for the next 43 years, became its spiritual head. Under his direction, a new, 1,500-pupil school and convent were built, and the complex of church, school, rectory, and convent became what it is at the present time.

In the first hundred years of its existence, St. Paul's contributed over 50 vocations to the priesthood and more than 150 sisters to the religious life.

As if to emphasize its youth and vitality in spite of the forthcoming 100th birthday of the parish, Monsignor Leo Mahoney completely renovated St. Paul's School in 1960, equipping it with the most modern educational and audiovisual devices at a cost of $70,000. The convent as well was modernized and redecorated.

The centennial year of the founding of the parish—1961—was a cause for great celebration and rejoicing. In the opening months of the year, a statue of St. Paul was unveiled in memory of Monsignor Monaghan. On November 19th, there was a solemn Mass of Thanksgiving attended by parishioners old and new and by dignitaries of church and government. The following day, November 20th, there was a centennial banquet and parish reunion attended by over 1,200 persons.

St. Paul's was both a pioneer and a model for the archdiocese of Newark in implementing the changes effected by the Second Vatican Council, and in recent years it had led the way in welcoming to its liturgical staff deacons, extraordinary eucharistic ministers, and lectors, both male and female.

It was almost at the conclusion of this metamorphosis, on October 24, 1974, that Monsignor Mahoney died after a recurring illness. Additional evidence of the influence of Vatican II was to be discerned in the manner of selection of his successor.

Input from St. Paul's Parish Council as to the requirements seen and the qualifications desired in a new pastor were given great weight by the Archdiocesan Personnel Board, and the man identified as meeting these criteria in fullest measure was Father Thomas E. Davis. A former Catholic campus minister at Montclair State College, where he had led a vigorous, inspiring, and successful revivification of religious commitment on that college campus in the wake of the Ecumenical Council, Father Davis assumed his new post in Greenville on January 25, 1975.

Today, as it has for the past century and a quarter, St. Paul's, now headed by the Reverend Joseph Slinger, following the Reverend Joseph A. Murray, successor to Father Davis, continues serving the spiritual and temporal needs of an ever-changing Catholic population. Its ethnic mix had altered; now many of its members are of Hispanic origin or from the Near and Far East. Still, its growth has been so great that in the 1960's the parish had to be split geographically with the founding of the Church of Our Lady of Mercy.

Despite that division, however, some 3,500 Catholic families—a far cry from the fewer-than-50 families in the area 125 years ago—are listed on the rolls of St. Paul's, and the strength and vigor of the parish remain undiminished. The people of St. Paul's in Greenville, with unabated enthusiasm, face a future of service "for God and Country," the motto etched on the facade of St. Paul's School.

In St. Paul's parish, which stands like the Rock of Gibraltar, in Jersey City, in the shadow of the Statue of Liberty, people of every heritage have been interwoven with our community's social fabric in social, economic, and cultural directions.

The sons and daughters of St. Paul's parish have made their mark in the professions—doctors, lawyers, teachers, scientists, engineers, members of the clergy—they have led exemplary lives as heads of families; they have fought in America's wars; World War I, World War II, Korea, and Vietnam.

St. Paul's parish has been an oasis of family-centered concern. Although located in a large city, it has been closely knit with community involvement, developing a human dimension as a place and a symbol of prayer and fellowship where people know each other personally, sharing each others' problems, as echoed by Pope Paul VI in his apostolic exhortation "Evangelii Nuntiandi" at the 1974 Synod of Bishops in Rome.

I am certain that my colleagues wish to join me today in this tribute to St. Paul's parish and pay tribute to its glorious 125 years of service to God and man. I am sure they share my pride and join me in extending best wishes to all the parishioners, nuns, and priests of this great parish.

TRIBUTE TO THE HONORABLE G. WILLIAM WHITEHURST

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. GOODLING. Mr. Speaker, I would like to join my colleagues today in bidding farewell to a vital and much respected Member of this Chamber who will be retiring at the close of this session—the Honorable G. WILLIAM WHITEHURST of Virginia's Second District.

Mr. WHITEHURST has distinguished himself both during his tenure in Congress and previously. He served his country in another capacity earlier in his distinguished career as a member of the U.S. Navy from 1943–46. After World War II, he received his bachelor's and master's degrees and began an 18-year career as a professor of history at Old Dominion University. From 1963–68 he held the re-

vered position of dean of students, evidence of his leadership and unique advisory capabilities.

His years spent in Washington also exemplify the strong character of this man. His prominent role as a member of the Armed Services Committee has significantly contributed to a sound policy for our national security. Membership in the North Atlantic Assembly allowed this gentleman the opportunity to help foster international understanding and communication.

Mr. WHITEHURST must also be commended for his position as chairman of the Education Task Force. In this capacity he has expressed his confirmed commitment to students and education. He also worked closely with the pages and supported programs to improve their learning experience here in Washington. He has instituted the American Studies Program in their curriculum.

When Mr. WHITEHURST leaves Congress he will take with him the many years of experience and memories he has gained here as well as wishes for success and happiness from his fellow colleagues. We hope his position as professor of history and political science at Old Dominion will once again be as enriching to him as it undoubtedly will be to his students. As this distinguished gentleman retires he leaves behind more than he takes with him. His pursuit of improved educational programs, increased international understanding, and record of service to his country act as an inspiration to us all.

THE BRONX IS BACK

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. GARCIA. Mr. Speaker, as time goes on, I find myself encouraged and heartened to know that many investors are still socially conscious and remain committed to the revitalization of so-called undesirable neighborhoods throughout the country.

I often tell people, the Bronx in back! And my boasts are often confirmed by the steady influx of investor dollars to restore many old neighborhood landmarks such as the Puerto Rico Theater, where I spent a great deal of time during my youth. The purchase of the Puerto Rico Theater of the Bronx and other landmark properties in East Harlem, are yet another shining example of restored faith and confidence in areas that many had written off in recent years past.

The following article from the October 15, 1986, New York Times, outlines aspects of the purchase and restoration of these landmark properties in East Harlem and the South Bronx.

REAL ESTATE—EL BARRIO MARKET'S RENEWAL

(By Shawn G. Kennedy)

Fifty years ago Mayor La Guardia put a marketplace underneath the Park Avenue elevated train tracks between 111th and 116th streets. The purpose was to clear congested streets of pushcart vendors and to provide clean spaces for small neighborhood businesses.

For decades the city-owned marketplace thrived, especially during the 40's and 50's as the largely Italian East Harlem neighborhood evolved into a Hispanic community known as El Barrio. But in the last 20 years, La Marqueta, as the market is known, lost vendors as the neighborhood declined. Today fewer than 50 merchants operate in a third of the enclosed market's space.

Now a development team is planning to put $7.5 million into a rehabilitation and expansion of the market. Last month the city designated San James Realty, an 11-year-old real estate management and development company, and the General Atlantic Realty Corporation as the developers.

The plan calls for the renovation of the five one-story structures and the construction of three buildings. The construction will extend the market's boundaries to 119th Street, in space now used as parking lots.

The developer is to pay the city about $1.5 million in rent and profit sharing over a 10-year lease. SanJames Realty will be responsible for developing, marketing and managing the complex.

"There have been other plans to restore the market but they never got off the ground," said Marcia Reiss, a spokesman for the city's Department of Ports, International Trade and Terminals, which has jurisdiction over the market.

Ms. Reiss said that for the last several years the beleaguered market was operated by a merchants' association. But as vacancies increased the group had an increasingly difficult time keeping up with maintenance and rent collections.

James Sanchez, the principal of SanJames Realty, feels that signs of rejuvenation throughout East Harlem spurred the city to revive La Marqueta. Among those signs, he said, is the strengthening market for higher-priced housing north of 96th Street and a commercial revivial along East 116th Street.

"Development uptown is not the risk it once was," said Mr. Sanchez, whose company has concentrated its efforts in East Harlem and the South Bronx. "There is a lot going on up here and everyone wants to be a part of it."

Mr. Sanchez said that in the last two years his company has invested $25 million in commercial and residential properties in East Harlem and the South Bronx. Among the projects is the restoration of the Puerto Rico Theater on 138th Street in the South Bronx. Mr. Sanchez converted the dilapidated 2,700-square-foot theater into three auditoriums, one for Spanish-language films another for first-run American movies and the third for stage performances.

His company also owns and manages 27 retail properties on 138th Street as well as 2,000 residential units, many in East Harlem. But Mr. Sanchez's link with the neighborhood goes beyond the financial investments he has made there.

"Like the Puerto Rico Theater, La Marqueta was a part of my childhood," he said in an interview in his office at 250 West 57th Street. "It used to be a Saturday ritual for me and my mother and father to go to La Marqueta to shop and then to the Puerto Rico theater for a show."

Michael Huerta, the Commissioner of Ports, International Trade and Commerce, said that one reason Mr. Sanchez's team had been selected was because it was willing to develop the property without city funds. Mr. Sanchez rejected the city's offer of a $5 million grant because the public financing process would slow the project.

The plan calls for the market's existing 50,000 square feet to be expanded to 80,000 square feet. There will be spaces for about 200 vendors of foods, spices, flowers and dry goods. The developers will put at least one restaurant in the market and a day care center.

The developers say that although the space will be improved, the market's Hispanic commercial focus and atmosphere will be maintained.

"We want it to be like a bazaar," Mr. Sanchez said. "I want it to be like I remember it as a kid, only more modern and cleaner."

Mr. Sanchez does not believe he will have trouble filling the new space, even though the market is more than half empty now.

"The market is not living up to its potential," he said. "The reason why vendors do not want to be there is not because the market is not in a good location. They have left because the buildings are rundown." He said that just a year or so ago La Marqueta had more than 100 merchants.

The current tenants, many of whom have leases that run until 2013, will remain at existing rents. Some pay less than $10 a square foot. New tenants will pay $30 to $40 a square foot.

Construction will start in the spring and will be done in phases so the market can remain open. It is expected that between 200 and 300 permanent jobs will be created by the redevelopment project.

DON'T UNDERVALUE FLIGHT ATTENDANTS

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. SWIFT. Mr. Speaker, in view of the ever-increasing hazards of air travel today, we

cannot overemphasize the important role flight attendants play in safeguarding the lives of the flying public. The flight attendants, too often taken for granted as only a provider of creature comforts, must in fact act as a buffer between terrorists and their victims, putting their lives at risk on behalf of those in their charge. They must also monitor aircraft safety, handle medical emergencies, and execute evacuations within seconds.

Recent events, however, indicate that the airline industry and our Government have underestimated the invaluable part these women and men play in protecting our lives and our investments. Nowhere is this more clearly demonstrated than at Trans World Airlines. For example, TWA flight attendants on hijacked Flight 847 in June, 1985 were honored for their capable handling of an extremely dangerous situation. Yet today, nearly 5,000 of these trained professionals at TWA, who are predominately mature women, are still prevented from returning to their jobs by TWA Chairman Carl Icahn because of their experience.

It is time for the people of the United States to recognize these individuals and the important contributions they have made to airline safety. It is time for action to be taken to stop the blatant discrimination they have endured. It is time for this body to take steps to ensure that this ongoing dispute be resolved, not only for the sake of fairness, but also so that the confidence of the flying public can once again be restored in our air transport system.

Mr. Speaker, it is time for the Department of Transportation to exercise its lawful authority and intervene in this protracted dispute. Our Federal courts have already determined that the flight attendants' offer to return to work without a contract last May was an unconditional one. Yet TWA obstinately refuses to allow them to return to their positions, in which they have invested an average of 15 years. These valiant professionals have suffered long enough. It is now time that we act.

FLORIO URGES OWENS-CORNING TO KEEP BARRINGTON PLANT OPEN

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. FLORIO. Mr. Speaker, yesterday I rose to express my shock and dismay at the decision by Owens-Corning Fiberglas Corp. to stop production at its Barrington, NJ plant. I rise again today to urge Owens-Corning to reconsider its decision and keep the profitmaking plant open or, at a minimum, look for a buyer of the plant who will keep the plant open.

The decision to stop plant operations means that 800 hardworking, dedicated taxpayers in my district will lose their jobs and become unemployed at a time when the national unemployment rate is already high and finding a job is more and more difficult. I would like to share with my colleagues a copy of an editorial published this morning in the Courier-Post which makes a number of outstanding points. The editorial follows:

JOBS FALL VICTIM TO MERGER MANIA

Merger mania appears to have dealt workers at the Owens-Corning plant in Barrington a cruel blow, or so the company suggested in announcing that its plant in the borough will be closing. Nearly 800 jobs will be lost, 500 of them by the end of the year. A not so merry Christmas for these workers.

The company does not want to play the Grinch, its statement last week suggested. The plant, which manufactures fiberglass insulation, is still profitable. The management was forced to make the move, it said, because of a hostile takeover bid and the debt incurred in fending it off. In order to outbid the corporate raider, the company borrowed about $2.6 billion, leaving it with no choice but to cut costs dramatically and divest itself of facilities that do not generate high profits in a short time.

Owens-Corning shareholders watched the value of their stock rise dramatically during the battle between the company's existing and would be managers. Owens-Corning workers, some of whom have worked at the Barrington plant since it opened more than 30 years ago, are watching their jobs and their careers go down the corporate drain.

Justice is not an integral component of the free enterprise system, which is based on competition, not fairness. Loyalty to employees often plays a role in a corporation's management policies, however, but it seems to be sorely lacking here. The company has apparently made little provision to try to relocate workers to other plants, or, better yet, to sell a facility that by its own account is still profitable. It plans to turn the plant into a warehouse, which would employ only a fraction of the manufacturing workforce.

The market for insulation boomed in the '70s, with its energy "crises" and consequent emphasis on conservation. The demand for insulation, however, goes on, particularly in a time of economic growth with a high level of new construction.

Not everyone in the Barrington area would be sorry to see the plant closed. The plant has made its share of enemies over the years because of the foul odors occasionally emitted and the threat of more serious pollution from its piles of hazardous waste materials. Local fire companies have worried at times about the use of propane at the plant and the possibility of explosions.

In general, however, the company, at least when it was still interested in doing business here, responded to such complaints with measures effective in addressing them.

The jobs that will be lost will be difficult to replace in an economy that is not producing much in the way of new manufacturing jobs. Government officials, from the borough hall to the State House, should join with the workers to try to keep the plant open, if not under Owens-Corning management, then in the hands of another company or an employees' cooperative.

PENSION LOSERS BILL REINTRODUCED

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. WOLPE. Mr. Speaker, last week I joined with Congressman CLAY and 20 other colleagues to introduce the Pension Restoration Act of 1986, also known as the pension losers bill.

In 1974, Congress passed the Employee Retirement Income Security Act [ERISA]. ERISA was motivated by a nationwide grassroots effort consisting of hundreds of thousands of workers who had earned pension benefits from their companies' pension plans, yet suddenly found themselves with no benefits. Pension plans were collapsing; companies were closing in bankruptcy or relocating to other areas and pension protection—for which people had worked and which they had every reason to anticipate—was suddenly being denied. The Congress responded to remedy what was understood to be a truly desperate situation.

Tragically, however, the very individuals who were responsible for bringing this crisis to Congress' attention were left out because of the arbitrary enactment date of ERISA's Pension Insurance Program. Nationwide, there are approximately 80,000 employees who to this day are not receiving their full pension benefits. Many of these people have yet to draw one dime from their plans.

ERISA's arbitrary enactment date affected thousands of American workers around the Nation. Georgia Pacific decided to close its Portage plant in the summer of 1974 denying several hundred of my constituents their rightful pension benefits. For the great majority of workers, the company terminated their pension plan and closed down on June 30, 1974, Just 1 day before the Federal pension insurance program went into effect. The company did leave a handful of employees on the books for several more weeks, but the Pension Benefit Guarantee Corporation ruled that

the maintenance of a few employees on the payroll was not sufficient for the purpose of ERISA's determination that the company was still operative at the time of the insurance program's initiation. The legislation we have introduced appears to be the only effective means of correcting the tragic injustice they have experienced.

The Pension Restoration Act is for the pension losers who met all the requirements of their pension plans. All are hard-working Americans who were loyal to their companies, many giving 20, 30, and 40 years of service. All participated in their pension plans in good faith and had every reason to expect their employers would fully meet the contractual obligations into which they had entered.

This legislation is a modest attempt to provide partial compensation for the injustice that has been done to the Nation's pension losers. By all rights, they should have received the same protection as those who have been covered by ERISA. However, this bill recognizes the budgetary constraints within which we must operate and proposes, therefore, to simply provide $75 per year for each year a pension loser with vested rights worked under his or her pension plan. This is far from what many workers would have been entitled to under ERISA. Yet it is much more than most are presently receiving. This bill could make a great difference in the quality of life for pension losers now in their retirement years; for some, it can literally mean the difference between a life of desperate subsistence and a life that will permit some dignity and security.

FERMI ACHIEVEMENT AWARD

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. SMITH of New Jersey. Mr. Speaker, on Saturday, October 18, 1986, Guido Luccarelli will be presented with the "Fermi Achievement Award" by the Fermi Federation for his numerous contributions to the Italian community in the greater Trenton area. The award will be presented to Mr. Luccarelli at Angeloni's Restaurant in Hamilton Township.

As an 18 year-old student in Naples, Italy, Guido Luccarelli interrupted his studies in 1946 to join his family in the Trenton area. He worked in his father's pizzeria-restaurant and attended evening classes at Trenton High School. Later, he took special courses at the University of Pennsylvania. In 1950 Guido Luccarelli was drafted and served during the Korean War. He received an honorable discharge with the rank of sergeant.

For many years, Guido Luccarelli was known as the Italian voice of Trenton. He earned this distinction by setting up a radio program that proved to be enormously beneficial to Italian immigrants in the vicinity of Trenton. His community oriented broadcasts have also been instrumental in enhancing the Italian culture and image in the local community.

On one occasion after another, Guido Luccarelli could be counted on to help those in need. In 1977, he served as chairman for the Italian Earthquake Relief Fund and conducted a 12 hour live radiothon to raise funds for this important cause. He also served with distinction on the Florentine Flood Relief Fund and responded with great compassion to the Sicilian Earthquake.

In April 1978 Guido Luccarelli was appointed by the Government of Italy, by a Ministerial decree, to serve as the Vice Consul of Italy for Central and Southern New Jersey. In November of the same year, the Italian Government also conferred on him the title of "Cavaliere" in the Order of the Italian Star of Solidarity.

As Italian Vice Consul, Guido Luccarelli looks after the affairs of approximately 300,000 to 400,000 Italian residents in the 13 central and southern counties of New Jersey. He has a variety of duties, including keeping vital statistical records, renewing passports and visas, administering pensions and Social Security benefits for the retired and those Italian workers and widows who are entitled to them, developing cultural relations, stimulating beneficial economic activities, and promoting educational and social activities.

Mr. Speaker, for the past 40 years Guido Luccarelli's dedicated efforts have helped to secure jobs for many immigrants and have provided guidance to many new citizens of the Italian community in central and southern New Jersey. His numerous contributions to the Italian community have been commended on several occasions and it is entirely appropriate that the Fermi Federation will honor him on Saturday, October 18.

Guido Luccarelli's wife Josephine and his four children: Robert, Ronald, Anita and Maria have every reason to be proud on this memorable occasion. Mr. Luccarelli's many friends and admirers can also look with pride at an individual who has set such a fine example for others to emulate.

THE FREEING OF MR. PJETER IVEZAJ: PROGRESS IN YUGOSLAVIA, BUT MORE REMAINS TO BE DONE

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. BROOMFIELD. Mr. Speaker, I am delighted to tell you that Mr. Ivezaj is back in the United States. He has finally been reunited with his loved ones. Two other Americans are also out of Yugoslav jails. I appreciate the assistance of Yugoslav officials in freeing those United States citizens. I am grateful for their help.

Although progess has been made in winning the freedom of Mr. Ivezaj and two other United States citizens, Mr. Vjeroljub Radivojevic and Mr. Gradimir Hadzic, both of California, who had also been illegally imprisoned in that country, more must be done. How many more Americans of Yugoslav origin will be snatched from the streets of Belgrade? How many more innocent United States travelers of Yugoslav origin will be detained and denied consular access? How many more Americans will be questioned by police and harassed for no reason? Will there be other cases like that of Mr. Ivezaj in the future?

I look forward to working with the Department of State and the Yugoslav Government to ensure that illegal arrests of this kind never happen again.

I want to ensure that Yugoslavia is honoring its international commitments to human rights. In addition to respecting the rights of all the various ethnic groups in that country, the Yugoslav Government must also honor the human rights of former Yugoslav nationals who are now American citizens. Should they be denied the right to return to their birthplace because of their ethnic ties? Why deny them the right to visit their families and friends? In addition, that Government must learn to respect the privileges enjoyed by an individual traveling as an American citizen.

Under the Vienna Convention, Consular access is guaranteed to an individual detained or imprisoned by a foreign government. By denying that basic privilege of consular access, the Yugoslav Government is blatantly violating its commitment to that vital international accord.

I believe that the freeing of those three men is a step in the right direction. More, however, remains to be done. I am ready to do all that I can to resolve the problems associated with American travelers of Yugoslav origin in that country. I promise all of my colleagues who share my interest in human rights, and the rights of traveling Americans, that I will be watching Yugoslavia.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when sched-

uled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, October 16, 1986, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

No meetings scheduled.

HOUSE OF REPRESENTATIVES—*Thursday, October 16, 1986*

The House met at 12 noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Gracious God, our lives are filled with words—words of understanding, words of praise, words of hope. Help us, gracious God, to translate our words into deeds, our hopes into reality. Enable us to witness to our trust in You by demonstrating that the faith we profess may be active in deeds of love and concern in our lives. May Your blessing and benediction be with each of us this day and always. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. PORTER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. PORTER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 237, nays 120, answered "present" 1, not voting 74, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 753. Joint resolution making further continuing appropriations for the fiscal year ending September 30, 1987, and for other purposes.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2638) "An act to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987,

to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes".

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill and concurrent resolution of the House of the following titles:

H.R. 3415. An act to authorize the minting of coins in commemoration of the Bicentennial of the U.S. Constitution; and

H.Con. Res. 395. Concurrent resolution to correct technical errors in the enrollment of the bill H.R. 3838.

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 427. Joint resolution reaffirming our friendship and sympathy with the people of El Salvador following the devastating earthquake of October 10, 1986.

The message also announced that pursuant to Public Law 99-205, the Chair on behalf of the President pro tempore appoints Mr. Don C. Steffes, of Kansas, from private life, and Mr. Maxie D. Love, Jr., of South Carolina, from private life, to the National Commission on Agricultural Finance.

AUTHORIZING FUNDS TO PRESERVE OFFICIAL PAPERS OF JOSEPH W. MARTIN, JR.

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4244) to authorize funds to preserve the official papers of Joseph W. Martin, Jr., with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Senate amendment: Page 3, after line 2, insert:

SEC. 5. AUTHORIZATION OF KANSAS EDUCATIONAL SATELLITE VIDEO COMMUNICATIONS CENTER.

(a) The Secretary is authorized to provide financial assistance, in accordance with the provisions of this section, to pay the Federal share of the cost of construction, and related expenses, for the Kansas Educational Satellite Video Communications Center at the Kansas State University located in Manhattan, Kansas, to enable the Kansas State University to establish the Kansas Educational Satellite Video Communications Center in order to produce and disseminate television programming in subject areas of local, regional, national, and international importance.

(b) No financial assistance may be made under this section except upon an application at such time, in such manner, and containing or accompanied by such information, as the Secretary may reasonably require.

(c) There are authorized to be appropriated such sums, not to exceed $6,000,000, as may be necessary to carry out the provisions of this section. Funds appropriated pursuant to this section shall remain available until expended.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. JEFFORDS. Mr. Speaker, reserving the right to object, I do not intend to object, but I do so for the purpose of asking the gentleman from California [Mr. HAWKINS] to explain this bill.

As I understand it, this is the bill which has passed this body with respect to the library for Joseph Martin. As I understand it, the other body attached the amendment thereto relative to a video center at Kansas State University to do some work in the utilization of satellites to enhance education.

Is that correct?

Mr. HAWKINS. Mr. Speaker, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Speaker, that is the correct explanation. It was passed in this House without any opposition. It refers to the establishment of an institute to preserve the papers of the late Joseph Martin, Speaker of the House.

It was a bill authored by our distinguished colleague, the gentleman from Massachusetts [Mr. CONTE]. When the bill reached the other body, it was amended with an amendment offered by Senator DOLE pertaining to a video communications center. There was no opposition to the center in the other body or to the Conte bill as passed by the House.

We are, therefore, asking that the House concur in the Senate amendment and that, as amended, the bill be passed.

Mr. JEFFORDS. Mr. Speaker, further reserving the right to object, I am happy to yield to the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Speaker, I want to thank my good friend, the distinguished gentleman from California [Mr. HAWKINS] for getting this bill completed so quickly.

I also want to thank my friend from Michigan [Mr. FORD], the gentleman from Vermont [Mr. JEFFORDS], and my colleague from Missouri [Mr. COLEMAN]. Their help has really been invaluable on this bill.

Mr. Speaker, the House passed H.R. 4244 unanimously 1 month ago to preserve the official papers of our former Speaker Joseph W. Martin.

It comes back to us today with only one additional provision, added by the majority leader in the other body, to authorize the establishment of a satellite communications center at Kansas State University.

The bill is acceptable to the OMB and the White House.

In February, I introduced H.R. 4244 to authorize this fitting memorial to Joe Martin at the Stonehill College in North Eaton, MA, where all his official papers are stored.

The House considered and passed that bill on September 16. The Senate took it up and passed it on September 30 with the one addition I described earlier.

Mr. Speaker, the Martin Institute for Law and Society will be a regional and national center for scholarship and applied research on the development of domestic and foreign policy during Speaker Martin's career.

And what a career that was. For 42 years, from 1925 to 1967, Uncle Joe Martin represented my home State in this distinguished body.

His career spanned four decades of our Nation's history, and his personal papers dramatically reflect the struggles and rapid change America experienced during those years: The Great Depression, World War II, the Korean war, the cold war, the fresh and enthusiastic spirit of John Kennedy's Presidency, and the tragedy of the Vietnam war.

As I said when this bill passed last month, Joe Martin was a dear and valued friend. It is because of him that I serve on the Appropriations Committee.

In honoring Speaker Martin today we are following a tradition similar to the one that established the Carl Albert Congressional Research and Studies Center at the University of Oklahoma, and the John W. McCormack Institute of Public Affairs at the University of Massachusetts in Boston.

The only difference between this academic center and those others is that this time we are honoring a Republican. In fact, we are honoring the only Republican Speaker since Nicholas Longworth.

Mr. Speaker, I know of no opposition to this bill to honor a distinguished former Speaker of the House of Representatives, and I urge adoption of the bill.

Mr. MOAKLEY. Mr. Speaker, I rise in support of the motion offered by the distinguished chairman of the Committee on Education and Labor, to agree to the Senate amendment to the bill (H.R. 4244) to provide Federal assistance in connection with the establishment of the Joseph W. Martin Institute for Law and Society at Stonehill College.

This request clears this important measure for the President's signature. I commend the committee for acting promptly on the bill which was introduced by my friend from Massachusetts [Mr. CONTE] and myself.

Joe Martin was one of the ablest and most honorable men our State has ever produced. The Republican Party was quick to recognize his character and wisdom. Most of his 42 year career in the House was spent as his party's leader both as minority leader and as Speaker during the 80th and 83rd Congresses.

He served as National Chairman of the Republican Party in the early

1940's and was permanent presiding officer of the party's national conventions from 1940 to 1956.

The records of House committees are preserved by the National Archives. But the papers of our Speakers are customarily donated to colleges. Speaker Martin deposited his papers at Stonehill College in North Easton. The college is establishing an institute that will serve as an academic center for scholarship and research on the development of domestic and foreign policy during the important years that Joe Martin was a national leader.

Mr. Martin's official papers span more than a generation and are an important historical resource and Federal assistance to the college in carrying out its archival responsibilities with respect to these records is highly appropriate.

I commend the committee for presenting this matter to the House today.

Mr. JEFFORDS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

□ 1230

DRAWING A LINE IN THE DUST AND THROWING DOWN THE GAUNTLET

(Mr. SCHEUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHEUER. Mr. Speaker, in your 34 years of service here you must have met very few Members who are more devoted to the principles of our party and more devoted to you as an individual, but there comes a time when a man of principle must stand his ground, draw a line in the dust and throw down the gauntlet.

Mr. Speaker, as the Representative of New York's Eighth Congressional District, the home of the soon-to-be world champions, the New York Mets, I want the world to know that I have made a bet with you, 20 pounds of Flushing, Queens' finest lox and bagels and cream cheese on the Mets against five succulent Massachusetts lobsters on the Red Sox.

Mr. Speaker, all I can say is, may the best team win in this exciting World Series.

The SPEAKER. The Chair would comment on the fact that he has five boxes of oranges coming from California and he would be happy to accept the bagels and cheese after the World Series.

EATING HUMBLE PIE

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute.

Mr. DORNAN of California. Mr. Speaker, I come to the well with a heavy heart to eat a generous portion of humble pie. Never again will I refer to that great Boston team as anything but the Red Sox.

I will throw in for good measure with the crates of oranges, because of the incredible grace under pressure of young Steve Crawford, a crate of avocados. Now, I know you are not too familiar with them in Boston.

The SPEAKER. Can the gentleman make it asparagus instead?

Mr. DORNAN of California. Well, Mr. Speaker, I know that in your neck of the woods that it is usually Brie and Perrier and quiche; but let me throw in a few avocados, Calavo avocados, with the asparagus.

Now I retreat to the island of my birth, Manhattan, and join the prior speaker and tell you, good luck, you will enjoy never those lox with the avocados and the oranges.

WATER RESOURCES BILL OFFERS RELIEF TO MINNESOTA FLOOD VICTIMS

(Mr. PENNY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PENNY. Mr. Speaker, on September 21, 1986, the citizens of Rochester, MN, were hit by a weekend storm that dumped up to 7 inches of rain, causing substantial flooding and damage in this city of 60,000. Rochester residents remember all too well a similar storm in July 1978, which took the lives of five people and caused millions of dollars of catastrophic damage. These tragic events demonstrate the necessity of completing the Rochester flood control project, which, along with other important water projects, is authorized by H.R. 6.

The citizens of Rochester have been waiting for relief from the threat of flooding by the south fork of the Zumbro River for well over 20 years. During the 4 years I have served in Congress, providing this relief has been among my highest priorities. The residents of Rochester have acted responsibly to meet the local financial demands of the flood control effort by accepting a sales tax—the proceeds of which have been earmarked for the city's share of the project. Able leadership by the mayor, city council, and other local officials has well prepared Rochester to move forward with this project. I am proud that Congress is ready to accept the conference report on H.R. 6. For cities like Rochester, H.R. 6 is the culmination of years of effort to meet a pressing local need.

JIM BALUKEVICH CHOSEN FOR INDUCTION INTO WASHINGTON, DC, BOXING HALL OF FAME

(Mr. ROBERTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ROBERTS. Mr. Speaker, it is an honor and a privilege for me to inform my colleagues that a good friend of us all, Jim Balukevich, the gentleman who is responsible for getting Members of this body from here to there within the Longworth Building, has received a much deserved and respected honor.

Jim has received notice from Julian Whitestone, president of Washington, DC, Boxing Hall of Fame that he has been chosen for induction into the hall of fame. That induction will be at their annual banquet November 14 at the Touchdown Club.

Mr. Speaker, Jim truly reflects all of the attributes of a great champion, not only in the ring but in his personal life as well. He was an Army boxer and coach in Hawaii, is currently senior Olympic middleweight boxing champion of America, a vice president of the New Jersey Boxing Hall of Fame, founder of Washington, DC, Boxing Hall of Fame, and an active member of Washington's boxing commission.

I might add a parochial note, Mr. Speaker. He is also an honorary marshal of Dodge City, KS, and is the Marshal Dillon of the Longworth elevators. But, more than that, he has been a good friend to all of us and he is the kind of person that personifies the very best that the manly sport of boxing embodies. Jim, you are a true champion and we are all proud of your achievement.

Mr. Whitestone's letter follows:

THE WASHINGTON, DC,
BOXING HALL OF FAME, INC.,
Locust Grove, VA, September 26, 1986.

Mr. JIM BALUKEVICH,
Box 172, Ben Franklin Station, Washington, DC.

DEAR FELLOW MEMBER: It is with great pleasure and privilege that I officially advise you that you have been selected for induction into the Washington, D.C. Boxing Hall of Fame.

You have been chosen for this great honor by vote of the membership and have every reason to be extremely proud of such recognition by your friends and peers.

The award for your induction into the Boxing Hall of Fame will be presented at our annual banquet, November 14, 1986. You and your wife will be our guests for the evening at the Touchdown Club. Please accept my heartiest congratulations.

Most cordially,

JULIAN WHITESTONE,
President.

FOR THE HONOR OF HOLLYWOOD . . . FLORIDA

(Mr. SMITH of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SMITH of Florida. Madam Speaker, there must be a better way to promote, preserve, protect, and defend the honor of Tinseltown than by attempting a land grab under the guise of trademarking the name of Hollywood—a baldfaced try to expropriate a city of 150,000 people in my district, my hometown. Yet, this is exactly what that California locality wants to do.

If this effort were to be successful, where would it end?

My colleagues, heed my words. If Hollywood, Florida, falls, one of your cities may be next.

Beware, those of you who represent Springfield, or Charleston, or Columbia, lest your city lose its name.

Woe to you Hoosiers if your entire State is required to pay royalties to Indiana, Pennsylvania

Will Juneau, Wisconsin, become subservient to Juneau, Alaska?

If necessary, I will introduce legislation to protect the name of the city of Hollywood, Florida. Heed my warning Tinseltown. Cease and desist forthwith.

They who live by the trademark may die by the dissolution. All's fair in love and war, even by Hollywood standards.

Madam Speaker, I include the following letter from the city of Hollywood, FL:

CITY OF HOLLYWOOD, FLORIDA,
October 6, 1986.

Congressman LAWRENCE J. SMITH,
113 Cannon House Office Building, Washington, DC

DEAR CONGRESSMAN SMITH: The City Commission of Hollywood, Florida, requests that you register our firm opposition to any attempt by the Chamber of Commerce of Hollywood, California, to trademark the name "Hollywood" through the U.S. Patent Office.

The 60-year-old City of Hollywood, located in the 16th congressional district, is a legally incorporated city which prides itself on its beautiful beaches and facilities. Our merchants generally identify their products with "Florida" appearing somewhere on the product to advertise our location. However, there are many circumstances in which this is neither necessary nor appropriate. For example, our annual "Hollywood Jazz Festival" posters need no other descriptive words in our region.

We hope you will keep us informed regarding this situation and will help us in our efforts to ensure that the free use of our name is not denied us or our merchants' businesses.

Very truly yours,

MARA GIULIANTI,
Mayor,
SUZANNE GUNZBURGER,
Vice Mayor,
CATHLEEN ANDERSON,
GUY ROPER,
JOHN T. WILLIAMS,
Commissioners.

A HAPPY CHRISTMAS GIFT TO THE SPEAKER

(Mr. LEWIS of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS of Florida. Madam Speaker, for the fourth consecutive year, I come before you and my other colleagues at the end of a hectic session with some nice news.

This year from our friends at the T&M Ranch in Indiantown, FL, I am the happy deliverer of their 1986 Christmas gift to you—Antonio of Spain.

Over the next few weeks each of you, our colleagues in the Senate, The President and Mrs. Reagan, and Vice President and Mrs. Bush, will receive this Angel of the World Christmas ornament.

The fourth edition of this beautiful ceramic ornament was again sculpted by Laszlo Ispanky and bears the remarkable likeness of Troy Vasquez of Miami.

The angels of the world program has grown tremendously since I brought you Kathleen—the first ornament—4 years ago.

Branches of the Association for Retarded Citizens all over the country—in New York, Connecticut, Boston, Atlanta, Ohio, and throughout Florida—raise funds to help thousands of mentally and physically handicapped people.

It all starts at the T&M Ranch in Indiantown, where just 21 mildly handicapped adults conduct an annual labor of love, preparing and packaging the angle ornaments for the enjoyment of thousands.

Have a happy and prosperous holiday season.

WELCOME BACK, SENATOR GARN

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANNUNZIO. Madam Speaker, Father's Day won't occur until next June, but in my view the real Father's Day took place this week when Senator JAKE GARN of Utah returned to the U.S Senate.

On September 10, Senator GARN donated one of his kidneys to his daughter Susan who suffers from diabetes and without the kidney transplant would have died. In this era of modern medicine we perhaps take too much for granted when we read of transplants. But, there was a great risk to Senator GARN and that risk will remain because of problems of people functioning with only one kidney. Yet, despite the risks, Senator GARN thought only of saving the life of his daugther.

I am certain that any father would have made the same decision and many parents have donated kidneys to their sick children. But Senator GARN not only gave part of himself to save his daughter but he is now encouraging everyone to consider organ donor programs so that when they die, their organs can be used to give life to others.

Madam Speaker, it is good to see Senator GARN back in the Senate and I salute him for his courage and for making certain that his daughter will be alive to celebrate many more Father's Days with her father.

PLO TERRORISM

(Mr. GILMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GILMAN. Madam Speaker, terror has struck once again in the Middle East. Near the Western Wall of the temple in Jerusalem, as a swearing-in ceremony for young Israeli recruits ended, vicious cowards hurled grenades at the young soldiers and their families.

The soldier's parent who was killed and the scores who were wounded were not the only victims of this assault. Among the victims are peace and reconciliation in the Middle East.

The so-called moderate, mainstream PLO, which has now claimed credit for this attack, is out to kill the peace process and along with it the prospects for accommodation and reconciliation. The Israeli Government, in an effort to create an expanded voice for the Palestinian people in the management of their own affairs, has appointed new, local mayors in several West Bank towns. Yet, their public service is perceived as traitorous by the PLO, which prefers the maximum possible tension in that region.

Madam Speaker, terror needs to be recognized for what it truly is—the forcible, violent imposition of one's will on the innocent—leaving victims throughout the world. Civilized nations of the world need to maintain a constant vigil against terror. The world needs to wake up to this threat, and act in unison against those who use it against us all and one good way to begin to act together, Madam Speaker, would be for the leaders of the world to convene a summit against terrorism, as the House called for when it passed the resolution I introduced, House Resolution 547, asking the President to convene such a summit.

HUMAN RIGHTS AND TERRORISM

(Mr. FASCELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FASCELL. Madam Speaker, I want to join the previous speaker, the distinguished gentleman from New York [Mr. GILMAN] in his remarks. I fully support the call that he has made, which has also been fully supported in a bipartisan sense by the Foreign Affairs Committee. It is absolutely essential, in my judgment, and I agree with the gentleman from New York [Mr. GILMAN], that if we are going to deal with the problem of terrorism, regardless of where it is, the western world, the civilized world, has to stand together; otherwise, we will be forever hostages to any maniac who wants to kill people in order to make some kind of political point.

Madam Speaker, I would like to draw our colleagues' attention to the tragic events occurring daily in Chile.

President Augusto Pinochet reimposed a state of siege last month, beginning another chapter in the 13-year old saga of brutal government repression. Using the recent assassination attempt as justification, Pinochet declared "war" on the Chilean people, increasing the already oppressive restrictions on freedom in that country. Within hours of the siege declaration, tanks rolled into residential areas, several leaders of the sizable opposition were jailed and six publications, including conservative ones, were shut down. An opposition magazine editor and Pinochet foe was dragged from his home at dawn and shot, reportedly by members of Chilean security forces.

Pinochet is closing ranks within his government, increasingly demonstrating his unwillingness to facilitate a peaceful transition to civilian rule. Just last week, Pinochet removed a member of Chile's four-man ruling junta and ordered nine generals into retirement in an apparent move against potential opposition. The junta post was given to a Pinochet loyalist, the head of Chile's notorious secret police. Two of the generals who were retired had urged talks with civilians on a return to democracy.

Unfortunately, these latest developments should come as no surprise from a regime that has established a record of gross and flagrant human rights violations. Last month, Amnesty International, an organization recognized and respected worldwide for its dedication to human rights, issued a comprehensive account of the continuing and systematic violence of the Pinochet regime. It reported that the threat of arrest, abduction, torture, and even death is ever-present for thousands of Chileans, from church workers, human rights activists, and the urban poor to members of opposition organizations.

Today in Chile, journalists, trade unionists, and political leaders are imprisoned. Their only crime was publicly criticizing the government. Highly organized clandestine forces terrorize those persons involved in political, religious or human rights work, hoping to paralyze their activities. Police and security personnel have been implicated in these groups.

I am particularly concerned that the government is attempting to use the attack against President Pinochet and his entourage to justify repression of legitimate human rights activity. On September 8, President Pinochet announced that all persons involved in human rights work "should be expelled or locked up". Individuals associated with the Chilean Commission on Human Rights, the National Commission Against Torture and other human rights monitors have been arrested or threatened.

Amnesty International also documented that many people have been hurt and killed by the indiscriminate shooting by police, a practice prevalent in Chile. In one incident, two young girls, ages 5 and 7, were seriously injured when police opened fire in an alley where several children were playing. Mass raids, carried out like battle campaigns, often occur in the poor districts of Chile. Military and police surround an area, supported by armoured vehicles and tanks. Heavily armed soldiers, their faces blackened, enter the targeted areas after water, gas, and electricity are cut off. Homes are searched, often violently ransacked, and the residents are treated like cattle. The Chilean bar association has termed these raids illegal under Chilean law.

Another deplorable and continuing practice is torture. In Chile the use of torture is a deliberate and carefully devised craft, designed to extract information, to intimidate and create a climate of fear. According to Amnesty International, medical doctors are often present at torture sessions to revive detainees and advise whether they are strong enough to withstand further abuse. Specially-designed torture equipment techniques suggest a sophistication achieved only through training.

The victims of these abuses receive little protection from the Chilean judiciary. Habeas corpus does not apply to arrests under provisions of the state of siege. Courts, particularly military courts, appear to impede rather than pursue investigations of human rights violations. Due process is routinely denied. Hundreds of complaints by victims of human rights abuses have been submitted to the courts. With rare exception, these cases have made little progress.

There can be no other characterization of the behavior of the Pinochet government than warfare against its own people. Through these actions, he is causing great suffering and feeding the political extremes, thereby jeopardizing any transition to democracy—a sad counterpoint to the democracies that have flowered in recent years in neighboring Argentina and Peru and elsewhere in the region. Dictatorships have been the rule in Latin America, but the more recent and welcome trend is toward democratically elected governments. Chile remains an embarrassing exception, a fact made all the more disappointing when one considers Chile's rich democratic tradition. Since independence in 1810, democracy and respect for human rights had been the norm in Chile. Prior to the 1973 coup, Chile had enjoyed 42 years of uninterrupted democratic government. In this context, the Pinochet regime must be considered an aberration.

The majority of Chileans desire a speedy end to human rights abuses and transition to democratic civilian government. The current state of siege and the additional repressive measures can only serve to create further dissatisfaction and polarization among the Chilean public and set the stage for dangerous confrontation. Pinochet must not be allowed to delay the restoration of democracy nor to further repress the aspirations of the Chilean people for full freedom.

ELIE WIESEL—NOBEL LAUREATE

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Madam Speaker, this year's Nobel Peace Prize recipient is Elie Wiesel, the voice of those who survived the Nazi death camps and the first to use the word "holocaust" to describe those atrocities.

There are few survivors of the concentration camps, even fewer that speak out with such force about their experience. Nobody has matched his ability to communicate the scope and depth of the Holocaust as thoroughly as Elie Wiesel. He has tirelessly spoken around the world, sending the message, "never again".

Once we admit that unthinkable crimes have been committed, it becomes our duty to stand watch for such atrocities and to speak out whenever we see them.

There can be no silence surrounding the murder of millions in Kampuchea, the systematic starvation in Ethiopia or the persecution of the Baha'i in Iran.

Madame Speaker, as we congratulate Mr. Wiesel for this honor awarded to him by the Nobel Committee, let us honor him through working to make sure that man's inhumanity to man never goes unnoticed again.

THE STEELE DECISION

(Mrs. COLLINS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. COLLINS. Madam Speaker, yesterday, the U.S. Court of Appeals for the District of Columbia Circuit took a dramatic step backwards in the effort to promote greater minority and women's participation in the broadcasting industry.

The court remanded the Steele versus Federal Communications Commission case to the FCC without comment or instruction. The Steele case represents the most significant challenge to the Commission's longstanding policy of granting minorities and women a preferene in the issuance of a radio or television license.

I am deeply disturbed by the court's action. The FCC's preference policy was adopted in 1973 following a Federal appeals court decision. Since that time, Congress on several occasions has reaffirmed its support for this policy

The FCC's preference policy has enabled minorities and women to gain a minuscle toehold in the broadcasting industry. Blacks, for example, hold 14 television stations today, when they held none 13 years ago. Blacks operate 150 radio stations; a little more than a decade ago, they controled 30 stations. This is an important step in the right direction.

Greater progress remains however, to be made. Nationally, minorities hold only 2 percent of broadcast licenses, while women hold 9 percent. The issue today should not be a reexamination of the preference policy; rather, the question should be how can we better use the FCC's current programs, including the tax certificate and distress sales policies, to promote greater minority and women's participation in the broadcasting industry.

SOVIET GENOCIDE IN AFGHANISTAN

(Mr. DREIER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER of California. Madam Speaker, in an effort to demonstrate goodwill while obliterating its defenseless neighbor, the Soviets this week reannounced their intention to withdraw a few troops from Afghanistan. This announcement represented the latest Soviet attempt to capitalize on humanitarian gestures. Namely, the Soviets originally received front page coverage for this announcement nearly 3 months ago.

Whether or not the Soviets will follow through by removing troops is still undetermined. Also undetermined is the question of whether this will be a withdrawal or merely a rotation of troops. Whatever the answer, I think we can all agree that these Soviet troops need a rest. It has got to be tiring killing unarmed civilians while coming up with new and different ways of disguising toy explosives to maim children.

If there is a genuine withdrawal, we can only guess at what effect the elimination of three antiaircraft regiments will have on the effectiveness of the invasion. After all, what sorts of aircraft are the Soviets shooting at, flying carpets?

Madam Speaker, I hope we all will see through the transparency of the Soviet's latest propaganda announcement. We must continue to condemn the genocide being conducted aginst the peaceful nation of Afghanistan.

□ 1245

TRADE BILL IS MOST IMPORTANT

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Madam Speaker, day after day, American plants are closing or moving overseas. In the last 10 years my area lost 55,000 jobs and $1 billion in annual payroll. But what really bothers me about the 99th Congress and our great sin is that we keep seeing all this big legislation, but never the trade bill.

It is not just my district, it is many Members'. For example, last year in Shreveport, LA, AT&T closed a plant down that had 1,200 people and made residential telephones. They cannot sell those telephones anywhere else in the world. They moved over to Singapore and invested $30 million to make the same telephones and ship them back to us.

Here is our trade and tax laws: If they take the profits from the sales of those telephones and reinvest them back over in Singapore, they will not even pay taxes to Uncle Sam.

This Congress has failed in its most important mission, and that is the trade bill. No one is talking about it. We keep diverting it with all these sensational issues, but the meat, bread, butter, and potatoes of this Congress has not been addressed, and that is our trade legislation.

McNAMARA'S RIDE

(Mr. CONTE asked and was given permission to address the House for 1 minute.)

Mr. CONTE. Madam Speaker, if 1967 was the impossible dream, then 1986 must be chapter 2. After a historic championship series with the California Angels, it's on to New York for the brass ring. My good friend, the Senator from New York, has issued a challenge—one Long Island duck for a Boston lobster on the outcome. I was only too happy to accept, and at 2 o'clock on the Capitol steps this afternoon, we'll officially confirm the wager. But the good Senator from New York would have done well to first read the famous poem, "McNamara's Ride," before foolishly gambling away a dinner. Permit me, Mr. Speaker.

Listen New Yorkers and you shall hear,
of McNamara's Ride in this glorious year.
It was Eighteen October on NBC live,
hardly a fan is now alive
who suspected the Mets would take such a dive.
But the problems he faced were known well to Davey,
to whip the Sox he'd need help from the navy.
Ojeda and Gooden were healthy enough,
but Clemens and Boyd would have better stuff,
and Schiraldi would be there when the goin' got tough.
McNamara yelled, "The Mets march tonight,
so Gedman give your signs as a signal light;
One if by fast ball and two if by curve,
our Hurst will frazzle and fray the Mets' nerve
and take away all of their vigor and verve."
The Red Sox will hit and spread the alarm throughout the barnyard known as Shea's farm.
Then on to old Fenway, a friendlier clime',
where Rice, Boggs and Barrett will hit on the dime,
Just check with those Angels 'bout their visit last time.
You'll know the rest, in the books you will read
how the Red Sox regulars played with gusto and speed.
How the Mets tried to match them ball for ball
but could not hit over that Green Monster Wall;
how the Mets simply did not answer the call.
And so my dear Senator, Alphonse D'Amato,
I'm gonna tell you somethin', I think that you ought ta'
start cooking that duck, not too tough on the hide,
and I'll throw this lobster back into the tide,
for this is the message of McNamara's Ride.

FLORIO DENOUNCES OWENS-CORNING LAYOFFS OF 14,000 WORKERS

(Mr. FLORIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FLORIO. Madam Speaker, less than 2 hours ago, I met with an official of Owens-Corning Corp. who gave me some shocking news. He told me that over the next year, Owens-Corning will be laying off one-half of its work force—14,000 workers from all around the country will be losing their jobs and become unemployed. Most of these workers have not received any notification from Owens-Corning and thus probably do not even know their tragic fate. In my own district, almost 800 workers have already received the shocking news that they will be joining the ranks of the unemployed.

These layoffs are all the result of Owens-Corning's "successful" effort to thwart a hostile corporate take over attempt which has put the company into a debt totaling $2.5 billion. I am outraged and shocked by this game of corporate monopoly being played at the expense of 14,000 hard-working, dedicated Americans who are losing their jobs. The economic, human, and psycological costs which these employees, their families, and our entire Nation must bear because of these layoffs is vast and incalculable. And who has benefited by this, by this game? A handful of Wall Street corporate raiders, arbitragers and investment bankers who have pocketed a quick $30 million.

At the same time, Owens-Corning is shutting its plants in the United States, the company plans on continuing to operate its facilities in Mexico.

One would think that the Reagan administration is working to make America more competitive and prevent the export of jobs to foreign nations such as Mexico. However, this week, I was shocked when I learned that the Commerce Department is sponsoring a program whose effect is to export jobs to Mexico. I urge the Commerce Department to stop funding this program immediately for I believe it is nothing less than a fundamental betrayal of the public trust.

I call upon Owens-Corning to reconsider its decision and stop or at least sharply reduce the number of layoffs. For those workers the company is laying off, I urge Owens-Corning to begin negotiations immediately concerning termination benefits, job retraining, and termination benefits which it will provide. Finally, I call upon the Congress to reexamine current laws which permit corporate chiefs and financial barons to play games in which they pocket millions of dollars while many thousands of American workers lose their jobs.

LEGISLATION REQUIRING SECURITY BOND FOR FOREIGN PRODUCTS

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Madam Speaker, last week I introduced a bill, H.R. 5688, which has the potential for giving our manufacturers a more level playing field in competing with foreign products inside our own markets.

For months our industries have been torn apart by the controversy coming out of product liability insurance. Some of my producers are having to turn away from new product lines because they cannot afford the costs of insuring against the liability of introducing new, unproven products.

Yet, over 50 percent of our consumer markets are supplied by foreign producers who do not have to carry one penny of liability insurance. Right now, when buying a product from a foreign producer it is truly "buyer beware."

There is no legal recourse if a foreign product proves to be fraudulent or dangerous. My bill requires the posting of a security bond for 20 percent of the value of a shipment. This sum will stand behind the performance of the foreign product as surely as American insurers stand behind the performance of American products, or the manufacturer bears the responsibility.

We hope this will help our onshore producers. They need it.

DEFENDING AMERICA IS NOT SO UNPOPULAR

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Madam Speaker, we have not had very many Members come to the floor this morning and criticize President Reagan for Reykjavik or criticize the strategic defense initiative. Maybe they are beginning to hear the American people. Between 60 and 80 percent of the American people have indicated that they think that the Reagan approach of getting tough with the Soviets at Reykjavik was exactly what they wanted. Seventy-five percent of the American people have now said that they approve of SDI.

The President's popularity rating personally is near an all-time high at 73 percent. Defending America is not so unpopular after all.

DEPARTMENT OF LABOR EXECUTIVE LEVEL CONFORMING AMENDMENTS OF 1986

Mr. HAWKINS. Madam Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2864) to provide for a Deputy Secretary of Labor, an Assistant Secretary of Labor for Administration and Management, three additional Assistant Secretaries of Labor, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore (Mrs. KENNELLY). Is there objection to the request of the gentleman from California?

Mr. JEFFORDS. Reserving the right to object, Madam Speaker, I do so for the purpose of ascertaining the content of this bill.

It is my understanding that this is the legislation which was requested by the Secretary of Labor to do some minor adjustments within the structure of the Department of Labor. Essentially there is no significant cost whatsoever, but it is just for the purposes of being able to do some of the reorganization that he desires to do to improve efficiency.

Mr. HAWKINS. Madam Speaker, will the gentleman yield?

Mr. JEFFORDS. I am happy to yield to the gentleman from California.

□ 1255

Mr. HAWKINS. Madam Speaker, the ranking Republican member of the committee is correct. The other body has passed this bill, S. 2864.

The bill creates four additional Assistant Secretaries of Labor at the request of the Department of Labor. One of these Assistant Secretaries, the Assistant Secretary for Administration, already exists. This bill codifies that position and makes the position a Presidentially appointed position.

In addition, the bill upgrades the position of Under Secretary to Deputy Secretary.

The bill was considered in the House Education and Labor Committee. There was no opposition to this.

There was some discussion of the creation of some additional Secretaries which we have postponed at this time, and it is the recommendation of the chairman of the committee that we agree to the bill as passed by the Senate, and in that sense allow the Secretary of Labor to proceed with his reorganization.

Mr. JEFFORDS. Madam Speaker, further reserving the right to object, I want to thank the chairman of the committee for his consideration of the Secretary. I think his rather persuasive recommendations that the Secretary review the problems in OFCCP, will receive appropriate action. I deeply appreciate the cooperation of the chairman, as the Secretary does, for his open help on this piece of legislation.

Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mrs. KENNELLY). Is there objection to the request of the gentleman from California?

There was no objection.

The clerk read the Senate bill, as follows:

S. 2864

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Department of Labor Executive Level Conforming Amendments of 1986".

SEC. 2. (a)(1) Section 1 of the Act of April 17, 1946 (60 Stat. 91; 29 U.S.C. 552), as amended, is amended by striking out "Under" wherever it appears in such section and inserting in lieu thereof "Deputy".

(2) Section 5313 of title 5, United States Code, is amended by inserting at the end thereof:

"Deputy Secretary of Labor.".

(3) Section 5314 of title 5, United States Code, is amended by striking:

"Under Secretary of Labor.".

(4) Any reference to the Under Secretary of Labor in any law, rule, regulation, certificate, directive, or other document in force on the date of enactment of this Act shall be deemed to refer and apply to the Deputy Secretary of Labor.

(b)(1) Section 2 of the Act of April 17, 1946 (60 Stat. 91; 29 U.S.C. 553), as amended, is amended by striking out "five" in the first sentence of such section and inserting in lieu thereof "nine".

(2) Section 5315 of title 5, United States Code, is amended by striking:

"Assistant Secretaries of Labor (5)."

and substituting therefor:

"Assistant Secretaries of Labor (10), one of whom shall be the Assistant Secretary of Labor for Veterans' Employment and Training.".

(3) Any reference in any law, regulation, certificate, directive, or other document to

the Assistant Secretary of Labor for Veterans' Employment in force on the date of enactment of this Act shall be deemed to be a reference to the Assistant Secretary of Labor for Veterans' Employment and Training.

(c)(1) Section 3 of Reorganization Plan No. 6 of 1950 is repealed.

(2) Section 5316 of title 5, United States Code, is amended by striking:

"Assistant Secretary of Labor for Administration.".

(d) Section 5316 of title 5, United States Code, is amended by striking:

"Assistant Secretary of Labor for Veterans' Employment.".

(e) Subsection (c) of this section shall become effective on the day upon which the individual who is the incumbent of the position abolished by such subsection, as of the date of enactment, ceases to hold the position.

(f)(1) The incumbent in the position of Under Secretary of Labor on the date of enactment of this Act may serve as Deputy Secretary of Labor at the pleasure of the President after such date and the amendments made by subsection (a)(2) shall apply to such incumbent.

(2) The incumbent in the position of Assistant Secretary of Labor for Veterans' Employment on the date of enactment of this Act may serve as Assistant Secretary of Labor for Veterans' Employment and Training at the pleasure of the President after such date and the amendments made by subsection (b)(2) shall apply to such incumbent.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAWKINS. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on S. 2864, the Senate bill just passed, as well as on H.R. 4244, the bill on which a Senate amendment was previously concurred in.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

WILD AND SCENIC RIVERS ACT AMENDMENTS

Mr. VENTO. Madam Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4350) to amend the Wild and Scenic Rivers Act, and for other purposes, with a Senate amendment to the House amendments thereto, and concur in the Senate amendment to the House amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendment to the House amendments, as follows:

At the end of the bill, insert:

TITLE VII—TO PROVIDE RELIEF FOR CERTAIN DESERT LAND ENTRYMEN IN IDAHO

SEC. 701. The Congress finds that—

(1) certain developed and productive desert land entries in Idaho, identified in section 702 of this title, made pursuant to the Act entitled "An Act to provide for the sale of desert lands in certain States and Territories", approved March 3, 1877 (43 U.S.C. 321, et seq.), commonly known and hereinafter referred to as the "Desert Land Act", have been canceled by the Secretary of the Interior pursuant to holding limitation regulations promulgated pursuant to section 7 of the Act (43 U.S.C. 329);

(2) such regulations were retroactively applied to such desert land entries several years after the entries were allowed and more than two years after final development, proof and final payment for such entries were made, without giving the entrymen any opportunity to comply with the new interpretation of such regulations;

(3) cancellation of such desert land entries was harsh and unfair, and resulted in forfeiture to the Government of the developed entries and the monies paid for the land;

(4) such entrymen have fulfilled the requirements of the Desert Land Act in all respects other than such holding limitation regulations; and

(5) such entrymen, or their heirs or devisees, should have the entries reinstated and qualify for issuance of patents to carry out the objectives of the Desert Land Act.

SEC. 702. The names of the entrymen, and the serial numbers of the desert land entries generally known as the "Sailor Creek Project", to which this title applies, are as follows:

Bureau of Land Management

Entryman:	*Serial Number*
G. Patrick Morris	Idaho 013820
John E. Roth	Idaho 013905
Elise L. Neeley	Idaho 013906
Lyle D. Roth	Idaho 013907
Vera M. Noble (Now Baltzor)	Idaho 014126
Charlene S. Baltzor	Idaho 014128
George R. Baltzor	Idaho 014129
John E. Morris (deceased)	Idaho 014130
Juanita M. Morris	Idaho 014249
Nellie Mae Morris (deceased)	Idaho 014250
Milo Axelsen	Idaho 014251
Peggy Axelsen	Idaho 014252

SEC. 703. (a) The desert land entries identified in section 702 of this title are hereby reinstated. The entrymen, or the heirs or devisees of any deceased entryman, may—

(1) rescind any agreement which is prohibited by the Secretary of the Interior pursuant to regulations under section 7 of the Act (43 U.S.C. 329) within six months after the date of enactment of this title; and

(2) resubmit final proof of reclamation and cultivation of the land in accordance with the provisions of section 7 of the Act (43 U.S.C. 329) before December 31, 1988.

(b) The Secretary of the Interior shall issue patents to the entryman named in section 702, or their heirs or devisees upon compliance with the provisions of subsection (a) and the submission of satisfactory final proof.

SEC. 704. Notwithstanding any other provision of law, the property right prior to issuance of a patent to the land of any entryman identified in section 702 of this title, or the heirs, or devisees of any such entryman whose entry is reinstated in accordance with section 703 of this title, shall be a personal right, inheritable but not assignable. Any such entry may be mortgaged in the manner permitted by regulations promulgated by the Secretary of the Interior for the purpose of securing repayment of monies borrowed for development of the entry or for farm operating or crop production expenses.

TITLE VIII—BLACK REVOLUTIONARY WAR PATRIOTS MEMORIAL

AUTHORIZATION OF MEMORIAL

SEC. 801. The Black Revolutionary War Patriots Foundation is authorized to establish a memorial on Federal land in the District of Columbia and its environs to honor the estimated five thousand courageous slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution and to honor the countless black men, women, and children who ran away from slavery or filed petitions with courts and legislatures seeking their freedom. Such memorial shall be established in accordance with the provisions of H.R. 4378, as approved by the House of Representatives on September 29, 1986.

FUNDING

SEC. 802. The Black Revolutionary War Patriots Foundation shall establish the memorial with non-Federal funds.

TITLE IX—WOMEN IN THE ARMED FORCES MEMORIAL

SEC. 901. AUTHORIZATION OF MEMORIAL

The Women in Military Service for America Memorial Foundation is authorized to establish a memorial on Federal land in the District of Columbia and its environs to honor women who have served in the Armed Forces of the United States. Such memorial shall be established in accordance with the provisions of H.R. 4378, as approved by the House of Representatives on September 29, 1986.

SEC. 902. FUNDING

The Women in Military Service for America Memorial Foundation shall establish the memorial with non-Federal funds.

TITLE X—NEW RIVER GORGE ADMINISTRATIVE SITE

SEC. 1001. Section 1102(a) of the National Parks and Recreation Act of 1978 (Public Law 95-625) is amended by inserting the following after the second sentence: "In addition, the Secretary may acquire by any of the foregoing methods not to exceed ten acres outside the boundaries of the national river for an administrative headquarters site, and funds appropriated for land acquisition shall be available for the acquisition of the administrative headquarters site.".

SEC. 1002. Section 1112 of the same Act is amended by striking "$500,000" and inserting "$3,000,000".

Mr. VENTO (during the reading). Madam Speaker, I ask unanimous consent that the Senate amendment to the House amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Minnesota?

Mr. LAGOMARSINO. Madam Speaker, reserving the right to object, I will not object, but yield to the gentleman from Minnesota [Mr. VENTO] to explain the Senate amendment.

Mr. VENTO. Madam Speaker, the House acted to return H.R. 4350 to the other body on October 8, 1986.

Unfortunately, the bill has been returned with several amendments. Since all of the Members have heard the description of the main body of the bill dealing with wild and scenic rivers, I will not repeat that discussion.

The amendments made by the other body would do four things.

First, the bill would provide authority for the Secretary of the Interior to acquire up to 10 acres for an administrative headquarters at New River Gorge National River.

Second, the Secretary would be required to issue patents for 3,790 acres in the State of Idaho to 12 named individuals under authority of the Desert Land Act.

Third, titles VIII and IX contain language similar to bills previously reported by the Committee on House Administration and passed by the House. Title VIII authorizes the Black Revolutionary War Patriots Foundation to establish a memorial on Federal land in the District of Columbia and its environs in recognition of those blacks—slave and free—who fought for the American Revolution. This memorial will help us all recognize and remember their contributions. The language specifies that the memorial shall be established in accordance with the provisions of H.R. 4378 as approved by the House of Representatives on September 29, 1986, and that the memorial shall be established with non-Federal funds.

Title IX authorizes the women in Military Service for America Memorial Foundation to establish a memorial to honor women who have served in the armed forces of the United States. As we know, the contributions of women have been insufficiently recognized in our history. Yet women have long fought in our Nation's wars and served in our armed forces. This memorial will improve our understanding of, and appreciation for, their contributions. Again, the language specifies that the memorial shall be established in accordance with the provisions of H.R. 4378 as approved by the House of Representatives on September 29, 1986, and that the memorial shall be established with non-Federal funds.

Madam Speaker, I urge approval of this legislation.

Mr. FRENZEL. Madam Speaker, will the gentleman yield?

Mr. LAGOMARSINO. Further reserving the right to object, I yield to the other gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Madam Speaker, the two memorial bills that are attached to this bill are the ones that the distinguished gentlewoman from Ohio [Ms. OAKAR] and I discussed on the floor several times this week. They provide for a memorial for Black Patriots of the Revolutionary War and for Women Heroes in our military history. These are essential first-priority bills for the House Administration Committee, and we are grateful to the gentlemen who are managing this bill for the vehicle for our two worthy hitchhikers.

I congratulate the gentlewoman from Ohio, all the authors of the bills, and all Members responsible for the passage of the Black Patriots bill and the Women Military Heroes bill.

Mr. LAGOMARSINO. Madam Speaker, further reserving the right to object. I rise in strong support of the amended version of H.R. 4350 which we are considering today. As you know, this bill would provide wild and scenic designation for segments of several rivers in the United States. It would also provide studies for several other river segments for potential inclusion in the National Wild and Scenic Rivers System.

The House has considered and approved this measure on two previous occasions. It was recently amended and approved by the Senate. We are concurring with the Senate amendments. These include provisions to provide relief for certain desert land entrymen in Utah, to authorize the Black Revolutionary War Patriots and Women in the Armed Forces Memorials, to authorize the Secretary of the Interior to acquire lands for an administrative site for the New River Gorge National River in West Virginia and to increase the authorization of appropriations for land acquisition for New River Gorge National River.

I am not opposed to these amendments. I urge passage of this legislation in an effort to provide appropriate protection for several of our Nation's most scenic and recreational rivers.

Mr. BROWN of Colorado. Mr. Speaker, I rise in support of the bill and would like to take this opportunity to thank the gentleman from Minnesota, Chairman VENTO, and the gentleman from California [Mr. LAGOMARSINO] for their leadership in putting together this package of wild and scenic river bills. Because of their dedication, and the dedication of the Members who sponsored the individual river bills, we have before us a measure which I am convinced will benefit our Nation for generations to come.

The hard work demonstrated in the other body has enabled us to work out this important compromise. I would like to thank the gentleman from Colorado, Senator ARMSTRONG, who sponsored and worked diligently on the Senate Cache la Poudre bill, and Senators WALLOP and MCCLURE for their leadership on the Senate committee.

The bill includes language which will designate segments of the Cache la Poudre River as the first wild and scenic river in Colorado. Colorado and the entire Nation will enjoy the beautiful amenities that this river offers for many years.

The Cache la Poudre is one of Colorado's finest rivers. Beginning at the Continental Divide, the Poudre River flows east, through the Roosevelt National Forest, across the Colorado plains to join the South Platte River. The mainstem of the Poudre flows down from an alpine lake, through a high mountain valley, on through steep-walled canyons, into the cities of La Porte, Fort Collins, and Greeley, before draining into the South Platte River.

Named by early French fur trappers who buried a cache of gunpowder along its bank, the Cache la Poudre Canyon is the longest scenic river canyon on the entire eastern slope of the Rocky Mountains.

The river and its corridor support a broad range of outdoor recreation activities. It is an excellent cold-water fishery, designated by the State as wild trout water, and features excellent hiking, picnicking and camping. These activities are easily accessible to the nearly 2 million people living along Colorado's Front Range.

Since the 19th century, the Poudre River has been intensively managed for importation, storage, and conveyance of water. The earliest transmountain diversion structure in Colorado carries water from the headwaters of the Colorado River into the headwaters of the Poudre River. Numerous small reservoirs exist on tributaries to the Poudre River in these upper reaches.

The Poudre River language is a very important compromise. Leaders in the community, including members of environmental groups and representatives from water users associations, worked together to develop this proposal. Included in the group which drafted this compromise was Maggie Fox, of the Sierra Club, Barney White, of the Friends of the Earth, Chuck Wanner, from Preserve Our Poudre, Fort Collins Councilman Jerry Horak, Larimer County Commissioner Court Hotchkiss, Larry Simpson, secretary-manager of the Northern Colorado Water Conservancy District, and Gregory Hobbs, counsel representing the Northern Colorado Water Conservancy District.

Through months of tough negotiations, the panel worked until all of the issues were resolved. These community leaders have dedicated a great deal of their time and effort to prepare a balanced and thoughtful proposal for our consideration. The bill would enhance the long-term water and recreational needs of the entire region. The measure preserves existing water rights, while preserving the beauty of the river. The language in the bill makes clear that water development outside of the areas designated will be possible. It is a situation where a compromise helped all sides win.

The Poudre language has the support of the local and national environmental groups, the Northern Colorado Water Conservancy District, the city of Fort Collins, the city of Greeley, the county commissioners of Weld and Larimer Counties, and the entire Colorado delegation. I believe leaders in northern Colorado have worked hard and in good faith to bring us a balanced proposal.

Mr. Chairman, the portion of the river that is designated as "wild" is named after the Honorable Peter H. Dominick. Senator Dominick served a term in this House of Representa-

tives and went on to serve two terms in the Senate. There is not a more fitting tribute to Pete Dominick than to name a "wild," untamed river in the mountains of Colorado in his honor. He loved the Colorado mountains and the untamed beauty of the State. Senator Dominick played the key vote in the original legislation that called for a wild and scenic study of the Cache la Poudre River. I think our actions here today would have meant a great deal to him.

Ms. OAKAR. Madam Speaker, included as amendments to H.R. 4350 are two resolutions that are very important to me, House Joint Resolution 142 and House Joint Resolution 36. I have anxiously awaited the passage of both these bills.

House Joint Resolution 36, originally passed unanimously (405–0) in the House of Representatives on November 6, 1985. The resolution was referred to the other body and was reported favorably, as amended, on September 19, 1986. On October 14, 1986, House Joint Resolution 36 passed as an amendment to H.R. 4350.

Since the American revolution, women have served with distinction and honor. The official history of women in the U.S. Armed Forces began with the formation of the Army Nurse Corps in 1901. Currently there are approximately 1.4 million women veterans—these women fulfill many responsibilities with the same competence displayed by military men. This resolution would provide for a memorial to honor these women.

Establishment of this memorial has been favorably recommended by the National Capital Memorial Advisory Committee and shall be established with non-Federal funds. This memorial shall also be established in accordance with the standards set forth in H.R. 4378, as passed by the House on September 29, 1986.

I urge adoption of this resolution, as an amendment to H.R. 4350.

House Joint Resolution 142, was also added as an amendment to H.R. 4350, and is a resolution to authorize a memorial to honor the black revolutionary war patriots. This legislation originally passed unanimously (408–0) in the House and was referred to the other body. It was reported favorably, as amended, on September 19, 1986 and was passed by the other body as an amendment to H.R. 4350 on October 14, 1986.

As early as 1652, blacks were fighting as members of the militia in colonial America; thus beginning their history of achievement and heroism. Yet history books in American schools have for the most part omitted the contributions of black soldiers. This memorial to these black patriots is but a small tribute to their bravery and valor.

Establishment of this memorial has been favorably recommended by the National Capital Memorial Advisory Committee and shall be established with non-Federal funds. This memorial shall also be established in accordance with the standards set forth in H.R. 4378, as passed by the House on September 29, 1986.

I ask that my complete statement be inserted in the RECORD and I urge adoption of this resolution, as an amendment to H.R. 4350.

I would like to commend the distinguished gentleman from Minnesota, Congressman BRUCE VENTO, for the splendid work he has done on legislation relating to future commemorative works. The assistance and cooperation of Mr. VENTO and his committee is always appreciated and warrants high praise from myself and my fellow colleagues on House Administration.

As the distinguished Chairman of the Committee on Interior and Insular Affairs, Mr. UDALL, is aware, the Committee on House Administration through its task force on libraries and memorials has jurisdiction over authorization of commemorative works.

The Committee on House Administration supports passage of these memorial bills, as amendments to H.R. 4350. It should not, however, be construed as precedent for relinguishing jurisdiction of the Committee on House Administration over this and any future related matters. Once again, I urge support of this bill, as amended, and thank the distinguished Chairman, Mr. VENTO, for managing this bill on the floor.

Madam Speaker, I am honored to be one of the many bipartisan co-sponsors and would like to commend my colleagues, Representative NANCY JOHNSON and Senator ALBERT GORE for introducing this historic legislation that will authorize the erection of a memorial on Federal land in the District of Columbia and its environs to honor the estimated 5,000 courageous slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution and to honor the countless black men, women, and children who ran away from slavery or filed petitions with courts and legislatures seeking their freedom.

House Joint Resolution 142 passed the House, as amended, by Yea-Nay vote: 408–0 and was referred to the other body. On September 19, 1986 the House version of this bill was amended and reported favorably. On Friday, October 3, 1986, the other body passed House Joint Resolution 142 as amended.

History has robbed all Americans of the chance to learn about the contributions of black men and women during this important period. Most history books, in American schools, have omitted the contributions of black soldiers, from the Revolutionary War to the conflict in Vietnam. Only since the establishment of black studies departments in universities and secondary schools have we begun to learn of the important contributions that black people have made throughout our country's history. I look forward to the day that black history is taught in the classroom as part of the regular or mainstream American history curriculum.

Approximately 20 percent of the colonial population of 2.5 million were black, yet many of the white colonists were against arming and recruiting them. In fact, the official policy of the Continental Army under Washington, was to refuse the enlistment of any "stroller, negro or vagabond." The British, quick to take advantage of the divisive nature of racism and slavery, sought to enlist blacks in exchange for their freedom. As a result of this, and because there was a manpower shortage and a newly imposed draft, General Washington authorized the recruitment of "free negroes" desirous of enlisting in the Army. These enlisted black soldiers served in integrated units. Later in the war "black units" were formed. Slaves, although officially barred, were frequently used as substitutes in place of their masters to fulfill their service requirement.

By contrast, Continental Navy enlisted blacks. No State passed legislation barring blacks for naval service. Several States, in fact, paid bonuses to black crew members or granted freedom to known slaves.

Service in the colonial military units brought the rewards of freedom and land grants to some slaves but their contributions were soon forgotten after the war. None received formal recognition nor were any decalted national heroes. Fear of slave revolts remained a primary concern in the minds of many white colonists. The revolutionary fervor felt so strongly amongst the white members of the colonies did not transcend to the rights of their colonial born black brothers and sisters.

As early as 1652, blacks were fighting as members of the militia in colonial America, beginning their history of achievements and heroism throughout our country's history.

A memorial is but a small tribute too long in coming, to those black Americans who played an important but forgotten part in the founding of this country.

Madam Speaker, House Joint Resolution 36, which I introduced, will authorize the establishment of a memorial to honor the thousands of women who have served in our Armed Forces. On November 6, 1985, the House passed this bill, as amended, in a historic vote of 405 to 0. The other companion measure, Senate Joint Resolution 156 was introduced on July 10, 1985 by the distinguished chairman of the Veterans' Affairs Committee, Senator FRANK MURKOWSKI. House Joint Resolution 36, as amended by the other body, was reported out of the Energy and Natural Resources Committee on September 19, 1986, and passed October 3, 1986.

The Federal Government would provide the land in the District of Columbia or its environs for this memorial while the funding would come from private sources raised by the Women in Military Service for America Memorial Foundation.

Women have served in a variety of military occupations in the Armed Forces since the American Revolutionary War—where more than 20,000 women served.

Women also experienced combat action in the Civil War. The most famous female soldier of that time was Sarah Edwards who disregarded the customary social mores of the 19th century and performed the functions of spy, courier, nurse, and soldier for the Union Army. Other women such a Clara Barton also made their mark in history tending to the sick and wounded. Barton went on to establish both the Arlington National Cemetery and the Red Cross.

Women have not been considered official participants of the military services since the formation of the Army Nurse Corps in 1901 and the Navy Nurse Corps in 1908. Even in World War II, the urgency of defending our country gave reason to the male dominated military for womens' broader participation within the armed services. Performing a myriad of duties, women like pilot Cornelia

Fort (WASPS), provided their bravery and dedication to our country, some losing their lives in the process.

Contrary to popular belief, in all wars women have been killed, maimed, disabled, and injured psychologically. There are names of eight nurses listed on the Vietnam Veterans Memorial. However, that small number of dead does not represent the daily fear of death or injury.

The World War II mobilization brought 350,000 women into the service as well as many others who served in quasi-military support units. For example, the Womens Airforce Service Pilots (WASPS) engaged 800 female pilots, from applications of over 25,000, to ferry war planes around the world. Women also performed traditionally male tasks such as changing tires, repairing planes, and rigging parachutes. Women served as gunnery instructors, test pilots, air traffic controllers, naval air navigators, and air transport servers.

Many do not know that the first Womens' Army Corps [WACS] unit landed in Normandy 38 days after D-day. Furthermore, 65 women were taken captive as POW's from December 1941 to February 1945 on Corregidor. Nurses were also on the beachhead at Anzio.

In light of their distinguished service, women veterans have throughout history been largely overlooked by their male counterparts in the military and in the Government. With the passage of this legislation, their achievements will indeed be recognized by both esteemed bodies.

Even today there is very little research information available on female veterans. Today there are over 1.4 million female veterans. In the United States alone they account for over 4.1 percent of all living American veterans.

The story of women veterans in American history is one in which all women can take pride. They have indeed performed with valor and courage in the defense of their country. They have suffered the dangers and agonies of war in combat, combat support and combat service support in many regions of the world. In spite of this, womens' roles in the area of national defense in peacetime situations have remained limited.

We know that the issue of peace in the world is of particular importance to women as mothers, wives, sisters, and daughters. They have sacrificed their lives, the lives of their sons, husbands, brothers, fathers, and loved ones.

In this era of multibillion dollar defense systems and the constant threat of nuclear annihilation, all women, particularly women in the military, must pursue their interests in the areas of military strategy, policy, security, and strategic defense matters.

Men have historically made the political decisions that have led our country into wars. Women, in turn, have performed the support functions for the military—directly in the field performing duties such as medical and technological, et cetera, or indirectly by working in heavy industry, et cetera.

With the increasing number of women in the military, they must be ensured equality with their male counterparts especially in the areas of rank benefits, rights, and opportunities.

I believe that we are about 200 years late in honoring the participation of women in the military. Their efforts have for too long gone unnoticed. I hope that this memorial will help create a greater sense of national public awareness of their contributions. Women in the military have served as role models for all women in their struggle to attain equality.

I would also like to mention that this memorial is supported by the Department of Defense, the Army Nurse Corps, the Air Force, the U.S. Coast Guard, and the Marines. It is also supported by the National Capital Memorial Advisory Committee, the American Veterans Committee, the Vietnam Veterans of America, Veterans of Foreign Wars, the Defense Advisory Committee on Women and the Services, the American Nurses Association, and many other organizations.

Mr. LAGOMARSINO. Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. VENTO. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

AUTHORIZING ERECTION OF A MEMORIAL TO THE "AMERICAN ARMORED FORCE"

Ms. OAKAR. Madam Speaker, I ask unanimous consent that the Committee on House Administration be discharged from further consideration of the Senate joint resolution (S.J. Res. 43) to authorize the Armored Force Monument Committee, the United States Armor Association, the World Wars Tank Corps Association, the Veterans of the Battle of the Bulge, the 11th Armored Cavalry Regiment Association, the Tank Destroyer Association, the 1st, 2d, 3d, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, and 16th Armored Divison Associations, and the Council of Armored Division Associations jointly to erect a memorial to the "American Armored Force" on United States Government property in Arlington, Virginia, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

Mr. FRENZEL. Madam Speaker, reserving the right to object, I yield to the distinguished gentlewoman from Ohio [Ms. OAKAR], chairman of the Library and Memorials Subcommittee, to explain the legislation.

Following Ms. OAKAR I wish to associate myself with the remarks of the gentlelady from Ohio. I also want to salute the gentleman from South Carolina [Mr. SPENCE] and the gentleman from Mississippi [Mr. MONTGOMERY] for their leadership in managing this bill through to passage.

Ms. OAKAR. Madam Speaker, I thank the minority leader of our committee for yielding.

Madam Speaker, this resolution would authorize the establishment of a memorial to honor the American Armored Force. The Armored Force Memorial will give credit to 3 million American soldiers and marines who have served in hundreds of units for the past 70 years. The Armored Force embodies a unique concept of cohesion and teamwork. The combat capabilities of these men contributed greatly to the success of the American Armed Services—in the wars of this century and continuing today to deter aggression around the world. To neglect such memorialization would be to deny recognition to those millions who served our Nation loyally and willingly—sacrificing themselves in the name of freedom for all.

Madam Speaker, I would like to thank my distinguished colleague from South Carolina, Mr. SPENCE, and especially the distinguished Senator from South Carolina, Mr. STROM THURMOND, for introducing this joint legislation. I would also like to thank the 229 cosponsors of House Joint Resolution 167, the House version of this bill.

Madam Speaker, this memorial will be established with non-Federal funds and in accordance with the standards of H.R. 4378, as passed in the House on September 29, 1986, except as amended.

Madam Speaker, I also want to say that we have also passed today or actually yesterday memorials honoring the women who served in the armed services really since the Revolutionary War days and the black patriots who served in the Revolutionary War. We did not have an opportunity to discuss these memorials, but the fact is that we are, with our great work of the committee members, in particular my distinguished minority leader, the gentleman from Minnesota [Mr. FRENZEL] and others, able to complete this series of worthy memorials that I think really deserve creation, such as the Korean War Veterans Memorial, the women who served in the armed services, the black patriots who served in the military, and now this very important armored division.

Madam Speaker, House Joint Resolution 43 would authorize the establishment of a memorial on Federal land in the District of Columbia or its environs to honor the American Armored

Force. This bill would recognize all American soldiers and marines who have served in armored and mechanized units organized for armored ground combat. This concept was pioneered in World War I and kept alive by dedicated leaders of the U.S. Army whose vision led to the creation of the original Armored Force in 1940. This force was a major and significant contributor to victory in World War I, World War II, the Korean conflict, and the Vietnam conflict.

This bill was introduced by the distinguished Senator from South Carolina, STROM THURMOND. Senate Joint Resolution 43 passed in the other body on September 20, 1985. The House version of this bill, House Joint Resolution 167, introduced by Representative FLOYD SPENCE of South Carolina has 228 cosponsors in the House of Representatives thus showing strong bipartisan support for this measure.

The Armored Force Memorial will give credit to 3 million American soldiers and marines who have served in hundreds of units for the past 70 years. The Armored Force embodies a unique concept of cohesion and teamwork. The combat capabilities of these men contributed greatly to the success of the American Armed Services—continuing today to deter aggression around the world.

From its establishment in 1940, the Armored Force became a cornerstone of our Army's organization and its unique concept of fighting. The Army's Chief of Staff at that time, Gen. George C. Marshall, saw the need to expand the Army's readiness to face the impending war. He selected Brig. Gen. Adna R. Chaffee as the Armored Forces' first commander and challenged him to prepare the U.S. Army for armored warfare.

The Armored Force concept unique and proven successful in World War II has been ingrained in the Army and Marines in the four decades following the great victories of North Africa, Sicily, Italy, in France on the shores of Normandy, at the Battle of the Bulge, on into Germany and in the Pacific in the Phillipines and Okinawa. Combined arms teamwork in mobile warfare was an active element of warfare in Korea and Southeast Asia in the 1950's, 1960's, and 1970's as armored units of various branches contributed victory after victory of American and Allied forces engaged in ground warfare in Asia.

To neglect such memorialization would be to deny recognition to those millions who have served our Nation loyally and willingly.

Mr. FRENZEL. Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 43

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Armored Force Monument Committee, the United States Armor Association, the World Wars Tank Corps Association, the Veterans of the Battle of the Bulge, the 11th Armored Cavalry Regiment Association, the Tank Destroyer Association, the 1st, 2d, 3d, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, and 16th Armored Division Associations, and the Council of Armored Division Associations are authorized jointly to erect a memorial on United States Government property in Arlington, Virginia. The memorial shall be erected for the purpose of honoring and commemorating the "American Armored Force," including the members of such organizations and others who have served in armored units of the Armed Forces of the United States during World War I or World War II or in and near Korea or Vietnam, and the members of the Armed Forces who continue to serve with exceptional professionalism to maintain peace worldwide.

SEC. 2. (a)(1) The Secretary of the Interior shall select, with the approval of the national Commission of Fine Arts and the National Capital Planning Commission, a suitable site on United States Government property in Arlington, Virginia, upon which may be erected the memorial authorized in the first section. The Secretary of the Interior shall, if practicable and appropriate, select a site between the Arlington Memorial Bridge and the entrance to the Arlington National Cemetery and beside Memorial Drive.

(2) If the site selected is within the boundaries of the Arlington National Cemetery, the approval of the Secretary of the Army shall be attained.

(b) The design and plans for the memorial shall be subject to the approval of the Secretary of the Interior, the national Commission of Fine Arts, and the National Capital Planning Commission.

(c) The United States Government shall not incur any expense in connection with designing, planning, or erecting the memorial except expenses required to carry out the responsibilities set out in this section and sections 3 and 4.

SEC. 3. The authority conferred pursuant to this joint resolution shall lapse unless (1) the erection of the memorial is commenced within five years after the date of enactment of this joint resolution, and (2) prior to its commencement, the Secretary of the Interior has received an appropriate certification that funds are available in an amount sufficient, in the judgment of the Secretary, to insure completion of the memorial.

SEC. 4. The maintenance and care of any memorial erected under the provisions of this joint resolution shall be the responsibility of the Secretary of the Interior.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. FRENZEL

Mr. FRENZEL. Madam Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. FRENZEL. Strike out all after the resolving clause and insert in lieu thereof the following:

SECTION 1. ESTABLISHMENT OF MEMORIAL.

(a) IN GENERAL.—Subject to subsection (c), the organizations specified in subsection (b) are authorized jointly to establish a memorial on Federal land in the District of Columbia or its environs to honor members of the American Armored Force who have served in armored units. The memorial shall commemorate the exceptional professionalism of the members of the American Armored Force and their efforts to maintain peace worldwide.

(b) ORGANIZATIONS.—The organizations referred to in subsection (a) are: the Armored Force Monument Committee, the United States Armor Association, the United States Field Artillery Association, the World Wars Tank Corps Association, the Veterans of the Battle of the Bulge, the 11th Armored Cavalry Regiment Association, the Tank Destroyer Association, the 1st, 2d, 3d, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, and 16th Armored Division Associations, the Council of Armored Division Associations, and the National Association of Uniformed Services.

(c) STANDARDS.—The memorial shall be established in accordance with the standards set forth in H.R. 4378, as passed by the Senate with amendments on September 10, 1986, and further amended by the House of Representatives on September 29, 1986, except that section 6(b)(1) of H.R. 4378 shall not apply to the memorial.

SEC. 2. PAYMENT OF EXPENSES.

The United States shall not pay any expense of establishment of the memorial.

Ms. OAKAR (during the reading). Madam Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Minnesota [Mr. FRENZEL].

The amendment in the nature of a substitute was agreed to.

The SPEAKER pro tempore. The gentlewoman from Ohio [Ms. OAKAR] is recognized for 1 hour.

Ms. OAKAR. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I want to also thank the distinguished chairman of the House Administration Committee, the gentleman from Illinois [Mr. ANNUNZIO] for the leadership he has provided. This completes the work hopefully of our Task Force on Memorials and Libraries for this Congress. It was a newly created task force based on a subcommittee that was phased out some years back.

I really want to thank my distinguished chairman, the gentleman from Illinois [Mr. ANNUNZIO] and the others for the confidence they placed in us. I think we had a very, very hard working group. I want to just compliment all of the people who served on the task force with me and also compliment my staff who really put up with an awful lot from the other body and other places so that we could bring these memorials to the floor, and I thank them for all the great work they have done.

□ 1305

Mr. MONTGOMERY. Madam Speaker, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentleman.

Mr. MONTGOMERY. Madam Speaker, I want to briefly say I sup-

port this amendment and this legislation.

Madam Speaker, I rise to thank the gentleman from Minnesota [Mr. FRENZEL] for working with us on the different memorials. I know you have disagreed on one but you did it with style; and I want to thank the gentlewoman from Ohio [Ms. OAKAR] for her patience and for bringing these bills forward. It meant a lot to a number of Americans; well over 3 or 4 million Americans are affected by these memorials that have passed the last 2 days. I commend the gentlewoman for pushing ahead on this historical legislation.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. FRENZEL

Mr. FRENZEL. Madam Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. FRENZEL: Amend the title so as to read: "Joint resolution authorizing establishment of a memorial to honor the American Armored Force.".

The title amendment was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Ms. OAKAR. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on Senate Joint Resolution 43, the Senate joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

INDEPENDENT SAFETY BOARD ACT AMENDMENTS OF 1986

Mr. MINETA. Madam Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4961) "to amend the Independent Safety Board Act of 1974 to authorize appropriations for fiscal year 1987, 1988, 1989, and for other purposes", with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 4, after line 16, insert:

SEC. 7. AVIATION LIABILITY INSURANCE.

(a) The Secretary of Transportation and the Administrator of the Federal Aviation Administration shall—

(1) not later than March 1, 1987, submit an interim report, and

(2) not later than March 1, 1988, submit a comprehensive final report,

concerning the extent of and causes for the rapidly increasing costs to United States public use airport sponsors for general liability insurance coverage. Such reports shall consider the probable implications of such increasing costs on the future capacity of the airport runway and taxiway system of the United States, particularly at smaller airports, and shall include any recommendations of the Secretary and the Administrator for actions which the Federal Government might undertake to assist in ameliorating the liability insurance difficulties of such public use airport sponsors.

(b)(1) The Administrator shall, within sixty days after the date of enactment of this Act, contract with a nonprofit foundation to establish an information clearinghouse concerning general liability insurance coverage at such public use airports.

(2) The clearinghouse shall gather and distribute without charge to such airports information on premiums, coverage limits and insurance availability. All information generated by such clearinghouse shall be made available promptly to the Secretary and the Administrator for use as appropriate in the reports required under subsection (a) of this section.

(3) There shall be available for the purposes of this subsection $250,000 of funds appropriated for the Federal Aviation Administration for each of the fiscal years 1987 and 1988.

Mr. MINETA (during the reading). Madam Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. HAMMERSCHMIDT. Madam Speaker, reserving the right to object, under my reservation, I yield to the distinguished chairman of the Subcommittee on Aviation of the Committee on Public Works and Transportation to explain to the House the reason for his unanimous-consent request.

Madam Speaker, I yield to the gentleman from California [Mr. MINETA].

Mr. MINETA. Madam Speaker, on September 30, the House passed by voice vote a bill to reauthorize the National Transportation Safety Board for fiscal years 1987 to 1989. The Senate has now sent the bill back with one amendment. The amendment required the Department of Transportation to make a study of recent increases in the cost of liability insurance for airports. The amendment further directs the Department to establish a clearinghouse to gather information on the availability of liability insurance. The clearinghouse is to be established by contract with a nonprofit organization at a cost of $250,000 from funds otherwise appropriated to FAA.

This amendment is acceptable. We have learned of a number of instances in which small airports have been severely impacted by recent increases in liability insurance. The amendment added by the Senate will furnish some assistance to small airports in meeting liability insurance problems.

Otherwise the Senate has passed our legislation which provides the authorizations needed by NTSB to fulfill its responsibilities to investigate transportation accidents, determine their probable cause and make recommendations to prevent the tragedies from reoccurring. I urge my colleagues to support this important legislation.

Mr. HAMMERSCHMIDT. Madam Speaker, further reserving the right to object, as the chairman has indicated, this is virtually the same bill that this body passed on September 30. The only difference is that the other body added one provision dealing with the airport liability insurance problem.

As we all know, the liability insurance crisis has hurt many sectors of our economy. Some small airports have been particularly hard hit by the problem.

The additional provision added by the other body would simply authorize a study of the problem and would permit the establishment of a clearinghouse to help small airports deal with the problem.

In all other respects, the bill remains the same as the one we passed 2 weeks ago. It reauthorizes the National Transportation Safety Board [NTSB] and makes minor changes in its governing statute. The NTSB plays an important role in transportation safety by investigating accidents and making safety recommendations. This bill would help it continue this work.

Therefore, I urge the immediate adoption of this bill.

Mr. HOWARD. Mr. Speaker, I rise in support of this bill that authorizes the National Transportation Safety Board for fiscal years 1987, 1988, and 1989. This Senate amended legislation is very similar to the bill passed by the House 2 weeks ago.

Aside from an amendment pertaining to a study and establishment of an information clearinghouse on airport liability insurance, the original House bill and the Senate amended bill are identical. The Aviation Subcommittee chairman, Mr. MINETA, has described the basis of the Senate amendment and why the House should accept it, so I will not go over that ground again.

I would like to reiterate the need for this legislation. The NTSB needs the level of funding in this authorization in order to adequately carry out its important safety responsibilities of investigating and determining the cause of transportation accidents.

I urge my colleagues to vote "aye" on this important legislation.

Mr. HAMMERSCHMIDT. Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MINETA. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 4961, the bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

MODIFYING PREVIOUS ACTION OF THE HOUSE IN AMENDING SENATE AMENDMENT TO H.R. 5595, SSI IMPROVEMENT AMENDMENTS OF 1986, BY ACCEPTING THE SENATE AMENDMENT TO THE TITLE OF THE BILL AND INCLUDING AN ADDITIONAL AMENDMENT TO THE SENATE AMENDMENT

Mr. ROSTENKOWSKI. Madam Speaker, I ask unanimous consent that the previous action of the House in amending the Senate amendment to H.R. 5595 be modified by accepting the Senate amendment to the title of the bill and by including an additional amendment to the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment to the title of the bill and the House amendment to the Senate amendment, as follows:

Amendment to the title: Amend the title so as to read: "An Act to make permanent and improve the provisions of section 1619 of the Social Security Act, and for other purposes.".

House amendment to the Senate amendment: Redesignate section 8 as section 9; and after 7 insert the following new section:

SEC. 8. PAYMENT OF BENEFITS DUE DECEASED RECIPIENTS.

(a) IN GENERAL.—Section 1631(b)(1) of the Social Security Act is amended—

(1) by inserting "(A)" after "(1)";

(2) by striking out "by recovery from" where it first appears in the first sentence and all that follows down through "The Secretary (A) shall make" and inserting in lieu thereof the following:

"by recovery from such individual or his eligible spouse (or from the estate of either) or by payment to such individual or his eligible spouse, or, if such individual is deceased, by payment—

"(i) to any surviving spouse of such individual, whether or not the individual's eligible spouse, if (within the meaning of the first sentence of section 202(i)) such surviving husband or wife was living in the same household with the individual at the time of his death or within the 6 months immediately preceding the month of such death, or

"(ii) if such individual was a disabled or blind child who was living with his parent or parents at the time of his death or within the 6 months immediately preceding the month of such death, to such parent or parents.

"(B) The Secretary (i) shall make";

(3) by striking out "and (B) shall in any event" and inserting in lieu thereof "and (ii) shall in any event";

(4) by striking out "(i) the amount" and "(ii) an amount" and inserting in lieu thereof "(I) the amount" and "(II) an amount", respectively; and

(5) by striking out "clause (B)" and "clause (A)" in the last sentence and inserting in lieu thereof "clause (ii)" and "clause (i)", respectively.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply with respect to benefits payable for months after May 1986.

Redesignate section 9 as section 10; and after section 8 insert the following new section:

SEC. 9. TREATMENT OF CERTAIN COUPLES IN MEDICAL INSTITUTIONS.

(a) IN GENERAL.—Section 1611(e) of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(5) Notwithstanding anything to the contrary in the criteria being used by the Secretary in determining when a husband and wife are to be considered two eligible individuals for purposes of this title and when they are to be considered an eligible individual with an eligible spouse, the State agency administering or supervising the administration of a State plan under any other program under this Act may (in the administration of such plan) treat a husband and wife sharing a room or comparable accommodation in a hospital, home, or facility described in paragraph (1)(B) as though they were an eligible individual with his or her eligible spouse for purposes of this title (rather than two eligible individuals), after they have continuously shared such a room or accommodation for 6 months, if treating such husband and wife as two eligible individuals would prevent either of them from receiving benefits or assistance under such plan or reduce the amount thereof.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on the date of the enactment of this Act.

Mr. FRENZEL (during the reading). Madam Speaker, I ask unanimous consent that the House amendment to the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. FRENZEL. Reserving the right to object, Madam Speaker, I yield to the gentleman from Illinois [Mr. ROSTENKOWSKI].

Mr. ROSTENKOWSKI. Madam Speaker, yesterday the House agreed to take from the Speaker's table the bill H.R. 5595, the SSI Improvement Amendments of 1986, and agree to the Senate amendment thereto with an amendment. The earlier action of the House was flawed in that we did not act on the Senate amendment to the title of the bill. As a technical matter, we have to dispose of that amendment or we cannot return the bill to the Senate. My request is to accept the Senate amendment to the title of the bill.

In addition, I would further amend the Senate amendment by adding another provision to the bill that should have been included in the earlier unanimous-consent request. This is the provision that continues Medicaid coverage for married couples who live in a Medicaid institution and who lose such coverage because SSI regulations require that they be treated as separate individuals. This provision was in the original House bill, has a negligible cost, and like the earlier House amendment, it is acceptable to the other body.

Mr. BARTLETT. Madam Speaker, I support this bill and urge its passage.

Title II of the bill does provide, as we passed yesterday, the enactment of legislation that was introduced right at 2 years ago, and with the help of a lot of people on the Committees on Ways and Means and Education and Labor, and in the other body, it will pass.

The provision that we are adding is a good provision out of title I, and it should be added, and I congratulate the gentlemen from Texas [Mr. ARMEY] and [Mr. PICKLE] for their addition to this.

I am assured by the other body and by the administration that this has the support of both.

Mr. FRENZEL. Madam Speaker, under my reservation I yield to the other distinguished gentleman from Texas [Mr. ARMEY].

Mr. ARMEY. Madam Speaker, I would like to concur in the explanation. It is absolutely accurate. I think this is the kind of happy thing we can do in this body to reunite older Americans so that they can live out their years together by correcting a technical interpretation of law.

I want to compliment everybody who worked so hard in this body and the other.

Mr. FRENZEL. Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

A motion to reconsider was laid on the table.

ARTHUR R. MARSHALL LOXAHATCHEE NATIONAL WILDLIFE REFUGE

Mr. JONES of North Carolina. Madam Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 511) to change the name of the Loxahatchee National Wildlife Refuge, FL, to the Arthur R. Marshall Loxahatchee National Wildlife Refuge, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. YOUNG of Alaska. Reserving the right to object, Madam Speaker,

and I shall not object, I yield to the gentleman from North Carolina [Mr. JONES].

Mr. JONES of North Carolina. Madam Speaker, S. 511 would rename a national wildlife refuge in Florida after the late Arthur R. Marshall, a noted conservationist from Florida who devoted decades of his life to the preservation of the Florida Everglades. This bill is virtually identical to H.R. 1438, as introduced—a bill cosponsored by the entire House delegation from Florida. Arthur Marshall received numerous conservation awards during his lifetime, including "Conservationist of the Decade" from the Florida Wildlife Federation. This bill is noncontroversial and has broad bipartisan support. I, therefore, urge my colleagues to unanimously support its passage.

Mr. YOUNG of Alaska. Under my reservation, Madam Speaker, I yield to the gentleman from Florida [Mr. LEWIS].

Mr. LEWIS of Florida. Madam Speaker, the Arthur R. Marshall Loxahatchee National Wildlife Refuge is certainly a very precious jewel that we should preserve and be adequately named.

As distinguished members of the Committee on Merchant Marine and Fisheries stated earlier this year, this bill changes the name of the Loxahatchee National Wildlife Refuge in Palm Beach County, FL, to the Arthur R. Marshall Loxahatchee National Wildlife Refuge.

This legislation honors the memory of an individual who contributed to the enhancement and protection of one of our greatest national treasures, Florida's natural environment.

The Loxahatchee National Wildlife Refuge was established in 1951 for the purpose of managing and protecting a portion of the Florida Everglades and its native species of wildlife. This area, which encompasses 220 square miles, is one of the largest freshwater marshes in North America.

Arthur R. Marshall was a pioneer in environmental conservation and served as an adviser to three Florida Governors, and worked for the U.S. Fish and Wildlife Service for 15 years.

Art Marshall waged one conservation battle after another in the interests of what was good for Florida and for the country. Many of his ideas and initiatives have today been put into constructive action.

With Art Marshall's death early last year, it is highly appropriate that an example of the habitat and natural systems that he diligently worked to preserve should be his name.

I and my Florida colleagues urge passage of this very important measure.

Mr. YOUNG of Alaska. Madam Speaker, I rise in support of S. 511, a bill that would add the name of Arthur R. Marshall to the Loxahatchee National Wildlife Refuge.

I understand that Mr. Marshall throughout his life was an avid conservationist, respected by his peers, and active in the fight to conserve Florida's valuable fish and wildlife resources and their environment.

The addition of Mr. Marshall's name to this refuge is a justifiable tribute to his dedication to the conservation of our natural resources.

I want to commend Congressman LEWIS and the other members of the Florida delegation for their work with similar legislation in the House earlier this session. Mr. Speaker, I urge the adoption of S. 511.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 511

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Loxahatchee National Wildlife Refuge, in the State of Florida, shall hereafter be known and designated as the "Arthur R. Marshall Loxahatchee National Wildlife Refuge". Any reference in any law, regulation, map, document, record, or other paper of the United States to such wildlife refuge, shall be held and considered to be a reference to the "Arthur R. Marshall Loxahatchee National Wildlife Refuge."

□ 1315

Mr. YOUNG of Alaska. Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mrs. KENNELLY). Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION MARINE FISHERIES PROGRAM AUTHORIZATION ACT OF 1985

Mr. JONES of North Carolina. Madam Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 991) to provide authorization of appropriations for certain fisheries activities, with a Senate amendment to the House amendment and concur in the Senate amendment to the House amendment with amendments.

The Clerk read the title of the bill.

(For Senate amendment to the House amendment, see proceedings of the Senate of yesterday, October 15, 1986.)

The Clerk read the House amendments to the Senate amendment to the House amendment as follows:

In the first sentence of section 303(d) of the Magnuson Fishery Conservation and Management Act (as proposed to be amended by section 105(b) of the Senate amendment), strike out "National Marine Fisheries Service personnel" in paragraph (1) and insert "Federal employees".

Section 205(d) of the Senate amendment is amended by striking out subparagraphs (E) and (F) and inserting the following:

(E) two members-at-large with demonstrated expertise in fresh-water and inland commercial fisheries and who are not residents of the states of the Alaska, Pacific, Southeast, or Northeast regions; and

(F) one member-at-large who is either a person professionally engaged in the dissemination of information pertaining to the nutritional benefits and preparation of fish and fish products or a person who is a member of an organized labor union and has expertise in the United States fisheries.

Insert the following new sentence at the end of section 206(c) of the Senate amendment: "In addition, the National Council may not promote the consumption or purchase of a single or group of similar fish species (such as members of the same genera); except that the Council may use illustrations of a single or group of similar fish species in the course of promoting the generic consumption of fish and fish products."

In the second sentence of section 209(a) of the Senate amendment, after "available" insert ", to the extent provided for in appropriation Acts,".

Strike out paragraph (1) of section 209(b) of the Senate amendment and insert the following:

(1) the moneys transferred to the Fund under section 2(b)(2) of the Act of August 11, 1939 (commonly known as the Saltonstall-Kennedy Act; 15 U.S.C. 713c-3(b));

Strike out subsection (e) of section 209 of the Senate amendment and insert the following:

(e) AMENDMENTS TO THE SALTONSTALL-KENNEDY ACT.—Subsection (b) of section 2 of the Act of August 11, 1939 (15 U.S.C. 713c-3(b)), is amended—

(1) by inserting "(1)" before "The Secretary of Agriculture";

(2) by striking out "separate fund" and all that follows thereafter and inserting in lieu thereof the following: "separate fund only for—

"(A) use by the Secretary—

"(i) to provide financial assistance for the purpose of carrying out fisheries research and development projects approved under subsection (c), and

"(ii) to implement the national fisheries research and development program provided for under subsection (d); and

"(B) the provision of moneys, subject to paragraph (2), to carry out the purposes of the Fisheries Promotion Fund established under section 208(a) of the Fish and Seafood Promotion Act of 1986."; and

(3) by adding at the end thereof the following new paragraph:

"(2) There are transferred from the fund established under paragraph (1) to the Fisheries Promotion Fund referred to in paragraph (1)(B) $750,000 in fiscal year 1987, $3,000,000 in each of fiscal years 1988 and 1989, and $2,000,000 in fiscal year 1990.".

Paragraph (4) of section 304(c) of the Senate amendment is redesignated as paragraph (5).

The second paragraph (3) of section 304(c) of the Senate amendment is redesignated as paragraph (4).

Strike out subparagraph (D) of section 304(c)(3) of the Senate amendment and insert the following:

(D) has entered into an interstate cooperative fishery management agreement and has in effect an interstate fisheries management or interstate fisheries research program.

Strike out section 413 of the Senate amendment.

Strike out section 414 of the Senate amendment.

Strike out section 412 of the Senate amendment.

At the end of section 302 amend the next section heading to read as follows:

"SEC. 303. DEFINITIONS."

At the end of section 410 amend the next section heading to read as follows:

"SEC. 411. INCIDENTAL TAKING OF DEPLETED MARINE MAMMALS."

Mr. JONES of North Carolina (during the reading). Madam Speaker, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. YOUNG of Alaska. Reserving the right to object, Madam Speaker, I would like to notify the House that the minority has no objection to this request, nor to the request that the bill be considered at this time.

Madam Speaker, I rise in support of the bill and the committee amendment before us and urge their adoption.

This bill is a comprehensive collection of fisheries legislation that has been passed by the House during this Congress. We are passing this bill with a committee amendment to resolve some technical difficulties that have been identified, and the intent is that the bill with the amendment will be accepted by the other body so that it can be forwarded to the President.

The bill consists of four titles. Title I includes a reauthorization of the Fishery Conservation and Management Act and numerous amendments to that act. These amendments were reported by the Committee on Merchant Marine and Fisheries on June 10, 1985, in H.R. 1533, and a discussion of these amendments can be found in House Report 99-165. That bill subsequently passed the House as part of S. 991 in August 1986. The bill that we are passing today deletes certain of those amendments as part of an agreement with the other body.

Title II of the bill establishes a new National Fish and Seafood Promotional Council and gives the fishing industry the authority to establish voluntary self-funded local marketing councils. The provision providing for industry-established councils was passed by the House as H.R. 2935. The national council was included by the other body. The purpose of these marketing entities is to promote the generic consumption of fish and seafood. As mentioned, the local councils will be self-funded by the commercial fishing industry. The national council will be funded through receipts under the Saltonstall-Kennedy program which consists of a portion of the duties imposed on foreign fish products being imported into the United States. As a result, this bill calls for no new Federal expenditures.

Title III of the bill establishes the Interjurisdictional Fisheries Act and repeals the existing Commercial Fisheries Research and Development Act. The language in this title has been considered by the House on previous occasions. Certain changes were made in the title to recognize that various States may engage in a variety of cooperative efforts with the Federal Government. However, the intent of the title—that Federal grants for fisheries be endowed only where there is a clear Federal role—has not been changed by the language in this title.

The final title of the bill consists of numerous minor authorizations that have been passed by the House on previous occasions, including two provisions that are strongly supported by the administration. One of these, which involves transfer of Fishermen's Protective Act functions from the Department of Commerce to the Department of State, requires further clarification. The language included in S. 991 was submitted by the administration to effect the transfer. We also intend that the transfer encompass all assets, liabilities, contracts, and funds—both obligated and unobligated—that previously were under the authority of the Secretary of Commerce. Unexpended funds should be used only for the purposes authorized, although we expect that these funds may be used to accomplish the transfer. In sum, both the administrative functions under the act and the funds associated with those functions and any accounts established under the provisions of the act are to be transferred to the Department of State.

Madam Speaker, the purpose of section 410 of this bill is to clarify certain ambiguous terms and conditions in a 1977 agreement with the Coast Guard to transfer certain tracts of Coast Guard property to Koniag, Inc., pursuant to Public Law 92-203. First, it clarifies that welding activities at a proposed ship repair facility that do not produce harmful electromagnetic interference with Coast Guard communications facilities are permitted. Second, it confirms title in Koniag for the wharf known as the "old shipyard" on Women's Bay near Kodiak, AK. Third, it confirms an easement over certain Coast Guard property to guarantee access to certain landlocked tracts of land conveyed to Koniag under the agreement. Finally, it guarantees the Coast Guard review of the construction of, and access to, a barge-landing facility to ensure it is available for Coast Guard use.

This section is merely intended to carry out the purpose of the 1977 agreement and the intention of the parties to the agreement. If not clarified, the issues addressed in this amendment would be left to the courts to decide. That legal process would take years and Koniag, Inc., the regional Native corporation taking title to these lands under the agreement, may be denied the full use and benefit of those lands as intended by Public Law 92-203.

It does not add any cost and will not convey additional lands to the corporation unintended by the original agreement. The Coast Guard contracted out a study in 1983 when the repair facility project was proposed to determine welding interference with their communications. The study concluded that, if properly installed, this equipment would not produce harmful interference.

Madam Speaker, while I believe that this is an excellent bill that deserves approval by the House, I note with some sadness that one item is not included. This is language that would establish a program for assessing, monitoring, and controlling the use of driftnets by foreign fishermen on the high seas. The provisions of this element of the package were those found in S. 2611 in the Senate and H.R. 5208 in the House. They were dropped by the other body as a result of objections received from fishermen in New England and from the Administration.

The fact that these provisions were dropped to me represents a case of being penny-wise and pound-foolish. This body has on numerous occasions addressed the problem of the taking of salmon and marine mammals on the high seas by foreign fishing vessels. The language that we hoped would be included would have provided basic data needed to assess the magnitude of these interceptions and would have established a zone to protect seabirds off the coast of Alaska. We made every effort in developing language to ensure that the concerns of fishermen in other parts of the United States were taken care of. As a result of this

language not being included in the bill, we will go for at least another year with no opportunity to discover how many of our resources are being taken by foreign fishermen. I hope that the Members of this body agree with me that something must be done to correct this situation and that we will have your support next year when legislation of this nature is again introduced.

Madam Speaker, as I said earlier, this is a worthwhile bill that was developed through the cooperative efforts of a number of Members of the House. I want to commend the gentleman from North Carolina [Mr. JONES] who is chairman of the Merchant Marine and Fisheries Committee, the gentleman from Louisiana, [Mr. BREAUX], the gentleman from Massachusetts [Mr. STUDDS], and the staff of the committee and subcommittees for the work they have done in bringing this bill before us today. Madam Speaker, I urge adoption of the bill with the amendment.

Mr. JONES of North Carolina. Madam Speaker, will the gentleman yield?

Mr. YOUNG of Alaska. Further reserving the right to object, I yield to the gentleman from North Carolina.

Mr. JONES of North Carolina. I thank the gentleman for yielding.

Madam Speaker, the bill now before us, S. 991, as amended, represents much of the fisheries legislation undertaken by the Committee on Merchant Marine and Fisheries during this Congress. Many of its provisions have been previously approved by the House as separate bills. In addition, nearly every item in this measure was passed by the House under suspension of the rules on August 12, 1986.

Title I of the Senate amendment amends and reauthorizes the Fisheries Conservation and Management Act of 1976. The 1976 act is the most important piece of Federal fisheries legislation and asserts U.S. authority to manage fisheries resources out to 200 miles at sea. Title I is nearly identical to S. 991, as passed by the House in August, with few exceptions.

Specifically, Senate amendment to the House amendment to S. 991:

Reauthorizes the Fisheries Conservation and Management Act at existing levels adjusted for inflation through fiscal year 1989;

Requires members appointed to the regional fishery management councils to be knowledgeable and experienced with regard to fishery conservation and management;

Requires the Secretary to cooperate with the fishery management councils in carrying out fishery research activities;

Clarifies that persons against whom a civil penalty has been assessed under the act may obtain review of that assessment by filing a notice of appeal within 30 days to the Secretary, Attorney General, and the appropriate U.S. attorney;

Allows maritime liens to be imposed on vessels which are assessed final civil penalties for violations of the act;

Requires administrative reports to be submitted to the Congress prior to the chartering of fishery research vessels in the Atlantic during fiscal years 1986 and 1987.

In addition to the above, the Senate amendment would: First, require that a foreign fishing nation, as a condition of receiving a foreign fishing permit, provide certification that its vessels have met the foreign nation's fishing vessel safety standards; second, require the Secretary of Commerce to establish health and safety standards for the quartering of U.S. fishery observers; third, delete existing provisions which waive the fishery observer requirement if health and safety conditions aboard foreign fishing vessels are inadequate; and fifth, modify the time period required for Federal review of fishery management plans.

For a legislative history of this title, the committee report on H.R. 1533 (House Report 99-165) should be consulted. In view of the fact that the provisions regarding observer safety in section 103 of the bill were not included in H.R. 1533, I would like to clarify the committee's understanding regarding this provision. First, the amendment would require that as a condition of receiving a foreign fishing permit, a nation would first have to provide certification that its vessels meet all applicable safety standards of that country. If the vessel did not meet such standards, the permit for that particular vessel would be denied. The provision also directs the Secretary of Commerce to develop and promulgate health and safety standards for the carrying out of observer functions on board foreign vessels. It is the committee's intent that if the observer finds that foreign vessels do not meet that nations own domestic safety standards or the standards promulgated by the Secretary that the observer would notify the U.S. Coast Guard.

In turn, the Coast Guard would inspect the vessel to ensure that it meets such requirements. If, in the view of the Coast Guard or the National Marine Fisheries Service, the vessel is found not to meet such requirements, the vessel's permit would then be suspended, the observer removed, and fishing operations by that foreign vessel would cease until such time as remedial actions have been taken. When such actions have been taken, the permit could be reissued and an observer again placed on the vessel prior to the beginning of fishing operations.

Title II of the amended bill is the Seafood Marketing Councils Act. This act would allow the seafood and fishing industry to design, approve, fund and implement seafood marketing councils. This title is nearly identical to H.R. 2935 as passed by the House in December 1985. The Senate amendment would, however, add a new provision to title II which would create a National Seafood Marketing Council. This Council would consist of a 15-member board and would operate on Federal funds. It is the committee's firm belief that the National Council should not engage in species-specific or like species-specific promotion activities. Rather, it is the intent of Congress that this Council use its resources to promote the consumption of fish, fish products, and seafood in the generic sense only. The House amendment retains the same level of funding that was provided for in the Senate amendment—$750,000 in fiscal year 1987, $3 million in fiscal years 1988 and 1989, and $2 million in fiscal year 1990. However, the House amendment provides that the funding source should be the existing moneys that accrue to the Saltonstall-Kennedy [S-K] Fund.

It is the committee's intention that these moneys shall be transferred to the seafood marketing fund and that the ultimate expenditure from the fund is subject to the normal appropriations process. It is also the committee's intent and understanding that this transfer will not effect the current programs carried out under the S-K Program including the projects carried out by the National Marine Fisheries Service and the industry grant program. It is also the committee's belief that a representative of a consumer group should be placed on the National Council and hence the amendment addresses the composition of the Council. With respect to the regional marketing councils, more information can be found in House Report 99-420.

Title III of this act would establish the Interjurisdictional Fisheries Act of 1986. This title repeals the Commercial Fisheries Research and Development Act—instead, it authorizes a program whereby the States are able to use matching Federal funds for fisheries programs where direct and legitimate Federal and State interests exist. This act would also prohibit the use of Federal funds for fish and fish product promotion. This legislation is nearly identical to H.R. 1028 which passed the House under suspension of the rules on July 29, 1985. More information on this measure can be found in House Report 99-20.

The Senate amendment to this measure relaxed the conditions that a State must meet in order to qualify for funding under this act. The House amendment makes these requirements more stringent by requiring that certain States, in addition to simply

having an interstate fishery management agreement, also have in place suitable interstate fishery management plans or interstate fishery research plans. It was and remains the committee's intent to encourage interstate and State-Federal cooperation as it relates to fishery research, management, and enforcement.

It is the committee's intent that the Secretary, before approving funding for certain States not qualifying for the normal apportionment of funds to ensure that effective and legitimate cooperative fishery arrangements are in place. It is the committee's intent that States without such agreements should not qualify for or receive funds under subsection 304(c)(3) of this act.

Section 401 of title IV of the Senate amendment includes a general authorization of appropriations for marine fisheries programs within the National Oceanic and Atmospheric Administration. This language is identical to authorizing legislation passed by the House as a part of S. 991.

Section 402 of this title would reauthorize section 4 of the Anadromous Fish Conservation Act. Section 4 authorizes a Federal-State cost-sharing program for research, development, and management necessary to support anadromous fish, that is, those fish that migrate from the ocean to freshwater to spawn. Because of their highly migratory nature, these fishes—such as shad, striped bass, Pacific and Atlantic salmon—pass through the jurisdiction of many States, U.S. Federal waters, the waters of other nations, and international waters.

If such resources are to be managed throughout their range, a coordinated approach to research and management must be taken. By coordinating State efforts, section 4 of the Anadromous Fish Conservation Act insures that redundancy is minimized and that the maximum use of data and the resource—the fish—can be achieved.

Under the Anadromous Fish Act, the Federal share for approved projects is 50 percent, except in cases where a multi-state project is approved by the Secretary, in which case it is 66⅔ percent. In the event that a project supports an interstate fishery management plan, pursuant to an interstate compact, the Federal share may be up to 90 percent. In any case, the State matching grant means that Federal dollars can double their impact compared to those invested in strictly Federal programs.

This program is administered jointly by the U.S. Fish and Wildlife Service with jurisdiction over sport fishery projects and by the National Marine Fisheries Service with jurisdiction over commercial fishery project. The National Marine Fisheries Service has noted that over 90 percent of the funds expended under this program support fisheries under Federal management, or fisheries that are subject to international treaties, such as the recently concluded Pacific Salmon Treaty.

The Anadromous Fish Conservation Act should be reauthorized. The States are essentially performing work that the Federal Government would ordinarily be required to perform—and they are doing it at less cost. We should certainly not terminate a program as effective as this one.

Moreover, this measure is nearly identical to H.R. 1025 which passed the House under suspension of the rules on March 19, 1985. The measure before us will reauthorize the act for 1 additional year and at levels that are indexed for inflation. More information on this measure can be found in House Report 99-19.

Section 403 of title IV would reauthorize the Central, Western, and South Pacific Fisheries Development Act during fiscal years 1986, 1987, 1988, and 1989 at existing levels of $5 million in each fiscal year. Although no moneys have ever been appropriated pursuant to this act, there is support for this measure within the Department of State and within the administration.

Section 404 of title IV authorizes appropriations to carry out the Atlantic Tunas Convention Act of 1975 for fiscal years 1987, 1988, and 1989. The Atlantic Tunas Convention Act authorized U.S. participation in the International Convention for the Conservation of Atlantic Tunas. The convention was negotiated in response to the decline of Atlantic tuna stocks caused by overfishing by various nations. In 1981, scientists reported that bluefin tuna stocks were only 15 percent of their 1960 levels. In an effort to correct this situation, the convention recommended severe reductions in the take of bluefin tuna. Recently acquired data now indicates that bluefin tuna stocks in the western Atlantic are beginning to show an increase. This increase has been largely due to the conservation restrictions recommended by the convention and adopted by its member nations.

Although the management of bluefin tuna stocks is showing success, other tuna stocks are still depleted. Therefore, the convention should continue its research and conservation efforts with strong U.S. support. Except for a technical change requested in draft legislation submitted by the administration, section 404 is identical to H.R. 3133, which was approved by the House under suspension of the rules on April 26, 1986. More information on this measure can be obtained in House Report 99-33.

Section 405 would amend the Great Lakes Fishery Act of 1956 by authorizing four U.S. representatives to sit on the Great Lakes Fishery Commission. Current law authorizes only three commissioners; however, the treaty was renegotiated long ago to provide for another commissioner. This legislation brings the authorizing legislation into conformance with the text of the Great Lakes Fishery Treaty and current practice. In addition, this section would terminate the terms of all non-Federal commissioners, create finite terms of office for non-Federal commissioners and would provide for the appointment of new commissioners or the reappointment of the current commissioners.

This section would also require the appointment of an alternate commissioner. These improvements to the implementing legislation are supported by a recent GAO study on the Great Lakes Fishery Commission. The committee notes that the appointment of an alternate commissioner is consistent with implementing legislation for the recently concluded Pacific Salmon Treaty.

Legislation calling for an alternate commissioner for the Pacific Salmon Commission was part of the implementing legislation submitted to the Congress by the administration, passed by the Congress and signed into law by the President. The GAO study also recommended that the Great Lakes Fishery Commission utilize a request for proposal process when issuing research grants greater than $15,000. The committee concurs with this recommendation and expects that the commission will establish procedures to implement the recommendation.

Section 406 provides for the establishment of an estuarine programs office [EPO] within NOAA. This office will be responsible for developing an agencywide strategy for the coordination of estuarine management activities. This strategy is to incorporate the research, regulatory, management, and trusteeship responsibilities with which the Congress has charged the agency. NOAA must be an active partner, with other Federal, State, and local agencies, in a focused nationwide effort to address the degradation of our Nation's estuaries.

Establishment of a NOAA Estuarine Programs Office [EPO] will provide for more effective conduct of NOAA responsibilities in estuarine research and management. The office should serve as the focal point for direct agency participation in specific estuarine research and management projects. In concert with the agency's broad planning and coordinating responsibilities under the National Ocean Pollution Planning Act—as amended by Public Law 99-272—the specific activity coordination provided by the EPO will ensure a central and active role for NOAA in the nation-

wide effort to improve management of estuaries.

Section 406(c) authorizes $500,000 for fiscal year 1987, $530,000 for fiscal year 1988, $560,000 for fiscal year 1989, and $600,000 for fiscal year 1990 for EPO administration.

Section 407(a) establishes an Under Secretary of Commerce for Oceans and Atmosphere, who shall also serve as the NOAA Administrator. Section 407(b) establishes an Assistant Secretary of Commerce for Oceans and Atmosphere, who shall serve as the NOAA Deputy Administrator. The Under Secretary and Assistant Secretary shall be appointed by the President, confirmed by the Senate, and compensated, respectively, at the rates provided for levels III and IV of the executive schedule pay rates.

These changes in title are necessary to help fit NOAA more closely into the fabric and structure of the Commerce Department. Since NOAA was established in 1970, three Under Secretary positions—level III—have been created: one for the International Trade Administration (1978); one for economic affairs (1981); and one for the travel and tourism administration (1981). This change in title will not result in a higher rate of compensation for the current NOAA Administrator and Deputy Administrator, but it is hoped that the change will provide better recognition and representation for the agency within the Commerce Department. Since NOAA represents over 60 percent of the Department's annual budget and houses 40 percent of its employees, this recognition is long overdue.

Finally, this change of job titles is intended to provide for better agency administration within the Commerce Department, but should not be misconstrued as rationale to inhibit any future consideration of independent agency status for NOAA.

Section 407(c) establishes the position of NOAA Chief Scientist to replace the current position of NOAA Associate Administrator. The Chief Scientist shall be appointed by the President, with the consent of the Senate, and compensated at the rate provided for level V of the executive schedule pay rates. It is intended that the Chief Scientists shall have strong backgrounds in appropriate scientific disciplines and shall serve as the focal point for the direction and coordination of agency research programs.

Section 408 would transfer authority to administer certain programs now carried out by the Secretary of Commerce to the Secretary of State. This change was requested by the administration and is identical to legislation submitted to the Congress by the administration.

Section 409 would clarify that moneys accruing to the fisheries loan fund after fiscal year 1987 shall accrue to the general fund of the U.S. Treasury.

Section 410 would amend and clarify a covenant accompanying the conveyance of lands owned by the Kontag Native Corp. at Kodiak, AK.

Section 411 makes conforming amendments to the ESA to reflect the changes to the MMPA and to clarify the relationship between the two statutes. It is intended that the decision processes under the involved statutes be coordinated and integrated to the maximum extent practicable. For example, section 411 would add a new requirement to section 7(b)(4) of the ESA that, in order to authorize the incidental take of an endangered or threatened marine mammal, the Secretary must confirm that the taking has been authorized under amended section 101(a)(5) of the MMPA and specify those measures that are necessary to comply with the MMPA authorization. The Secretary and affected Federal agencies, including permit and license applicants, are expected to take appropriate steps to coordinate these two procedures.

A potential problem for coordinating the ESA consultation and the MMPA section 101(a)(5) exemption processes in section 101(a)(5) arises from the fact that section 7(b)(1)(A) of the ESA generally requires the consultation process to be completed within 90 days. This timeframe is likely to be too short to complete a section 101(a)(5) review if it is initiated at the same time as section 7 consultation. Should this discrepancy occur, the Secretary is expected to proceed with issuance of the biological opinion and section 7(b)(4) incidental take statement in a timely manner as required by section 7(b)(1) of the ESA. With respect to the incidental take statement, however, the Secretary should indicate that the findings and conditions applicable to affected marine mammals are subject to final completion of the MMPA section 101(a)(5) process and that the statement would subsequently be revised to reflect the outcome of that review.

In this situation, incidental take of listed marine mammals would not be authorized under the ESA until the section 101(a)(5) process has been completed under the MMPA and the section 7(b)(4) incidental take statement has been revised. Thus, despite the issuance of a biological opinion, section 9 of the ESA would remain an impediment to agency or private action until such time as the MMPA section 101(a)(5) process has been completed and the findings of that process have been incorporated into the previously issued biological opinion.

Several options are available to reduce the likelihood of a timing discrepancy between the two procedures. First, in appropriate circumstances and when adequate information is available, the section 101(a)(5) procedure could be started before section 7 consultation is initiated. In this case, the burden would be on the applicant for the section 101(a)(5) exemption to submit a timely and complete request.

As a second option, section 7(b)(1)(A) of the ESA provides that the Secretary and the action agency may agree to complete consultation in more than 90 days. When an incidental take of a listed marine mammal is involved, it may be appropriate for the consulting Federal wildlife agency and the action agency to agree to a timeframe that would accommodate completion of the section 101(a)(5) procedure.

If a permit or license applicant is involved, however, section 7(b)(1)(B) requires that certain steps be taken to extend the consultation period, including obtaining the consent of the applicant if more than 60 additional days would be required. If the consent and cooperation of the applicant is obtained, it should be possible to coordinate the two decisionmaking procedures through appropriate extension of the consultation period.

Finally, in certain circumstances it may be appropriate to pursue early consultation under section 7(a)(3) of the ESA. Under this approach, a preliminary biological opinion could be issued on the prospective agency action. At such time as the section 101(a)(5) procedure has been completed and the agency action is about to proceed, the biological opinion shall be reviewed and amended as appropriate. At this point, the required findings and conditions based on the completed section 101(a)(5) review would be incorporated into the section 7(b)(4) incidental take statement.

Ultimately, the successful coordination of the ESA and MMPA procedures will depend upon the effective cooperation among the action and consulting agencies and affected private applicants. Hopefully, this cooperation will be forthcoming.

Mr. Speaker, let me emphasize that this legislation is to my knowledge noncontroversial and represents the product of a great deal of work by the Committee on Merchant Marine and Fisheries, especially by the chairman of the Subcommittee on Fisheries and Wildlife, Mr. BREAUX and the ranking minority member, Mr. YOUNG. I believe this legislative package is much needed to keep our fisheries strong and I urge the Members to support its passage.

Mr. YOUNG of Alaska. Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from North Carolina?

There was no objection.

A motion to reconsider was laid on the table.

Without objection the Senate amendment to the House amendment to the title of the bill S. 991 is agreed to.

GENERAL LEAVE

Mr. JONES of North Carolina. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend the remarks on the legislation just adopted.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

AUTHORIZING A TECHNICAL CORRECTION IN ENROLLMENT OF S. 2250, ANTI-KICKBACK ENFORCEMENT ACT OF 1986

Mr. FUQUA. Madam Speaker, I ask unanimous consent to take from the Speaker's table the Senate concurrent resolution (S. Con. Res. 168) authorizing a technical correction to be made in the enrollment of the bill, S. 2250, and ask for its immediate consideration in the House.

The SPEAKER pro tempore. The Clerk will report the Senate concurrent resolution.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 168

Resolved by the Senate (the House of Representatives concurring), That, in the enrollment of the bill (S. 2250) to prohibit kickbacks relating to subcontracts under Federal Government contracts, the Clerk of the Senate shall make the following correction:

In the first sentence of section 5(a)(2) of the Anti-Kickback Act of 1986 (as it appears in section 2(a) of the bill), insert "employee," between "whose" and "subcontractor".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. WALKER. Reserving the right to object, I shall not object, I yield to the gentleman from Florida for an explanation of the resolution we have before us.

Mr. FUQUA. I appreciate the gentleman yielding

Madam Speaker, this measure would direct the enrollment clerk to make one technical correction to S. 2250—the Anti-Kickback Act of 1986—which was passed by the House last week and in the Senate on Tuesday. This change does not alter the substance of the bill in any way but merely clarifies its application by the insertion of the word "employee" to make certain that the affected provision in the bill covers kickbacks to employees of prime contractors as well as to employees of subcontractors.

Mr. WALKER. Further reserving the right to object, Madam Speaker, I appreciate the gentleman's explanation. The minority has no problem with this.

The Justice Department has indicated they believe the change would be helpful. We understand the Judiciary Committee has no objection.

Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

BICENTENNIAL OF CONSTITUTION COINS AND MEDALS ACT

Mr. ANNUNZIO. Madam Speaker, I ask unanimous consent to take from the Speaker's table the bill [H.R. 3415] to authorize the minting of coins in commemoration of the bicentennial of the U.S. Constitution, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments as follows:

Page 4, line 33, strike out "December 30, 19087" and insert: "June 30, 19088."

Page 5, after line 19, insert: "procurement of goods and service".

SEC. 108. No provision of law governing procurement or public contracts shall be applicable to the procurement of goods or services necessary for carrying out the provisions of this title. Nothing in this section shall relieve any person entering into a contract under the authority of this title from complying with any law relating to equal employment opportunity.

Mr. HILER (during the reading). Madam Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Illinois?

Mr. HILER. Madam Speaker, reserving the right to object, and I do not intend to object, but I would ask the chairman of the committee to explain the bill for the body and the amendments that were offered.

Mr. ANNUNZIO. Madam Speaker, will the gentleman yield?

Mr. HILER. I yield to the chairman of the committee.

Mr. ANNUNZIO. I thank the gentleman for yielding.

Madam Speaker, I appreciate the hard work that the gentleman from Indiana has put into this legislation.

This is a bicentennial celebration commemorating the anniversary of the U.S. Constitution. It provides for the minting of two coins, a $5 gold piece and a silver coin. All the money that will be realized from these coins will be used to retire the national debt.

The Senate amendments are merely technical amendments, provide for no substantive change in the legislation.

Mr. HILER. Further reserving the right to object, I would like to take this opportunity to compliment the chairman for responding to the plea, really, from several Members of this body as well as from the Bicentennial Commission to move this legislation. It is somewhat unusual in that this legislation did not have the customary 218 cosigners that we quite often require in our committee. But the chairman felt, and I agree with the chairman, that this particular coin program to commemorate the bicentennial of the Constitution is extremely important to the country, and it will be a money-raiser for the Government as well.

The gentleman from Illinois' highly successful George Washington 1976 coin program returned tens of millions of dollars to the Treasury. We are sure this coin program, with the support of the American people and the wholehearted support of the Congress and the Bicentennial Commission, will do as well.

Mr. ANNUNZIO. Madam Speaker, will the gentleman yield further?

Mr. HILER. I yield to the chairman.

Mr. ANNUNZIO. I thank the gentleman for yielding.

Madam Speaker, I appreciate the remarks from the ranking Republican on my committee. Through his hard work and perseverance, we have been able to accomplish and have established a genuine coin program in America where the profits are being realized by the American people.

I want to compliment the gentleman from Indiana and thank him for his assistance which I have received.

Mr. HILER. I thank the chairman for those kind comments.

Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANNUNZIO. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the matter just concluded concerning H.R. 3415.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PATENT EQUITY ACT

Mr. KASTENMEIER. Madam Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4899) to amend title 35, United States Code, with respect to patented processes and the patent cooperation treaty, with a Senate amendment thereto, and concur in the Senate amendment with an amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment and the House amendment to the Senate amendment as follows:

Senate amendment: Page 2, strike out all including line 1 over to and including line 25 on page 4 and insert:

TITLE I—PATENTED PROCESSES

SEC. 101. This title may be cited as the "Process Patent Amendments Act of 1986".

SEC. 102. (a) Section 154 of title 35, United States Code, is amended by inserting after "United States," the following: "and, if the invention is a process, of the right to exclude others, to the extent provided in section 271(a)(2), from using or selling products produced thereby throughout the United States, or importing products produced thereby into the United States,".

(b) Section 271 of title 35, United States Code, is amended by—

(1) inserting "(1)" after "(a)";

(2) adding at the end of subsection (a), the following:

"(2) If the patented invention is a process, whoever without authority uses or sells within, or imports into, the United States during the term of the patent therefor a product produced by such process, infringes the patent. A product will no longer be considered to have been produced by a patented process once it has been materially changed by subsequent steps or processes.".

(c) Section 287 of title 35, United States Code, is amended by—

(1) striking out "Limitation on damages" in the section heading and inserting in lieu thereof "Limitation on damages and other remedies";

(2) inserting "(a)" before "Patentees,"; and

(3) adding at the end thereof the following new subsection:

"(b)(1) An infringer under section 271(a)(2) shall be subject to all of the provisions relating to damages and injunctions set forth in this title except to the extent that those remedies are limited by this subsection or section 3. The limitations on remedies set forth in this subsection shall not be available to any party who—

"(A) engaged in the actual practice of the patented process;

"(B) is owned or controlled by the party who engaged in the actual practice of the patented process;

"(C) owns or controls the party who engaged in the actual practice of the patented process;

"(D) having made a request for disclosure as provided in subsection (b)(5), fails to notify its supplier of patents identified in response to the request and to instruct its supplier to refrain from infringement of such patents; or

"(E) had knowledge prior to the infringement that a patented process was used to produce the product whose importation, use, or sale constituted the infringement.

"(2) No damages shall be recovered by the patentee unless the infringer had notice of the infringement and continued to infringe thereafter. Damages may be recovered only for infringement that occurred after notice of infringement.

"(3) No remedy may be obtained during the eighteen months after the date of notice for retail sales of a normal volume of products in inventory or on order at the time of notice, obtained from a party in the United States who did not use the patented process, provided the retailer discloses to the patentee, within 30 days from notice, the identity and location of the party from whom the products were purchased. Normal quantity of products in inventory and on order shall be determined by previous business practices, and could include units of a product ordered prior to notice and received within a period not to extend eighteen months after notice.

"(4) The remedy for the importation, use, or sale of units of the infringing product ordered prior to notice and imported, used, or sold in a manner consistent with the normal business practices of the infringer during the six months after the date of notice shall be limited to a reasonable royalty. The limitation in this subparagraph shall not be available to any party who failed to make a request for disclosure, as defined in subparagraph (5), of the party asserting infringement or its licensee.

"(5)(A) For purposes of this paragraph, a 'request for disclosure' means a written request made to a party then engaged in the manufacture of a product to identify all process patents owned by or licensed to that party as of the time of the request that could reasonably be asserted tc be infringed under section 271(a)(2) if that product were imported into, or sold or used in, the United States by an unauthorized party. A request for disclosure is further limited to a request—

"(i) made by a party regularly engaged in the sale of the same type of products as the party to whom the request is directed, or a request which includes facts showing that the requester plans to engage in the sale of such products; and

"(ii) made prior to such party's first importation, use or sale of units of the product produced by an infringing process and prior to notice of infringement.

"(B) In any action where the infringer made a request for disclosure from the party asserting infringement and the infringed patent was not identified within 60 days, the remedy for the importation, use, or sale of units of the infringing product which are imported, used, or sold by the infringer in a manner consistent with the normal business practices of the infringer during the eighteen months after the data of notice shall be limited to a reasonable royalty.

"(C) For the purposes of the limitations on remedies in this subsection—

"(i) no party may make more than one request for disclosure of the same party for the identification of process patents for producing a particular product; and

"(ii) no party who has received the benefit of the limitations of this paragraph or paragraph (4) with respect to the infringement of one process patent shall be entitled to that benefit in the event of a subsequent infringement of any process patent for producing the same product owned by the same patentholder at the time of the first infringement.

"(6) For the purposes of the remedy limitations in subsection (b), notice of infringement means actual knowledge, or receipt of notification, that a product was produced by a patented process without authorization of the patentee. A notification shall constitute notice of infringement only if it is in writing and sets forth facts which are sufficient to establish that there is a substantial likelihood that the product was made by the infringing process. Filing an action for infringement shall constitute notice of infringement only if the pleadings or other papers filed in the action meet the requirements of a notification.".

(d) The table of sections for chapter 29 of title 35, United States Code, is amended by amending the item relating to section 287 to read as follows:

"287. Limitations on damages and other remedies; marking and notice.".

SEC. 103. (a) This title and the amendments made by this title shall apply only to products produced or imported after the date of enactment, and shall not abridge or affect the right of any persons or their successors in business to continue to use, sell or import any specific product already in substantial and continuous sale or use in the United States on July 1, 1986, or for which substantial preparation for such sale or use was made before such date, to the extent equitable for the protection of commercial investments made or business commenced in the United States before such date.

(b) This title and the amendments made by this title shall not deprive a patent owner of any other remedies available under section 271 of title 35, United States Code, section 337 of the Tariff Act of 1930, or any other provision of law.

SEC. 104. Beginning on the date one year after the date of enactment of this title and each year for 4 additional years thereafter, the Department of Commerce shall submit an annual report to the Congress on the effect of this title and the amendments made by this title, on the importation of ingredients to be used for manufacturing products in the United States in those domestic industries that submit formal complaints to the Department alleging that their legitimate sources of supply have been adversely affected.

SEC. 105. (a) Chapter 29 of title 35, United States Code, is amended by adding at the end thereof the following:

"§ 295. Presumption: product produced by patented process

"In actions alleging infringement of process patent based on use, sale, or importation of a product produced by the patented process, if the court finds (1) that a substantial likelihood exists that the product was produced by the patented process and (2) that the claimant has made a reasonable effort to determine the process actually used in the production of the product and was unable so to determine, the product shall be presumed to have been so produced, and the burden of establishing that the product was not produced by the process shall be on the party asserting that it was not so produced.".

(b) The table of sections for chapter 29 of title 35, United States Code, is amended by adding after the item relating to section 294 the following:

"295. Presumption: product produced by patented process.".

House Amendment to the Senate Amendment: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

TITLE I—PATENTED PROCESSES

SEC. 101. SHORT TITLE.

This title may be referred to as the "Process Patent Amendments Act of 1986".

SEC. 102. RIGHTS OF OWNERS OF PATENTED PROCESSES.

Section 154 is amended by inserting after "United States," the following: "and, if the invention is a process, of the right to exclude others from using or selling throughout the United States, or importing into the United States, products made by that process,".

SEC. 103. INFRINGEMENT FOR IMPORTATION, SALE, OR USE.

Section 271 is amended by adding at the end the following new subsection:

"(g) Whoever without authority imports into the United States or sells or uses within the United States a product which is made by a process patented in the United States shall be liable as an infringer, if the importation, sale, or use of the product occurs during the term of such process patent. In an action for infringement of a process patent, no remedy may be granted for infringement on account of the use or retail sale of a product unless there is no adequate remedy under this title for infringement on account of the importation or other sale of that product. A product which is made by a patented process will, for purposes of this title, not be considered to be so made after—

"(1) it is materially changed by subsequent processes; or

"(2) it becomes a minor or nonessential component of another product.".

SEC. 104. DAMAGES FOR INFRINGEMENT.

(a) LIMITATIONS AND OTHER REMEDIES.—Section 287 is amended—

(1) in the section heading by striking "Limitation on damages" and inserting "Limitation on damages and other remedies";

(2) by inserting "(a)" before "Patentees"; and

(3) by adding at the end the following:

"(b)(1) An infringer under section 271(g) shall be subject to all the provisions of this title relating to damages and injunctions except to the extent those remedies are modified by this subsection or section 106 of the Process Patent Amendments Act of 1986. The modifications of remedies provided in this subsection shall not be available to any person who—

"(A) practiced the patented process;

"(B) owns or controls, or is owned or controlled by, the person who practiced the patented process; or

"(C) had knowledge before the infringement that a patented process was used to make the product the importation, use, or sale of which constitutes the infringement.

"(2) No remedies for infringement under section 271(g) of this title shall be available with respect to any product in the possession of, or in transit to, the infringer before the infringer had notice that the product was made by a process patented in the United States.

"(3) In an action brought for infringement under section 271(g), the court shall take into consideration the good faith and reasonable business practices demonstrated by the infringer and the need to restore the exclusive rights of the patentee.

"(4) For the purposes of this subsection, notice of infringement means actual knowledge, or receipt of notification, that a product was made by a patented process without authorization of the patentee. A notification shall constitute notice of infringement only if it is in writing and sets forth facts which are sufficient to establish that there is a substantial likelihood that the product was made by the infringing process. Filing an action for infringement shall constitute notice of infringement only if the pleadings or other papers filed in the action meet the requirements of a notification set forth in the preceding sentence. For the purposes of this subsection, a person who obtains a product made by a process patented in the United States in a quantity which is abnormally large in relation to the volume of business of such person or an efficient inventory level shall be rebuttably presumed to have actual knowledge that the product was made by such patented process.".

(b) TECHNICAL AMENDMENT.—The item relating to section 287 in the table of sections for chapter 29 is amended to read as follows:

"287. Limitations on damages and other remedies; marking and notice.".

SEC. 105. PRESUMPTION IN INFRINGEMENT ACTIONS.

(a) IN GENERAL.—Chapter 29 is amended by adding at the end the following:

"§ 295. Presumption: Product made by patented process

"In actions alleging infringement of a process patent based on the importation, sale, or use of a product which is made from a process patented in the United States, if the court finds—

"(1) that a substantial likelihood exists that the product was made by the patented process, and

"(2) that the claimant has made a reasonable effort to determine the process actually used in the production of the product and was unable so to determine,

the product shall be presumed to have been so made, and the burden of establishing that the product was not made by the process shall be on the party asserting that it was not so made.".

(b) CONFORMING AMENDMENT.—The table of sections for chapter 29 is amended by adding after the item relating to section 294 the following:

"295. Presumption: Product made by patented process.".

SEC. 106. EFFECTIVE DATE.

(a) IN GENERAL.—The amendments made by this title shall apply only to products made or imported after the date of the enactment of this Act, but shall not abridge or affect the right of any person or any successor in business of such person to continue to use, sell, or import any specific product already in substantial and continuous sale or use by such person in the United States on July 1, 1986, or for which substantial preparation by such person for such sale or use was made before such date, to the extent equitable for the protection of commercial investments made or business commenced in the United States before such date.

(b) RETENTION OF OTHER REMEDIES.—The amendments made by this title shall not deprive a patent owner of any remedies available under subsections (a) through (f) of section 271 of title 35, United States Code, under section 337 of the Tariff Act of 1930, or under any other provision of law.

SEC. 107. REPORTS TO CONGRESS.

(a) CONTENTS.—The Secretary of Commerce shall, not later than the end of each 1-year period described in subsection (b), report to the Congress on the effect of the amendments made by this title on the importation of ingredients to be used for manufacturing products in the United States in those domestic industries that submit complaints to the Department of Commerce, during that 1-year period, alleging that their legitimate sources of supply have been adversely affected by the amendments made by this title.

(b) WHEN SUBMITTED.—A report described in subsection (a) shall be submitted with respect to each of the five 1-year periods which occur successively beginning on the date of the enactment of this Act and ending five years after that date.

Mr. KASTENMEIER (during the reading). Madam Speaker, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Wisconsin?

Mr. MOORHEAD. Madam Speaker, reserving the right to object, I do so, so that I may yield to the gentleman from Wisconsin for an explanation as to the purpose of his unanimous consent request.

Mr. KASTENMEIER. Madam Speaker, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. I thank the gentleman for yielding.

Madam Speaker, I will be pleased to explain.

Madam Speaker, this afternoon the House has before it the Patent Equity Act of 1986. This bill is a product of more than 4 years of work by the Committee on the Judiciary.

The bill contains two titles; title I relates to process patents and title II implements the Patent Cooperation Treaty.

In general terms, title I of the bill provides that it is an act of patent infringement, for a person to import, use or sell a product which has been made in violation of a U.S. process patent.[1]

---

[1] A product will be considered made by the patented process regardless of any subsequent changes if it would not be possible or commercially viable to make that product but for the use of the patented process. In judging the commercial viability, the courts shall use a flexible standard which is appropriate to the competitive circumstances. For example, where the patented process is to produce chemical X, and chemical X is an intermediate or precursor in the manufacture of imported product chemical Y, and it would not be possible or commercially viable to make imported product chemical Y but for the use of the patented process for the intermediate or precursor chemical X, the connection between the patented process for chemical X and the imported product chemical Y is not broken and the imported product Y is not materially changed for purposes of this section.

In the biotechnology field it is well known that naturally occurring organisms contain within them particular genetic sequences composed of unique structural characteristics. The patented process may be for the process of preparing a DNA molecule comprising a specific genetic sequence. A for-

Under current patent law, the manufacture and subsequent importation of the product of an item in violation of a process patent does not constitute an infringement of a U.S. patent. This bill remedies that omission.

Now, I want to particularly congratulate my colleague, Mr. MOORHEAD; it is his persistence and his interest in this legislation that has, I think, largely been responsible for getting this bill to the floor.

Two years ago a similar bill was passed by the House but was not enacted because of last minute opposition in the other body. Hopefully H.R. 4899 will meet a better fate this Congress.

American patent law has long recognized the validity of securing for inventors the right to exclude others from practicing an invention that consists of a method of making a product. Process patent protection has been a part of U.S. law since at least the 19th century. Process patents extend intellectual property protection for new and useful processes, art or methods of creating an object. Since 1952 there has been an explicit statutory acknowledgment of the availability of process patent protection. Process patents, however, have been granted only partial protection against acts of infringement. This is so because, unlike product patents, the use of a patented process outside the United States and a subsequent importation of the foreign product is not an act of patent infringement. The failure to fully protect American process patents harms American businesses, results in a loss of domestic jobs and is contrary to the public interest. Therefore, one of the positive factors about title I of H.R. 4899 is that it creates a level international playing field for American inventors contrary to the public interest. Many foreign countries adequately protect process patents, thus leaving American patent holders in a position to become the victims of unfair competition.

Process patent protection today is of central importance in the pharmaceutical industry, to the development of solid state electronics, for the manufacture of certain amorphous metals and, perhaps most significantly, for the biotechnology industry. For most biotech companies the best—and sometimes only—available protection of their intellectual property is a process patent. Such a patent is effective in securing for the inventor the right to prevent others from practicing that invention in the United States. Under current law a process patent is limited to the territory of the United States; it therefore is possible—if not likely—for a process patent holder to face domestic competition from persons who have used the patented process to create a product overseas and then ship it into the United States. In this situation the patent owner cannot sue for patent infringement; rather, the owner is relegated to the U.S. International Trade Commission (ITC) to seek limited nonmonetary relief.

There is no logical reason to exclude from the ambit of patent infringement acts associated with the abuse of a U.S. process patent as long as they occur within the reach of U.S. domestic law. Moreover, as the President's Commission on Industrial Competitiveness has found, the failure to extend such protection diminishes the economic value of U.S. process patents. Without domestic legal protection, competitors using the protected process may accept the limited risks of foreign production costs. There is no policy justification for encouraging such overseas production and concurrent violation of U.S. intellectual property rights.

The compelling nature of this deficiency in U.S. patent laws has been evident both in the Congress and to the executive branch. Reform in this area is a centerpiece in trade law reform.

The bill before us contains provisions which attempt to meet some other objections to the bill which have been heard from a variety of quarters.

The amendment at the desk—unlike the Senate amendment we called up on Tuesday—has the strong support of the administration. The amendment differs from both the House passed bill H.R. 4899 and the Senate amendment is that it defines the act of patent infringement to occur with respect to a product made in violation of a process patent only with respect to goods acquired after the alleged infringer knew or was on notice that the goods had been so produced. The amendment at the desk does not include any compulsory licenses. The bill protects against unscrupulous stockpiling of goods before notice to protect patent holders while also requiring that such intellectual property owners to exhaust their remedies against importers and others before obtaining relief against retailers. It is our hope that this limited bill will meet with favor in the other body.

In sum, these amendments go part of the way toward meeting the objections of the bill's opponents.

Title I will help address the U.S. trade deficit and inability to protect American intellectual property overseas. It is supported by much of American industry and by the administration.

Title II of H.R. 4899 amends our patent laws to authorize the U.S. Patent and Trademark Office to undertake the responsibilities outlined in chapter II of the Patent Cooperation Treaty. Basically, the PTO is granted statutory to serve as an international examining office with respect to international patent applications. This new responsibility is in addition to those under chapter I, which the PTO has already undertaken in accordance that it was enacted into law during the 98th Congress.

The Patent Cooperation Treaty is administered effectively and fairly by the World Intellectual Property Organization, located in Geneva, Switzerland. The significance of the treaty is underscored by an observation made by the WIPO Director General, Dr. Arpad Bogsch: "The PCT system has been revised over the years as is now an even more important instrument for filing patent application abroad."

Enactment of title II is supported by the administration and by numerous patent law associations and individuals, including most recent the American Bar Association.

By facilitating the obtaining of patent protection abroad, the legislation will promote exports from the United States. It further will simplify and render more economical the filing of patent applications on the same inventions in different countries and the receiving of patent coverage in those countries.

In conclusion, H.R. 4899 will improve patent protection not only in this country but also internationally. I urge your support for this important legislation.

THE DEPUTY SECRETARY OF COMMERCE,
Washington, DC, October 16, 1986.

Hon. ROBERT W. KASTENMEIER,
Chairman, Subcommittee on Courts, Civil Liberties and the Administration of Justice, Committee on the Judiciary, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Secretary and I were pleased to learn that you have developed a new proposal to stop the unauthorized importation, use or sale in this country of products made by a U.S. process patent. The bill you have crafted contains a fair approach for dealing with innocent infringers of U.S. process patents, while avoiding the compulsory licensing provisions that the Senate included in H.R. 4899. As I understand it, your new proposal achieves this goal by providing liability for products ordered after notice, while at the same time providing safeguards against stockpiling of infringing products.

If enacted, your approach would improve our patent laws. It would also enable our Government to continue its quest for improved intellectual property protection abroad without being undermined by the

---

eign manufacturer uses the patented process to prepare the DNA molecule which is the product of the patented process. The foreign manufacturer inserts the DNA molecule into a plasmid or other vector and the plasmid or other vector containing the DNA molecule is, in turn, inserted into a host organism; for example, a bacterium. The plasmid-containing host organism still containing the specific genetic sequence undergoes expression to produce the desire polypeptide. Even though a different organism was created by this biotech procedure, if it would not have been possible or commercially viable to make the different organism and product expressed therefrom but for the patented process, the product will be considered to have been made by the patented process.

unfortunate provisions added to H.R. 4899 by the Senate. By extending protection to products of patented processes with the safeguards in your bill, Congress will strengthen the hand of the United States both in bilateral discussions with pirating nations as well as in its efforts to obtain strong intellectual property protection in the new round of multilateral trade negotiations.

On behalf of the Administration, I thank you for your tireless efforts to find acceptable process patent legislation which fairly protects innocent infringers. I also congratulate you on the balanced solution you have developed. I will actively support enactment of your compromise in these waning days of the 99th Congress with the hope that the owners of U.S. process patents will finally obtain the kind of protection to which they are entitled.

Sincerely,

CLARENCE J. BROWN.

Mr. MOORHEAD. Further reserving the right to object, I think this is an excellent piece of legislation, very much needed by our country.

Madam Speaker, most 17-year patents are obtained on products invented and if that patent is infringed by the manufacture, use, or sale either in this country or infringed abroad and brought back to this country, it can be stopped and damages awarded to the patent owner.

Now process patents are different; the patent is only on the method of making a certain product. For example, a new method of making gasoline or interferon, is patentable, the products themselves are not patentable. Now the present loophole in the law exists where products are made abroad using a U.S. patented process and the goods made by that process are then shipped into this country and compete with the local U.S. product; that is legal in this country. It's not legal in Japan, England, West Germany, France, Switzerland, and numerous other countries. That's the problem we are trying to correct with this legislation.

Commerce Department objection: Presently there is no protection for U.S. process patents which are infringed abroad. This legislation provides 17 years of protection, however, the Senate compromise has an 18-month exception in certain cases to allow retailers who did not have notice of any infringement to sale off their inventory. So in that case, a patent owner would only have 15½ rather than 17 years of protection, that is, if the retailer took the full 18 months to dispose of the violating inventory. The U.S. patent owner today gets nothing. I would rather have my bill which doesn't have this 18-month exception in it, but it's a compromise which has the support of the Pharmaceutical Manufacturers Association, the retailers, the generics, the unions, but not the Department of Commerce. Their complaint is that this 18-month grace period is like a compulsory license; that is, a patent is being used without permission or consent for 18 months. Present law is, it can be used in the United States forever without the patent owner's permission or consent. And under the compromise, at least the U.S. patent owner will get 15½ years where now he gets nothing.

The Department of Commerce says that this is a compulsory license and will undermine their efforts to persuade Third World countries not to draft compulsory licenses in their law. This may be a valid concern but I believe our overriding public policy mandates that we try and help our local U.S. industries, and we can make clear to the Third World countries that this is not a compulsory license.

I would like to be very clear about this point and that is, this legislation contains no compulsory licensing scheme, nor was such ever intended, and if there was such, I would strongly oppose it. It merely sets up a mechanism to provide protection for U.S. process patents which they presently do not now have. There are circumstances, however, wherein for a limited period of time a patent holder does not have exclusive rights, but that is because we are trying to balance the interest of people who purchased a lot of goods without knowledge and without an intention to infringe someone's patent and for those who suggest this is a compulsory license. I want to make clear that it is not, and I believe our U.S. Trade Office will eventually agree with my position. However, this new compromise I understand has the strong support of the Department of Commerce and I hope the other parties will accept it when it goes back to the other body.

This sort of evasion of our patent law is costly, not only in actual revenue lost but also to the number of U.S. jobs that are actually lost to foreign manufacturers. For example, we have a letter in our file from the Glass Workers Union, which states that they believe this present practice has cost their industry alone upward of 50,000 jobs.

I urge support for this issue.

Mr. MOORHEAD. Madam Speaker, further reserving the right to object, I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Madam Speaker, as the one who objected the other day on behalf of the administration, I want to congratulate both the majority and the minority for working out the problem that was in the bill at that point from the administration's veiwpoint and bringing to us today a bill that could be unanimously approved.

I thank the gentleman for yielding.

Mr. MOORHEAD. Madam Speaker, further reserving my right to object, I wish to congratulate and thank the gentleman from Wisconsin for his tireless efforts in getting this legislation through the Congress. I introduced legislation on this subject earlier in the Congress. He has carefully moved it through our subcommittee, to the committee, and to this point.

There are issues that needed to be worked out. I believe they have been worked out. I wish to thank the gentleman for his efforts.

Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

A motion to reconsider was laid on the table.

□ 1330

GENERAL LEAVE

Mr. KASTENMEIER. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore (Mrs. KENNELLY). Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 5705, COLUMBIA RIVER GORGE ENHANCEMENT OF RESOURCES

Mr. BONIOR of Michigan. Madam Speaker, by direction of the Committee on Rules, I call up House Resolution 596 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 596

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5705) to protect and provide for the enhancement of the resources of the Columbia River Gorge, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, with thirty minutes to be equally divided and controlled by the chairman and ranking minority members of each of the Committees on Agriculture and Interior and Insular Affairs, the bill shall be considered as having been read for amendmemt under the five-minute rule. No amendment to the bill shall be in order except three amendments if offered by Representative Robert F. Smith of Oregon, said amendments shall not be subject to amendment or to a demand for a division of the question in the House or in the Committee of the Whole, and each of said amendments shall be debatable for not to exceed twenty minutes, to be equally divided and controlled by Representative Smith

and a Member opposed thereto. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Michigan [Mr. BONIOR] is recognized for 1 hour.

Mr. BONIOR of Michigan. Madam Speaker, I yield the customary 30 minutes to the gentleman from Tennessee [Mr. QUILLEN], pending which I yield myself such time as I may consume.

Madam Speaker, House Resolution 596 is a modified closed rule providing for the consideration of H.R. 5705, a bill to protect and provide for the enhancement of the resources of the Columbia River Gorge.

The rule provides for 1 hour of general debate. Thirty minutes is to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, and 30 minutes is to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs.

The rule provides that only three amendments to be offered by Representative ROBERT SMITH of Oregon are in order. The amendments are not subject to amendment or to a demand for a division of the question. Each amendment may be debated for 20 minutes.

Finally, the rule provides one motion to recommit. Madam Speaker, this legislation is the result of 6 years of legislative efforts to protect the Columbia River Gorge, one of our Nation's great scenic resources. The legislation has broad support from the Members of Congress in the region, from both sides of the aisle and in both the House and Senate.

At the same time, the rule offers the gentleman from Oregon an opportunity to perfect this legislation.

Madam Speaker, this rule will allow us to move ahead to enactment of this long-awaited legislation.

I urge adoption of this rule.

Madam Speaker, let me just finally add that this is something that we can be very proud of if we pass this legislation in the waning hours of this 99th Congress. It is a nice and beautiful and wonderful thing we will be doing.

Thomas Jefferson sent Lewis and Clark west, and when they saw this magnificent gorge they were with awe and wonder.

I commend to my colleagues the recommendations not only of myself but, I should say, the entire Washington delegation, including both Republican Senators, and at least half of the Oregon delegation which includes both Senators from the other body, of this highly important piece of legislation.

Madam Speaker, I urge the adoption of this rule.

Madam Speaker, I yield to the gentleman from Tennessee [Mr. QUILLEN] for purposes of debate only.

Mr. QUILLEN. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I ask for a "no" vote on this rule.

This is a controversial bill. Tennessee is a long way from the Columbia River Gorge of Washington and Oregon. Yet, I have received almost 100 telegrams opposed to this bill from people who live in the gorge area. I have received no telegrams in support of this bill.

The Rules Committee met yesterday afternoon on this matter. The bill's supporters asked for a closed rule and we turned them down. I thought the matter was closed. It should have been, but it wasn't. At midnight, the Rules Committee met again and reported out this rule permitting only three amendments to be offered to the bill by the gentleman from Oregon, Mr. BOB SMITH.

Mr. SMITH represents many of the people living in the Columbia River Gorge and he made it clear to the Rules Committee that he has 10 amendments he wishes to offer to this bill. He stated very forthrightly to the Rules Committee that he must be permitted to offer these 10 amendments if he is to represent adequately his constituents.

When the Rules Committee prevents a member from offering amendments to a bill affecting directly that Members' constituents, it is time for the Members to say "no" to the Rules Committee. We must not support a rule which precludes a Member representing the area affected directly by the bill from offering amendments important to his constituents. This is a most serious matter which should concern every Member of the House.

In addition, the gentleman from Oregon, Mr. DENNY SMITH, testified that he had a number of amendments he wished to offer to this bill. Under this gag rule, he will not be permitted to do so.

Madam Speaker, when in the dying days of this Congress, we bring up a Federal land zoning and Federal land use planning bill such as this, and then give it a gag rule so that a fine and courteous Member representing the part of the country affected directly cannot offer his amendments, I say it is time to say "no."

Madam Speaker, I ask for a "no" vote on this rule. I say stand up for the right of a Member to represent the people who elected him. This is an important issue.

Madam Speaker, this issue has been around for years and, here in the closing days of the 99th Congress, the Rules Committee reported out a very controversial measure for us to try to pass in just a few hours, when it has been around for so long.

Madam Speaker, I urge a "no" vote on the rule. Let us defeat it, send it back to committee, and let them hammer out a compromise that is agreeable to the Members who live in the area and represent the people of the gorge. I would say that we would be doing this House a great service if we accomplish that goal.

Madam Speaker, I yield 10 minutes to the gentleman from Oregon [Mr. ROBERT F. SMITH].

Mr. ROBERT F. SMITH. Madam Speaker, I thank my friend and colleague, the gentleman from Tennessee [Mr. QUILLEN] for yielding this time to me.

Madam Speaker, ladies and gentlemen, this is the issue of the protection of the Columbia River Gorge. I do not believe that there is anyone in Oregon or in Washington, or likely this Nation, who does not believe that protection of the gorge is a good idea.

□ 1340

This has been discussed for 35 years in our State. It has been discussed here in the Congress for at least 6 years. I think it points out the fact that there is controversy involved in this issue or it would have been settled years and years ago.

Over those last 35 years the blight in the Columbia River Gorge has been created by the Federal Government. If you wanted to foul up the gorge, what would you do? I would suggest that the first thing you would do would be to build dams in it. You know, those ugly gray things that go across the river and dam up the water.

Then I would recommend that you build railroads up each side and clear the rights-of-way so that the trains could go up and down the gorge. Then I would build a highway on each side, which has been done. Then I would string wires across the gorge from time to time that have great red balls on them so that if you are flying and you are a pilot, as I am, you do not run into the lines across the Columbia River Gorge.

The passage of this rule and this bill will ask the Federal Government to protect the gorge in that manner. I suggest that is very possible. So how do we protect the gorge and who should do it? Really, that is where the controversy lies and that is what we will be discussing today at some length.

I must tell you that on the Oregon side of the river we have the most

stringent, comprehensive land use laws in America. Every acre of land in Oregon is zoned. Every house, every garage, every business is controlled by a State commission, unelected, but a statewide commission. The opportunity to provide any blight or scars on the Oregon side is nonexistent without LCDC, our land use planning authority, giving permission to do so.

The Washington side is not that way and I admit that. There are not the stringent land use laws on the Washington side, and there may be a need to provide some sort of authority that will combine the two sides of the river. But it is not an Oregon problem; I want to make that point to you.

I want to talk for just a minute about this rule. I rise in opposition to this rule, and I want to tell you why. The movement of this bill has been bizarre at the least; I think that is very kind. The bill came from the Senate as has been identified. It was jointly sent to the Committee on Interior and the Committee on Agriculture. The Committee on Interior, after having considered the bill, finally moved the title of the bill out of committee. Only the title; the committee left the rest of the bill there.

The Committee on Agriculture and the Subcommittee on Forestry, which I serve on, had the bill under consideration, and yet we did not have the opportunity for a quorum to complete the activity of the Agriculture Committee. I suggest to you it was not the fault of dilatory tactics on anybody's part; it was the fault of late session problems and activities of all Members. There was always a majority of Republicans in that meeting. You cannot call this dilatory tactics at all. If the other side had had an opportunity to present their people there for one reason or another, we would have gone on procedurally, as we should have, to follow the final event of this bill and carry it through the committee as it should have been.

That did not occur. Now we have a situation in which this very day, yes, this morning, after midnight, the Rules Committee decided to send a bill to you that has never been to committee. It has never been heard and it is restricted for me to present three amendments. I asked for 10. I represent 20,000 people on the gorge; they are my constituents. I am their only voice here to deal with this issue, and we are dealing, my friends, with their future, with their land, with their children and with their dreams.

I suggest we ought to give them an opportunity to at least have their voice heard on amendments so important to their livelihoods. I have 3 chances. For just a moment I want to go through some of the issues to prove to those who are listening that these amendments that I cannot present to this House, because of the restriction of three, are not dilatory. They contribute to a better bill. I want to prove that to you because I have been denied this opportunity to present them, but you are going to hear about them anyway. I cannot present them, but you are going to hear about them.

An amendment that provides that the countries' appointments to the commission be residents of the scenic area. Hardly too great an amendment, yet important for local control which is the issue that you will hear about today.

Another amendment that provides that these commission members who are appointed be volunteers. We have told the Oregon Legislature and the Washington Legislature in this bill, "You must fund the commission and pay their expenses." I suggest that if the Federal Government wants to fund a commission, it ought to pay for it. Since commission members are to serve on a voluntary basis, this amendment provides that the legislatures are only liable for commission member expenses.

Another very important amendment which provides that Thunder Island and Wells Island be a part of the urban area rather than the special management area or the scenic area. There are three distinctions in this bill, simply because Wells Island is owned by the Port of Hood River. It is owned by the Port of Hood River and it is a part of the city limits of Hood River. Thunder Island is owned by the Port of Cascade Locks and within the city limits. But when you take designations out of the urban area into the scenic area, you place much greater restrictions on them. These are little ports on the Columbia River that are barely thriving but need to use the ownership of their own land for the future of their ports. It's not a degrading amendment; it certainly could not kill the legislation.

Next, an amendment that would allow fill and removal permit applications to be exempted from the definition of major development action, asked for by the Port of Cascade Locks, the Hood River Port, the Oregon Ports Association. Obviously an essential kind of activity of ports in the gorge itself. Not a destructive amendment.

I have asked that the office of the commission be located within the scenic area. If we are going to have a commission, we do not want to meet in Olympia and in Portland or Salem; we want it in the scenic area, of course.

An amendment that would delete the Hood River from the restrictions of hydroelectric development provided in the wild and scenic Rivers Act. This river has never been through the Wild and Scenic River Act operation. There are a number of people who live along the Hood River. Agriculture is a principal activity and certainly it ought not be tied up by an act of Congress that has nothing to do with the Wild and Scenic issue.

Another amendment which would, and this is very important, would allow the commission to establish its own guidelines for private lands within the special management area. If this amendment is not adopted, the Secretary of Agriculture, the Federal Government will direct control over private lands. Federal land use planning, Federal zoning; the first time, new granting of authority. Precedent that will follow through this Congress and those that follow, and you may be learning about this later as it presents itself in your State.

Finally, an opportunity for check and balance. An opportunity for a supermajority of the commission to override what the Federal Government does by going one step further and says, "If the commission is not already established, then the Governors of each of the respective States may veto Federal condemnation in the Gorge." What is wrong with that? That is local control; that is check and balance. I thought that is what we were all about.

These issues, my friends, are some that I cannot propose to you because of the restriction of this rule. Now let me say to you in closing that I have been through 13 sine dies in my experience in Government; over 26 years. I have never found one that reached this stage that did not pass bad legislation. Never found one; 13 sine dies in all; I have had a little experience here.

This is bad legislation. This rule gags my opportunity to speak for my people and I ask the Members to defeat it.

Mr. BONIOR of Michigan. Madam Speaker, I yield 5 minutes to the gentleman from Oregon [Mr. WEAVER].

Mr. WEAVER. I thank the gentleman for yielding me this time.

Madam Speaker, I want to thank my distinguished colleague from the State of Michigan for his good words. I want to say if I characterize this legislation in any way and that is it is in openness. It has been before the House and the other body for 6 years. There have been four perhaps five or six different bills introduced by various Members of the House and the other body.

□ 1350

We have continually worked together, opening our negotiations to everyone throughout this 6 years. We had countless thousands of hours with the other body's members and staff, with the Forest Service and land agencies involved, with all the various Members of the House, my good colleagues from Washington and Oregon. We have kept the negotiating process wide open to everyone at all times. The welcome mat has been before the door; the wel-

come sign has been on the door to come on in and talk.

As an example of one of the things we did, my good and dear friend, the gentleman from Oregon [Mr. ROBERT F. SMITH], preceding me, spoke of a very great concern to him, the fact that there is condemnation, extremely limited condemnation in this. You cannot condemn single-family residences, farms, ranches, educational facilities, or anything like that.

But we put in, because the gentleman wanted it, the amendment he was discussing. It is in there. The local governments can override any condemnation authority, the Governor or the local government. That is in this bill.

This bill has been open to everyone, to come in and say what they need. It has been refined so many times to meet the needs of the local citizens, to meet the needs of the gorge, the lovely gorge itself, and that is why we felt that this rule was perfectly proper.

I will be frank with you that, as a member of both the Committee on Interior and Insular Affairs and the Committee on Agriculture, we wanted to open up those committees, but when we began marking up in the committee amendments that were agreed on, approved, what I would vote for and everyone would vote for, they would then ask for quorum calls and record votes after the amendment was agreed on.

Finally, after hours and hours of marking up and coming to 6, I believe, of the 84 amendments they had with each amendment even agreed to, having quorum calls and record votes, we felt that we would try to proceed through just negotiation.

The other body's four members from Washington and Oregon all support this bill and have passed it in the other body. The entire delegations of Washington and Oregon, both Republicans and Democrats, support this bill with two exceptions. So we believe that the process has been open, Madam Speaker. We believe everyone has been welcome and we feel there has been a fair and equitable process to get a refined bill. Hearings have been held in the gorge, among the counties there. People have had their say. We have had hearings in the Committees on Interior and Insular Affairs and Agriculture on this bill over the years, an open and complete process with other people's concerns always in mind.

But all we want to ask the House is to finally enact a bill, and not have it killed by quorum calls and amendments that are already agreed on.

With that, I ask the House to support the rule. I think it is a fair rule to all parties.

Mr. QUILLEN. Madam Speaker, I yield 3 minutes to the gentleman from Alaska [Mr. YOUNG].

Mr. YOUNG of Alaska. Madam Speaker, this is one of the worst examples of legislating that I have seen in my 14 years. Both committees of jurisdiction failed to report this bill. They failed to report the bill because they refused to consider Republican amendments.

It is a sad day when the will of two committees are thwarted and the whole House is asked to cover these failures for proper consideration by accepting a midnight rule on one of the last days of the session.

Other Members on this side of the aisle have stayed with this bill which is so strongly opposed by local residents.

Madam Speaker, I have over 200 telegrams in my office; people that settled the gorge said, "Don't take our land. Don't take away the future for our children. Don't deprive us of our dreams. We have taken care of the gorge, at least on the Oregon side."

Where do we come off as the Congress of the people taking lands by an act of Congress, without considering the Congressman who represents those people and their beliefs and their thoughts?

Maybe we ought to design a red flag and put a hammer and sickle over it, because that is what we are doing here. We are using the Government to take private land and lives away from people that belong to them, not through the due process of legislation, but because of a midnight rule that was denied at 4 o'clock, a midnight rule to appease certain people, and for what reason I do not know.

I have watched this Congress in 14 years prostitute itself and not use the committee system, come to the floor and propose amendments without due consideration and public input.

That is wrong. The subject does not bother me as much as the method that is being used here today.

I say, shame on this House, shame, because we are using Big Brother government. Do you know who owns all of the land in Russia today? The Federal Government. Do you know who owns most of the land in the United States today? The Federal Government.

We continue to take it away from the people. Let the States work out their problems. Oregon has done it; let Washington do it. Let us not be a part of this travesty in justice. Let us go back to this system that I am very proud of and have been proud of. Let us regain our strength of being a committee system. Let us not come to this floor in this late hour.

Mr. BONIOR of Michigan. Madam Speaker, I yield 5½ minutes to my colleague, the gentleman from Oregon [Mr. AUCOIN].

Mr. AUCOIN. Madam Speaker, I appreciate the gentleman from Michigan yielding this time to me.

I would just like to set on the table for the consideration of our colleagues today, all of our colleagues on both sides of the aisle, what this issue is.

This is a rule that makes it possible to consider and finally reach a conclusion on an issue of great importance to the people of the Pacific Northwest, both in the State of Washington and the State of Oregon. It is a debate that has gone on a long time, but the time for decision has come.

The bill is made in order by the rule that has the support of the two Republican Senators from the State of Washington. The bill we will consider, with the passage of this rule, has the support of the two Republican Senators from the State of Oregon. This bill has the support of Republicans and Democrats alike, unanimously, in the Washington State delegation. This bill has the support of three of the five Members in the House from the Oregon delegation.

There are only two Members of the entire Pacific Northwest delegation who oppose this bill.

The people of the region are calling for a resolution: Those who have resisted gorge legislation, but who have compromised; those who are intractable and will not compromise; and those who support vigorous legislation.

All are saying, except for the hardcore on some fringes, that a resolution is needed. We need to know what the rules are from this point forward. We need to get this issue behind us.

Mention has been made today of hundreds of telegrams that have come in from people who live in the gorge who oppose this legislation, and I do not doubt that there have been telegrams. But what has not been stated today is the fact that the Republican Member of the House of Representatives who is most directly affected by the legislation this rule makes in order supports this rule, supports this legislation, and he has the most at stake. I am referring, of course, to our colleague, and a man I feel is a great statesman in this House, the gentleman from Washington [Mr. MORRISON].

I want Members to know that this is not a gag rule. The gentleman from Oregon [Mr. ROBERT F. SMITH], a gentleman I have served with in the Oregon Legislature and now have served with in the Congress, is able, under this rule, to offer three amendments.

□ 1400

I listened very carefully to the objections the gentleman has, which he said are items he is prevented from offering in the form of amendments on the floor.

The SPEAKER pro tempore (Mrs. KENNELLY). The time of the gentleman from Oregon has expired.

Mr. BONIOR of Michigan. Madam Speaker, for purposes of debate only, I yield an additional 2½ minutes to the gentleman from Oregon.

Mr. AuCOIN. Madam Speaker, I appreciate the gentleman yielding this additional time.

I listened with great interest to my friend, the gentleman from Oregon [Mr. ROBERT F. SMITH] when he delineated the items he felt he was precluded from offering as amendments to this bill under this rule.

The truth is that the gentleman from Oregon has the ability to offer three amendments. Among those can be a substitute for the entire bill, so that within that substitute, if he so chooses, he can offer any amendment that covers any of his concerns.

Mr. ROBERT F. SMITH. Madam Speaker, will the gentleman yield?

Mr. AuCOIN. Of course, I yield to the gentleman from Oregon.

Mr. ROBERT F. SMITH. Madam Speaker, I just want to point out to my friend that the gentleman will be witnessing the offering of a substitute.

Mr. AuCOIN. Well, then, I would say to my friend, if that is the case, he should not object to the rule which permits him to offer the amendments that cover all his concerns. That amendment can embrace all his concerns. Those concerns can be heard by the whole House. He is in no way gagged. As a result, this is not a gag rule, but one that simply permits all concerns to be freely aired and debated and voted upon, so the House can act its will on an important piece of legislation that the gentleman's two Republican colleagues support, that his Republican Governor from the State of Oregon supports, and the gentleman is in no way bound or inhibited or prevented from representing his conscience, his views or his constituents.

Mr. ROBERT F. SMITH. Madam Speaker, will the gentleman yield?

Mr. AuCOIN. Of course, I yield to the gentleman from Oregon.

Mr. ROBERT F. SMITH. Madam Speaker, the point the gentleman fails to realize is simply that this bill came to us today. My opportunity to print, to put forward a substitute, was so limited that I had no chance to get my amendments in. I was prohibited by the Rules Committee from offering only 10.

Mr. AuCOIN. I would like to reclaim my time, Madam Speaker, and simply say that the gentleman's amendments were in legislative form, easy to cut and paste and put into the form of a substitute and offer on the floor. I think Members who have served here have been in a position where events here do move quickly and have been in a position to do that and have effectively done precisely that kind of thing, so that their legislation previously drafted can be repackaged in a form that can be offered in swiftly changing circumstances; so the gentleman is not precluded.

Let us vote for this rule. It is a fair rule that leads to a very important piece of legislation.

Mr. QUILLEN. Madam Speaker, I yield 5 minutes to the gentleman from Oregon [Mr. DENNY SMITH].

Mr. DENNY SMITH. Madam Speaker, I think all of us in this House and every Member of the body should be ashamed and embarrassed by what has happened here today. In the last few days we have gone through a number of subversions of the process. Regardless of how they want to gloss over what has happened, let us go through a short history of what has happened here.

This bill has been around for 6 years. This is not a new idea, the taking of private property and trying to protect something that is really unprotectable by the human. I think we have done about as much damage as we can do to the gorge. The mountain to the north of it, Mount St. Helens blew up about 6½ years ago. It made a nasty gash in the countryside; but if you fly over this country as I do on a regular basis, we as human beings have made very little dent on this countryside. Sure, there are trees that come down and trees that grow, but I think as we start looking at what we are trying to do here, we are taking private property and we are trying a land use plan for the Federal Government.

This is highly controversial. We have about 97 percent of the people, some 48,000 people who live in the gorge, who are opposed to this legislation.

This is Big Brother looking over the fence and saying to somebody else, "That looks green and I would like to have it." That is what we are doing here.

This bill is really very poorly crafted. Sure, we have lots of amendments. We had 84 and in the subcommittee, the subcommittee of the gentleman from Minnesota [Mr. VENTO], and I would have to say to the gentleman from Minnesota that he was very fair in the way that he tried to offer us the time to consider those amendments; but if you are going to have 5 minutes for each Member talking about it, one of the amendments which was accepted after we voted on it was one that would allow an individual to build a garage next to a house they already own in the gorge without going to the Secretary of Agriculture to get a building permit. That is the kind of problem we have in this bill. We are talking about specifics here. We are not talking about dilatory.

So after about 15 different bills being put into the hopper this year, with the rewrites considered, we now have a real bill here that we are looking at.

Now, we have not seen this bill before. The bill that we were working on in the subcommittee and the Interior Committee, which was pulled from the subcommittee after about 3½ hours and six amendments, was a different bill. We have had the full committee pull the bill out of the subcommittee because of the so-called dilatory tactics.

What happened then, the gentleman from Oregon [Mr. WEAVER], offered a three-line bill which struck everything but the enacting clause, so that effectively the Interior Committee has not considered this bill or any other bill.

We recessed for a lack of quorum in trying to vote out this three-line bill. We recessed until 4 o'clock in the afternoon. At approximately 4 o'clock we had a vote on the House floor and we were precluded from being there.

The gentleman from Idaho [Mr. CRAIG] and I were walking back to the committee when out of the committee room came the committee members, of which I was told there were about 10 or 11.

Now, remember, we recessed the full committee for lack of quorum trying to vote it out. When we got to that point, we were told that the committee had just by unanimous consent sent the bill to the House floor. This is a three-line bill. We are not talking about where we might have voted equally. The majority clearly controls the numbers on this committee. We would have lost.

Why did they subvert the process? In the Interior Committee, we did not get the chance to do anything that we should have done, which was to offer these amendments. They can say otherwise. The gentleman from Minnesota [Mr. VENTO] started to do that, but it did not really work out that way.

I might say that Chairman UDALL, upon my talking to him about it, said, "Well, SMITTY, this isn't our finest hour." I think he is very correct on that.

The Agriculture Committee dealt with it a little more straightforward. They just refused to consider it after a number of amendments were offered and went on down the road.

Yesterday at 4 o'clock we had an emergency meeting of the Rules Committee to consider this bill. After approximately 45 minutes, the chairman of the Rules Committee, the gentleman from Florida [Mr. PEPPER] decided that we were not going to take this bill up.

Then we had pressure and so forth, so that we had an emergency meeting of the Rules Committee at 12:30 at night to consider a bill that has been around here for 6 years and in the final hours of the session is to be considered. It does not really look like it is

a good deal for anyone, let alone the people that I represent in Oregon or that any of you represent anywhere in this country.

This rule does allow three amendments. We had 84.

We could come up with many problems in this bill, things that need to be addressed. Nobody else on the subcommittee, Congressmen CHENEY, DON YOUNG, BOB LAGOMARSINO, LUJAN, we all had amendments to this.

The SPEAKER pro tempore (Mr. NATCHER). The time of the gentleman from Oregon [Mr. DENNY SMITH] has expired.

Mr. DENNY SMITH. Mr. Speaker, could the gentleman yield 1 additional minute to me?

Mr. QUILLEN. I am sorry, I have no additional time.

Mr. DENNY SMITH. Mr. Speaker, I request a "no" vote on this bill.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 2 minutes to the gentleman from Washington [Mr. CHANDLER].

Mr. CHANDLER. Mr. Speaker, I thank the gentleman for yielding these few minutes.

I want to say from the outset that I have no better friend and I have no higher respect for any Member of this House of Representatives than I do for my colleague, the gentleman from Oregon, Mr. BOB SMITH, who in fact represents the area where I grew up as a child, so I feel some compelling reasons to stand before you today and take what is a difficult position, and that is to oppose a very dear friend.

I think the question on this rule is should we consider the bill? That is clearly what we are debating. My answer is "yes", we should.

Is this, as I think it has been characterized, an unreasonable measure, is it radical? No, I believe not.

It has been pointed out that the Governor of Oregon, a Republican, both Republican Senators from Oregon and the Republican Senators from Washington have approved this bill.

The time is the problem. The process has come about because of the time. There were options discussed even of bringing this bill to the floor on the suspension calendar. Well, that would not even have allowed any amendments whatsoever. We simply would have had a true jamming of the bill through.

This is not a perfect bill. It is not a perfect opportunity for my good friend. It is not exactly the right way to do it, but those opportunities are rarely afforded to us in a legislative body. We have to go with what we have.

This bill ought to be considered today. We ought to reject the notion that simply because it is late, which we all know, that we ought not to consider it. Too much has gone into it. Too much is at stake. Too little time is left for us to simply say let us vote against the rule and not consider the bill.

Mr. Speaker, I urge my colleagues to approve the rule and consider the bill under the provisions of the rule.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from Montana [Mr. MARLENEE].

Mr. MARLENEE. Mr. Speaker, I do not think that anything will exhibit a clear-cut picture better of the ramrodding, bulldozing and railroading of this bill than to review the schedule of events that occurred with regard to this legislation.

I would like to ask the gentleman from Oregon [Mr. DENNY SMITH], what was the committee of primary jurisdiction that this bill was first referred to?

I yield to the gentleman from Oregon.

Mr. DENNY SMITH. It was jointly referred to both the Interior and Agriculture Committees, I understand.

Mr. MARLENEE. But what committee has primary jurisdiction?

Mr. DENNY SMITH. Interior.

Mr. MARLENEE. The Interior Committee has primary jurisdiction?

Mr. DENNY SMITH. Yes.

Mr. MARLENEE. When this bill was first introduced to the Interior Committee this year and when we first considered it in the Interior Committee, when had it been introduced?

Mr. DENNY SMITH. I understand that the bill we considered in the Interior Committee had been introduced on October 1.

Mr. MARLENEE. October 1, and if my memory serves me correctly, October 3 was the date that they passed the bill out of the committee.

Mr. DENNY SMITH. I think that is correct—well, no, it was passed out on the 5th, I think.

Mr. MARLENEE. If we can call it passed out.

Mr. DENNY SMITH. They tried to pass it out on the 3d, but there was a lack of a quorum.

Mr. MARLENEE. So, No. 1, the committee of primary jurisdiction was the Interior Committee?

Mr. DENNY SMITH. Yes.

Mr. MARLENEE. No. 2, the bill that we were considering was introduced on October 1 and October 3 or October 5, somewhere thereabouts; we passed that bill out of the committee. Was there a quorum present when this bill was passed out of the committee?

Mr. DENNY SMITH. If the gentleman will yield further, there was not a quorum present when the bill was passed out.

Mr. MARLENEE. Was the bill passed out on a voice vote?

Mr. DENNY SMITH. It was passed out on a unanimous-consent request with the gentleman from Ohio [Mr. SEIBERLING] in the chair.

Mr. MARLENEE. Was there a quorum call for passage pending on the bill when it was passed by unanimous consent?

Mr. DENNY SMITH. When we recessed in the morning hours about 11 o'clock, I believe, there was a quorum call with a vote pending to vote the bill out to the floor.

Mr. MARLENEE. Obviously, a quorum call that they could not fill, so they vacated that quorum call, passing out a piece of legislation on a voice vote, a major piece of legislation. And what piece of legislation did they pass out? Is this the particular piece of legislation they passed out?

Mr. DENNY SMITH. It is the bill that had everything but the enacting clause struck from it, so that the Interior Committee has never dealt with the bill that we have today.

Mr. MARLENEE. And the bill that we had today, if the gentleman would answer this question, the bill that we are considering today, what date was that introduced into the House of Representatives?

Mr. DENNY SMITH. I believe it was yesterday when the gentleman from Oregon [Mr. WEAVER] worked it up and handed it to the Rules Committee. It was not in a printed form.

Mr. MARLENEE. So neither committee, the Agriculture Committee to which it was referred, nor the Interior Committee, the committee of prime jurisdiction, had an opportunity to look at this bill or pass it out of that appropriate committee; is that correct?

□ 1415

Mr. DENNY SMITH. The gentleman is absolutely correct. Neither committee has considered this bill.

Mr. MARLENEE. Much has been made of the due parliamentary process which has been followed here, but it seems to me that it has been completely abdicated and this House of Representatives is willing to consider on this floor in the House of Representatives a bill that impacts 41,000 people, takes away their rights, and subjects them to condemnation, subjects them to Federal control by a commission on which they may not even have representation.

Mr. Speaker, in the subcommittee of the Committee on Agriculture, was this bill that we are now talking about right here considered?

Mr. ROBERT F. SMITH. Mr. Speaker, will the gentleman yield?

Mr. MARLENEE. I yield to the gentleman from Oregon.

Mr. ROBERT F. SMITH. It was not.

Mr. MARLENEE. On the bill that we did consider, did the gentleman have opportunities to offer amendments?

Mr. ROBERT F. SMITH. I did.

Mr. MARLENEE. And when those amendments were passed out of the subcommittee, were they not taken out when they got to the full committee?

Mr. ROBERT F. SMITH. There was one taken out, but we did not have a chance because of the quorum problems to continue on with the discussion in the full Committee on Agriculture. Therefore, a final decision was not reached.

Mr. MARLENEE. Is the gentleman telling me that no bill was passed out of the Committee on Agriculture?

Mr. ROBERT F. SMITH. That is correct; no bill came forward.

Mr. MARLENEE. So we had no bill passed out of the Agriculture Committee, we had essentially no bill passed out of the Interior Committee, we take up a bill today—today—that was introduced yesterday, and when was the rule granted?

Mr. ROBERT F. SMITH. I am sorry—correction—the bill was introduced today, after midnight. We are still in the same day.

Mr. MARLENEE. Well, events have been compressed and bulldozed together.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 3 minutes to the gentleman from Oregon [Mr. WYDEN].

Mr. WYDEN. Mr. Speaker, I rise in support of this rule.

Mr. Speaker, I am proud to say that literally thousands of acres in my district are part of the Columbia River Gorge. The Columbia River Gorge is truly a national nugget, and in my district we boast Multnomah Falls, perhaps the highest in the country outside of Yosemite. We also have the western part of the historic Columbia River Scenic Highway, and this bill will help restore that.

Mr. Speaker, we have already made mention of the fact that this is an important preservation bill, but for many of my constituents who do live in the gorge, this is also going to be a critical jobs bill. The reason that it is a jobs bill, Mr. Speaker, is that it is going to promote tourism in Oregon and throughout the Pacific Northwest. The fact of the matter is that tourism is our third largest employer at this point. In fact, it is the fastest-growing sector of the Oregon economy. We are now seeing more than $2 billion in tourism throughout our State, and there is no question in my mind that that figure is going to rise as a result of the shot in the arm that this bill is going to give our economy.

Mr. Speaker, the only other point that I would want to mention is that there is a bipartisan coalition of Members who represent many citizens in many communities that are part of the gorge behind this bill: the gentleman from Washington [Mr. BONKER], the gentleman from Washington [Mr. MORRISON], and myself all literally have tens of thousands of acres of gorge lands that are going to be part of this legislation.

Mr. Speaker, I want all of my colleagues to understand that there is a bipartisan coalition in this House that favors this rule at this time that represents communities and citizens that live in the gorge.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 2 minutes to the gentleman from Washington [Mr. MILLER].

Mr. MILLER of Washington. Mr. Speaker, I rise to urge the House to adopt the rule which will allow us to consider H.R. 5705, a bill to establish a Columbia River Gorge National Scenic Area.

For almost a decade, people concerned about preserving this natural wonder that stretches along the Columbia River between Washington and Oregon have sought congressional assistance in coming up with a joint management and conservation plan. For years, Congress has wrestled with this issue. In the last 2 years, I have seen the Washington State congressional delegations wrestle with this issue, and we now have a bill that a majority of Members on both sides of the aisle from Washington and Oregon support.

Mr. Speaker, this rule is fair to those who oppose the bill. It will allow consideration of three amendments. I do not support these amendments, but I do believe that the gentleman from Oregon [Mr. ROBERT F. SMITH] is entitled to offer them.

I ask the House to approve this rule, to defeat the amendments of the gentleman from Oregon [Mr. ROBERT F. SMITH], and to pass H.R. 5705. This is a good bill, it is a fair bill, it is a sensible approach to preserving this national and natural scenic wonder, and it should be passed by Congress and signed into law.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 3 minutes to the gentleman from Washington [Mr. BONKER].

Mr. BONKER. Mr. Speaker, I rise in support of the legislation.

Mr. Speaker, I would like to comment on some of the remarks that have been made concerning the pending rule. Those remarks remind me of the old verse about "ghoulies and ghosties and long-legged beasties, and things that go bump in the night." And despite the closeness of Halloween, there are no ghoulies and ghosties and long-legged beasties in this rule.

It is a fair and just rule, and provides the gentleman from Oregon, who does have a stake in this legislation, to offer his amendments. He stated at the outset that he had 10 amendments, and of course, if we had allowed all of the amendments to be offered today, we would make it a long afternoon. He was asked to be able to package his amendments in any way he desired, so that he could present them and his case on behalf of his constituents. This is certainly not a gag rule, as he claims.

The Rules Committee did convene at midnight, in order to make available a rule for consideration today. As we all know, once the Rules Committee has offered a rule for a bill, there is a 1 day layover. We are winding down this 99th Congress, and had we convened the Rules Committee this morning, as was previously agreed to, then we would have to take up the gorge legislation tomorrow at a time when we may be finishing up our legislative business and Members would be anxious to leave town.

In other words, the Rules Committee convened last evening for the purpose of granting a rule, which they were going to do anyway, so that we could take up the gorge bill today when we have empty time, instead of tomorrow, when we are all pressed to get back to our districts. So I think that the Rules Committee has acted properly.

The other point that I would like to make concerns the obvious fact that this is a regional issue. It involves two States—Oregon and Washington. What Members should know is that the impact of this legislation will be upon the private lands, and 90 percent of the private lands are on the Washington side, 10 percent on the Oregon side. Ninety percent are on the Washington side, and its entire congressional delegation supports the bill. Five Republicans and five Democrats in this congressional delegation all support the bill and the rule.

So I think that we have approached this in a bipartisan way and in a deliberative way. I think that the Rules Committee has been fair and just. Mr. SMITH will have his opportunity to propose his amendments. We will debate them and vote them up and down.

Mr. Speaker, I would like to say that Members can oppose the bill on its merits, but I think that they ought to support the rule because of its fairness.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Speaker, I hardly ever speak on rules, but I rise in very strong opposition to this rule on H.R. 5705, to establish the Columbia River Gorge National Scenic Area. It is just too late in the session to be considering such a complex and controversial piece of legislation. I believe an acceptable bill could be worked out. However, the consideration of the Columbia Gorge issue in the House has been a complete perversion of the legislative process.

During debate on the issue in the Interior Committee, of which I am a member, the bill was not reported from the subcommittee due to strong opposition to the bill. The bill was then brought before the full committee which discharged the subcommittee from further action and proceeded to approve a two-line shell bill, introduced by the gentleman from Oregon [Mr. WEAVER], without a quorum present. The Republicans had prepared approximately 80 good, solid amendments to this legislation, but were never presented the opportunity to offer even one of the amendments during full committee action.

I am told that when the Agriculture Committee considered the bill, the gentleman from Oregon, Mr. BOB SMITH, was unable to offer all of his amendments for consideration since the chairman of the committee adjourned the session for lack of a quorum.

Therefore, those who had prepared amendments were never allowed the opportunity to offer them. They never had the chance to improve what they believed was a seriously flawed bill. Furthermore, none of the House or Senate committees which considered this bill prepared or filed a committee report. I doubt that many Members of this body even know what is included in this bill.

I believe the rules action on this bill was also a perversion of the process. The committee deferred further action on a rule yesterday afternoon due to the controversy surrounding the bill. They then proceeded to grant a rule for the bill after midnight. The rule is for a bill which was only introduced in the House yesterday and which had not even been printed. It has never been considered by any House committees. The only bill concerning the Columbia River Gorge which was reported to the House, without a quorum I might add, was the two-line shell bill. Furthermore, the rule only provides for consideration of three amendments even though several Members had indicated to the rules committee that they had prepared numerous amendments which they wanted to offer to the bill.

Mr. Speaker, if this rule is approved, it will be a sad commentary on the democratic process. All of the rules have been stretched—if not broken—on this issue; the process has been thwarted. I urge all of my colleagues to oppose this rule and send this bill back to the committees where it can be appropriately considered next year.

□ 1425

Mr. BONIOR of Michigan. Mr. Speaker, may I inquire as to the time remaining?

The SPEAKER pro tempore (Mr. NATCHER). The gentleman from Michigan [Mr. BONIOR] has 6½ minutes remaining, and the gentleman from Tennessee [Mr. QUILLEN] has 1 minute remaining.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 3 minutes to the gentleman from Washington [Mr. MORRISON].

Mr. MORRISON of Washington. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, my friend and colleague from Oregon, BOB SMITH, has accurately described the differences between the two States, and obviously those differences exist or we probably would not have this legislation in front of us today.

I want to point out that the gentleman from Oregon [Mr. SMITH] has been very constructive trying to represent his constituents, just as I have. My druthers are not really represented in this bill today. I would start with strictly local counties working out their own problems on land use. My second choice would be coordinated efforts through State agreements between the two States. But these just have not worked in the past, as evidenced by the frustrations of the last 40 years.

There is a need for some modest role of the Federal Government, and that is because there is so much Federal land already involved in this Columbia Gorge area. Through the years this Congress has done some interesting things with land. This bill does establish some new precedents.

Heretofore, for 14 areas around the Nation that the Forest Service already handles, the boundaries of the Federal forests have been modified to take in outside areas. That is not the goal in this case. The goal is to protect scenic values. We are establishing a national scenic area. The boundaries of the national forest are not extended. The hope is to keep these lands in private hands and to coordinate, with the help of a bistate commission, locally appointed, to determine what sort of scenic values protecting are to be established. The goal is to keep it private, protect the scenic values and not extend the boundaries of the national forest.

As far as the rule is concerned, which is the current debate, I would prefer no limitation on amendments. I have additional changes in this bill that I would like to make, but I will vote for the rule. Under the circumstances, it is the best that we can do.

The next bill that we would see in this same subject area next year will be worse. I feel badly about the Interior Committee procedure that makes some of my colleagues very unhappy, but let me defend the Agriculture Committee. The proceedings there were totally fair. The Forestry Subcommittee held a field hearing in the Columbia River Gorge, listened to over 80 witnesses, held a thorough markup, every amendment was considered. In the Agricultural Committee it was only because of a series of quorum calls that there was no opportunity to fully process the bill. I wish we could have completed consideration, because we would have a better bill here in front of us now.

We currently have the only package that seems to be available to us. So in spite of the fact that there has been some unhappiness over process, I prefer to look at the issue that is before us right now, and I do ask my colleagues to support the rule.

Mr. MARLENEE. Mr. Speaker, will the gentleman yield?

Mr. MORRISON of Washington. I yield to the gentleman from Montana.

Mr. MARLENEE. Mr. Speaker, was a bill passed out of the Agriculture Committee?

Mr. MORRISON of Washington. No, unfortunately, for lack of a quorum after several quorum calls, the gentleman from Oregon, Mr. SMITH's amendments were not further considered, and so that version of the bill remains in the hands of the Agriculture Committee.

Mr. MARLENEE. I thank the gentleman for yielding.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Idaho [Mr. CRAIG].

Mr. CRAIG. Mr. Speaker, I stand in opposition to the rule today for all of the reasons that have been spoken here this afternoon by those who do oppose it, and they are numerous.

But there is another reason that I think is so fundamental in this issue, and that is, How do we deal with our constituents at home when in fact they stand so loudly and clearly and say they do not want Federal control over their lives? But in our wisdom, in our righteous wisdom we say we know better.

The legislation you will be dealing with this afternoon is a demonstration of this body saying to the citizens of the State of Washington we know better, we are brighter, we are more intelligent and, therefore, we will determine your destiny and how you will control your land and how you will live your lives. That is what this legislation is saying. It is so fundamentally clear and it has been said before.

THE WASHINGTON LEGISLATURE'S MEMORIAL, APRIL 28, 1983

To the Honorable Ronald Reagan, President of the United States, and to the President of the Senate and the Speaker of the House of Representatives, and to the Senate and House of Representatives of the United States, in Congress assembled:

We, your Memorialists, the Senate and House of Representatives of the State of Washington, in legislative session assembled, respectfully represent and petition as follows:

Whereas, The Columbia River Gorge is the home of forty-one thousand residents of the states of Washington and Oregon who

live in the location by choice, and as free and responsible citizens have managed their area in a prudent, conservation-minded manner; and

Whereas, The Columbia River Gorge is a vital transportation corridor and economic link between the Northwest and the products and markets of the nation and the world; and

Whereas, Congressional proposals have been made to place the Columbia River Gorge under centralized federal control, which proposals conflict with the sentiments expressed by the people in votes and polls in overwhelming opposition to the federal control; and

Whereas, The Senate and House of Representatives of the State of Washington oppose imposition of any further federal control over nonfederal land in the Columbia River Gorge;

Now, therefore, Your Memorialists respectfully pray that Congress refrain from considering legislation imposing further federal control over nonfederal land in the Columbia River Gorge.

Be it resolved, That copies of this Memorial be immediately transmitted to the Honorable Ronald Reagan, President of the United States, the President of the United States Senate, the Speaker of the House of Representatives, and each member of Congress from the State of Washington.

Mr. BONIOR of Michigan. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, through their elected Representatives in the State of Washington and Oregon the vast majority of people in the Northwest have spoken clearly and eloquently of the need to preserve this national treasure, the Columbia River Gorge. I think we give a wonderful gift to the American people, and in particular to the people of that part of the country with the passage of this bill which has been so long before this Congress.

I urge my colleagues to vote in a bipartisan way as we have had bipartisan leadership on this issue for this rule and for the bill.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. BONIOR of Michigan. I yield to the gentleman from Ohio, for purposes of debate only.

Mr. SEIBERLING. Mr. Speaker, I rise in support of the rule. It is a simple issue. All we are trying to do is give the House an opportunity to disgorge this little bill.

Mr. BONIOR of Michigan. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 252, nays 138, not voting 42, as follows:

□ 1445

The Clerk announced the following pair:

On this vote:

Mr. Hayes for, with Mr. Hansen against.

Mr. RAY changed his vote from "yea" to "nay."

Mr. COBLE and Mrs. BOXER changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed with amendments in which the con-

currence of the House is requested, bills of the House of the following titles:

H.R. 2776. An act to amend the District of Columbia Stadium Act of 1957 to direct the Secretary of the Interior to convey title to the Robert F. Kennedy Memorial Stadium to the District of Columbia;

H.R. 4208. An act to authorize appropriations for the Coast Guard for fiscal year 1987, and for other purposes; and

H.R. 5167. An act to declare that the United States holds certain public domain lands in trust for the Pueblo of Zia.

The message also announced that the Senate had passed bills, joint resolution, and concurrent resolutions of the following titles, in which the concurrence of the House is requested:

S. 485. An act to amend the Alaska National Interest Lands Conservation Act of 1980 to clarify the treatment of submerged lands and ownership by the Alaskan Native Corporation;

S. 2243. An act to improve the health status of Native Hawaiians, and for other purposes;

S.J. Res. 428. Joint resolution granting the consent and approval of Congress for the State of Maryland, the Commonwealth of Virginia, and the District of Columbia to amend the Washington Metropolitan Area Transit Regulation Compact;

S. Con. Res. 171. Concurrent resolution to correct the enrollment of House Joint Resolution 626; and

S. Con. Res. 172. Concurrent resolution to convene the Congress in Philadelphia, Pennsylvania, on July 16, 1987, in order to commemorate the 200th anniversary of the Great Compromise creating the basis of representation between the Senate and the House of Representatives.

AUTHORIZING CORRECTIONS IN ENROLLMENT OF H.J. RES. 626, PALAU COMPACT OF FREE ASSOCIATION ACT

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all committees be discharged from further consideration of the Senate concurrent resolution (S. Con. Res. 171) to correct the enrollment of House Joint Resolution 626.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. (Mr. NATCHER). Is there objection to the request of the gentleman from Ohio?

Mr. ROBERT F. SMITH. Reserving the right to object, Mr. Speaker, I do so in order to yield to the distinguished gentleman from Ohio for an explanation of his unanimous consent request.

Mr. SEIBERLING. Mr. Speaker, I would be glad to respond to the gentleman, and let me say, if the gentleman will yield, that this concurrent resolution has been passed by the Senate to make certain changes in the enrollment of the Senate's amendment to the House's resolution ratifying the Compact of Free Association with Palau.

The changes that will be made by this concurrent resolution have been discussed between House Members and Members of the other body and have been agreed to. They are essentially technical changes, except for one which addresses the moral commitment of the United States with respect to certain important programs that are now in place for people in the Marshall Islands affected by American nuclear testing after World War II.

The Senate resolution now before us would not amend existing law dealing with those programs, but would be a separate expression of congressional intent.

In my opinion, the changes improve the Palau compact legislation sufficiently that if the House adopts this concurrent resolution, the way will be clear for us to immediately proceed to bring up the Palau compact legislation and to clear the way for its passage.

Two of the programs originally part of the provision about which the House wanted reassurance regarding future funding were removed in the course of negotiations with the Senate, by mutual agreement.

Provisions dealing with the Prior Service Benefits Program were deleted for two reasons: First, because the Urgent Supplemental Appropriations Act of 1986 (P.L. 99-349) contained $8 million for "initial capitalization" of the fund. Second, because the Appropriations Committees of the U.S. Congress have agreed to look at the need for any additional funding once the appropriate officials have presented to them facts and information regarding the total cost of completing this program for the designated beneficiaries.

The provisions addressing the Enjebi Community Trust Fund were also removed. This trust fund was initially funded by the U.S. Congress with $2.75 million in the Urgent Supplemental Appropriations Act of 1986 referred to above. We were then informed that there is yet another $2.25 million in the continuing resolution for fiscal year 1987, along with conference report language committing the Appropriations Committees to completing the funding of the trust fund up to the $10 million level that was originally recommended by the Interior and Insular Affairs Committee. Because we believe that the Appropriations Committees have shown determination to meet this commitment, and that they will persevere until the commitment has been fully met, provisions regarding this trust are not included in the expression of congressional intent.

The remaining programs, all part of the 103(h) of Public Law 99-239, which provide for the Special Medical Program with its logistical support for the nuclear victims from Rongelap and Utrik, which provide a support program of agricultural maintenance, food, and boat transportation for the Enewetak people, and which provide a food supplemental program for Bikinians, are addressed in a provision in this concurrent resolution, which amends House Joint Resolution 626. The provision stipulates that it is the sense of Congress that these three programs "represent special and continuing moral commitments of the United States which will be annually funded to the extent of the need of the populations of such atolls for such assistance." We are hopeful that this will ensure that there be no disruptions in the annual funding of these critically needed programs so long as they are needed by these people. Further, we do not view this in any way as undermining the House's position regarding the legal status of these programs but rather as bolstering it.

Mr. ROBERT F. SMITH. Mr. Speaker, I thank the gentleman for his explanation, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. LAGOMARSINO. Mr. Speaker, reserving the right to object, I shall not object. The gentleman from Ohio has already explained the resolution.

I am in strong support of the resolution. It is something that we have worked out. I think it is in the best interests not only of the island community but of the United States itself.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from Ohio.

Mr. SEIBERLING. I thank the gentleman for yielding.

Mr. Speaker, I thank the gentleman and all the other gentlemen on the minority side and the gentlemen in the other body, particularly our colleague Senator MCCLURE, for the cooperative way in which this has been worked out. I join with the gentleman in urging of this resolution.

Mr. LAGOMARSINO. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the Senate concurrent resolution as follows:

S. CON. RES. 171

Resolved by the Senate (the House of Representatives concurring), That in the enrollment of the joint resolution (H.J. Res. 626) to approve the "Compact of Free Association" between the United States and the Government of Palau, the following corrections shall be made:

(1) In section 101(d)(1)(B), insert "the Committees on Interior and Insular Affairs and Foreign Affairs and other" before "appropriate Committees of the House of Representatives".

(2) In section 101(d)(2) strike "(B)" and insert "(C)".

(3) In section 102(b), add "as amended," after "Public Law 99-239,".

(4) In section 104(c), strike "fiscal year 1985" each time such words occur and in each instance insert in lieu thereof "fiscal year 1986".

(5) In section 104(f), strike "Public Law 99-396" and in lieu thereof insert "Public Law 99-366".

(6) In section 104(g), strike "preclude" and in lieu thereof insert "exclude, limit".

(7) In section 242(c)(4) of Title II, strike "chapter V" and insert "title V".

(8) Following Section 104(j) insert new subsection (k) as follows:

"(k) The Departments of Energy and Interior are directed to provide the Committees on Appropriations of the House and Senate with a report by December 1 of each fiscal year detailing how funds were spent during the previous fiscal year for the special medical care and logistical support program for Rongelap and Utrik and for the agriculture and food programs for Enewetak and Bikini as referenced in Section 103(h) of Public Law 99-239. The report shall also specify the anticipated needs during the current and following fiscal years in order to meet the radiological health care and logistical support program for Rongelap and Utrik and the planting, agricultural maintenance, and food programs for Enewetak and Bikini. It is the sense of the Congress that the special medical care and logistical support program for Rongelap and Utrik and for the agriculture and food programs for Enewetak and Bikini described in section 103(h) of Public Law 99-239 represent special and continuing moral commitments of the United States which will be annually funded to the extent of the need of the populations of such atolls for such assistance."

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

PALAU COMPACT OF FREE ASSOCIATION ACT

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the joint resolution (H.J. Res. 626) to approve the "Compact of Free Association" between the United States and the Government of Palau, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the joint resolution.

The Clerk read the Senate amendment as follows:

Strike out all after the resolving clause and insert:

TITLE I—APPROVAL OF COMPACT; INTERPRETATION OF, AND UNITED STATES POLICIES REGARDING, COMPACT; SUPPLEMENTAL PROVISIONS

APPROVAL OF COMPACT OF FREE ASSOCIATION

SEC. 101. (a) APPROVAL.—The Compact of Free Association set forth in title II of this joint resolution between the United States and the Government of Palau is hereby approved, and Congress hereby consents to the agreements as set forth on pages 154 through 405 of House Document 99-193 of April 9, 1986 (hereafter in this joint resolution referred to as subsidiary or related agreements), as they relate to such Government. Subject to the provisions of this joint resolution, the President is authorized to agree, in accordance with section 411 of the Compact, to an effective date for and thereafter to implement such Compact, having taken into account any procedures with respect to the United Nations for termination of the Trusteeship Agreement.

(b) REFERENCE TO THE COMPACT.—Any reference in this joint resolution to the "Compact" shall be treated as a reference to the Compact of Free Association set forth in title II of this joint resolution.

(c) AMENDMENT, CHANGE, OR TERMINATION OF THE COMPACT AND CERTAIN AGREEMENTS.—(1) Mutual agreement by the Government of the United States as provided in the Compact which results in amendment, change, or termination of all or any part thereof shall be affected only by act of Congress and no unilateral action by the Government of the United States provided for in the Compact, and having such result may be effected other than by Act of Congress.

(2) The provisions of paragraph (1) shall apply—

(A) to all actions of the Government of the United States under the Compact including, but not limited to, actions taken pursuant to sections 431, 432, 441, or 442;

(B) to any amendment, change, or termination in any agreement that may be concluded at any time between the Government of the United States and the Government of Palau regarding friendship, cooperation and mutual security concluded pursuant to sections 321 and 323 of the Compact referred to in section 462(h);

(C) to any amendment change, or termination of the agreements concluded pursuant to Compact sections 175 and 221(a)(4), the terms of which are incorporated by reference into the Compact; and

(D) to the following subsidiary agreements, or portions thereof:

(i) Article II of the agreement referred to in section 462(a) of the Compact;

(ii) Article II of the agreement referred to in section 462(b) of the Compact;

(iii) Article II and Section 7 of Article X of the agreement referred to in section 462(f) of the Compact;

(iv) the agreement referred to in section 462(g) of the Compact;

(v) Articles II, III, IV, V, VI, and VII of the agreement referred to in section 462(h) of the Compact; and

(vi) Articles VI, XV, and XVII of the agreement referred to in section 462(i) of the Compact.

(d) EFFECTIVE DATE.—(1) The authority of the President to agree to an effective date for the Compact of Free Association between the United States and Palau concurrently with termination of the Trusteeship shall be carried out in accordance with this section, and the Compact shall not take effect until after—

(A) The President has certified to the Congress that the Compact has been approved in accordance with Section 411 (a) and (b) of the Compact, and that there exists no legal impediment to the ability of the United States to carry out fully its responsibilities and to exercise its rights under Title Three of the Compact, as set forth in this Act, and

(B) enactment of a joint resolution which has been reported by the Committee on Energy and Natural Resources of the Senate and the appropriate Committees of the House of Representatives authorizing entry into force of the Compact, and

(C) agreements have been concluded with Palau which satisfy the requirements of Section 102 of Public Law 99-239. For the purpose of this subsection the word "Palau" shall be substituted for "Federated States of Micronesia" whenever it appears in Section 102 of Public Law 99-239.

(2) Any agreement concluded with Palau pursuant to subparagraph 101(d)(1)(B) of this title and any agreement which would amend, change, or terminate any subsidiary agreement or related agreement, or portion thereof, as set forth in paragraph (4) of this subsection shall be submitted to the Congress. No such agreement shall take effect until after the expiration of 30 days after the date such agreement is so submitted (excluding days on which either House of Congress is not in session.)

(3) No agreement described in paragraph (2) shall take effect if a joint resolution of disapproval is enacted during the period specified in paragraph (2). For the purpose of expediting the consideration of such a joint resolution, a motion to proceed to the consideration of any such joint resolution after it has been reported by an appropriate committee shall be treated as highly privileged in the House of Representatives. Any such joint resolution shall be considered in the Senate in accordance with the provisions of section 601(b) of Public Law 94-329.

(4) The subsidiary agreement or portions thereof referred to in paragraph (2) are as follows:

(A) Articles III and IV of the agreement referred to in section 462(b) of the Compact.

(B) Articles III, IV, V, VI, VII, VIII, IX, and X (except for section 7 thereof) of the agreement referred to in section 462(f) of the Compact.

(C) Articles IV, V, X, XIV, XVI, and XVII of the agreement referred to in section 462(i) of the Compact.

(D) Articles II, V, VI, VII, and VIII of the agreement referred to in section 462(h) of the Compact.

(E) The agreement referred to in section 462(j) of the Compact.

(5) No agreement between the United States and the Government of Palau which would amend, change, or terminate any subsidiary or related agreement, or portion thereof, other than those set forth in subsection (d) of this section or paragraph (4) of this subsection, shall take effect until the President has transmitted such an agreement to the President of the Senate and the Speaker of the House of Representatives, together with an explanation of the agreement and the reasons therefor.

EXTENSION OF COMPACT OF FREE ASSOCIATION TO PALAU

SEC. 102. (a) The interpretation of and United States Policy Regarding the Compact of Free Association set forth in section 104 of Public Law 99-239 shall apply to the Compact of Free Association with Palau.

(b) The provisions of section 105, except for subsection (i), section 106, section 110, and section 111 (a) and (b) of Public Law 99-239, shall apply to Palau in the same manner and to the same extent as such sections apply to the Marshall Islands.

REPEAL OF TITLE V OF THE COMPACT OF FREE ASSOCIATION ACT (PUBLIC LAW 99-239)

SEC. 103. Title V of the Public Law 99-239 is repealed.

SUPPLEMENTAL PROVISIONS

SEC. 104. (a) CIVIC ACTION TEAMS.—In recognition of the special development needs of Palau and the Marshall Islands, the United

States shall make available United States military Civic Action Teams for use in Palau or the Marshall Islands under terms and conditions mutually agreed upon by the Government of the United States and the Governments of Palau or the Marshall Islands, as appropriate. The Government of Palau may use the amount of $250,000 annually from current account funds provided pursuant to section 211 of the Compact to defray expenditures attendant to the operation of the Civic Action Teams made available pursuant to this subsection. The Government of the Marshall Islands may use the amount of $250,000 annually from current account funds provided under section 211 of Title Two of the Compact of Free Association with the Marshall Islands to defray expenditures attendant to the operation of the Civic Action Teams made available pursuant to this subsection.

(b) INVENTORY AND STUDY OF NATURAL, HISTORIC AND OTHER RESOURCES.—The Secretary of the Interior shall conduct, upon request of Palau, the Federated States of Micronesia or the Marshall Islands, and through the Director of the National Park Service, a comprehensive inventory and study of the most unique and significant natural, historical, cultural, and recreational resources of Palau, the Federated States of Micronesia or the Marshall Islands. Areas or sites exhibiting such qualities shall be described and evaluated with the objective of the preservation of their values and their careful use and appreciation by the public, along with a determination of their potential for attracting tourism. Alternative methodologies for such preservation and use shall be developed for each area or site (including continued assistance from the National Park Service); current or impending damage or threats to the resources of such areas or sites shall be identified and evaluated; and authorities needed to properly protect and allow for public care and appreciation shall be identified and discussed. Such inventory and study shall be conducted in full cooperation and consultation with affected governmental officials and the interested public. A full report on such inventory and study shall be transmitted to Palau or the Federated States of Micronesia or the Marshall Islands, the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate no later than two complete calendar years after the date of enactment of this joint resolution. The inventory and study shall also identify areas or sites which, if they were located in the United States, would qualify to be listed on the Registry of Natural Landmarks and the National Register of Historic Places.

(c) AUTHORIZATION FOR TRANSITION PURPOSES.—Section 105(c)(2) of Public Law 99-239 is amended by deleting "infrastructure." and inserting in lieu thereof "infrastructure, except that, for purposes of an orderly reduction of United States programs and services in the Federated States of Micronesia, the Marshall Islands, and Palau, United States programs or services not specifically authorized by the Compact of Free Association or by other provisions of law may continue but, unless reimbursed by the respective freely associated state, not in excess of the following amounts:

"(1) For fiscal year 1987, an amount not to exceed 75 per centum of the total amount appropriated for such programs for fiscal year 1985;

"(2) For fiscal year 1988, an amount not to exceed 50 per centum of the total amount appropriated for such programs for fiscal year 1985;

"(3) For fiscal year 1989, an amount not to exceed 25 per centum of the total amount appropriated for such programs for fiscal year 1985.".

(d) PELELIU AND ANGAUR.—Not later than one year after the date of enactment of this joint resolution, the Secretary of Agriculture, after appropriate studies conducted in consultation with the Government of Palau, shall report to the President and the Congress concerning the feasibility and cost of rehabilitating and restoring the fertility of the topsoil of the islands of Peleliu and Angaur. Upon the request of the Government of Palau, the President shall make the report of the Secretary of Agriculture available to the Government of Palau. Technical assistance to accomplish such rehabilitation and restoration, if feasible, may be provided to the Government of Palau on a nonreimbursable basis, subject to the availability of appropriated funds.

(e) Neither the Secretary of the Treasury nor any other officer or agent of the United States shall pay or transfer any portion of the sums and amounts payable to the Government of Palau pursuant to this joint resolution to any party other than the Government of Palau. The provisions of section 174(a) of the Compact shall apply with respect to any action based on a contract or debt related to any electrical generating plant or related facilities entered into or incurred by Palau prior to the date of enactment of this joint resolution.

(f) Amounts appropriated to be paid pursuant to section 177 of Article I of Title One or Articles I and III of Title Two of the Compact of Free Association with the Federated States of Micronesia and the Marshall Islands, as set forth in Title II of the Compact of Free Association Act of 1985, or pursuant to section 103(h), 103(k), or 105(m) of such Act (Public Law 99-239), or pursuant to Article I of Title Two of the Compact with Palau, as set forth in Title II of this joint resolution, or section 104(*l*) of this joint resolution shall not be reduced, notwithstanding Public Law 99-177, Public Law 99-396, and other law enacted to implement Public Law 99-177, or any other provision of law.

(g) The Congress reaffirms all of the understandings, interpretations, and policy statements contained in Public Law 99-239 (99 Stat. 1770). Congressional Resolution 4-60 adopted by the 4th Congress of the Federated States of Micronesia on March 26, 1986 and Resolution No. 62 adopted by the Nitijela of the Marshall Islands on February 18, 1986 do not preclude or modify any provision of the Compact of Free Association as approved by the United States. To the extent that any understandings, interpretations, and policy statements contained in such Resolutions are inconsistent with the provisions of Public Law 99-239, the United States does not concur therein. The President shall take such steps, including but not limited to, communicating with the Governments of the Federated States of Micronesia and the Republic of the Marshall Islands, as may be necessary to preserve all rights of the United States in connection with interpretation and implementation of such Public Law.

(h) ADDITIONAL PROVISIONS RELATING TO TITLE THREE OF THE COMPACT.—

(1) The Government of the United States recognizes and respects the scarcity and special importance of land in Palau. In making any designation of land pursuant to section 322 of the Compact, the Government of the United States shall follow the policy of requesting the minimum area necessary to accomplish the required security and defense purpose, of requesting only the minimum interest in real property necessary to support such purpose, and of requesting first to satisfy the requirement through public real property, where available, rather than through private real property.

(2) The Armed Forces of other nations invited to use military areas and facilities in Palau pursuant to section 312 of the Compact shall be permitted only as it is incident to the authority and under the control of the United States. The activities of such third country forces shall be subject to the same limitations and restrictions applicable to the authority of the United States under the terms of the Compact.

(3) The Government of the United States considers "Exclusive use" areas established for the United States pursuant to Title Three of the Compact to be "within the jurisdiction of Palau," as that term is used in section 324 of the Compact.

(i) Notwithstanding any other provision of law, funds appropriated for the Compact of Free Association, Public Law 99-239, or this joint resolution, in the act making supplemental appropriations for fiscal year 1986, shall remain available until expended.

(j)(1) section 4(c) of the Act of December 27, 1974 (88 Stat. 1784; 16 U.S.C. 460ff-3(c)) is amended by inserting "(1)" after "(c)" and by adding the following at the end thereof:

"(2) The Secretary is authorized and directed, in cooperation with the Secretary of Agriculture, the State of Ohio, and affected local governments, to undertake a program of and treatment for the purpose of restoring suitable vegetative cover to substantially eliminate erosion from all lands, public and private, within the authorized boundaries of the recreation area. In the case of any private lands, within such authorized boundaries such treatment may be undertaken only with the consent of the owner thereof and shall be contingent upon assurances that such land treatment will be maintained by the owner for a period of not less than ten years. The Secretary shall, in conjunction with such program, take such actions as may be required to correct areas of ecological degradation which create hazards to health and safety.".

(2) Section 6 of such Act (16 U.S.C. 460ff-5) is amended by adding the following at the end thereof:

"(c) There are hereby authorized to be appropriated not more than $500,000 for fiscal year 1986, $1,000,000 for fiscal year 1987, $1,500,000 for fiscal year 1988, and $1,750,000 for fiscal year 1989, to carry out the provisions of section 4(c)(2) of this Act. Any amounts authorized to be appropriated for any fiscal year under this subsection which are not appropriated for that fiscal year shall remain available for appropriation in succeeding fiscal years.".

(3) No authority under this subsection to enter into contracts or to make payments shall be effective except to the extent and in such amounts as provided in advance in appropriations Acts. Any provision of this subsection which authorizes the enactment of new budget authority shall be effective only for fiscal years beginning after September 30, 1985.

TITLE II—COMPACT OF FREE ASSOCIATION

COMPACT OF FREE ASSOCIATION

SEC. 201. The Compact of Free Association is as follows:

COMPACT OF FREE ASSOCIATION

PREAMBLE

THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF PALAU

Affirming that their Governments and the relationship between their Governments are founded upon respect for human rights and fundamental freedoms for all, and

Affirming the common interests of the United States of America and the people of Palau in creating close and mutually beneficial relationships through a free and voluntary association of their Governments; and

Affirming the interest of the Government of the United States in promoting the economic advancement and self-sufficiency of the people of Palau; and

Recognizing that their previous relationship has been based upon the International Trusteeship System of the United Nations Charter; and that pursuant to Article 76 of the Charter, the peoples of the Trust Territory have progressively developed their institutions of self-government, and that in the exercise of their sovereign right to self-determination they have, through their freely-expressed wishes, adopted a Constitution appropriate to their particular circumstances; and

Recognizing their common desire to terminate the Trusteeship and establish a new government-to-government relationship in accordance with a new political status based on the freely-expressed wishes of the people of Palau and appropriate to their particular circumstances; and

Recognizing that the people of Palau have and retain their sovereignty and their sovereign right to self-determination and the inherent right to adopt and amend their own Constitution and form of government and that the approval of the entry of their Government into this Compact of Free Association by the people of Palau constitutes an exercise of their sovereign right to self-determination;

Now, therefore, agree to enter into relationship of free association which provides a full measure of self-government for the people of Palau; and

Further agree that the relationships of free association derives from and is as set forth in this Compact; and that, during such relationships of free association, the respective rights and responsibilities of the Government of the United States and the Government of the freely associated state of Palau in regard to this relationship of free association derives from and is set forth in this Compact.

TITLE ONE

GOVERNMENT RELATIONS

ARTICLE I

Self-government

Section 111

The people of Palau, acting through their duly elected government established under their constitution, are self-governing.

ARTICLE II

Foreign affairs

Section 121

(a) The Republic of Palau has the capacity to conduct foreign affairs in its own name and right, except as otherwise provided in this Compact and the Government of the United States recognizes that the Government of Palau, in the exercise of this capacity, may enter into, in its own name and right, treaties and other international agreements with governments and regional and international organizations.

(b) In the conduct of its foreign affairs the Government of Palau confirms that it shall act in accordance with principles of international law and shall settle its international disputes by peaceful means.

Section 122

The Government of the United States shall support application by the Government of Palau for membership or other participation in regional or international organizations as may be mutually agreed. The Government of the United States agrees to accept citizens of Palau for training and instruction at the United States Foreign Service Institute, established under 22 U.S.C. 4021, or similar training under terms and conditions to be mutually agreed.

Section 123

In recognition of the authority and responsibility of the Government of the United States under Title Three, the Government of Palau shall consult with the Government of the United States. The Government of the United States, in the conduct of its foreign affairs, shall consult with the Government of Palau on matters which the Government of the United States regards as relating to or affecting the Government of Palau, and shall provide, on a regular basis, information on regional foreign policy matters.

Section 124

(a) The Government of Palau has authority to conduct its foreign affairs relating to law of the sea and marine resources matters, including the harvesting, conservation, exploration or exploitation of living and nonliving resources from the sea, seabed or subsoil to the full extent recognized under international law.

(b) The Government of Palau has jurisdiction and sovereignty over its territory, including its land and internal waters, territorial seas, the airspace superjacent thereto only to the extent recognized under international law.

Section 125

Except as otherwise provided in this Compact or its related agreements, all obligations, responsibilities, rights and benefits of the Government of the United States as administering authority which have resulted from the application pursuant to the Trusteeship Agreement of any treaty or other international agreement to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact are no longer assumed and enjoyed by the Government of the United States.

Section 126

The Government of the United States shall accept responsibility for those actions taken by the Government of Palau in the area of foreign affairs, only as may from time to time be expressly and mutually agreed.

Section 127

The Government of the United States may assist or act on behalf of the Government of Palau in the area of foreign affairs as may be requested and mutually agreed from time to time. The Government of the United States shall not be responsible to third parties for the actions of the Government of Palau undertaken with the assistance or through the agency of the Government of the United States pursuant to this Section unless expressly agreed.

Section 128

At the request of the Government of Palau and subject to the consent of the receiving state, the Government of the United States shall extend consular assistance on the same basis as for citizens of the United States to citizens of Palau for travel outside of Palau, the Marshall Islands, the Federated States of Micronesia, the United States and its territories and possessions.

ARTICLE III

Communications

Section 131

(a) The Government of Palau has full authority and responsibility to regulate its domestic and foreign communications, and the Government of the United States shall provide communication assistance in accordance with the terms of a related agreement which shall come into effect simultaneously with this Compact, and such agreement shall remain in effect until such time as any election is made pursuant to Section 131(b) and which shall provide for the following:

(1) the Government of the United States remains the sole administration entitled to make notification to the International Frequency Registration Board of the International Telecommunications Union of frequency assignments to radio communications stations in Palau; and to submit to the International Frequency Registration Board seasonal schedules for the broadcasting stations in Palau in the bands allocated exclusively to the broadcasting service between 5,950 and 26,100 kHz and in any other additional frequency bands that may be allocated to use by high frequency broadcasting stations; and

(2) the United States Federal Communications Commission has jurisdiction pursuant to the Communications Act of 1934, 47 U.S.C. 151 et seq., and the Communications Satellite Act of 1962, 47 U.S.C. 721 et seq., over all domestic and foreign communications services furnished by means of satellite earth terminal stations where such stations are owned or operated by United States common carriers and are located in Palau.

(b) The Government of Palau may elect at any time to undertake the functions enumerated in Section 131(a) and previously performed by the Government of the United States. Upon such election, the Government of the United States shall so notify the International Frequency Registration Board and shall take such other actions as may be necessary to tranfer to the Government of Palau the notification authority referred to in Section 131(a) and all rights deriving from the previous exercise of any such notification authority by the Government of the United States.

Section 132

The Government of Palau shall permit the Government of the United States to operate telecommunications services in Palau to the extent necessary to fulfull the obligations of the Government of the United States under this Compact in accordance with the terms of related agreements which shall come into effect simultaneously with this Compact.

ARTICLE IV

Immigration

Section 141

(a) Any person in the following categories may enter into, lawfully engage in occupations, and establish residence as a nonimmigrant in the United States and its territories and possessions without regard to paragraphs (14), (20), and (26) of section 212(a) of the Immigration and Nationality Act, 8 U.S.C. 1182(a) (14), (20), and (26):

(1) a person who, on the day preceding the effective date of this Compact, is a citizen of Trust Territory of the Pacific Islands, as defined in Title 53 of the Trust Territory Code in force on January 1, 1979, and has become a citizen of Palau;

(2) a person who acquires the citizenship of Palau, at birth, on or after the effective date of the Constitution of Palau; or

(3) a naturalized citizens of Palau, who has been an actual resident there for not less than five years after attaining such naturalization and who holds a certificate of actual residence.

Such persons shall be considered to have the permission of the Attorney General of the United States to accept employment in the United States.

(b) The right of such persons to establish habitual residence in a territory or possession of the United States may, however, be subjected to nondiscriminatory limitations provided for:

(1) in statutes or regulations of the United States; or

(2) in those statutes or regulations of the territory or possession concerned which are authorized by the laws of the United States.

(c) Section 141(a) does not confer on a citzens of Palau, the right to establish the residence necessary for naturalization under the Immigration and Nationality Act, or to petition for benefits for alien relatives under that Act. Section 141(a), however, shall not prevent a citizen of Palau from otherwise acquiring such rights or lawful permanent resident alien status in the United States.

Section 142

(a) Any citizen or national of the United States may enter into, lawfully engage in occupations, and reside in Palau, subject to the right of that Government to deny entry to or deport any such citizen or national as an undesirable alien. A citizen or national of the United States may establish habitual residence or domicile in Palau only in accordance with the laws of Palau. This subsection is without prejudice to the right of the Government of Palau to regulate occupations in Palau in a nondiscriminatory manner.

(b) With respect to the subject matter of this Section, the Government of Palau shall accord to citizens and nationals of the United States treatment no less favorable than that accorded to citizens of other countries; and denial of entry to or deportation of a citizen or national of the United States as an undesirable alien must be pursuant to reasonable statutory grounds.

Section 143

(a) The privileges set forth in Section 141 shall not apply to any person who takes an affirmative step to preserve or acquire a citizenship or nationality other than that of Palau.

(b) Every person having the privileges set forth in Sections 141 and 142 who possesses a citizenship or nationality other than that of Palau or the United States ceases to have these privileges two years after the effective date of this Compact, within six months after becoming 21 years of age, whichever comes later, unless such person executes an oath of renunciation of that other citizenship or nationality.

Section 144

(a) A citizen or national of the United States who, after notification to the Government of the United States of an intention to employ such person by the Government of Palau, commences employment with that Government shall not be deprived of his United States nationality pursuant to Section 349(a)(2) and (a)(4) of the Immigration and Nationality Act, 8 U.S.C. 1481(a)(2) and (a)(4).

(b) Upon such notification by the Government of Palau, the Government of the United States may consult with or provide information to the notifying Government concerning the prospective employee, subject to the provisions of the Privacy Act, 5 U.S.C. 552a.

(c) The requirement of prior notification shall not apply to those citizens or nationals of the United States who are employed by the Government of Palau on the effective date of this Compact with respect to the positions held by them at that time.

ARTICLE V

Representation

Section 151

The Government of the United States and the Government of Palau may establish and maintain representative offices in the capitals of the other.

Section 152

(a) The premises of such representative offices, and their archives wherever located, shall be inviolable. The property and assets of such representative offices shall be immune from search, requisition, attachment and any form of seizure unless such immunity is expressly waived. Official communications in transit shall be inviolable and accorded the freedom and protections accorded by recognized principles of international law to official communications of a diplomatic mission.

(b) Persons designated by the sending Government may serve in the capacity of its resident representatives with the consent of the receiving Government. Such designated persons shall be immune from civil and criminal process relating to words spoken or written and all acts performed by them in their official capacity and falling within their functions as such representatives, except insofar as such immunity may be expressly waived by the sending Government. While serving in a resident representative capacity, such designated persons shall not be liable to arrest or detention pending trial, except in the case of a grave crime and pursuant to a decision by a competent judicial authority, and such persons shall enjoy immunity from seizure of personal property, immigration restrictions, and laws relating to alien registration fingerprinting, and the registration of foreign agents.

(c) The sending Governments and their respective assets, income and other property shall be exempt from all direct taxes, except those direct taxes representing payment for specific goods and services, and shall be exempt from all customs duties and restrictions on the import or export of articles required for the official functions and personal use of their representatives and representative offices.

(d) Persons designated by the sending Government to serve in the capacity of its resident representatives shall enjoy the same taxation exemptions as are set forth in Article 34 of the Vienna Convention on Diplomatic Relations.

(e) The privileges, exemptions and immunities accorded under this Section are not for the personal benefit of the individuals concerned but are to safeguard the independent exercise of their official functions. Without prejudice to those privileges, exemptions and immunities; it is the duty of all such persons to respect the laws and regulations of the Government to which they are assigned.

ARTICLE IV

Environmental protection

Section 161

The Government of the United States and the Government of Palau declare that it is their policy to promote efforts to prevent or eliminate damage to the environment and biosphere and to enrich understanding of the natural resources of the Palau.

Section 162

(a) The Government of the United States and the Government of Palau agree that with respect to the activities of the Government of the United States in Palau, and with respect to substantively equivalent activities of the Government of Palau, each of the Governments shall be bound by such environmental protection standards as may be mutually agreed for the purpose of carrying out the policy set forth in the Compact.

Section 163

In order to carry out the policy set forth in this Article, the Government of the United States and the Government of Palau agree to the following undertakings.

(a) The Government of the United States:

(1) shall apply environmental standards substantively similar to those in effect on the day preceding the effective date of this Compact to any activity requiring the preparation of an Environmental Impact Statement under the provisions of the National Environmental Policy Act of 1969, 83 Stat. 852, 42 U.S.C. 4321 et seq.

(2) shall develop, prior to conducting any activity included within the category described in this Section, appropriate mechanisms, including regulations or other standards and procedures, to regulate such activity in Palau in a manner appropriate to the special governmental relationship set forth in this Compact. The Government of the United States shall provide the Government of Palau with the opportunity to comment formally during the development of such mechanisms.

(b) The Government of Palau shall develop standards and procedures to protect the environment of Palau. As a reciprocal obligation to the undertakings of the Government of the United States under this Article, the Government of Palau, taking into account the particular environment of Palau, shall develop standards for environmental protection substantively similar to those required of the Government of the United States by Section 163(a)(1) prior to conducting activities in Palau substantively equivalent to activities conducted there by the Government of the United States and, as a further reciprocal obligation, shall enforce those standards.

(c) Section 163(a), including any standard or procedure applicable thereunder, and Section 163(b) may be modified or superseded in whole or in part by agreement of the Government of the United States and the Government of Palau.

(d) Disputes arising under this Article, except for Section 163(e), shall be resolved exclusively in accordance with Article II of Title Four.

(e) The President of the United States may exempt any of the activities of the Government of the United States under this Compact and its related agreements from any environmental standard or procedure which may be applicable under this Article if the President determines it to be in the paramount interest of the Government of the United States to do so, consistent with Title Three of this Compact and the obligations of the Government of the United States under international law. Prior to any decision pursuant to this subsection, the views of the Government of Palau shall be sought and considered to the extent practicable. If the President grants such an exemption, to the extent practicable, a report with his reasons for granting such exemption shall be given promptly to the Government of Palau.

ARTICLE VII

General legal provisions

Section 171

Except as provided in this Compact or its related agreements, the application of the laws of the United States to the Trust Territory of the Pacific Islands by virtue of the Trusteeship Agreement ceases with respect to Palau as of the effective date of this Compact.

Section 172

(a) Every citizen of Palau who is not a resident of the United States shall enjoy the rights and remedies under the laws of the United States enjoyed by any nonresident alien.

(b) The Government and every citizen of Palau shall be considered a "person" within the meaning of the Freedom of Information Act, 5 U.S.C. 552, and of the judicial review provisions of the Administrative Procedure Act, 5 U.S.C. 701-706.

Section 173

The Government of the United States and the Government of Palau, agree to adopt and enforce such measures, consistent with this Compact and its related agreements, as may be necessary to protect the personnel, property, installations, services, programs and official archives and documents maintained by the Government of the United States in Palau pursuant to this Compact and its related agreements and by that Government in the United States pursuant to this Compact and its related agreements.

Section 174

Except as otherwise provided in this Compact and its related agreements:

(a) The Government of Palau shall be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall be immune from the jurisdiction of the courts of Palau.

(b) The Government of the United States accepts responsibility for and shall pay:

(1) any unpaid money judgment rendered by the High Court of the Trust Territory of the Pacific Islands against the Government of the Trust Territory of the Pacific Islands or the Government of the United States with regard to any cause of action arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact;

(2) any claim settled by the claimant and the Government of the Trust Territory of the Pacific Islands but not paid as of the effective date of this Compact; and

(3) settlement of any administrative claim or of any action before a court of the Trust Territory of the Pacific Islands, pending as of the effective date of this Compact, against the Government of the Trust Territory of the Pacific Islands or the Government of the United States, arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States.

(c) Any claim not referred to in Section 174(b) and arising from an act or omission of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact shall be adjudicated in the same manner as a claim adjudicated according to Section 174(d). In any claim against the Government of the Trust Territory of the Pacific Islands, the Government of the United States shall stand in the place of the Government of the Trust Territory of the Pacific Islands. A judgment on any claim referred to in Section 174(b) or this subsection, not otherwise satisfied by the Government of the United States, may be presented for certification to the United States Court of Appeals for the Federal Circuit shall certify such judgment, and order payment thereof, unless it finds, after a hearing, that such judgment is manifestly erroneous as to law or fact, or manifestly excessive. In either of such cases the United States Court of Appeals for the Federal Circuit shall have jurisdiction to modify such judgment.

(d) The Government of Palau, shall not be immune from the jurisdiction of the courts of United States, and the Government of the United States shall not be immune from the jurisdiction of the courts of Palau in any case in which the action is based on a commercial activity of the defendant Government carried out where the action is brought, or in a case in which damages are sought for personal injury or death or damage to or loss of property occurring where the action is brought. This subsection shall apply only to actions based on commercial activities entered into or injuries or losses suffered on or after the effective date of this Compact.

Section 175

A separate agreement, which shall come into effect simultaneously with this Compact, shall be concluded between the Government of the United States and the Government of Palau regarding mutual assistance and cooperation in law enforcement matters including the pursuit, capture, imprisonment and extradition of fugitives from justice and the transfer of prisoners. The separate agreement shall have the force of law. In the United States, the laws of the United States governing international extradition, including 18 U.S.C. 3184, 3186 and 3188-3195, shall be applicable to the extradition of fugitives under the separate agreement, and the laws of the United States governing the transfer of prisoners, including 18 U.S.C. 4100-4115, shall be applicable to the transfer of prisoners under the separate agreement.

Section 176

The Government of Palau confirms that final judgments in civil cases rendered by any court of the Trust Territory of the Pacific Islands shall continue in full force and effect, subject to the constitutional power of the courts of Palau to grant relief from judgments in appropriate cases.

Section 177

(a) Federal agencies of the Government of the United States which provide services and related programs in Palau are authorized to settle and pay tort claims arising in Palau from the activities of such agencies or from the acts or omissions of the employees of such agencies. Except as provided in Section 177(b), the provisions of 28 U.S.C. 2672 and 31 U.S.C. 1304 shall apply exclusively to such administrative settlements and payments.

(b) Claims under Section 177(a) which cannot be settled under Section 177(a) shall be disposed of exclusively in accordance with Article II of Title Four Arbitration awards rendered pursuant to this subsection shall be paid out of funds under 31 U.S.C. 1304.

(c) The Government of the United States and the Government of Palau shall provide for:

(1) the administrative settlement of claims referred to in Section 177(a), including designation of local agents in Palau, such agents to be empowered to accept, investigate and settle such claims, in a timely manner, as provided in such related agreements; and

(2) arbitration, referred to in Section 177(b), in a timely manner, at a site convenient to the claimant, in the event a claim is not otherwise settled pursuant to Section 177(a).

(d) The provisions of Section 174(d) shall not apply to claims covered by this Section.

TITLE TWO

ECONOMIC RELATIONS

ARTICLE I

Grant assistance

Section 211

In order to assist the Government of Palau in its efforts to advance the well-being of the people of Palau and in recognition of the special relationship that exists between the United States and Palau, the Government of the United States shall provide to the Government of Palau on a grant basis the following amounts:

(a) $12 million annually for ten years commencing on the effective date of this Compact, and $11 million annually for five years commencing on the tenth anniversary of the effective date of this Compact, for current account operations and maintenance purposes, which amounts commencing on the fourth anniversary of the effective date of this Compact shall include a minimum annual distribution of $5 million from the fund specified in Section 211(f).

(b) $2 million annually for fourteen years commencing on the first anniversary of the effective date of this Compact as a contribution to efforts aimed at achieving increased self-sufficiency in energy production, of which annual amounts not less than $500,000 shall be devoted to the energy needs of those parts of Palau not served by its central power-generating facility.

(c) $150,000 annually for fifteen years commencing on the effective date of of this Compact as a contribution to current account operations and maintenance communications systems, and the sum of $1.5 million, to be made available concurrently with the grant assistance provided during the first year after the effective date of this Compact, for the purpose of acquiring such communications hardware as may be located within Palau or for such other current or capital account activity as the Government of Palau may select.

(d) $631,000 annually on a current account basis for fifteen years commencing on the effective date of this Compact for the purposes set forth below:

(1) for the surveillance and enforcement by Government of Palau of its maritime zone;

(2) for health and medical programs, including referrals to hospital and treatment centers; and

(3) for a scholarship fund to support the post-secondary education of citizens of Palau attending United States accredited, post-secondary institutions in Palau, the United States, its territories and possessions, and states in free association with the United States. The curricular criteria for the award of scholarships shall be designed to advances the purposes of the plan referred to in Section 231.

(e) The sum of $666,800 as a contribution to the commencement of activities pursuant to Section 211(d)(1).

(f) The sum of $66 million on the effective date of this Compact, and the sum of $4 million concurrently with the grant assistance to be made available during the third year after the effective date of this Compact, to create a fund to be invested by the Government of Palau in issues of bonds, notes or other redeemable instruments of the Government of the United States or other qualified instruments which may be identified by mutual agreement of the Government of the United States and the Government of Palau. Investment of the fund in qualified instruments of United States nationality, and the distribution of sums derived from such investment to the Government of Palau, shall not be subject to any form of taxation by the United States or its political subdivisions. The Government of the United States and the Government of Palau shall set forth in a separate agreement, which shall come into effect simultaneously with this Compact, provisions for the investment, management and review of the fund so as to allow for an agreed minimum annual distribution from its accrued principal and interest commencing upon the effective date of this Compact for fifty years. The objective of this sum is to produce an average annual distribution of $15 million commencing on the fifteenth anniversary of this Compact for thirty-five years. Any excess or variance from the agreed minimum annual distributions which may be produced from these sums shall accrue to or be absorbed by the Government of Palau unless otherwise mutually agreed in accordance with the provisions of the separate agreement referred to in this paragraph. The annual distributions produced from these sums are not subject to Sections 215 and 236.

Section 212

In order to assist the Government of Palau in its efforts to advance the economic development and self-sufficiency of the people of Palau and in recognition of the special relationship that exists between the United States and Palau, the Government of the United States shall provide:

(a) To the people of Palau, a road system in accordance with mutually agreed specifications, the construction of which shall be completed prior to the sixth anniversary of the effective date of this Compact; and

(b) To the Government of Palau, the sum of $36 million, during the first year after the effective date of this Compact, for capital account purposes.

Section 213

The Government of the United States shall provide on a grant basis to the Government of Palau the sum of $5.5 million in conjunction with Article II of Title Three. This sum shall be made available concurrently with the greater assistance provided pursuant to this Article during the first year after the date of this Compact. The Government of Palau, in its use of such funds, shall take into account the impact of the activities of the Government of the United States in Palau.

Section 214

All funds previously appropriated to the Trust Territory of the Pacific Islands for the Government of Palau which are unobligated by the Government of the Trust Territory as of the effective date of this Compact shall accrue to the Government of Palau for the purposes for whch such funds were originally appropriated as determined by the Government of the United States.

Section 215

Except as otherwise provided, the amounts stated in Sections 211(a), 211(b), 211(c) and 212(b) shall be adjusted for each fiscal year by the percent which equals two-thirds of the percentage change in the United States Gross National Product Implicit Price Deflator, or seven percent, whichever is less in any one year, using the beginning of Fiscal Year 1981 as the base.

ARTICLE II

Program assistance

Section 221

(a) The Government of the United States shall make available to Palau, in accordance with and to the extent provided in the separate agreement referred to in Section 232, without compensation and at the levels equivalent to those available to the Trust Territory of the Pacific Islands during the year prior to the effective date of this Compact, the services and related programs:

(1) of the United States Weather Service;

(2) provided pursuant to the Postal Reorganization Act, 39 U.S.C. 101 et seq.;

(3) of the United States Federal Aviation Administration; and

(4) of the United States Civil Aeronautics Board or its successor agencies which has the authority to implement the provisions of paragraph 5 of Article IX of such separate agreements, the language of which is incorporated into this Compact.

(b) The Government of the United States, recognizing the special needs of the Palau particularly in the fields of education and health care, shall make available, as provided by the laws of the United States:

(1) the annual amount of $2 million which shall be allocated in accordance with the provisions of the separate agreement referred to in Section 232; and

(2) the sums of $4.3 million, $2.9 million and $1.5 million, respectively, during the first, second and third years after the effective date of this Compact, which sums shall be used by the Government of Palau as current account funds to finance programs similar to those programs of the United States that applied to Palau prior to the effective date of this Compact and that provided financial assistance for education to any institution, agency, organization or permanent resident of Palau or to the College of Micronesia.

(c) The Government of the United States shall make available to Palau such alternate energy development projects, studies and conservation measures as are applicable to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact, for the purposes and duration provided in the laws of the United States.

(d) The Government of the United States shall have and exercise such authority as is necessary for the purposes of this Article and as is set forth in the related agreements referred to in Section 232, which shall also set forth the extent to which services and programs shall be provided to Palau.

Section 222

The Government of Palau may request, from time to time, technical assistance from the Federal agencies and institutions of the Government of the United States, which are authorized to grant such technical assistance in accordance with its law and which shall grant such technical assistance in a manner which gives priority consideration to Palau over other recipients not a part of the United States, its territories or possessions and equivalent consideration to Palau with respect to other states in Free Association with the United States.

Section 223

The citizens of Palau who are receiving post-secondary education assistance from the Government of the United States on the day preceding the effective date of this Compact shall continue to be eligible, if otherwise qualified, to receive such assistance to complete their academic programs for a maximum of four years after the effective date of this Compact.

Section 224

The Government of the United States and the Government of Palau may agree from time to time to the extension to Palau of additional United States grant assistance and of United States services and programs as provided by the laws of the United States.

ARTICLE III

Administrative provisions

Section 231

(a) The annual expenditure by the Government of Palau of the grant amounts specified in Article I of this Title shall be in accordance with an official national development plan promulgated by the Government of Palau and concurred in by the Government of the United States prior to the effective date of this Compact. This plan may be amended from time to time by the Government of Palau.

(b) The Government of the United States and the Government of Palau recognize that the achievement of the goals of the plan referred to in this Section depends upon the availability of adequate internal revenue as well as economic assistance from sources outside of Palau, including the Government of the United States, and may, in addition, be affected by the impact of exceptional, economically adverse circumstances. The Government of Palau shall therefore report annually to the President of the United States and to the Congress of the United States on the implementation of this plan and on its use of the funds specified in this Article. This report shall outline the achievements of the plan to date and the need, if any, for an additional authorization and appropriation of economic assistance for that year to account for any exceptional, economically adverse circumstances. The availability of such additional economic assistance from the Government of the United States shall be subject to the authorization and appropriation of funds by the Government of the United States.

Section 232

The specific nature, extent and contractual arrangements of the services and programs provided for in Section 221 as well as

the legal status of agencies of the Government of the United States, their civilian employees and contractors, and the dependents of such personnel while present in Palau, and other arrangements in connection with a service or program furnished by the Government of the United States, are set forth in related agreements which shall come into effect simultaneously with this Compact.

Section 233

The Government of the United States, in consultation with the Government of Palau, shall determine and implement procedures for the periodic audit of all grants and other assistance made under this Title. Such audits shall be conducted at no cost to the Government of Palau.

Section 234

Title to the property of the Government of the United States situated in the Trust Territory of the Pacific Islands and in Palau or acquired for or used by the Government of the Trust Territory of the Pacific Islands on or before the day preceding the effective date of this Compact shall, without reimbursement or transfer of funds, vest in the Government of Palau as set forth in a separate agreement which shall come into effect simultaneously with this Compact. The provisions of this Section shall not apply to the personal property of the Government of the United States for which the Government of the United States determines a continuing requirement.

Section 235

(a) Funds held in trust by the High Commissioner of the Trust Territory of the Pacific Islands, in his official capacity, as of the effective date of this Compact shall remain available as trust funds to their designated beneficiaries. The Government of the United States, in consultation with the Government of Palau, shall appoint a new trustee who shall exercise the functions formerly exercised by the High Commissioner of the Trust Territory of the Pacific Islands.

(b) To provide for the continuity of administration, and to assure the Governments of Palau that the purposes of the laws of the United States are carried out and that the funds of any other trust fund in which the High Commissioner of the Trust Territory of the Pacific Islands has authority of a statutory or customary nature shall remain available as trust funds to their designated beneficiaries, the Government of the United States agrees to assume the authority formerly vested in the High Commissioner of the Trust Territory of the Pacific Islands.

Section 236

Except as otherwise provided, approval of this Compact by the Government of the United States shall constitute a pledge of the full faith and credit of the United States for the full payment of the sums and amounts specified in Article I of this Title. The obligation of the Government of the United States under Article I of this Title shall be enforceable in the United States Claims Court, or its successor court, which shall have jurisdiction in cases arising under this Section, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States.

ARTICLE IV

Trade

Section 241

Palau is not included in the customs territory of the United States.

Section 242

The President of the United States shall proclaim the following tariff treatment for articles imported from Palau which shall apply during the period of effectiveness of this Title:

(a) Unless otherwise excluded, articles imported from Palau, subject to the limitations imposed under sections 503(b) and 504(c) of title 5 of the Trade Act of 1974 (19 USC 2463(b): 2464(c)), shall be exempt from duty.

(b) Only canned tuna provided for in item 112.30 of the Tariff Schedules of the United States that is imported from the Federated States of Micronesia, the Marshall islands and Palau during any calendar year not to exceed 10 percent of the United States consumption of canned tuna during the immediately preceding calendar year, as reported by the National Marine Fisheries Service, shall be exempt from duty; but the quantity of tuna given duty free treatment under this paragraph for any calendar year shall be counted against the aggregate quantity of canned tuna that is dutiable under rate column numbered 1 of such item 112.30 for that calendar year.

(c) The duty-free treatment provided under paragraph (1) shall not apply to:

(1) watches, clocks and timing apparatus provided for in sub-part E of part 2 of schedule 7 of the Tariff Schedules of the United States;

(2) buttons (whether finished or not finished) provided for in item 745.32 of such Schedules;

(3) textile and apparel articles which are subject to textile agreements; and

(4) footwear, handbags, luggage, flat goods, work gloves, and leather wearing apparel which were not eligible articles for purposes of chapter V of the Trade Act of 1974 (19 USC 2461 et seq.) on April 1, 1984.

(d) If the cost of value of materials produced in the customs territory of the United States is included with respect to an eligible article which is a product of Palau, an amount not to exceed 15 percent of the appraised value of the article at the time it is entered that is attributable to such United States cost or value may be applied for duty assessment purposes toward determining the percentage referred to in section 503(b)(2) of title V of the Trade Act of 1974.

Section 243

Articles imported from Palau which are not exempt from any duty under paragraphs (a), (b), (c) and (d) of Section 242 shall be subject to the rates of duty set forth in column numbered 1 of the Tariff Schedules of the United States and all products of the United States imported into Palau shall receive treatment no less favorable than that accorded like products of any foreign country with respect to customs duties or charges of a similar nature and with respect to laws and regulations relating to importation, exportation, taxation, sale, distribution, storage, or use.

ARTICLE V

Finance and taxation

Section 251

The currency of the United States is the official circulating legal tender of Palau. Should the Government of Palau act to institute another currency, the terms of an appropriate currency transitional period shall be as agreed with the Government of the United States.

Section 252

The Government of Palau may, with respect to United States persons, tax income derived from sources within its respective jurisdiction, property situated therein, including transfers of such property by gift or at death, and products consumed therein, in such manner as such Government deems appropriate. The determination of the source of any income, or the situs of any property, shall, for purposes of this Compact, be made according to the United States Internal Revenue Code.

Section 253

A citizen of Palau, domiciled therein and who is a nonresident and not a citizen of the United States, shall be exempt from estate, gift, and generation-skipping transfer taxes imposed by the Government of the United States.

Section 254

(a) In determining any income tax imposed by the Government of Palau, the Government of Palau shall have authority to impose tax upon income derived by a resident of Palau from sources without Palau in the same manner and to the same extent as the Government of Palau imposes tax upon income derived from within its jurisdiction. If the Government of Palau exercises such authority as provided in this subsection, any individual resident of Palau who is subject to tax by the Government of the United States on income which is also taxed by the Government of Palau shall be relieved of liability to the Government of the United States for the tax which, but for this subsection, would otherwise be imposed by the Government of the United States on such income. For purposes of this Section, the term "resident of Palau" shall be deemed to include any person who was physically present in Palau for a period of 183 or more days during any taxable year. The relief from liability referred to in this subsection means only:

(1) relief in the form of the foreign tax credit (or deduction in lieu thereof) available with respect to the income taxes of a possession of the United States, and

(2) relief in the form of the exclusion under section 911 of the United States Internal Revenue Code of 1954.

(b) If the Government of Palau subjects income to taxation substantially similar to that imposed by the Trust Territory Code in effect on January 1, 1980, such Government shall be deemed to have exercised the authority described in Section 254(a).

Section 255

(a) For purposes of section 936 of the Internal Revenue Code of 1954 Palau shall be treated as if it was a possession of the United States.

(b) Subsection (a) of this Section shall not apply to Palau for any period after December 31, 1986, during which there is not in effect between Palau and the United States an exchange of information agreement of the kind described in section 274(h)(6)(C) (other than clause (ii) thereof) of the Internal Revenue Code of 1954.

(c) If the tax incentives extended to Palau under subsection (a) of this Section are, at any time during which the Compact is in effect, reduced, the United States Secretary of the Treasury shall negotiate an agreement with the Government of Palau under which, when such agreement is approved by law, Palau will be provided with benefits substantially equivalent to such reduction in benefits. If within the 1-year period after the date of the enactment of the Act making the reduction in benefits, an agreement negotiated under the preceding sen-

tence is not approved by law, the matter shall be submitted to the arbitration Board established pursuant to Section 424. For purposes of Article V of this Title, the Secretary of the Treasury or his delegate shall be the member of such Board representing the Government of the United States. Any decision of such Board in the matter when approved by law shall be binding on the United States, except that such decision rendered is binding only as to whether the United States has provided the substantially equivalent benefits referred to in this subsection.

(d) For purposes of section 274(h)(3)(A) of the Internal Revenue Code of 1954, the term "North American area" shall include Palau.

Section 256

This Article shall apply to income earned, and transactions occurring, after September 30, 1985, in taxable years ending after such date.

TITLE THREE

SECURITY AND DEFENSE RELATIONS

ARTICLE I

Authority and responsibility

Section 311

The territorial jurisdiction of the Republic of Palau shall be completely foreclosed to the military forces and personnel or for the military purposes of any nation except the United States of American, and as provided for in Section 312.

Section 312

The Government of the United States has full authority and responsibility for security and defense matters in or relating to Palau. Subject to the terms of any agreements negotiated pursuant to Article II of this Title, the Government of the United States may conduct within the lands, water and airspace of Palau the activities and operations necessary for the exercise of its authority and responsibility under this Title. The Government of the United States may invite the armed forces of other nations to use military areas and facilities in Palau in conjunction with and under the control of United States Armed Forces.

Section 313

The Government of Palau shall refrain from actions which the Government of the United States determines, after consultation with that Government, to be incompatible with its authority and responsibility for security and defense matters in or relating to Palau.

ARTICLE II

Defense sites and operating rights

Section 321

The Government of the United States may establish and use defense sites in Palau, and may designate for this purpose land and water areas and improvements in accordance with the provisions of a separate agreement which shall come into force simultaneously with this Compact.

Section 322

(a) When the Government of the United States desires to establish or use such a defense site specifically identified in the separate agreement referred to in Section 321, it shall so inform the Government of Palau which shall make the designated site available to the Government of the United States for the duration and level of use specified.

(b) With respect to any site not specifically in the separate agreement referred to in Section 321, the Government of the United States shall inform the Government of Palau, which shall make the designated site available to the Government of the United States for the duration and level of use specified, or shall make available one alternative site acceptable to the Government of the United States. If such alternative site is unacceptable to the Government of the United States, the site first designated shall be made available after such determination.

(c) Compensation in full for designation, establishment or use of defense sites is provided in Title Two of this Compact.

Section 323

The military operating rights of the Government of the United States and the legal status and contractual arrangements of the United States Armed Forces, their members, and associated civilians, while present in Palau, are set forth in related agreements which shall come into effect simultaneously with this Compact.

Section 324

In the exercise in Palau of its authority and responsibility under this Title, the Government of the United States shall not use, test, store or dispose of nuclear, toxic chemical, gas or biological weapons intended for use in warfare and the Government of Palau assures the Government of the United States that in carrying out its security and defense responsibilities under this Title, the Government of the United States has the right to operate nuclear capable or nuclear propelled vessels and aircraft within the jurisdiction of Palau without either confirming or denying the presence or absence of such weapons within the jurisdiction of Palau.

ARTICLE III

Defense treaties and international security agreements

Section 331

Subject to the terms of this Compact and its related agreements, the Government of the United States, exclusively, shall assume and enjoy, as to Palau, all obligations, responsibilites, rights and benefits of:

(a) Any defense treaty or other international security agreement applied by the Government of the United States as administering authority of the Trust Territory of the Pacific Islands as of the day preceding the effective date of this Compact; and

(b) Any defense treaty or other international security agreement to which the Government of the United States is or may become a party which it determines to be applicable in Palau. Such a determination by the Government of the United States shall be preceded by appropriate consultation with the Government of Palau.

ARTICLE IV

Service in the Armed Forces of the United States

Section 341

Any citizen of Palau entitled to the privileges of Section 141 of this Compact shall be eligible to volunteer for service in the Armed Forces of the United States, but shall not be subject to involuntary induction into military service of the United States, its territories or possessions.

Section 342

The Government of the United States shall have enrolled, at any one time, at least one qualified student from Palau as may be nominated by the Government of Palau, in each of:

(a) The United States Coast Guard Academy pursuant to 14 U.S.C. 195; and

(b) The United States Merchant Marine Academy pursuant to 46 U.S.C. 1295b(b)(6), provided that the provisions of 46 U.S.C. 1295(b)(6)(C) shall not apply to the enrollment of students pursuant to Section 342(b) of this Compact.

ARTICLE V

General provisions

Section 351

(a) The Government of the United States and the Government of Palau shall establish a joint committee empowered to consider disputes which may arise under the implementation of this Title and its related agreements.

(b) The membership of the joint committee shall comprise selected senior officials of each of the participating Governments. The senior United States military commander in the Pacific area shall be the senior United States member of the joint committee. For the meetings of the joint committee, each of the Governments may designate additional or alternate representatives as appropriate for the subject matter under consideration.

(c) Unless otherwise mutually agreed, the joint committee shall meet semi-annually at a time and place to be designated, after appropriate consultation, by the Government of the United States. The joint committee also shall meet promptly upon request of either of its members. Upon notification by the Government of the United States, the joint committee shall meet promptly in combined session with other such joint committees so notified. The joint committee shall follow such procedures, including the establishment of functional subcommittees, as the members may from time to time agree.

(d) Unresolved issues in the joint committee shall be referred to the Government of the United States and the Government of Palau for resolution, and the Government of Palau shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of Defense personally regarding any unresolved issue which threatens its continued association with the Government of the United States.

Section 352

In the exercise of its authority and responsibility under this Compact, the Government of the United States shall accord due respect to the authority and responsibility of the Government of Palau to assure the well-being of Palau and its people. The Government of the United States and the Government of Palau agree that the authority and responsibility of the United States set forth in this Title are exercised for the mutual security and benefit of Palau and the United States, and that any attack on Palau would constitute a threat to the peace and security of the entire region and a danger to the United States. In the event of such an attack, or threat thereof, the Government of the United States would take action to meet the danger to the United States and Palau in accordance with its constitutional processes.

Section 353

(a) The Government of the United States shall not include the Government of Palau as a named party to a formal declaration of war, without the consent of the Government of Palau.

(b) Absent such consent, this Compact is without prejudice, on the ground of belliger-

ence or the existence of a state of war, to any claims for damages which are advanced by the citizens, national or Government of Palau which arise out of armed conflict subsequent ot the effective date of this Compact and which are:

(1) petitions to the Government of the United States for redress; or

(2) claims in any manner against the government, citizens, nationals or entities of any third country.

(c) Petitions under Section 353(b)(1) shall be treated as if they were made by citizens of the United States.

TITLE FOUR

GENERAL PROVISIONS

ARTICLE I

Approval and effective date

Section 411

This Compact shall come into effect upon mutual agreement between the Government of the United States, acting in fulfillment of its responsibilites as Administering Authority of the Trust Territory of the Pacific Islands, and the Government of Palau, subsequent to completion of the following:

(a) Approval by the Government of Palau in accordance with its constitutional processes;

(b) Approval by the people of Palau in a referendum called on this Compact; and

(c) Approval by the Government of the United States in accordance with its constitutional processes.

ARTICLE II

Conference and dispute resolution

Section 421

The Government of the United States and the Government of Palau shall confer promptly at the request of the other on matters relating to the provisions of this Compact or of its related agreements.

Section 422

In the event the Government of the United States and the Government of Palau, after conferring pursuant to Section 421, determines that there is a dispute and gives written notice thereof, the Governments shall make a good faith effort to resolve the dispute among themselves.

Section 423

If a dispute between the Government of the United States and the Government of Palau cannot be resolved within 90 days of written notification in the manner provided in Section 422, either party to the dispute may refer it to arbitration in accordance with Section 424.

Section 424

Should a dispute be referred to arbitration as provided for in Section 423, an arbitration board shall be established for the purpose of hearing the dispute and rendering a decision which shall be binding upon the two parties to the dispute unless the two parties mutually agree that the decision shall be advisory. Arbitration shall occur according to the following terms:

(a) An arbitration board shall consist of a chairman and two other members, each of whom shall be a citizen of a party to the dispute and each of the two parties to the dispute shall appoint one member to the arbitration board. If either party to the dispute does not fulfill the appointment requirements of this Section within 30 days of referral of the dispute to arbitration pursuant to Section 423, its member on the arbitration board shall be selected from its own standing list by the other party to the dispute. Each government shall maintain a standing list of 10 candidates. The parties to the dispute shall jointly appoint a chairman within 15 days after selection of the other members of the arbitration board. Failing agreement on a chairman, the chairman shall be chosen by lot from the standing lists of the parties to the dispute within 5 days after such failure.

(b) The arbitration board shall have jurisdiction to hear and render its final determination on all disputes arising exclusively under Articles, I, II, III, IV, and VI of Title One, Title Two, Title Four and their related agreements.

(c) Each member of the arbitration board shall have one vote. Each decision of the arbitration board shall be reached by majority vote.

(d) In determining any legal issue, the arbitration board may have reference to international law and, in such reference, shall apply as guidelines the provisions set forth in Article 38 of the Statute of the International Court of Justice.

(e) The arbitration board shall adopt such rules for its proceedings as it may deem appropriate and necessary, but such rules shall not contravene the provisions of this Compact. Unless the parties provide otherwise by mutual agreement, the arbitration board shall endeavor to render its decision within 30 days after the conclusion of arguments. The arbitration board shall make findings of fact and conclusions of law and its members may issue dissenting or individual opinions. Except as may be otherwise decided by the arbitration board, one-half of all costs of the arbitration shall be borne by the Government of the United States and the remainder shall be borne by the Government of Palau.

ARTICLE III

Amendment and review

Section 431

The provisions of this Compact may be amended at any time by mutual agreement of the Government of the United States and the Government of Palau in accordance with their respective constitutional processes.

Section 432

Upon the fifteenth and thirtieth and fortieth anniversaries of the effective date of this Compact, the Government of the United States and the Government of Palau shall formally review the terms of this Compact and its related agreements and shall consider the overall nature and development of their relationship. In these formal reviews, the governments shall consider the operating requirements of the Government of Palau and its progress in meeting the development objectives set forth in the plan referred to in Section 231(a). The governments commit themselves to take specific measures in relation to the findings of conclusions resulting from the review. Any alteration to the terms of this Compact or its related agreements shall be made by mutual agreement and the terms of this Compact and its related agreements shall remain in force until otherwise amended or terminated pursuant to Title Four of this Compact.

ARTICLE IV

Termination

Section 441

This Compact may be terminated by mutual agreement and subject to Section 451.

Section 442

This Compact may be terminated by the Government of the United States subject to Section 452, such termination to be effective on the date specified in the notice of termination by the Government of the United States but not earlier than six months following delivery of such notice. The time specified in the notice of termination may be extended.

Section 443

This Compact shall be terminated, pursuant to its constitutional processes, by the Government of Palau subject to Section 452 if the people of Palau vote in a plebiscite to terminate. The Government of Palau shall notify the Government of the United States of its intention to call such a plebiscite which shall take place not earlier than three months after delivery of such notice. The plebiscite shall be administered by such government in accordance with its constitutional and legislative processes, but the Government of the United States may send its own observers and invite observers from a mutually agreed party. If a majority of the valid ballots cast in the plebiscite favors termination, such government shall, upon certification of the results of the plebiscite, give notice of termination to the Government of the United States, such termination to be effective on the date specified in such notice but not earlier than three months following the date of delivery of such notice. The time specified in the notice of termination may be extended.

ARTICLE V

Survivability

Section 451

Should termination occur pursuant to Section 441, economic assistance by the Government of the United States shall continue on mutually agreed terms.

Section 452

Should termination occur pursuant to Section 442 or 443, the following provisions of this Compact shall remain in full force and effect until the fiftieth anniversary of the effective date of this Compact and thereafter as mutually agreed:

(a) Article I and Section 233 of Title Two;

(b) Title Three; and

(c) Articles II, III, V and VI of Title Four.

Section 453

Notwithstanding any other provision of this Compact:

(a) The provisions of Section 311, even if Title Three should terminate, are binding and shall remain in effect for a period of 50 years and thereafter until terminated or otherwise amended by mutual consent;

(b) The related agreements referred to in Article II of Title Three shall remain in effect in accordance with their terms; and

(c) The Government of the United States reaffirms its continuing interest in promoting the long-term economic advancement and self-sufficiency of the people of Palau.

Section 454

Any provision of this Compact which remains in effect by operation of Section 452 shall be construed and implemented in the same manner as prior to any termination of this Compact pursuant to Section 442 or 443.

ARTICLE VI

Definition of terms

Section 461

For the purpose of this Compact the following terms shall have the following meanings:

(a) "Trust Territory of the Pacific Islands" means the area established in the Trusteeship Agreement consisting of the administrative districts of Kosrae, Yap, Palau, Ponape, the Marshall Islands and Truk as described in Title One, Trust Territory Code, Section 1, in force on January 1, 1979. This term does not include the area of the Northern Mariana Islands.

(b) "Trusteeship Agreement" means the agreement setting forth the terms of trusteeship for the Trust Territory of the Pacific Islands, approved by the Security Council of the United Nations April 2, 1947, and by the United States July 18, 1947, entered into force July 18, 1947, 61 Stat. 3301, T.I.A.S. 1665, 8 U.N.T.S. 189.

(c) "Palau" is used in a geographic sense and includes the land and water areas to the outer limits of the territorial sea and the air space above such areas as now or hereafter recognized by the Government of the United States consistent with the Compact and its related agreements.

(d) "Government of Palau" means the Government established and organized by the Constitution of Palau including all the political subdivisions and entities comprising that Government.

(e) "Habitual Residence" means a place of general abode or principal, actual dwelling place of a continuing or lasting nature; provided, however, that this term shall not apply to the residence of any person who entered the United States for the purpose of full time studies as long as such person maintains that status, or who has been physically present in the United States or Palau for less than one year, or who is a dependent of a resident representative, as described in Section 152.

(f) For the purposes of Article IV of Title One of this Compact:

(1) "Actual Residence" means physical presence in Palau during eighty-five percent of the period of residency required by Section 141(a)(3); and

(2) "Certificate of Actual Residence" means a certificate issued to a naturalized citizen by the Government which has naturalized him stating that the citizen has complied with the actual residence requirement of Section 141(a)(3).

(g) "Defense Sites" means those land and water areas and improvements thereon in Palau reserved or acquired by the Government of Palau for use by the Government of the United States, as set forth in the related agreements referred to in Section 321.

(h) "Capital Account" means, for each year of the Compact, those portions of the total grant assistance provided in Article I of Title Two, which are to be obligated for:

(1) the construction or major repair of capital infrastructure; or

(2) public and private sector projects identified in the official overall economic development plan.

(i) "Current Account" means, for each year of the Compact, those portions of the total grant assistance provided in Article I of Title Two, which are to be obligated for recurring operational activities including infrastructure maintenance as identified in the annual budget justifications submitted yearly to the Government of the United States.

(j) "Official National Development Plan" means the documented program of annual development which identifies the specific policy and project activities necessary to achieve a specified set of economic goals and objectives during the period of free association, consistent with the economic assistance authority in Title Two. Such a document should include an analysis of population trends, manpower requirements, social needs, gross national product estimates, resource utilization, infrastructure needs and expenditures, and the specific private sector projects required to develop the local economy of Palau. Project identification should include initial cost estimates, with project purposes related to specific development goals and objectives.

(k) "Tariff Schedules of the United States" means the Tariff Schedules of the United States as amended from time to time and as promulgated pursuant to United States law and includes the Tariff Schedules of the United States Annotated (TSUSA), as amended.

(l) "Vienna Convention on Diplomatic Relations" means the Vienna Convention on Diplomatic Relations, done April 18, 1961, 23 U.S.T. 3227, T.I.A.S. 7502, 500 U.N.T.S. 95.

Section 462

The Government of the United States and the Government of Palau shall conclude related agreements which shall come into effect and shall survive in accordance with their terms, and which shall be construed and implemented in a manner consistent with this Compact, as follows:

(a) Agreement Regarding the Provision of Telecommunication Services by the Government of the United States to Palau Concluded Pursuant to Section 131 of the Compact of Free Association;

(b) Agreement Regarding the Operation of Telecommunication Services of the Government of the United States in Palau, Concluded Pursuant to Section 132 of the Compact of Free Association;

(c) Agreement on Extradition, Mutual Assistance in Law Enforcement Matters and Penal Sanctions Concluded Pursuant to Section 175 of the Compact of Free Association;

(d) Agreement Regarding United States Economic Assistance to the Government of Palau Concluded Pursuant to Section 211(f) of the Compact of Free Association;

(e) Agreement Regarding Construction Projects in Palau Concluded Pursuant to Section 212(a) of the Compact of Free Association;

(f) Agreement Regarding Federal Programs and Services, Concluded Pursuant to Article II of Title Two and Section 232 of the Compact of Free Association;

(g) Agreement Regarding Property Turnover, Concluded Pursuant to Section 234 of the Compact of Free Association;

(h) Agreement Regarding the Military Use and Operating Rights of the Government of the United States in Palau Concluded Pursuant to Sections 321 and 322 of the Compact of Free Association; and

(i) Status of Forces Agreement Concluded Pursuant to Section 323 of the Compact of Free Association.

(j) Agreement regarding the Jurisdiction and Sovereignty of the Republic of Palau over its Territory and the Living and Non-Living Resources of the Sea.

ARTICLE VII

Concluding provisions

Section 471

(a) The Government of the United States and the Government of Palau agree that they have full authority under their respective constitutions to enter into this Compact and its related agreements and to fulfill all of their respective responsibilities in accordance with the terms of this Compact and its related agreements. The Governments pledge that they are so committed.

(b) The Government of the United States and the Government of Palau shall take all necessary steps, of a general or particular character, to ensure, not later than the effective date of this Compact, that their laws, regulations and administrative procedures are such as to effect the commitments referred to in Section 471(a).

(c) Without prejudice to effects of this Compact under international law, this compact has the force and effect of a statute under the laws of the United States.

Section 472

This Compact may be accepted, by signature or otherwise, by the Government of the United States and the Government of Palau. Each government shall possess an original English language version.

In witness thereof, the undersigned, duly authorized, have signed this Compact of Free Association which shall come into effect in accordance with the terms between the Government of the United States and the Government of Palau.

DONE AT , THIS DAY OF , ONE THOUSAND NINE HUNDRED EIGHTY-FIVE

FOR THE GOVERNMENT OF THE UNITED STATES OF AMERICA

DONE AT , THIS DAY OF , ONE THOUSAND NINE HUNDRED EIGHTY-FIVE

FOR THE GOVERNMENT OF THE REPUBLIC OF PALAU

JURISDICTION

SEC. 202. (a) MARITIME AND TERRITORIAL JURISDICTION.—With respect to section 321 of the Compact of Free Association and its related agreements, the jurisdictional provisions set forth in subsection (b) of this section shall apply only to the citizens and nationals of the United States and aliens lawfully admitted to the United States for permanent residence who are in Palau.

(b) DEFENSE SITES.—The defense sites of the United States established in Palau in accordance with the Compact of Free Association and its related agreements are within the special maritime and territorial jurisdiction of the United States as set forth in section 7, title 18, United States Code.

(c) OFFENSES.—(1) Any person referred to in subsection (a) of this section who within or upon such defense sites is guilty of any act or omission which, although not made punishable by any enactment of Congress, would be punishable if committed or omitted within the jurisdiction of the territory of Guam by the laws thereof, in force at the time of such act or omission, shall be guilty of a like offense and subject to a like punishment.

(2) The District Court of Guam shall have jurisdiction to try all criminal offenses against the United States, including the laws of Guam made applicable to the defense sites in Palau by virtue of subsection (c)(1) of this section, committed by any person referred to in subsection (a) of this section.

(3) The District Court of Guam may appoint one or more magistrates for the defense sites in Palau. Such Magistrates shall have the power and the status of Magistrates appointed pursuant to chapter 43, title 28, United States Code: Provided however, That such Magistrates shall have the power to try persons accused of, and sentence persons convicted of, petty offenses, as defined in section 1(3), title 18, United States Code, including violations of regulations for the maintenance of peace, order, and health issued by the Commanding Officer on such defense sites, without being subject to the restrictions provided for in section 3401(b), title 18, United States Code.

Mr. SEIBERLING (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Ohio?

Mr. LAGOMARSINO. Mr. Speaker, reserving the right to object, I yield to the gentleman from Ohio to explain the resolution before us.

Mr. SEIBERLING. Mr. Speaker, this is the Compact of Free Association with Palau, as amended by the concurrent resolution which we just adopted. It is very, very important to the people of Palau as well as the United States to move this along to final ratification. It has the support of the administration, it has the support of both sides of the aisle, and I urge its adoption.

Mr. LAGOMARSINO. Mr. Speaker, further reserving the right to object, I rise in strong support of this measure. As the gentleman said, it has the strong support of the administration, both parties and is very similar to what we passed here, in fact I think it is an improved version together with the resolution which we just passed.

I rise in support of House Joint Resolution 626, the Palau Compact of Free Association Act.

The 99th Congress has been engaged in issues affecting the Pacific, including aid to the Philippines, legislation affecting United States flag areas in the Pacific, and the Compact of Free Association Act of 1985, which detailed the new relationship of the United States and the Marshall Islands and the Federated States of Micronesia, and now the Palau Compact of Free Association. I commend all those Members who have taken an active interest in issues affecting the Pacific.

The Secretary General of the Soviet Union has also taken an active interest in the Pacific. In July of this year, he traveled to Vladivostok, on the shores of the Pacific, where he announced that the Soviet Union is an Asia-Pacific nation. It was also in Vladivostok that he indicated that there has been a shift from a European era to a Pacific era. It is apparent from the military, diplomatic, and trade initiatives of the Soviets that the General Secretary's statement is reflective of an expanded effort in the Pacific.

The advent of a Pacific era is not a new idea, as it was predicted in the United States years before Government officials, scholars and the media declared its arrival. The Palau Compact of Free Association is a crucial part of the evolution of the Pacific era. The three new freely associated states of Palau, the Marshall Islands and the Federated States of Micronesia will bring to 14 the number of sovereign Pacific Island nations established since 1961.

The United States needs to focus on other pressing issues in the Pacific. These include the implementation of a negotiated regional fisheries agreement, consideration of signing the protocols of the Treaty of Rarotonga, increased bilateral aid, expanded diplomatic presence and the political status issues raised among U.S. flag areas, and foreign dependencies and territories. Our first order of business has been the fulfillment of our responsibilities under the Trust Territory of the Pacific Islands.

This legislation represents one of the last steps in completing the trusteeship obligation. It has taken 16 years of hard negotiations to develop mutually acceptable compacts of free association. The Palau compact development and approval process has been complex due to the particular requirement of the Palau constitution, which deserves clarification.

There has been a great deal of confusion about the status of the Palau compact in light of the fact that Palau's internal approval process is not yet completed. For example, even today there are those who assert the Palau supreme court has ruled the compact to be inconsistent with the constitution of Palau. To the contrary, the court ruled only that the compact has not yet been approved because it received 72 percent rather than 75 percent of the vote. Obviously, there is a significant difference between an international agreement which has not been approved, and one that is unconstitutional under the legal system of one of the parties.

Of course, both section 411 of the Palau compact and section 101(d) of House Joint Resolution 626 require that the compact not take effect until Palau's approval process is completed in accordance with the requirements of the constitution—as interpreted in light of the court's decision. Thus, it is accurate to say that the compact is not yet in effect as an international agreement in Palau or the United States. Nevertheless, it is an agreement signed by the duly authorized representatives of the foreign policy organs of the two governments, and it has been approved by two-thirds of both houses of the Palau National Congress and 72 percent of the people. The compact has the status of an international agreement awaiting ratification.

Still, there are those who insist that the compact is somehow unconstitutional because the court ruled that it cannot enter into force until it receives 75 percent approval. It is also asserted that the compact clearly required 75 percent and that the United States and Palau should never have taken the position that 50 percent approval was sufficient. However, the position of both governments on this point was based upon an interpretation of the nuclear provisions of the constitution which was translated into section 324 of the compact. Under that interpretation the United States accepted restrictions upon its defense operating rights intended to meet the requirements of the Palau constitution, so that 50 percent rather than 75 percent approval would suffice. The court chose to accept the interpretation of those who advocate a much more extreme interpretation of the Palau constitution which precludes any accommodation of United States defense rights absent a 75 percent approval.

Let the record show that the elected leaders of Palau who negotiated the compact on behalf of Palau, and whose interpretation of the constitution was the basis for section 324 and our position that 50 percent approval was sufficient, were the authors of the final version of the nuclear provisions of Palau's constitution. The records of the constitutional convention in Palau establish this fact. While the court interpreted the constitution in a more extreme way than the authors of the applicable provisions of the constitution, this obviously does not alter the effect of the court's decision. The court's interpretation is now the law of the land in Palau, and we all must accept the consequences of that decision. However, it would be a distortion to suggest, as some have, that the court decisions in Palau are an unequivocal vindication for the extremist interpretation of the Palau constitution's nuclear provisions.

For example, in announcing the original decision in the compact approval case, a decision which was upheld by the appellate division of Palau's supreme court, the Palau supreme court justice who heard the case made the following statements:

> The fact that this decision may have a devastating effect on Palau is not a govering standard. * * * I find small consolation in the fact that it is * * * not this court who bequeathed this legacy of trouble to Palau and its leaders * * * it is hoped that those who found it incumbent upon them to initiate this lawsuit to protect the rights of the 198 citizens who did not vote in favor of the compact, as against the 5,079 who did, do not find in the long run that the service they have done to the few is far outweighted by the disservice they may have done to the many.

That rather harsh view of the court expresses the frustration Palau's constitutional dilemma is causing in Palau, particulary since 72 percent of the voters approved the compact in a referendum in which 71 percent of the registered voters participated. I personally think there is cause for optimism. President Salii was one of the convention delegates who drafted the final version of the nuclear provisions in the constitution; he and the members of the National Congress understand the balance which must be struck between Palau's strong policy to limit the impact of military activities upon Palau's environment and the need for Palau to have an effective mutual security relationship with the United States. The Palauans have a history of being

intruded upon by foreign powers, and they are not naive about what the Soviets are doing in the Pacific.

Thus, I am very hopeful that the Palau compact, which will put the Palauans at long last in control of their own destiny, will be approved soon in a manner consistent with the court's decision. Under the compact, Palau will decide for itself how to chart its economic course, and will have the resources to engage in long term development strategies. It is a fair and very generous package, and obviously the vast majority of Palauans want to terminate the trusteeship in favor of the compact. Completion of the United States process for approval of the agreement is the best way for us to ensure that this goal will be achieved just as soon as Palau's approval process is complete.

As I did when the Palau compact first came before the House, I want to again commend the many Members of Congress who have worked so hard to make this legislation a reality. A successful resolution of the last remaining issues between the House and the Senate were resolved through the intense efforts of MORRIS UDALL, JOHN SEIBERLING, STEVE SOLARZ, JIM LEACH, SIDNEY YATES, and Senators JIM MCCLURE and BENNETT JOHNSTON. An incredible amount of time and effort was expended by the staffs of the Foreign Affairs and the Interior Committees, and they are again wholeheartedly commended. I do want to acknowledge the considerable contributions and cooperation of the Senate staff of the Energy and Natural Resources Committee, and particularly Jim Bernie and Lallen Stayman who worked steadily through to the resolution of the compact issues.

I cannot let this historic opportunity pass without once again acknowledging the tireless efforts of the Office of Micronesian Status Negotiations, headed by the President's personal representative for Micronesian Status Negotiations, Ambassador Fred M. Zeder II, and ably staffed by his assistants Jim Berg and Howard Hills. In fact the Ambassador has been in Micronesia this past week continuing to carry out his mandate for the future termination of the Trust Territory of the Pacific Islands.

It is only proper to thank the people of Palau for the patience they have shown throughout the years in their quest for a freely associated state status with the United States. I want to acknowledge President Lazarus Salii for his tenacious efforts to develop a compact of free association that reflects the wishes of the people of Palau. President Salii's executive task force on the compact, headed by Senator Laki Marisok in Washington to personally deliver the message that the people of Palau want the Palau compact. The task force has been a vital resource to the Congress during the past few weeks and I thank President Salii and the task force for their assistance.

Mr. SEIBERLING. I thank the gentleman, and I concur in his statement.

Mr. LAGOMARSINO. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Ohio?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the joint resolution just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

PERMISSION FOR COMMITTEE ON SMALL BUSINESS TO HAVE UNTIL 5 P.M. DECEMBER 31, 1986, TO FILE TWO REPORTS

Mr. MAVROULES. Mr. Speaker, I ask unanimous consent that the Committee on Small Business may have until 5 p.m. on December 31, 1986, to file two reports: The first is a report entitled "The Regulatory Flexibility Act: A Five-Year Report," and the second is a report entitled "International Tourism and Small Business."

These reports are not legislative, they are investigative, and the results of the committee's study and investigation of problems of small business pursuant to House Rule X.3(g).

The reports originated due to the work of our Subcommittee on Export Opportunities and Special Small Business Problems, of which Representative SKELTON is the chairman and Representative IRELAND is the ranking minority member. This request has the approval of the minority.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

Mr. IRELAND. Mr. Speaker, reserving the right to object, and I will not object, I want to take a moment to say that both of these reports are on subjects that were high in the ranking of interest at the recent White House Conference on Small Business. Our subcommittee chairman, Mr. SKELTON, has done an excellent job of bringing this material to the attention of the full committee and to our colleagues, and I want to compliment him for that.

□ 1500

Mr. Speaker, under my reservation of objection, I yield to the gentleman from Missouri [Mr. SKELTON].

Mr. SKELTON. Mr. Speaker, I appreciate the gentleman yielding to me.

Mr. Speaker, I wish to say that I appreciate the gentleman's efforts as the ranking minority member on the subcommittee. Both of these reports, as the gentleman has already stated, are investigative, that is oversight in nature. They are very substantive, and we would appreciate being able to file them before the end of the calendar year, because they will be of interest to all the Members of this body.

Mr. Speaker, I also thank the gentleman from Massachusetts for making this unanimous-consent request.

Mr. IRELAND. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. NATCHER). Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

CERTAIN PUBLIC DOMAIN LANDS HELD IN TRUST FOR THE PUEBLO OF ZIA

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5167) to declare that the United States holds certain public domain lands in trust for the Pueblo of Zia, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 2, line 2, strike out all after "land" down to and including "Interior," in line 5, and insert: "under the jurisdiction of the Bureau of Land Management of the Department of the Interior situated within Sandoval County, New Mexico.".

Page 4, strike out lines 10 to 18, and insert:

(2) Plains Electric Generation and Transmission Cooperative, Inc. and its successors and assigns, shall be permitted to renew the right-of-way described in paragraph (1) under rules and regulations of the Secretary to the same extent and in the same manner that such permit could have been renewed if this Act had not been enacted.

Page 5, line 8, strike out "subsisting" and insert: "existing".

Page 5, strike out all after line 19, over to and including line 2 on page 6, and insert:

(2) Subject to valid existing rights, the leases described in subsection 4(d)(1) shall be administered under rules and regulations of the Secretary to the same extent and in the same manner that such leases would be administered if this Act had not been enacted.

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

REAFFIRMING OUR FRIENDSHIP AND SYMPATHY WITH THE PEOPLE OF EL SALVADOR FOLLOWING EARTHQUAKE OF OCTOBER 10, 1986

Mr. FASCELL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 427) reaffirming our friendship and sympathy with the people of El Salvador following the devastating earthquake of October 10, 1986, and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. LAGOMARSINO. Mr. Speaker, reserving the right to object, I reserve the right to object to that I might ask the gentleman from Florida, the chairman of the committee, to explain the measure.

Mr. Speaker, under my reservation of objection, I yield to the gentleman from Florida.

Mr. FASCELL. Mr. Speaker, I will say that this is a simple resolution expressing on behalf of the citizens of the United States our sympathy, and extending that to the people of El Salvador at the time of this great crisis, and expressing the sense of the House that the President should, as he has been doing, provide all the appropriate relief and rehabilitation which, as you know, has already been supplied. We have several teams down there right now evaluating and determining what should be done. And finally, it urges that we work together in order to help these folks who have had enough trouble already with their rehabilitation and reconstruction on the President's request to the Congress.

Mr. LAGOMARSINO. Mr. Speaker, further reserving the right to object, I rise in strong support of this resolution.

As the gentleman, the chairman of the committee, has pointed out, we are already assisting and lending support to those efforts. As concrete evidence of our Government's interest in and sympathy for the people of El Salvador, the Secretary of State is there today visiting the area.

I certainly join in sympathizing with what has happened, this terrible tragedy in El Salvador, and urge my colleagues to support the measure.

Mr. LAGOMARSINO. Mr. Speaker, I rise in strong support of Senate Joint Resolution 427 reaffirming our friendship and sympathy with the people of El Salvador following the devastating earthquake of October 10, 1986. This resolution underscores our strong commitment to the welfare of the Salvadoran nation which has suffered so much in recent years.

In response to an urgent request from President Duarte, the Agency for International Development [AID] has already provided $1.5 million in emergency relief. Another $50 million will be on the way soon as the result of Congress' decision to appropriate such additional assistance in the continuing resolution.

Mr. Speaker, in short, this measure demonstrates our solidarity and enduring friendship with the people of El Salvador and I urge its swift adoption. In order for Members to have a greater understanding of the extent of this tragedy, I insert at this point in the RECORD some information I have just received from AID:

AGENCY FOR INTERNATIONAL DEVELOPMENT,
Washington, DC, October 14, 1986.

Dear MEMBER: On October 10, two strong earthquakes struck El Salvador, effecting heavy damage to a twenty-square block area in downtown San Salvador and to the southeast of the capital. There have been numerous aftershocks since that time. The present estimated count is 900 (unconfirmed) dead, 9,000–10,000 injured, and 150,000 homeless.

In response to a request for international assistance by El Salvador President Duarte, the Agency for International Development has provided $1.5 million in emergency relief supplies and equipment, personnel, and transportation costs from its International Disaster Assistance account since last Friday. Additional assistance will be provided as needs are identified and as available funding permits.

The Office of U.S. Foreign Disaster Assistance has convened an emergency working group to monitor the situation and to coordinate the U.S. Government response from Washington. We will be producing periodic situation reports during the emergency phase of the disaster. Enclosed is a copy of the most recent report which provides detailed information on the general situation in El Salvador and the response to date by the El Salvadoran government, nongovernmental organizations, and the international community.

We urge those who wish to contribute to any relief effort to make cash donations to relief agencies with programs in El Salvador. We hope you will join us in this effort by encouraging your constituents who inquire to send their cash contributions to a charity of their choice. Enclosed is a listing of voluntary agencies which are known to be participating in the El Salvador emergency relief effort.

If you would like additional information, please call this office at 647–8441.

Sincerely,

KELLY C. KAMMERER,
Director, Office of Legislative Affairs.

Enclosures: as stated.

EL SALVADOR—EARTHQUAKE

Date: October 10, 1986—11:49 a.m. local time.

Areas affected: Mainly a 20-square block area in downtown San Salvador; major structural damage also reported to the southeast of the capital including the residential neighborhoods of San Jacinto, San Marcos, and Modelo.

Dead: Estimated 900 (unconfirmed).

Injured: Estimated 9,000–10,000, many with minor wounds.

Homeless: Estimated 150,000.

Damage: Heavy damage was reported in the center of San Salvador; eight major buildings, a GOES ministry building and the U.S. Embassy, suffered severe damage; two of seven San Salvador hospitals reported destroyed, one evacuated, and the remaining four damaged to varying degrees (10%–40%).

Preliminary damage assessment: Virtually every sector suffered major damage, and reconstruction costs are expected to top $600 million. Many structures are beyond repair and will have to be demolished and built.

Government buildings: The Ministry of Public Works reported 40 government buildings with major structural damage; the Ministry of Planning collapsed; the Ministry of Finance and the Central Reserve Bank also suffered extensive structural damage; Ministry of Agriculture's main facility is badly damaged; about 30% of the Presidential Palace collapsed.

Hospitals—Three of the city's major hospitals require extensive or complete reconstruction: one wing of the Bloom Hospital collapsed completely and the main tower structure may be beyond restoration; the Social Security and Military hospitals also suffered extensive structural damage and equipment loss.

Schools: Of 62 schools visited, 30 suffered damage requiring reconstruction or repair: 13 will require complete reconstruction; 17 will require extensive repair.

Houses: Damage to houses, particularly those occupied by relatively poor people, was extensive.

Public Service Infrastructure: Streets and some bridge structures have suffered damage from heaving and settling. Streets are being evacuated in hundreds of sites to repair water and sewer lines and will have to be patched.

GENERAL SITUATION

Two strong earthquakes struck El Salvador the morning of Friday, October 10. The first tremor registered 5.4 on the Richter scale at 11:49 a.m. local time and was centered about 10 miles northwest of the capital; the second tremor registered 4.5 at 12:04 p.m., centered near the same site. The quakes were felt in neighboring Honduras and Guatemala.

Aftershocks have continued through October 13.

Search and rescue operations are in progress. These efforts are being carried out by the Salvadoran Red Cross and U.S., Mexican, Guatemalan, Italian, and Swiss rescue workers, among others.

The Ruben Dario Building in downtown San Salvador and the Ministry of Planning in the city's southern outskirts collapsed, burying many who are still trapped and feared dead in the ruins; rescue workers, including search and rescue dog teams, are locating survivors. Swiss teams are concentrating their efforts at the Ministry of Planning, and U.S. teams are working at the Ruben Dario site.

In addition to buildings in central San Salvador, including most government buildings, shanty-towns around the capital suffered the most damage.

Electricity was disrupted but should be back in service in a few days; phone communications were intermittently interrupted, with only ham radio communication functioning; water distribution was also interrupted. Commercial telex is expected to be inoperable for four to five days.

Many of the injured and those evacuated from damaged hospitals have been sent to hospitals in Santa Ana, a large city in western El Salvador, which was undamaged.

Electrical service has been restored 85%; water service has been restored; and public transportation services are operating.

There are no major problems with streets and bridges; landslides covered the two outer lanes of the airport highway, but two lanes remain open.

Comalapa Airport is overloaded with unnecessary items as a result of an influx of unsolicited donations; these in-kind donations are not needed and interfere with the relief effort.

Sufficient emergency medical and rescue personnel are on site. The situation does not warrant additional personnel.

A donor coordination meeting among government representatives from the U.S., Switzerland, Italy, West Germany, and Japan was held Monday, October 13.

Search and rescue efforts have been coordinated and responsibilities divided among international teams; at least 70 survivors were reported rescued by Sunday, October 12.

ACTION TAKEN BY THE GOVERNMENT OF EL SALVADOR (GOES) AND LOCAL GROUPS

President Duarte declared a state of emergency and requested international assistance.

The GOES convened the National Emergency Committee which met at 10:00 a.m. local time October 11. The Crisis Commission comprises members of the Cabinet, the armed forces, and representatives from the private sector. Several subcommittees were established to investigate emergency and rehabilitation needs.

The El Salvador Red Cross, along with many private Salvadoran volunteers, is providing first aid and rescue services. More than 400 Red Cross volunteers are engaged in relief endeavors.

ASSISTANCE PROVIDED BY THE UNITED STATES GOVERNMENT

The U.S. Ambassador, Edwin Corr, declared a disaster on October 10. His $25,000 Disaster Assistance Authority was applied toward the local purchase of several thousand water jugs and unspecified medical supplies.

On October 10, AID's Office of U.S. Foreign Disaster Assistance (OFDA) convened a 24-hour El Salvador Earthquake Working Group to coordinate USG assistance to host country disaster victims. Simultaneously, the State Department established a Task Force to respond to the needs of U.S. Embassy and AID personnel in El Salvador as well as respond to inquiries about U.S. citizens from concerned relatives.

OFDA dispatched a five-member assessment team from Costa Rica to the disaster site via a DOD C-130 from Panama. The team arrived October 11 with 10 cases of radio equipment and a portable generator. Cost of team: approximately $20,000.

A 15-member Emergency Medical Response Team with a truck and supplies, donated by DOD, and 360 blankets from OFDA's stockpile were sent October 11 via the same flight from Panama, the team to be on hand in case of need. Cost of transport: $11,000; cost of blankets: $1,458.

A second relief flight from Panama also arrived October 11 carrying 740 blankets, 50 tents, and 100 folding litters. Cost of blankets: $2,997; tents: $20,400; litters: $1,500.

OFDA provided a search and rescue team of four dogs and four handlers plus two coordinators. They arrived October 11 via a DOD C-141 from Andrews AFB paid for by DOD. Five survivors and 11 bodies have been identified by the team.

A five-member fire rescue team from Dade County, Miami, was flown in on October 11 with five sets of "jaws of life" rescue equipment, total cost $20,000. On October 11, the team pulled at least five survivors from rubble of one building where smoke from fires complicated rescue efforts. The number of people rescued by Dade County so far is 32.

OFDA provided 12 water tanks (3,000-gallon capacity), 309 rolls of plastic sheeting, and 1,500 wool blankets, arriving from Panama aboard two DOD C-130s, Saturday evening (October 11). The 3,000-gallon water tanks were immediately delivered to the hospitals. Cost of supplies: $157,850; cost of transport: $21,000. (The cost for the shipment of all replacement stocks is estimated at $40,000.)

20 general purpose medium tents (on loan from DOD) were flown in from Honduras to the disaster site.

USG relief personnel are working with Salvadoran Red Cross volunteers to distribute OFDA plastic sheeting to be used for temporary shelter. The sheeting was trucked to a soccer field from the airport and is being divided and distributed to victims.

OFDA notified U.S. media to discourage in-kind donations, due to the overload of unnecessary commodities being donated.

OFDA sent an additional 210 rolls of plastic sheeting and 200 body bags on a DOD C-130 from Panama on October 12. Cost of plastic: $32,368; body bags: $4,000; transport $11,000.

Two AID employees from the U.S. Mission in Costa Rica arrived in San Salvador October 14 to help monitor and distribute supplies. Cost of team: $2,020 for ten days.

OFDA is sending a U.S. Geological Survey seismologist, Dr. David Harlow, to accompany a team from the Earthquake Engineering Research Institute. These scientists plan to arrive at the end of the week (October 16 or 17).

OFDA sent an additional 236 rolls of plastic sheeting from its Panama stockpiles on Monday October 13, via a DOD C-130. Cost of transport: $11,000; plastic sheeting: $64,192.

OFDA is funding the transport of 29,500 lbs of medical supplies provided by MAP International, a U.S. voluntary organization. Cost of transport: $19,000

Two rolls of plastic sheeting were transported to San Salvador on space available on military transport. Cost of plastic: $544

OFDA is supplying 960 rolls of plastic sheeting and 200 tents from its new Windsor stocks; and tent kits, including 350 tents, flys, and repair tools; and 24 3,000-gallon water tanks from its Panama stocks. Cost of plastic: $261,120; tents and kits: $652,386; water tanks: $57,600; C5A transport: $100,000; inland (U.S.) truck transport: $10,000

OFDA is also sending USAID/Lima housing expert Kraig Baier to assess reconstruction needs.

Total USG assistance to date—$1,546,435.

ASSISTANCE PROVIDED BY U.S. VOLUNTARY AGENCIES AND OTHER PRIVATE GROUPS

Cross Connection, Inc.—General relief items, including medical supplies.

Earthquake Engineering Research Institute—Team of scientists to collect seismological data on the earthquakes.

MAP International—Assessment team and 29,500 lbs medical supplies.

Save the Children Federation—$10,000 for local procurement of relief items; on-going program in country has staff of 35 which will be supplemented by staff from Guatemala.

ASSISTANCE PROVIDED BY THE INTERNATIONAL COMMUNITY GOVERNMENTS

Canada—Cash grant of $109,000 through PAHO and LRCS.

Costa Rica—Search and medical team, five-member assessment team headed by Vice President Dengo.

France—Satellite communications equipment, 1.8 MT of relief goods and medical equipment, and a nine-member medical team.

Guatemala—80-person medical/rescue team and medical supplies.

Italy—One C-130 carrying medicines, medical supplies, food, tents, three electric generators, plastic storage tanks, family kits, and blankets; second relief flight carried medical/rescue team.

Japan—Three-person medical team.

Mexico—Relief flight carrying medical/technical team, food, medicines, and equipment.

Netherlands—Cash grant of $450,000 for rehabilitation and reconstruction.

Nicaragua—Blood supplies for transfusion.

Spain—Relief flight carrying medical supplies and rescue and other relief equipment.

Switzerland—One DC-10 Swissair charter flight carrying relief personnel and supplies arrived Sunday, October 12, carrying 52 specialists from the Swiss Disaster Unit, one delegate each from UNDRO and the Swiss Red Cross, and a French medical team. The Swiss rescue team comprises 21 search and rescue experts with 15 dogs, 18 relief experts with heavy equipment, four water treatment specialists with technical equipment, and a nine-member relief coordination team including radio operators, a medical doctor, and support personnel; 8.7 MT of relief supplies donated by the Swiss Red Cross were also on board.

Venezuela—Relief flight with medicines, medical suplies, and an assessment team including doctors and firefighters.

INTERNATIONAL ORGANIZATIONS AND PRIVATE VOLUNTARY ORGANIZATIONS

Action D'Urgence Internationale—Four rescue experts, one electronic sonde, and two rescue dogs.

Caritas/FRG—Emergency first-aid supplies, valued at $100,000.

Caritas/Italy—Emergency first-aid supplies, valued at $70,000.

EEC—Joint operation with United Kingdom and the British Red Cross: relief flight with 500 family tents and other emergency supplies, valued at $290,000.

ICRC—In-country team of 21 members assisted in relief operations.

International Rescue Corps (U.K.)—14-member search and rescue team with two dogs and technical equipment.

League of Red Cross Societies—Two delegates, 13 MT of relief supplies: 3,000 blankets, 457 tents, and 200 first-aid kits.

Medecins du Monde/France—Two doctors to reinforce a medical team of 13 providing regular assistance.

Medecins sans Frontieres/France—Three medical teams with a total of 15 doctors, nurses, and logisticians.

Netherlands Red Cross—5,000 blankets, 100 tents, and medical supplies.

Switzerland Red Cross—Nine MT of relief goods, including 4,500 blankets, 100 sets of household equipment, five special tents to be used as emergency health posts, and 50 family shelter tents.

UNDRO—Delegate arrived early October 12 with Swiss relief flight to assist UNDRO/UNDP resident representative in coordinating international relief.

UNICEF—2,000 blankets, 1,500 yards of dressing material, 100 5-gallon plastic water jugs, and 50 Coleman lamps.

JULIA V. TAFT,
Director, OFDA.

PRIVATE VOLUNTARY ORGANIZATIONS PARTICIPATING IN EL SALVADOR RELIEF RESPONSE

A number of American voluntary agencies are currently reviewing appropriate relief measures in order to respond to the needs of the earthquake victims. Persons wishing to make cash contributions may make tax deductible donations to the following organizations which have assistance programs in the areas:

Adventist Development and Relief Agency International
6840 Eastern Avenue, N.W.
Washington, DC 20012
(202) 722-6428

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida.

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 427

Whereas on October 10, 1986, El Salvador suffered a devastating earthquake resulting in heavy loss of life and injuries to many of its citizens;

Whereas the prolonged and extreme hardship of the people of El Salvador as a result of civil conflict has been deepened by this natural disaster;

Whereas the assistance of many governments, as well as international and nongovernmental organizations, for the people of El Salvador has been prompt and generous;

Whereas Secretary of State George Shultz will visit El Salvador during this emergency in order to convey the solidarity and friendship which link the peoples of our two nations: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That government of the United States, on behalf of the citizens of the United States, extends to the people and government of El Salvador our most profound sympathies in this time of tragedy.

SEC. 2. The President should provide all appropriate relief and rehabilitation assistance to help prevent further loss of life, alleviate suffering, and safeguard the public health in El Salvador.

SEC. 3. The United States, in consultation with the government of El Salvador, is prepared to cooperate with El Salvador in long-term efforts to recover from the effects of the earthquake.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

COLUMBIA RIVER GORGE ENHANCEMENT OF RESOURCES

The SPEAKER pro tempore. Pursuant to House Resolution 596 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 5705.

□ 1504

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5705) to protect and provide for the enhancement of the resources of the Columbia River Gorge, and for other purposes, with Mr. MONTGOMERY in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from North Carolina [Mr. WHITLEY] will be recognized for 15 minutes, the gentleman from Oregon [Mr. ROBERT F. SMITH] will be recognized for 15 minutes, the gentleman from Oregon [Mr. WEAVER] will be recognized for 15 minutes, and the gentleman from California [Mr. LAGOMARSINO] will be recognized for 15 minutes.

The Chair recognizes the gentleman from Oregon [Mr. WEAVER].

Mr. WEAVER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of H.R. 5705, the Columbia River Gorge National Scenic Area Act. The Columbia River provides the only sea level passage through the great Cascade mountain range between Canada and California. This grand old river's importance to the economy of the Northwest can hardly be overemphasized: Not only is it a vital component of the region's transportation network, but it also provides clean, abundant hydroelectric energy to the people who live and work there.

In addition, the towering waterfalls, spectacular vistas, and unsurpassed recreational opportunities of the gorge

bring millions of visitors to the area every year.

As the region's population has grown, however, the gorge has come under increasing pressure for residential, commercial, and industrial development. H.R. 5705 will channel those developments into areas that will protect and preserve the scenic, cultural, recreation, and natural resources that have made the Columbia River Gorge the great national treasure that it is today.

H.R. 5705 establishes a 12-member bistate commission to oversee management and development of a 245,000 acre national scenic area. The commission is made up of six members appointed—one each—by the county commissions of the six affected counties in the scenic area. The Governors of the respective States will appoint three members each to the commission.

The scenic area consists of 13 urban areas, totaling some 19,000 acres, which are exempted from the provisions of the act. It also includes four special management areas, totaling approximately 112,000 acres, which contain the regions most precious scenic and recreational resources. Finally, there is an additional 113,000 acres of land in the scenic area which is outside the urban and special management areas.

The commission, in consultation with the counties and with the Forest Service, will develop a management plan for the scenic area. Public hearings and an opportunity for public comment are required prior to adoption of the management plan.

I want to stress that H.R. 5705 keeps control of private lands in the hands of the counties. The commission's management plan will contain guidelines for the development of land use ordinances for private lands in the scenic area. Those counties that already have land-use ordinances in effect can submit those to the counties for approval. If the commission agrees that the ordinances are consistent with the act, the counties need do nothing more.

With regard to private lands in the special management areas, the Secretary must concur with the commission's decision that the land use ordinances are consistent with the act. If the Secretary does not concur, however, the commission can override that decision by a majority vote of the members from each State.

Mr. Chairman, I want to assure you and other House Members that this bill will not disrupt the lives and activities of the area's residents. The act does authorize condemnation of lands if they are going to be put to a use that threatens the resources of the scenic area. However, this authority is extremely limited: Single-family residences, farms, ranches, educational facilities can never be condemned. Prior to the adoption of local zoning ordinances, condemnation is not allowed of any existing uses outside the special management areas, and any proposed condemnation in these areas by the Secretary can be overriden by a two-thirds, dual majority vote of the commission. Finally, after the local zoning ordinances have been approved under this act, condemnation can occur only in special management areas and then only if they are being used inconsistently with those ordinances.

Mr. Chairman, this bill will not bring an overbearing and onerous Federal presence to the area. On the contrary, this bill will remove the cloud of uncertainty that currently hangs over the gorge. For the better part of a decade gorge residents have watched—and weathered—a multitude of State and Federal proposals to protect the Columbia Gorge. At last a concensus has been reached among the entire Washington and Oregon Senate delegations, and all but two Members of the House delegations, and that cloud of uncertainty can be removed.

H.R. 5705 is the product of countless thousands of hours of work by House and Senate Members, their staffs, and the committee staffs of the respective bodies. In essence, it is the Senate-passed bill with several amendments that were in the House bill that was considered by the Interior and Agriculture Committees last week.

This bill is a compromise in the truest sense of the word. It will not make everyone happy and there will be those who disagree with some of its provisions. But every conceivable effort has been made through meetings with Members, Senators, staff, and the administration to draft a bill that provides the strongest protection with the least impact on residents of the area. I believe this bill will accomplish that goal for several reasons.

First, the bill passed by the other body a week ago included interim management authority that was not provided in the original bill. It also added a requirement that State and Federal activities in the scenic area must be consistent with the act, and it limited the availability of funds that would otherwise be provided under the act for counties that do not comply with its provisions. These changes were intended to ensure that the interstate compact is adopted by the States, that the commission is established, that a sound management plant is developed, and that county zoning ordinances are implemented.

Second, both H.R. 5705 and the bill passed by the other body contains a revised mechanism for developing county land use ordinances in the special management areas which resolves the concerns of those who suggested that the original formula was tantamount to Federal zoning.

Finally, H.R. 5705 was further strengthened by adding several provisions important to the House Interior Committee. These include limiting the directed land exchange program to private forest landowners, extending the limitation on Federal underwriting of inconsistent activities to the issuance of new permits and licenses as well as to new expenditure or financial assistance, and providing the commission with the authority to disapprove the Secretary's proposed condemnation of private lands during the interim period.

Mr. Chairman, I believe these changes make a good bill even better and we have assurances from the other body that they are acceptable. I urge my colleagues to support H.R. 5705.

□ 1510

Mr. ROBERT F. SMITH. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, when I first began discussing this issue with Members of Congress, we found that we had broad areas of agreement. We wanted and made a pact, Democrats and Republicans, that in the Columbia River Gorge the first thing that would be clear is local control over whatever may occur within the gorge. We made a pact.

I cosponsored a bill demonstrating my sincerity in that pact. The other part of that pact was that we would reduce condemnation to its very narrowest point of view and that we would not have Federal intervention in the decisionmaking in the gorge. We also provided, and I cosponsored a bill, which said that if you have local land use laws, which the State of Oregon does in abundance, then those land use laws would not be impacted nor superseded by any Federal authority.

My friends, none of those issues, nor none of those agreements, nor none of that pact has held up since the time I cosponsored the bill. None are in this bill and we should oppose the bill for this reason.

We may discuss the protection of the Columbia River Gorge and we should. But at what cost? Are we going to take away the rights and privileges of the people on my side of the river and the Washington side of the river and for what? Are we going to allow the Secretary of Agriculture and the Federal Government broad, new condemnation powers which they have under this bill and for what?

Are we going to ignore local land use laws that are already established in the State of Oregon and serving us well and for what? There has been some discussion about the economic opportunity that may surround itself in this bill. There has even been dis-

cussion that there would be an increase in tourism. Let me give you the hard, cold facts of the day. Not my numbers; numbers from the U.S. Forest Service as we heard this bill in the Agriculture Committee.

The loss in the allowable cut in the timber resource after the passage of this bill is 17 million board feet. By Forest Service numbers, that means direct and indirect job loss of 357 people. That means that considering an annual income average of $30,000 more than $10 million in direct economic loss would occur every year, this bill is in effect. By the way, the plum on the other side of the issue, the plum is this: We, the Congress, are supposed to appropriate under this bill after it is authorized, this is the authorization, $5 million to go to the State of Washington and $5 million to go to the State of Oregon for economic development. We took the jobs away, 357, plus $10 million annually, and we given them back $5 million one time. Not very good arithmetic for jobs. I support expansion of jobs, not reducing them. I know that every Member here wants to support the expansion of jobs not reducing them.

This 12-man commission is not local control at all. If you want local control, you do what we did in the original bill I cosponsored and every Member on the Democratic side cosponsored, may I say. That is to provide for a majority of commission members live within the Gorge. In other words, there should be 8 members of this 12-member commission who live in the scenic area of the gorge. That is local control.

The issue about overriding, what may be the greatest detriment to the people that I represent, brandnew condemnation powers. It is the idea that you can override by the commission. I merely wanted in one of my amendments, to allow, in the interim before the commission was established, the Governors of the respective States the authority to override any condemnation powers by the Federal Government. That is not in this bill.

May I suggest to you that I am not alone in my concern about this legislation. Just let me give you an example or two.

I did not solicit the Department of Justice on this issue. They sent a letter to the chairman of the Interior Committee and the chairman of the Agriculture Committee and in it they said these things, and I quote directly. I want to submit the Department of Justice letter which I will do under general leave.

Here is what Justice said and I will submit their letter for the RECORD.

Injunctive relief—temporary taking of private lands. We are talking about private lands. There is no time limit in this bill. This is a restraint of local property use by actions of Federal officials.

This provides broad, new powers to the Secretary of Agriculture for interim guidelines condemnation. There is no sunset in this bill.

This failure to include a sunset provision may lead to a bill which originally contemplated the voluntary actions of the States becoming an indefinite regulatory land use program by the Federal Government. An indefinite regulatory land use program by the Federal Government. The Department of Justice went on to say, if I may paraphrase, We have such reservations about this bill, we very well may recommend a veto. Unheralded condemnation powers. Unhearlded powers given to the bureaucrats in Washington, DC.

The Justice Department letter follows:

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,
Washington, DC, October 14, 1986.

Hon. MORRIS K. UDALL,
Chairman, House Committee on Interior and Insular Affairs, Washington, DC.

DEAR CONGRESSMAN UDALL: This is in response to your request for this Department's comments on the amendment in the nature of a substitute to H.R. 3625. The bill would establish a national scenic area and provide a scheme for its management. The bill is designed to facilitate management through a Commission created out of a compact between Oregon and Washington. We take the opportunity to identify certain concerns raised by the language of the bill. We will reference where warranted, S. 2055, recently passed by the Senate.

1. Interim Injunctive Relief/Temporary Taking Concern.

Section 10(c)(1) purports to authorize federally requested temporary restraining orders or preliminary injunctions (upon exercising the authority to acquire land) to protect against interim uses which are likely to cause impacts adverse to the purposes for which the bill establishes the scenic area. The time limit on the interim restraint is ninety days. The Senate bill has a similar provision but has no time limit.

As a technical matter, the bases upon which the relief can be sought are broad. An injunction can be sought against actions "significantly affecting" scenic, cultural, recreation, and natural resources of the scenic area or otherwise inconsistent with the purposes for which the scenic area is established. Turning to those "purposes", Section 3 refers to the protection of scenic, cultural, recreation, and natural resources. It also refers to support of the "economy" of the Columbia River Gorge Area. These provisions offer any little limit to the grounds for which relief may be sought.

In effect, the interim injunctive relief of this section will restrict local property use by actions of federal officials. This gives rise to serious concerns of federal temporary taking liability where, for some reason, a complaint in condemnation is filed but the suit later withdrawn. Accordingly, we strongly urge the deletion of the provision. In addition, Section 10(c)(2) seems to provide an effective mechanism for the balancing of local interests and federal interests under the bill. For that reason as well, Section 10(c)(1) may be unnecessary. As a much less desirable alternative, retention of the provision should at least be coupled with a time limitation, as in the House bill. In that respect, however, we would urge a much shorter period, such as 14 days, as ample "cooling off" time.

2. Citizen Suit Provisions and the Enforcement Scheme.

Generally, we oppose the inclusion of citizen suit provisions, such as those in Section 14(d) in legislation. This is particularly appropriate where, as here, alternative enforcement mechanisms are provided. See Section 14(c). The Attorney General may initiate civil action for an injunction or other appropriate order as may the Attorneys General of Washington and Oregon. We would recommend deleting the citizen suit provision.

Even where citizen suit provisions have been enacted, those provisions typically include "notice of intent to sue" terms. In this bill, the citizen suit provisions provide for no notice where the basis of the suit is that "a legal interest" of the plaintiff is immediately affected. The United States normally takes the position that "a legal interest" is required to have standing to litigate in the first instance; thus, if standing exists, there is in essence no notice requirement in this language. Thus, we would recommend deleting this notice exception if the citizen suit provision is not deleted.

3. Enforcement and Responsibilities.

As a preface, but one which leads to numerous other ambiguities in the bill, we note that the legislation appears to grant prior Congressional approval to a possible undefined future agreement by the states. The bill is so detailed in its requirements for that agreement that the roles of federal and local authority become confused. Thus, although Section 5(a)(1)(b) speaks of the Commission as exercising state authority, the bill leaves the lines of federal and state enforcement authority unclear.

Specifically, in Section 14(c) no distinction is made between the enforcement responsibilities of the Attorney General of the United States and those of the State Attorneys General. The actions taken by the Commission, a non-federal entity under the Act, seem to be enforcible by the federal government's attorney. Similarly, actions of the Secretary of Agriculture could be enforced by the State Attorneys General. Of course, federal responsibility should extend only to federal interests. The Senate bill provides a separation between the enforcement responsibilities that should be included in Section 14.

4. Penalty Provisions.

There is no provision for the use or fiscal status of collected penalties for violation of the Commission orders. Viewed on the basis of Section 5, the bill seems to contemplate that the power to collect the penalties is derived from state law. Otherwise, the penalty provision would be an impermissible delegation of the federal legislative contempt power or federal judicial sanction power to a non-federal entity.

5. Indeterminate Period of Secretarial "Interim" Responsibility.

As we now understand the bill, it does not specifically address the continued efficacy of the Secretarial "interim" responsibilities (Section 10) in the event the compact is not approved within one year. This failure to include a sunset provision may lead to a bill which originally contemplated the voluntary actions of the States becoming an indefinite regulatory land use program by the federal government.

6. Generally.

It is not unreasonable to view the Secretary's interim guidelines and his guidelines for "land use ordinances" (the latter developed in consultation with the Commission) Section 8(f), as substantially controlling the standards adopted by the Commission and eventually the local land use bodies. Thus, even apart from "taking" implications, fair argument exists that, under this legislation, the federal government is itself regulating both local bodies and local land use.

In sum, the bill raises serious risks of taking liability, although its injunctive provisions are more restrained than those of the Senate version. The bill also leaves troublesome ambiguity over the allocation of federal and state power in such areas as enforcement authority, an ambiguity which could, conceivably, reach as far as the Constitutional efficacy of the compact itself. We would be glad to discuss the bill further but are constrained to say that our concerns, which stem in large part from the bill's ambiguity over allocation of authority, are fundamental and serious enough to warrant consideration of a veto recommendation from this Department should the Congress pass the legislation.

The Office of Management and Budget has advised that there is no objection to submission of this report from the standpoint of the Administration's program.

Sincerely,

KEN BERGQUIST,
Acting Assistant Attorney General.

The Department of Agriculture is most concerned about this bill. You read the letter, many of us did in Agriculture, from Secretary Lyng, saying, we do not like our role in this thing. We do not want to be directing what happens on private lands. We already direct what happens on 90 percent of the lands on the Oregon side; there are only 10 percent left. That is what we pay taxes with. That is the way we educate our children and that is the way we build roads. We have only got 10 percent left, now you want to take the rest.

How are we going to educate our children and how are we going to build our roads? I suggest to you that the Forest Service is saying, We do not want this program; we do not like what you are telling us to do in this bill, and if you do not change it, we are going to recommend a veto.

A later letter came, I admit, and said the Senate has made some adjustments, but we still do not like our role. It is a dictatorial, Federal role we have never had before. It allows us condemnation, direction, and power over private lands. That is the reason this is a bad bill and I will provide you with a better one in a few minutes.

□ 1520

Mr. Chairman, I yield 5 minutes to the gentleman from Oregon [Mr. DENNY SMITH].

Mr. DENNY SMITH. Mr. Chairman, Oregonians have a proud history of sensible land management. We were historic in being the first State to have the bottle bill, where we have to clean up our bottles and cans. We have cleaned up our polluted rivers. We have tough laws on public beaches and we have very strong land-use planning laws in effect in the State of Oregon.

That is why the bill before us is wrong. It is unnecessary. And frankly, it is an insult to thousands of Oregonians in the gorge that have and will continue to manage their own lands in a responsible manner without the Federal Government looking over their shoulder.

The bill reflects a complete lack of confidence in the people of Oregon to manage their own lands.

Let me talk a little bit about economics now, because I think that is really where we are talking about the gut issues, as far as this Member is concerned.

The proponents of the bill will not allow an economic impact study to be conducted. In addition, it is going to cost a lot of jobs for Oregonians.

My colleagues said 350; I would say it is 350, maybe 2 or 3 times over. Those jobs are in Oregon and they are going right out the window. The unemployment rates in the gorge are high enough as it is. This will increase those rates by another 1 percent.

But let me give you, in 1986 figures, what the unemployment is county-by-county: Hood River County, 16.2 percent; Wasco County, 16.5 percent; on the Washington side, Klickitat County, 16 percent; and Skamania County, 20.6 percent.

And no economic impact study? What kind of signal is this to send to Oregonians concerned about their livelihoods? I have said in the past that I thought taking jobs away from Oregonians in this manner is criminal. We are truly sentencing our children to go someplace else to find a job and to be able to make a living.

Some people are here today to represent special interest groups. I came here representing constituents who are unhappy about Federal controls.

Most are here today to vote for a bill they have never even seen.

I am here to represent Oregonians who have proven they can manage their lives and their lands quite well, thank you, without the Federal Government telling them how to do so.

If Congress continues to pass bills like this, if we continue to display a lack of confidence in the people we represent, we might as well consider giving up our own statehood. At this rate, Oregon is going to end up as a wholly owned piece of Federal property—a giant Federal land preserve.

Congress might as well consider moving the U.S. Capitol to the gorge * * * with passage of this bill we'll have two Districts of Columbia. Oregonians think one D.C. is more than enough.

What's more, Oregonians don't want this legislation. A survey conducted in my district this week revealed that by nearly two to one they oppose Federal oversight in the gorge. And I know that surveys in the gorge itself show even stronger opposition—by as much as 90 percent.

The people don't want Federal intervention. The country can't afford the price tag. And we shouldn't be taking away people's homes, jobs and futures * * * especially with this legislation which virtually no one in the House has had on opportunity to consider.

I urge you to oppose this effort.

Mr. AUCOIN. Mr. Chairman, will the gentleman yield?

Mr. DENNY SMITH. I yield to the gentleman from Oregon.

Mr. AUCOIN. Mr. Chairman, I listened to the gentleman say this legislation would destroy jobs in Oregon, and I assume he also meant in Washington. The gentleman knows that this bill is essentially and practically 99 percent the other body-passed bill.

So my question to the gentleman would be: Since Senator GORTON of Washington sponsored and supports this bill and since Senator PACKWOOD of Oregon supports this bill, is he saying to this body that those two Senators are endorsing a piece of legislation that destroys jobs in the region?

Mr. DENNY SMITH. Mr. Chairman, I would say to the gentleman that just because you serve in the other body does not make your instincts or your intellects or your knowledge any greater than any Member of the body here.

Mr. AUCOIN. I agree with the gentleman.

Mr. DENNY SMITH. I think that they have made a drastic error.

Mr. AUCOIN. So the gentleman is saying to his colleagues here that Senator GORTON and Senator PACKWOOD are, by their support of this legislation——

Mr. DENNY SMITH. I think the gentleman heard what I said. I said that I did not feel that they were necessarily right and that I was necessarily wrong.

I think what we are talking about here is that the more control we give to the Federal Government, no matter where it is, when we take lands, we are taking jobs.

I would point out to the gentleman that in his congressional district, where the timber swaps are going to take place, he is going to run out of cutting-circle timber, and I think it will cost jobs in his district, also.

Mr. WHITLEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 5705 was jointly referred to the Committee on Agriculture and the Committee on Interior and Insular Affairs.

This bill is the culmination of many years of work and has had consider-

able deliberation during this term of the Congress.

H.R. 5705 is a hybrid of a bill that was recently passed by the other body and one that was considered in the Subcommittee on Forests, Family Farms and Energy, the full Committee on Agriculture and the Committee on Interior and Insular Affairs.

The House bill, H.R. 5625, was reported by the Subcommittee on Forests, Family Farms and Energy on October 8. I might say, Mr. Chairman, that our subcommittee made a trip out to the gorge. We held a lengthy hearing out there and heard from some 80 public and private witnesses. We conducted a full markup of the bill in subcommittee and reported it to the full Committee on Agriculture.

We began a markup session in the full Committee on Agriculture, which was eventually interrupted as a result of repeated requests for quorum calls at a time when the House was busy.

That is the only reason, Mr. Chairman, that there was not complete consideration of this bill in the Committee on Agriculture. My own position is that I am like the politician who, asked where he stood on an issue, said, "Some of my friends are for it and some are against it, and I am for my friends."

Having been to the gorge, having heard the testimony, having discussed it with many Members, I have certainly come to the conclusion that this gorge is an extremely beautiful region of the Pacific Northwest, running between the States of Oregon and Washington.

I know this because we visited it and we heard from 80 witnesses. I am sure that the Members have already come to understand that this is a matter of considerable controversy. We are hearing and we will continue to hear from Members on both sides of the gorge.

My own opinion is that this is a very beautiful area; its scenic beauty ought to be maintained by the best means possible. There seems to be a consensus that this bill is probably the best management tool. I do not personally disagree with that consensus, although I defend strongly the right of all Members to be heard on this issue.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from North Carolina [Mr. WHITLEY] has consumed 3 minutes.

Mr. WEAVER. Mr. Chairman, I yield 5 minutes to the distinguished chairman of the Subcommittee on National Parks and Recreation, the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. Mr. Chairman, the Columbia River flows through the Cascade Mountains east of Portland, OR, forming the boundary between the States of Oregon and Washington. The Columbia River cut its way through the Cascade Range by eroding a 60 to 70 mile long, almost straight, gorge with sharply rising escarpments of up to 3,000 feet above a river that ranges from one-quarter mile to 1½ miles in width.

I've seen the gorge and I share the rapture that is expressed by those who are so fortunate as to live near such beauty. The Columbia River Gorge should be protected for its visual quality alone but it has many other values.

The gorge, in itself, is an extremely important geological feature. The nearly sea level course it has cut through the Cascade Range is the only major break in the Cascades between the Fraser River in British Columbia and the Klamath River in California.

The Cascade Range affects climate, flora and fauna in the region. The climate varies considerably from one end of the gorge to the other. The western end of the gorge has a mild, moist climate, while the eastern end has wide temperature ranges and approaches a semiarid condition. Rainfall at the western end of the gorge is about 75 inches diminishing to about 10 to 14 inches at the eastern end.

The complex geology and climatic conditions within the gorge has produced an equally complex plant community that differs significantly from the north wall—the Washington side—to the south wall—the Oregon side—as well as differing from one end of the gorge to the other and within the many small microclimes throughout the gorge. Eight hundred plant species are found in the gorge of which 58 are considered rare or endangered. There are nine species which are found only within the gorge. Thirty-one plant species that usually occur at elevations above 4,000 feet are found in the gorge almost always below 1,600 feet. These plants, which are limited to the steep bluffs and cool canyons characteristic of the south wall, are isolated from the main portion of their populations.

H.R. 5705, introduced by our colleague on the Interior and Insular Affairs Committee, JIM WEAVER, is the seventh and latest bill introduced in the House by Members of the Oregon or Washington delegations in an effort to find a compromise solution to the complex issues of protecting the Columbia River Gorge. Additional measures were introduced in the other body and S. 2055 passed October 7, 1986.

H.R. 5705 would establish the Columbia River Gorge National Scenic Area.

The bill would provide for complicated interagency, multilevel, governmental procedures to achieve the purposes of the bill. The bill states the purpose as preserving the scenic, recreational, historical, cultural, natural resources of the gorge; and to protect the economy and encourage future economic development. The scenic area is established generally between Washougal—Sandy River on the west to Wisham—Deschutes River on the east. The scenic area generally would have three classifications of land within its boundaries; special management areas, urban areas, and general scenic area lands.

The bill calls for a land use study to be completed and implemented by the local governing bodies with the proviso that any failure to act according to the plan would result in some form of enforcement action by the commission.

The commission would be established by the action of both States when they enact a bistate agreement which would incorporate this act into such agreement.

The agreement must be reached within 15 months of enactment. If this agreement is not reached the Secretary of Agriculture would have authority to review any direct or indirect Federal programs or actions, with certain exceptions, to assure that all Federal programs are consistent with the purposes of this act.

Mr. Chairman, other aspects of the bill will be discussed in some detail as we proceed today.

I wish to reiterate my support for protection for the Columbia River Gorge. However, I have very serious reservations about some of the provisions in this bill. Especially some language incorporated from the other body.

I have worked out some changes in language with the author of H.R. 5705 Mr. WEAVER, but even so, there are many provisions that I believe are real breaches to the long history of establishment of conservation units in the United States. As the chairman of the Subcommittee on National Parks and Recreation, my view is that this is a special bill—a hybrid measure to meet the very special needs—but mostly it is a bill of bits and pieces of compromise reflecting a concept to a greater degree than pragmatic problem solving in designation of a national conservation unit. As such, I wish all of my colleagues to understand that I do not consider this bill or any of its provisions to be a precedent for any future action to establish any similar national conservation unit.

Mr. Chairman, with these reservations, I support enactment of H.R. 5705.

□ 1530

Mr. MARLENEE. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. LAGOMARSINO]..

Mr. LAGOMARSINO. Mr. Chairman, I rise in strong opposition to the Columbia Gorge legislation, H.R. 5705, which we are considering today. This bill is severely flawed in many respects and this is too complex and too impor-

tant of an issue to be rushing through Congress at the last minute.

I can certainly appreciate the efforts of those who seek to protect the unique and beautiful resources of the gorge. But passage of this bill at this time in this form will not serve anyone's interests well but will, rather, result in an atmosphere of chaos and resentment toward the Federal Government, in addition to extensive litigation. Rather, this legislation should be considered in an orderly process next year in the park subcommittee which is chaired by the gentleman from Minnesota [Mr. VENTO]. He has shown he and his committee can carefully, fairly, and productively consider important and complex legislation.

In my view, there are many problems with this bill, both major and minor. In the first place, this bill was only introduced in the House yesterday. It is unlikely that many Members even know what is in it. It has consistently been rushed through the committees and now the full House without adequate opportunity for debate or amendments, even though the bill is 46 pages long.

Let me start by saying that I'm not convinced that a bill of this scope is necessary to protect the resources of the gorge. According to the testimony which we heard at the subcommittee hearings, only a few development projects had been proposed for this area over the last several years and almost all of them had been rejected.

Second, the severe restrictions on development embodied in this bill will most likely result in additional economic hardship for an area which already suffers from double-digit unemployment. There has never been the opportunity for an economic impact statement to determine exactly what the effects of this bill will be. However, it appears that the restrictions will result in the closure of logging operations and numerous local businesses.

The bill also provides for condemnation of the private lands in this area—some 130,000 acres. Many local residents who have lived there for generations will be forced off their land. In addition, thousands of acres of land will be removed from the local tax rolls creating financial hardships for the local governments. It is no wonder that over 90 percent of the local residents and nearly all of the local governments are opposed to this bill, along with over 90 local, regional, State and national agricultural, forestry, and civic associations, including the National Farm Bureau, The National Grange, and the National Association of Counties.

There are also numerous constitutional problems with this legislation which have not been resolved, particularly the requirement that the Secretary of Agriculture regulate private lands within the special management areas. This is clearly unconstitutional. The regulation of private lands is strictly a State and local responsibility and well it should be. However, should this bill pass, we are taking this right away from those who actually live on the land. This is a grave injustice. In addition, the U.S. Department of Justice has expressed serious reservations about several other provisions in this bill which will result in years of litigation and countless expense for the Federal Government. I would like to submit the Justice Department's views on this bill for the record.

The U.S. Department of Agriculture has also expressed grave concerns about this bill. I share their concerns, particularly regarding interim acquisition authority provided to the Secretary until the bi-State commission is formed. This could result in the Federal Government acquiring vast acreages of land if the States fail to act. There should definitely be a sunset provision in this bill, since the States have been reluctant to act on Columbia Gorge legislation in the past. To put the burden of protecting and managing the resources of this area on the Federal Government possibly forever is clearly inappropriate.

This bill is also very vague in many respects. For instance, many terms, such as "substantially changed" or "significantly affect" are not defined. Therefore, landowners and industries are unclear as to what they can and cannot do and how the bill will affect them. It seems only reasonable that they should be informed of this prior to passage of the bill.

Furthermore, passage of this bill would establish several serious precedents, including payments to local governments in addition to pilt and placing the Secretary of Agriculture in the business of constructing and operating conference centers.

Which brings me to my final point—expense. H.R. 5705 authorizes over $75 million in appropriations. We all know that this amount, which doesn't even consider the enormous cost of administering the area, would be increased in future years as more land acquisition, or other expenditures, are determined to be necessary. In these times of multibillion-dollar budget deficits, I strongly feel we should not be rushing such an expensive measure through Congress. I say this also because of the enormous backlog of authorized, but unfunded, land acquisitions which must seriously compete with each other for limited Federal dollars. Many of these projects have been authorized for several years, but the money has never been provided due to the intense competition with other projects. We cannot continue to authorize new Federal spending for areas such as this until we have taken care of the backlog for other projects.

Although this legislation is not beyond hope, particularly since it contains some good provisions including the ability for oil and gas companies to explore and develop the vast mineral resources in this area, this bill should not go forward at this time. It should be sent back to the committees where the problems can be worked out next year and a clean compromise bill passed. To approve this measure at this time would thwart the legislative process and result in years of litigation over the unconstitutional provisions in this bill.

Therefore, I ask my colleagues to let justice and fairness prevail. Please join with me in opposing H.R. 5705.

Mr. Chairman, I include the following correspondence:

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND
INTERGOVERNMENTAL AFFAIRS,
Washington, DC, October 14, 1986.

Hon. MORRIS K. UDALL,
Chairman, House Committee on Interior and Insular Affairs, Cannon House Office Building, Washington, DC.

DEAR CONGRESSMAN UDALL: This is in response to your request for this Department's comments on the amendment in the nature of a substitute to H.R. 3625. The bill would establish a national scenic area and provide a scheme for its management. The bill is designed to facilitate management through a Commission created out of a compact between Oregon and Washington. We take the opportunity to identify certain concerns raised by the language of the bill. We will reference where warranted, S. 2055, recently passed by the Senate.

1. Interim Injunctive Relief/Temporary Taking Concern.—Section 10(c)(1) purports to authorize federally requested temporary restraining orders or preliminary injunctions (upon exercising the authority to acquire land) to protect against interim uses which are likely to cause impacts adverse to the purposes for which the bill establishes the scenic area. The time limit on the interim restraint is ninety days. The Senate bill has a similar provision but has no time limit.

As a technical matter, the bases upon which the relief can be sought are broad. An injunction can be sought against actions "significantly affecting" scenic, cultural, recreation, and natural resources of the scenic area or otherwise inconsistent with the purposes for which the scenic area is established. Turning to those "purposes", Section 3 refers to the protection of scenic, cultural, recreation, and natural resources. It also refers to support of the "economy" of the Columbia River Gorge Area. These provisions offer any little limit to the grounds for which relief may be sought.

In effect, the interim injunctive relief of this section will restrict local property use by actions of federal officials. This gives rise to serious concerns of federal temporary taking liability where, for some reason, a complaint in condemnation is filed but the suit later withdrawn. Accordingly, we strongly urge the deletion of the provision. In addition, Section 10(c)(2) seems to provide an effective mechanism for the balancing of local interests and federal interests under the bill. For that reason as well, Section 10(c)(1) may be unnecessary. As a much less desirable alternative, retention of the

provision should at least be coupled with a time limitation, as in the House bill. In that respect, however, we would urge a much shorter period, such as 14 days, as ample "cooling off" time.

2. Citizen Suit Provisions and the Enforcement Scheme.—Generally, we oppose the inclusion of citizen suit provisions, such as those in Section 14(d) in legislation. This is particularly appropriate where, as here, alternative enforcement mechanisms are provided. See Section 14(c). The Attorney General may initiate civil action for an injunction or other appropriate order as may the Attorneys General of Washington and Oregon. We would recommend deleting the citizen suit provision.

Even where citizen suit provisions have been enacted, those provisions typically include "notice of intent to sue" terms. In this bill, the citizen suit provisions provide for no notice where the basis of the suit is that "a legal interest" of the plaintiff is immediately affected. The United States normally takes the position that "a legal interest" is required to have standing to litigate in the first instance; thus, if standing exists, there is in essence no notice requirement in this language. Thus, we would recommend deleting this notice exception if the citizen suit provision is not deleted.

3. Enforcement and Responsibilities.—As a preface, but one which leads to numerous other ambiguities in the bill, we note that the legislation appears to grant prior Congressional approval to a possible undefined future agreement by the states. The bill is so detailed in its requirements for that agreement that the roles of federal and local authority become confused. Thus, although Section 5(a)(1)(b) speaks of the Commission as exercising state authority, the bill leaves the lines of federal and state enforcement authority unclear.

Specifically, in Section 14(c) no distinction is made between the enforcement responsibilities of the Attorney General of the United States and those of the State Attorneys General. The actions taken by the Commission, a non-federal entity under the Act, seem to be enforcible by the federal government's attorney. Similarly, actions of the Secretary of Agriculture could be enforced by the State Attorneys General. Of course, federal responsibility should extend only to federal interests. The Senate bill provides a separation between the enforcement responsibilities that should be included in Section 14.

4. Penalty Provisions.—There is no provision for the use or fiscal status of collected penalties for violation of the Commission orders. Viewed on the basis of Section 5, the bill seems to contemplate that the power to collect the penalties is derived from state law. Otherwise, the penalty provision would be an impermissible delegation of the federal legislative contempt power or federal judicial sanction power to a non-federal entity.

5. Indeterminate Period of Secretarial "Interim" Responsibility.—As we now understand the bill, it does not specifically address the continued efficacy of the Secretarial "interim" responsibilities (Section 10) in the event the compact is not approved within one year. This failure to include a sunset provision may lead to a bill which originally contemplated the voluntary actions of the States becoming an indefinite regulatory land use program by the federal government.

6. Generally.—It is not unreasonable to view the Secretary's interim guidelines and his guidelines for "land use ordinances" (the latter developed in consultation with the Commission), Section 8(f), as substantially controlling the standards adopted by the Commission and eventually the local land use bodies. Thus, even apart from "taking" implications, fair argument exists that, under this legislation, the federal government is itself regulating both local bodies and local land use.

In sum, the bill raises serious risks of taking liability, although its injunctive provisions are more restrained than those of the Senate version. The bill also leaves troublesome ambiguity over the allocation of federal and state power in such areas as enforcement authority, an ambiguity which could, conceivably, reach as far as the Constitutional efficacy of the compact itself. We would be glad to discuss the bill further but are constrained to say that our concerns, which stem in large part from the bill's ambiguity over allocation of authority, are fundamental and serious enough to warrant consideration of a veto recommendation from this Department should the Congress pass the legislation.

The Office of Management and Budget has advised that there is no objection to submission of this report from the standpoint of the Administration's program.

Sincerely,

KEN BERGQUIST,
Acting Assistant Attorney General.

Mr. WHITLEY. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from Oregon [Mr. AUCOIN].

Mr. AUCOIN. Mr. Chairman, I appreciate the gentleman yielding this time to me.

I would tell my colleagues that this is landmark legislation. It is also compromise legislation. It deserves the active support of this body, whether Members be from the West, the Midwest, or from the East. It deserves support on both sides of the aisle.

H.R. 5705 comes as close as is possible to reaching a consensus among a wide range of interests. An overwhelming majority of us from the Northwest brings it to you today. It is the product of 6 years of negotiation.

In the debate in the rule it was stated, and I state it again, that this bill, this approach is supported by the four Senators from the two States that are directly affected and who represent the people there. It is supported unanimously by the Washington State House delegation, the people who are responsible for representing the people of that State. It is supported by three of the five members of the Oregon delegation who represent the people in the State of Oregon. It is supported by a Democratic Governor in Washington State and a Republican Governor in the State of Oregon. It is a bipartisan piece of legislation. There are only two dissenters in the entire Northwest delegation.

Mr. Chairman, this is an excellent piece of legislation. I urge the Members to support it. I also urge the Members in considering it to reflect on the fact that it was 181 years ago next week, that Lewis and Clark, in a mission conceived by President Thomas Jefferson, floated past the mouth of the Deschutes River and entered into what we now consider the Columbia River Gorge.

There those two explorers found, and Merriwether Lewis recorded in his journal, both the natural beauty, on the one hand, and the abundance of resources on the other that we seek to protect and to enhance today through this legislation.

It is not an easy task to reconcile those competing interests of resources and natural beauty. Sometimes I think that we have been debating how to best do it in the gorge ever since Lewis and Clark made their famous trip down the Columbia River.

But the compromise legislation that we now bring before you provides—and an overwhelming majority of the Representatives who have the duty to represent the people of these two States agree—provides a successful resolution of those issues.

The is not a wilderness bill. Nor does it create a national park. Rather it provides a means of protecting those most sensitive and important areas in the gorge and then it provides a means of encouraging appropriate economic activity to sustain opportunities for the residents of the area. The bill delineates where those economic opportunities should best take place and what places ought to be reserved for different uses, the protection of natural resources.

The bill creates three tiers of management to achieve those purposes, special management areas, urban areas—and in discussing urban areas, it exempts 13 population centers where more than half the area's residents currently reside. Finally, it calls for the creation of a bi-State commission.

You have got to have a bi-State commission because both States, Oregon and Washington, abut this magnificent river. Without a bi-State commission with a Federal role involved, all the interests involved are not going to be fully represented.

The CHAIRMAN. The time of the gentleman from Oregon has expired.

Mr. WHITLEY. Mr. Chairman, I yield 30 additional seconds to the gentleman from Oregon.

Mr. AUCOIN. Mr. Chairman, I appreciate the gentleman yielding this additional time.

I would conclude by saying that this three-tier management system has a very limited Federal role. It puts most of the decisionmaking at the local level. It encourages a sense of responsibility on all parties in striking that incredibly important balance between the husbanding of resources and the encouragement of economic growth. Nowhere in the country is it more important than in this area that Lewis

and Clark discovered 181 years ago next week.

The CHAIRMAN. The time of the gentleman from Oregon has again expired.

Mr. WEAVER. Mr. Chairman, I yield 30 additional seconds to the gentleman.

Mr. Chairman, will the gentleman yield?

Mr. AUCOIN. I am delighted to yield to the gentleman from Oregon.

Mr. WEAVER. Mr. Chairman, I want to say that the key role of moderation and consensus building was played by the gentleman in the well, my distinguished colleague from Oregon, Mr. AUCOIN. He took the middle approach, brought all the disparate elements together and eventually we coalesced around the approach that he and the gentleman from Washington [Mr. BONKER] sponsored.

I think we owe a great deal of thanks to the gentleman from Oregon [Mr. AUCOIN] for the bill we have here today.

Mr. AUCOIN. Mr. Chairman, I appreciate the gentleman's remarks. The gentleman is more than generous with his words. It is the handiwork of a good number of Members.

Mr. WEAVER. Mr. Chairman, I yield 4 minutes to the gentleman from Oregon [Mr. WYDEN].

I would like to say, about my distinguished colleague, that he also played an extremely critical role in bringing this bill here, in moderating and bringing it to a consensus, because he represents citizens who are in this scenic area.

Mr. WYDEN. Mr. Chairman, I thank the gentleman very much for his kind words.

Mr. Chairman, earlier I talked about how I believe this legislation is going to make the gorge a magnet for additional tourism in the Northwest, something we need very, very badly, at a time when we have had a lagging economy; but there is something I want to touch on now very briefly and that is that this bill contains a whole host of protective measures that respect the rights of the people who have chosen to make their homes in the gorge. It was the feeling of those of us who represent these gorge communities that in no way should there be an effort to turn the gorge into a museum piece. This area is a living piece and for many it is a place to live. The people of the gorge want a say in how their communities develop and grow. This legislation insures that they will have it.

The people who live and reside in the gorge do not want to see the gorge filled with horrors like purple condominiums or fluorescent fast food stands. This bill does not do that. What it does is preserve a balance. It preserves the gorge without suffocating it. It allows the gorge to be used for power and timber and jobs, but not to be abused in the process.

I think that this legislation insures that the communities all up and down the gorge are going to be the critical players in all land use decisions to be made in this scenic area.

As my colleagues have said, this bill really has been a 6-year study in the effort to negotiate and reconcile various kinds of approaches.

□ 1545

I am thankful to my colleagues for all their good work, and I will wrap up if I could, Mr. Chairman, with just a very brief colloquy with the floor manager for Oregon.

Mr. Chairman, it is my understanding that where possible the Columbia River Gorge Commission will consider all the existing land use plans as far as the local communities are concerned when developing land use designations. Is that the understanding of the floor manager?

Mr. WEAVER. Mr. Chairman, will the gentleman yield?

Mr. WYDEN. I yield to the gentleman from Oregon.

Mr. WEAVER. Yes, it is my understanding that the Commission should take existing land use designations into account as part of its consultations under section 6(e) of the act. The Commission should make every effort to coordinate its land use designations with existing local and State designations unless those designations conflict with the purposes and standards of the act.

Mr. WYDEN. And if it appears to a county that an existing land-use ordinance or plan is consistent with the management plan the Commission ultimately develops, may the county submit such an ordinance to the Commission under section 7 or 8 of the act?

Mr. WEAVER. Nothing would prevent a county from submitting an existing ordinance or plan. No good would be served by requiring the county to go through the formality of re-enacting an existing piece of law.

Mr. WYDEN. I note that the maps accompanying the bill include a tiny scale of the city of Troutdale, OR within the scenic area. Is it the gentleman's understanding that the commission should give due deference to the land use plans of the city of Troutdale?

Mr. WEAVER. So long as those plans remain consistent with the standards and purposes of this act, nothing should require the commission to put undue restraints on land use in that section of Troutdale. Where possible, the Commission should coordinate its land use designations with existing local plans.

Mr. WYDEN. I thank the gentleman. This issue is of great importance to a growing city in my area, Troutdale, and I thank the gentleman for his fine work.

Mr. MARLENEE. Mr. Chairman, I yield 3 minutes to my esteemed colleague, the gentleman from Washington [Mr. MORRISON].

Mr. MORRISON of Washington. I thank the gentleman from Montana for yielding time to me.

Mr. Chairman, the Columbia River Gorge, as you have heard it described, is truly a scenic wonderland. In fact, I have opined that if it had been in the Eastern United States, we would have turned it into a national park many many years ago.

The unique part of this particular legislation in front of us is that unlike many of the designated areas through the years where Forest Service boundaries have been modified to absorb the areas that there was a desire to protect, or national park boundaries have been expanded to do the same sort of thing, that is not the goal in this particular area. The goal is to work together between a variety of jurisdictions—State, local, and Federal—and preserve the scenic value of this particular area. I think that is a highly desirable goal.

I certainly have a number of constituents who are unhappy with the position that I am taking in supporting this measure, but I have reached the conclusion, after many years of very deliberative thought, that under the uncertainty created by the prospect of legislation, which has been introduced year in and year out, that the economy particularly on the Washington side of the Columbia River Gorge, is slowly dying.

That does not mean that you cave in to the pressure for a heavy Federal role; that is not true at all. It does mean that you do the best that you can under the circumstances, and prepare a bill with local control, as much local involvement as possible, and protect private property rights. This measure in front of us does both. As I have indicated earlier, I believe that a bill coming back to us early in this next session would in fact probably be under the jurisdiction of the National Park Service, and be much more restrictive than the measure in front of us.

I believe that there comes a time in the dance of legislation when you either sit on the sidelines or fill in your program, and I have sensed the growing consensus on the longstanding gorge issue. It comes primarily from the Senate, the other side of this Congress, with all of our Senators from the Northwest aggressively involved. My decisions have been under the circumstances to craft the best bill possible, to be part of the team, and I thank all those who have let me inside this measure address many of the concerns of my constituents.

I have also tried to help my good friend, the gentleman from Oregon [Mr. ROBERT F. SMITH] by supporting some of his amendments designed to enhance local control and protect private property rights, and I will do so when we get into the amendatory section of this bill.

We have together, between our two States, included an economic opportunity study and economic development funding, which it certainly is my intent should be broad and unrestricted as to its application as long as its use is consistent with the scenic protections necessary under this act. That is, it could be for commercial and industrial development as well as things related to attracting the tourist industry.

We also have included a State and local override of condemnation decisions by the Secretary of Agriculture, and I look forward to the final decision on this bill, because I think that Congress is going to approve it overwhelmingly.

I would like to mention some highlights of the legislation before us, with emphasis on the features related to local control.

Thirteen urban areas are excluded from scenic area management and all other provisions of the act, except for economic development grants under section 11.

Six members of the twelve-member Commission will be appointed by the governing bodies of the counties within the scenic area.

Citizen advisory committees must be established to provide maximum citizen participation in the development of the management plan.

The Commission can override the Secretary of Agriculture's determination that the management plan is inconsistent with the purposes of the act.

If a county fails to enact land ordinances required by the management plan, the Commission may adopt such ordinances. Should the county subsequently enact an ordinance, it will preempt the Commission ordinance, provided it is in compliance with the act.

A $5 million in economic development money is granted to each State for use in expanding the economic base of communities within the gorge.

Condemnation cannot be used to acquire single family residential homes, farmland, or grazing lands, or lands used for education, religious, or charitable purposes, so long as the existing character is not substantially changed. In all cases, condemnation is to be used only as a last resort.

A two-thirds majority of the bi-State Commission, or the Governor involved can override a condemnation decision in the scenic area.

Judicial review is provided for any final action or order of a county, the Commission or the Secretary for adversely affected parties.

Provides counties within the gorge that have implemented approved land use ordinances with greater flexibility in the use of payments received under the timber receipt program.

Requires Forest Service to make payments to counties with approved land use ordinances of 1 percent of fair market value of acquired lands for a period of 5 years from the date of acquisition.

TIMBER HARVEST IS ALLOWED

There are also several points I would like to clarify regarding this bill. The legislation is specifically designed to not only protect the unique beauty of the Columbia River Gorge, but also the interests of the more than 41,000 people who will be directly impacted by the Commission's management plan. Section 5 of the bill requires the Commission to form citizen advisory committees to ensure that residents have the opportunity to help shape the management plan to reflect their specific needs and minimize conflicts in the implementation of the plan.

I am also aware that the U.S. Department of Agriculture has issued regulations under the Uniform Relocation Assistance and Real Property Acquisition Policies Act that provide individuals whose lands are acquired by the Department with full reimbursement for the costs incurred in preparing their property for sale to the Government. I applaud the Department's effort in this area and fully expect that it will conduct any acquisition activities in the Gorge in compliance with those regulations and in a prompt and equitable manner.

There are many religious, cultural, archeological and burial sites, as well as fishing areas in the Columbia River Gorge that are important to the Indian people. Because the location of these sites is not generally known to the public, there is the potential that they may inadvertently be damaged or destroyed by development actions in the scenic area. This problem can most easily be avoided by providing actual notice to the Indian tribes of any proposed development actions in the scenic area. Section 5(e) of the bill provides for such notice not only to Indian tribes, but to the Secretary, the states, and local governments as well.

Finally, I would point out that the Department of the Army and the Department of the Interior have a long standing agreement with the Indian tribes to obtain "in lieu" fishing sites along the Columbia River to replace fishing sites that were flooded by construction of the Bonneville Dam. Many potential "in lieu" sites may also prove to be prime locations for recreation sites in the Columbia River Gorge. The cooperative recreation plan should acknowledge this potential conflict and an effort made to provide for them in the planning process.

The issue of how best to protect and preserve the Columbia River Gorge has been one that has remained unresolved for close to half a century. Today, we have the opportunity to enact legislation that will provide a fair and balanced resolution that will not only protect the character and beauty of the Gorge, but also the interests of those who have chosen to make the Gorge their home.

Mr. MARLENEE. Mr. Chairman, may I inquire how much time remains on each side?

The CHAIRMAN. The gentleman from Montana [Mr. MARLENEE] has 8 minutes remaining; the gentleman from North Carolina [Mr. WHITLEY] has 7½ minutes remaining; the gentleman from Oregon [Mr. ROBERT F. SMITH] has 3 minutes remaining; and the gentleman from Oregon [Mr. WEAVER] has no time remaining.

Mr. MARLENEE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, what kind of craziness are we considering here at the last hours of the 99th Congress? You might ask yourself, "Is this legislation pork barrel, pork barrel, pork barrel? Is it special interest?" Yesterday this Congress passed a continuing resolution that spent an unprecedented $576 billion. At that, we cut $110 million in training for unwed mothers; $150 million was cut from low-income energy assistance; $50 million for education of disadvantaged was cut; $130 million for vocational education was cut out of that continuing resolution, because we did not have the money; $440 million from the disadvantaged.

Now we are considering spending almost $100 million on a bill that is unneeded? And that is just for starters. What about the land acquisition costs? You cannot condemn land and take it away from people without reimbursement. One-third of the privately owned land is to be purchased or condemned—the Wall Street Journal estimates about 48,000 acres—and at what cost? $1,000 an acre? $2,000 an acre? $3,000 an acre? Estimates have been put easily in the $100 to $400 million cost range. The Justice Department estimates enormous costs on their part in litigation.

Shame, shame, shame. Every single congressman goes back to his constituency and says, "I'm going to cut spending. I'm cutting back." You are exhorted by your constituents to cut back on spending.

Yet every one of the Members who votes for this bill is in essence going to receive in my estimation a failing grade: a failure to cut spending, a failure to protect property rights, a failure to stop new programs, a failure to stop new spending.

Let us review: First, we have a bill before us that has not technically passed either committee of jurisdiction, a bill that was introduced at a midnight hour. The bill that we have right before us was introduced at a midnight hour this morning and given a rule this morning—a bill that encompasses, according to the Wall Street Journal, 510 square miles, only 20 percent of which is currently in Federal ownership.

Second, a bill opposed by over 90 regional, State, and national associations. Let me read to you what they are: the National Grange, the National Forestry and Civic Associations, the National Association of Counties, and

nearly every one of the gorge's 24 local government jurisdictions.

□ 1555

This is a bill that the Justice Department declares:

In sum, the bill raises serious risks of taking liability, although its injunctive provisions are more restrained than those of the Senate version. The bill also leaves troublesome ambiguity over the allocation of federal and state power in such areas as enforcement authority, an ambiguity which could, conceivably, reach as far as the Constitutional efficacy . . .

In other words, they are saying this bill probably is unconstitutional and that they will recommend a veto.

This is a bill that strips local people, 41,000 of them, of assured representation in zoning and control.

This is a bill that hurts agriculture, a bill that hurts jobs, and for what reason, when all of this could be done at the State level without Federal and taxpayer costs.

Vote against this pork-barrel legislation.

Mr. Chairman, I reserve the balance of my time.

Mr. WHITLEY. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Washington [Mr. BONKER].

Mr. BONKER. Mr. Chairman, a great deal of credit is in order because so many have been involved in this lengthy process which has brought the bill to us today. I would like to especially commend the subcommittee chairmen involved for their patience and diligence; they gave their undivided attention to seeing that everyone had their say. But I would also like to commend the gentleman from Oregon [Mr. WEAVER] who is the principal on this legislation. This is his last term in Congress, and he has committed himself fully to working with the various committees, since he serves on both, in order to shape a consensus that is acceptable to the body today.

Mr. Chairman, in 1915 the Secretary of the Interior identified the Columbia Gorge as the Nation's greatest water gap and an area of undeniable national significance. In the 70 years since then, the quickening pace of development has changed the face of the gorge and threatens to mar its breathtaking beauty forever. Today we have a historic opportunity to preserve the magnificent scenery of the Columbia River Gorge; an opportunity that may not present itself again for years to come.

As was noted in the debate on the rule, this legislation is the result of years of work and regional consensus. There is nothing new in this legislation. There are no new precedents, nothing unusual. This has been the result of diligent committee work to shape a bill that is consistent with national scenic area policy.

The Oregon and Washington congressional delegations and Governors of both States support the bill that is before us. A number of legislative drafts have developed over the years. Senator PACKWOOD was the first sponsor and then Senator HATFIELD, and Congressman AUCOIN and myself authored a proposal, as well as Congressman WEAVER. Congressman MORRISON has been intimately involved in all aspects of this legislation. It is remarkable that we have achieved the consensus, given the often conflicting concerns on both sides of the river, and yet what we have before us today is a proposal that enjoys that consensus. It is bipartisan, it is regional, and it is the sort of legislation we can proudly bring to the House floor.

The bill is a balance between national interests and preserving the spectacular scenery of the gorge, and the interests of local government and property owners.

Mr. Chairman, the legislation is supported by a number of prominent national environmental organizations. I will list just a few in a letter they signed to Members of Congress: The National Wildlife Federation, the Sierra Club, the National Audubon Society, the American Rivers Conservation Council, the National Parks and Conservation Association, and the Wilderness Society all strongly back the bill that is before us.

The other body has already passed a similar bill. I would like to commend the Northwest Senators' delegation for their efforts to develop Gorge legislation that is probably supportable.

The bill provides a 2-tiered management structure which puts the most critical lands in the Gorge under the direct authority of the Forest Service and establishes a 12-member bistate commission to manage most of the remaining lands in the proposed national scenic area. Even the Forest Service administered areas have checks and balances and a high degree of local participation in land management. The commission will develop the plan and the commission is composed of local residents in the counties involved. Indeed, the commission members, at least half of them, will be appointed by local county commissioners.

I think we owe a great debt to the gentleman from Washington [Mr. MORRISON] whose area is directly impacted by the bill. He diligently worked to make sure that the Federal involvement is minimal and that local participation is stronger, so that whatever plan emerges from the commission will be truly a product of local participation. I think that is a great credit to the gentleman from Washington [Mr. MORRISON].

In conclusion, Mr. Chairman, I would like to stress that this bill is necessary if we are to preserve the unique scenery of the Columbia Gorge. The States have called on Congress for this legislation. The area needs Federal protection.

As the session comes to a close this week, the Columbia River Gorge National Scenic Act will be the most significant environmental achievement in the 99th Congress. We have the opportunity this afternoon to preserve a magnificent river and its tributaries. Future generations will be grateful that we took this historic action today, and I urge my colleagues to support the bill.

Mr. MARLENEE. Mr. Chairman, I yield 1 minute to the gentleman from Colorado [Mr. STRANG].

Mr. STRANG. Mr. Chairman, I thank my colleague for yielding me this time.

Mr. Chairman, we are spending 3 hours on this issue which has slithered through the process here during the dark of night, a slimy travesty, a ripoff of the American taxpayer.

Where are the budget busters, $100 million on a bill that has not even had a fair hearing in Congress, where are the budget busters? This is the time to put up or shut up.

This is a local land use problem between the State of Washington and the State of Oregon, and the American taxpayer has no business being pulled in here to solve a local land use problem, particularly when it means stealing land from residents who do not want it stolen.

This is a slimy raid on the American taxpayer. I hope that my colleagues will have the guts to say what are we doing here, 3 hours on a bill that is ripping off the American taxpayers, the taxpayers in Minnesota, New York, Florida.

Let us get on with it, Mr. Speaker.

Mr. MARLENEE. Mr. Chairman, I reserve the balance of my time.

□ 1605

Mr. ROBERT F. SMITH. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, we have heard the exposure of the taxpayers of more than $100 million in this bill. We have heard that this is a compromise bill, but the problem is that the people who live in Hood River and Wasco Counties, the two counties that I represent that are impacted by this bill, are having difficulty finding where that compromise is, because they are taking the brunt of this legislation.

I suppose this is historic legislation. I think the last time in my memory this happened was at a time when the British Empire expanded their control over a colony, and we were so incensed by a government 3,000 miles away in England, taking our land, abusing the ability of those people who lived in this country of freedom and opportunity, that we became so incensed we

fought a war of independence over that.

I see very little difference for a government 3,000 miles away from the Columbia River Gorge taking Federal authority, taking over land by condemnation and using it for a Federal purpose.

It seems to me those follow carefully. I do not blame people for being upset with this kind of legislation in the area that I live. We have heard all the concerns and we have explained them to you; of justice, of agriculture.

Again let me say to those of you who are not familiar with Oregon we have a State land use program. We have a nonelected commission in Oregon; we are now asked to take a Federal nonelected commission, and implant it over the top of a State nonelected commission. That makes two commissions that are not elected and have really little to do with their recognition of individual and land rights.

Mr. MARLENEE. Mr. Chairman, will the gentleman yield?

Mr. ROBERT F. SMITH. I yield to the gentleman from Montana.

Mr. MARLENEE. Mr. Chairman, I would like to make the gentleman aware of a letter from the Office of the Assistant Attorney General, which I will include for the RECORD.

The complete text of the letter follows:

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,
Washington, DC, October 14, 1986.

Hon. MORRIS K. UDALL,
Chairman, House Committee on Interior and Insular Affairs, Cannon House Office Building, Washington, DC.

DEAR CONGRESSMAN UDALL: This is in response to your request for this Department's comments on the amendment in the nature of a substitute to H.R. 3625. The bill would establish a national scenic area and provide a scheme for its management. The bill is designed to facilitate management through a Commission created out of a compact between Oregon and Washington. We take the opportunity to identify certain concerns raised by the language of the bill. We will reference where warranted, S. 2055, recently passed by the Senate.

1. INTERIM INJUNCTIVE RELIEF/TEMPORARY TAKING CONCERN

Section 10(c)(1) purports to authorize federally requested temporary restraining orders or preliminary injunctions (upon exercising the authority to acquire land) to protect against interim uses which are likely to cause impacts adverse to the purposes for which the bill establishes the scenic area. The time limit on the interim restraint is ninety days. The Senate bill has a similar provision but has no time limit.

As a technical matter, the bases upon which the relief can be sought are broad. An injunction can be sought against actions "significantly affecting" scenic, cultural, recreation, and natural resources of the scenic area or otherwise inconsistent with the purposes for which the scenic area is established. Turning to those "purposes", Section 3 refers to the protection of scenic, cultural, recreation, and natural resources. It also refers to support of the "economy" of the Columbia River Gorge Area. These provisions offer any little limit to the grounds for which relief may be sought.

In effect, the interim injunctive relief of this section will restrict local property use by actions of federal officials. This gives rise to serious concerns of federal temporary taking liability where, for some reason, a complaint in condemnation is filed but the suit later withdrawn. Accordingly, we strongly urge the deletion of the provision. In addition, Section 10(c)(2) seems to provide an effective mechanism for the balancing of local interests and federal interests under the bill. For that reason as well, Section 10(c)(1) may be unnecessary. As a much less desirable alternative, retention of the provision should at least be coupled with a time limitation, as in the House bill. In that respect, however, we would urge a much shorter period, such as 14 days, as ample "cooling off" time.

2. CITIZEN SUIT PROVISIONS AND THE ENFORCEMENT SCHEME

Generally, we oppose the inclusion of citizen suit provisions, such as those in Section 14(d) in legislation. This is particularly appropriate where, as here, alternative enforcement mechanisms are provided. See Section 14(c). The Attorney General may initiate civil action for an injunction or other appropriate order as may the Attorneys General of Washington and Oregon. We would recommend deleting the citizen suit provision.

Even where citizen suit provisions have been enacted, those provisions typically include "notice of intent to sue" terms. In this bill, the citizen suit provisions provide for no notice where the basis of the suit is that "a legal interest" of the plaintiff is immediately affected. The United States normally takes the position that "a legal interest" is required to have standing to litigate in the first instance; thus, if standing exists, there is in essence no notice requirement in this language. Thus, we would recommend deleting this notice exception if the citizen suit provision is not deleted.

3. ENFORCEMENT AND RESPONSIBILITIES

As a preface, but one which leads to numerous other ambiguities in the bill, we note that the legislation appears to grant prior Congressional approval to a possible undefined future agreement by the states. The bill is so detailed in its requirements for that agreement that the roles of federal and local authority become confused. Thus, although Section 5(a)(1)(b) speaks of the Commission as exercising state authority, the bill leaves the lines of federal and state enforcement authority unclear.

Specifically, in Section 14(c) no distinction is made between the enforcement responsibilities of the Attorney General of the United States and those of the State Attorneys General. The actions taken by the Commission, a non-federal entity under the Act, seem to be enforcable by the federal government's attorney.

Similarly, actions of the Secretary of Agriculture could be enforced by the State Attorneys General. Of course, federal responsibility should extend only to federal interests. The Senate bill provides a separation between the enforcement responsibilities that should be included in Section 14.

4. PENALTY PROVISIONS

There is no provision for the use or fiscal status of collected penalties for violation of the Commission orders. Viewed on the basis of Section 5, the bill seems to contemplate that the power to collect the penalties is derived from state law. Otherwise, the penalty provision would be an impermissible delegation of the federal legislative contempt power or federal judicial sanction power to a non-federal entity.

5. INDETERMINATE PERIOD OF SECRETARIAL "INTERIM" RESPONSIBILITY

As we now understand the bill, it does not specifically address the continued efficacy of the Secretarial "interim" responsibilities (Section 10) in the event the compact is not approved within one year. This failure to include a sunset provision may lead to a bill which originally contemplated the voluntary actions of the States becoming an indefinite regulatory land use program by the federal government.

6. GENERALLY

It is not unreasonable to view the Secretary's interim guidelines and his guidelines for "land use ordinances" (the latter developed in consultation with the Commission), Section 8(f), as substantially controlling the standards adopted by the Commission and eventually the local land use bodies. Thus, even apart from "taking" implications, fair argument exists that, under this legislation, the federal government is itself regulating both local bodies and local land use.

In sum, the bill raises serious risks of taking liability, although its injunctive provisions are more restrained than those of the Senate version. The bill also leaves troublesome ambiguity over the allocation of federal and state power in such areas as enforcement authority, an ambiguity which could, conceivably, reach as far as the Constitutional efficacy of the compact itself. We would be glad to discuss the bill further but are constrained to say that our concerns, which stem in large part from the bill's ambiguity over allocation of authority, are fundamental and serious enough to warrant consideration of a veto recommendation from this Department should the Congress pass the legislation.

The Office of Management and Budget has advised that there is no objection to submission of this report from the standpoint of the Administration's program.

Sincerely,

KEN BERGQUIST,
Acting Assistant Attorney General.

Mr. ROBERT F. SMITH. Mr. Chairman, let me conclude by saying this is Federal land-use control. I believe in local control.

Mr. MARLENEE. Mr. Chairman, I have no further requests for time. I yield back the balance of my time.

Mr. WHITLEY. Mr. Chairman, just in closing, briefly I would say that I think this matter has been thoroughly debated, as a general proposition both in the debate on the rule and in the general debate on the rule itself. It is very apparent that there is considerable consensus although there is some disagreement.

The rule permits the gentleman from Oregon [Mr. SMITH] to offer three amendments. I urge all my colleagues to give careful consideration to those amendments; vote as you see fit, and then vote for the bill on final passage.

Mr. DICKS. Mr. Chairman, I would like to join my colleagues in support of this important

legislation, and would like to congratulate those who have worked so hard to see its final enactment.

This legislation has taken 6 long years to germinate, and the final product, I believe, will stand as a monument to our democratic process at work. This bill is the result of several official House and Senate hearings and extensive public workshops and meetings with interested parties. It has been carefully crafted to protect the scenic and natural values of the gorge, while preserving the rights of the thousands of people who live in the area.

The Columbia Gorge is located between the States of Oregon and Washington. It was formed over many thousands of years as the Columbia River cut through the Cascade Mountain Range. The beauty of this spectacular canyon is breathtaking, as the Columbia River moves silently toward the Pacific Ocean, guarded by the looming sentinel peaks of Mount St. Helens, Mount Adams, and Mount Hood.

Millions visit the gorge each year, drawn by its many scenic vistas, and the local highways and trails are heavily used by visitor and local resident alike. For centuries, the Columbia River has been a major center of commerce and trade, and thousands call the gorge area home and are dependent on the river for the continuation of their commercial activities.

This concurrence of natural beauty and commercial enterprise created many of the difficulties that have slowed passage of the legislation, as we attempted to strike a balance between local needs and Federal intervention. I believe this bill resolves these conflicts in a way that will stand as an example for other projects throughout the Nation. As economic and developmental pressures continue to threaten our important natural areas from coast to coast, it no doubt will become necessary for the Congress to devise and implement such new methods of providing strong and effective safeguards which will accommodate the many competing forces which are inherent in a modern society.

This legislation may mark the beginning of this new concept in natural resource protection because it represents a careful balance between little or no Federal protection for a scenically important area on the one hand, and wilderness or national park designation on the other. It serves as proof that, simply because a beautiful area such as the Columbia River Gorge is inhabited and its residents are involved in economic pursuits, that should not automatically exclude it from being considered worthy of strong resource protection. And, Mr. Chairman, I believe that the bill will show that both economic activity and natural resource protection can coexist harmoniously, with mutual benefits shared by both.

Every day we delay further, critical natural areas in the gorge face development and extinction, and the potential for protecting this national resource dims. For this reason, I strongly urge my colleagues to support the bill without amendment, and allow the process of protecting the Columbia River Gorge to begin at last.

Mr. WHITLEY. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time has expired.

Pursuant to House Resolution 596, the bill is considered as having been read for amendment under the 5-minute rule.

The text of H.R. 5705 is as follows:

H.R. 5705

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

This Act may be referred to as the "Columbia River Gorge National Scenic Area Act."

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
Sec. 2. Definitions.
Sec. 3. Purposes.
Sec. 4. Establishment of the Scenic Area.
Sec. 5. The Columbia River Gorge Commission.
Sec. 6. The Scenic Area Management Plan.
Sec. 7. Administration of the Scenic Area.
Sec. 8. Administration of the Special Management Areas.
Sec. 9. Land Acquisitions.
Sec. 10. Interim Management.
Sec. 11. Economic Development.
Sec. 12. Old Columbia River Highway.
Sec. 13. Tributary Rivers and Streams.
Sec. 14. Implementation Measures.
Sec. 15. Enforcement.
Sec. 16. Authorization of Appropriations.
Sec. 17. Savings Provisions.
Sec. 18. Severability.

SEC. 2. DEFINITIONS.

As used in this Act, the term—

(a) "adversely affect" or "adversely affecting" means, except as used in section 15, a reasonable likelihood of more than moderate adverse consequences for the scenic, cultural, recreation or natural resources of the Scenic Area, the determination of which is based on—

(1) the context of a proposed action;

(2) the intensity of a proposed action, including the magnitude and duration of an impact and the likelihood of its occurrence;

(3) the relationship between a proposed action and other similar actions which are individually insignificant but which may have cumulatively significant impacts; and

(4) proven mitigation measures which the proponent of an action will implement as part of the proposal to reduce otherwise significant affects to an insignificant level.

(b) "agricultural lands" means lands designated as agricultural lands pursuant to section 6 of this Act.

(c) "Commission" means the Columbia River Gorge Commission established pursuant to section 5 of this Act.

(d) "Counties" means Hood River, Multnomah, and Wasco Counties, Oregon; and Clark, Klickitat, and Skamania Counties, Washington.

(e) "Dodson/Warrendale Special Purchase Unit" means the Dodson/Warrendale Special Purchase Unit established pursuant to section 4 of this Act.

(f) "forest lands" means lands designated as forest lands pursuant to section 6 of this Act.

(g) "Indian tribes" means the Nez Perce Tribe, the Confederated Tribes and Bands of the Yakima Indian Nation, the Confederated Tribes of the Warm Springs of Oregon, and the Confederated Tribes of the Umatilla Indian Reservation.

(h) "interim guidelines" means any interim guidelines developed by the Secretary pursuant to section 10 of this Act, and any amendment, revision, or variance.

(i) "land use ordinance" or "ordinance" means any ordinance adopted by a county or by the Commission pursuant to this Act, and includes any amendment to, revision of, or variance from such ordinance.

(j) "major development actions" means any of the following:

(1) subdivisions, partitions and short plat proposals;

(2) Any permits for siting or construction outside urban areas of multifamily residential, industrial or commercial facilities, except such facilities as are included in the recreation assessment;

(3) the exploration, development and production of mineral resources unless such exploration, development or production can be conducted without disturbing the surface of any land within the boundaries of a special management area or is for sand, gravel and crushed rock used for the construction, maintenance or reconstruction of roads within the special management areas used for the production of forest products; and

(4) permits for siting or construction within a special management area of any residence or other related major structure on any parcel of land less than forty acres in size.

(k) "Management Plan" means the Scenic Area Management Plan adopted pursuant to section 6 of this Act.

(l) "Open Spaces" means unimproved lands not designated as agricultural lands or forest lands pursuant to section 6 of this Act and designated as open space pursuant to section 6 of this Act. Open spaces include—

(1) scenic, cultural, and historic areas;

(2) fish and wildlife habitat;

(3) lands which support plant species that are endemic to the Scenic Area or which are listed as rare, threatened or endangered species pursuant to State or Federal Endangered Species Acts;

(4) ecologically and scientifically significant natural areas;

(5) outstanding scenic views and sites;

(6) water areas and wetlands;

(7) archaeological sites, Indian burial grounds and village sites, historic trails and roads and other areas which are culturally or historically significant;

(8) potential and existing recreation resources; and

(9) Federal and State wild, scenic, and recreation waterways.

(m) "recreation assessment" means the recreation assessment adopted pursuant to section 6 of this Act.

(n) "residential development" means the permitting for siting or construction of any residence or other related major structure.

(o) "Scenic Area" means the Columbia River Gorge National Scenic Area established pursuant to section 4 of this Act.

(p) "Secretary" means the Secretary of Agriculture.

(q) "Special Management Areas" means areas within the Scenic Area established pursuant to section 4 of this Act.

(r) "States" means the States of Oregon and Washington.

(s) "Urban Areas" means those areas within the Scenic Area identified as urban areas on the map referred to in section 4(e) of this Act or within the boundaries of an Urban Area as revised pursuant to section 4(f).

SEC. 3. PURPOSES.

The purposes of this Act are—

(A) to establish a national scenic area to protect and enhance the scenic, cultural, recreational and natural resources of the Columbia River Gorge; and

(B) to protect and enhance the economy of the Columbia River Gorge by recognizing compatible historic economic pursuits such as agriculture and forestry and by encouraging future economic development to occur in existing urban areas.

SEC. 4. ESTABLISHMENT OF THE SCENIC AREA.

(a) NATIONAL SCENIC AREA.—(1) There is hereby established the Columbia River Gorge National Scenic Area.

(2) The boundaries of the Scenic Area shall be generally depicted on the map entitled "Boundary Map, Columbia River Gorge National Scenic Area," numbered NSA-001 sheets 1 and 2, and dated September 1986, which shall be on file and available for public inspection in the offices of the Commission and of the Chief, Forest Service.

(b) SPECIAL MANAGEMENT AREAS.—(1) The following areas within the boundaries of the Scenic Area are hereby designated "Special Management Areas"; Gates of the Columbia River Gorge; Wind Mountain; Burdoin Mountain; and Rowena.

(2) The boundaries of the Special Management Areas designated in this section—

(A) shall be generally depicted on the map entitled "Special Management Areas, Columbia River Gorge National Scenic Area", numbered SMA-002 sheets 1 through 17, and dated September 1986, which shall be on file and available for public inspection in the offices of the Commission and of the Chief, Forest Service; and

(B) shall include all islands within the boundaries of the Scenic Area.

(c) REVISION OF SPECIAL MANAGEMENT AREA BOUNDARIES.—The Secretary, in consultation with the Commission, may make minor revisions in the boundaries of Special Management Areas after publication of notice to that effect in the Federal Register and submission of notice thereof to the Committee on Energy and Natural Resources of the United States Senate and the Committees on Agriculture and Interior and Insular Affairs of the United States House of Representatives. Such notice shall be published and submitted at least sixty days before the revision is made. Notice of final action regarding such revision shall also be published in the Federal Register.

(d) DODSON/WARRENDALE SPECIAL PURCHASE UNIT.—(1) There is hereby established the Dodson/Warrendale Special Purchase Unit.

(2) The boundaries of the Dodson/Warrendale Special Purchase Unit shall be generally depicted on the map entitled "Dodson/Warrendale Special Purchase Unit, Columbia River Gorge National Scenic Area", numbered SPU-003 sheet 1, and dated September 1986, which shall be on file and available for public inspection in the offices of the Commission and of the Chief, Forest Service.

(e) URBAN AREAS.—(1) The following cities and towns are hereby designated as "Urban Areas": Cascade Locks, Hood River, Mosier, and The Dalles, Oregon; and Bingen, Carson, Dallesport, Home Valley, Lyle, North Bonneville, Stevenson, White Salmon, and Wishram, Washington.

(2) The boundaries of Urban Areas shall be generally depicted on the map entitled, "Urban Areas, Columbia River Gorge National Scenic Area", numbered UA-004 sheets 1 through 11, and dated September 1986, which shall be on file and available for public inspection in the offices of the Commission and of the Chief, Forest Service. The boundaries of Urban Areas designated in this subsection may be revised pursuant to the provisions of this section.

(f) REVISION OF URBAN AREA BOUNDARIES.—(1) Upon application of a county and in consultation with the Secretary, the Commission may make minor revisions to the boundaries of any Urban Area identified in subsection 4(e) of this section. A majority vote of two-thirds of the members of the Commission, including a majority of the members appointed from each State, shall be required to approve any revision of Urban Area boundaries.

(2) The Commission may revise the boundaries of an Urban Area only if it finds that—

(A) a demonstrable need exists to accommodate long-range urban population growth requirements or economic needs consistent with the management plan;

(B) revision of Urban Area boundaries would be consistent with the standards established in section 6 and the purposes of this Act;

(C) revision of Urban Area boundaries would result in maximum efficiency of land uses within and on the fringe of existing Urban Areas; and

(D) revision of Urban Area boundaries would not result in the significant reduction of agricultural lands, forest lands, or open spaces.

SEC. 5. THE COLUMBIA RIVER GORGE COMMISSION

(a) ESTABLISHMENT AND MEMBERSHIP OF THE COMMISSION.—(1) To achieve the purposes of this Act and to facilitate cooperation among the States of Oregon and Washington, and with the United States of America, the consent of Congress is given for an agreement described in this Act pursuant to which, within one year after the date of enactment of this Act—

(A) The States of Oregon and Washington shall establish by way of an interstate agreement a regional agency known as the Columbia River Gorge Commission, and shall incorporate this Act by specific reference in such agreement. The Commission shall carry out its functions and responsibilities in accordance with the provisions of the interstate agreement and of this Act and shall not be considered an agency or instrumentality of the United States for the purpose of any Federal law;

(B) The States of Oregon and Washington shall provide to the Commission and the counties under State law the authority to carry out their respective functions and responsibilities in accordance with the provisions of paragraph (1) (A) of this subsection.

(C) The States of Oregon and Washington shall appoint members of the Commission as provided in clauses (i) through (iii), subject to applicable State law: *Provided*, That the Governor of either State may extend the time for appointment of Commission members ninety days to provide more time for the States and counties to make such appointments. Membership of the Commission shall be as follows:

(i) Six members, comprised of one resident from each of the following counties: Hood River, Multnomah, and Wasco Counties, Oregon, and Clark, Klickitat, and Skamania Counties, Washington, to be appointed by the governing body of each of the respective counties: *Provided*, That in the event the governing body of a county fails to make such appointment, the Governor of the State in which the county is located shall appoint such member;

(ii) Three members who reside in the State of Oregon, to be appointed by the Governor of Oregon;

(iii) Three members who reside in the State of Washington, to be appointed by the Governor of Washington; and

(iv) One ex officio, nonvoting member who shall be an employee of the Forest Service, to be appointed by the Secretary.

(2) The agreement shall take effect and the Commission may exercise its authorities pursuant to the agreement upon the appointment of four initial members from each State, subject to applicable State law, and the date of such an agreement shall be the date of establishment of the Commission. Such agreement is hereby consented to by the Congress.

(3) Either State or any county may fill any vacancy occurring prior to the expiration of the term of any member originally appointed by that State or county. Each member appointed to the Commission shall serve a term of four years, except that, with respect to members initially appointed pursuant to paragraph (1)(C)(i), each Governor shall designate one member to serve for a term of five years and one to serve for a term of six years, and one member from each State initially appointed pursuant to paragraph (1)(C) (ii) and (iii) shall be designated by the Governor to serve a term of five years, and one to serve a term of six years. Neither the Governors nor the governing bodies of any of the counties may appoint Federal, State, or local elected or appointed officials to the Commission.

(4) A majority of the members of the Commission shall constitute a quorum. The members of the Commission shall select from among themselves a Chairman by majority vote of the members appointed from each State.

(5) Except for the ex-officio member appointed pursuant to paragraph (1)(C)(iv), the members and officers and employees of the Commission shall not be officers or employees of the United States for any purpose. The Commission shall appoint, fix compensation for, and assign and delegate duties to such officers and employees as the Commission deems necessary to fulfill its functions under this Act. The compensation of Commission members shall be fixed by State law. The compensation of Commission members, officers, and employees and the expenses of the Commission shall be paid from funds provided to the Commission by the States.

(b) APPLICABLE LAW.—For the purposes of providing a uniform system of laws, which, in addition to this Act, are applicable to the Commission, the Commission shall adopt regulations relating to administrative procedure, the making of contracts, conflicts-of-interest, financial disclosure, open meetings of the Commission, advisory committees, and disclosure of information consistent with the more restrictive statutory provisions of either State. Regulations applicable to financial disclosure under this subsection shall be applied to members of the Commission without regard to the duration of their service on the Commission or the amount of compensation received for such service. No contract, obligation, or other action of the Commission shall be an obligation of the United States or an obligation secured by the full faith and credit of the United States.

(c) ASSISTANCE TO THE COMMISSION.—Upon the request of the Commission, the Secretary and other Federal agencies are authorized to provide information, personnel,

property, and services on a reimbursable basis, and the Secretary is authorized to provide technical assistance on a nonreimbursable basis, to the Commission to assist it in carrying out its functions and responsibilities pursuant to this Act.

(d) ADVISORY COMMITTEES.—The Commission shall establish voluntary technical and citizen advisory committees to assist the Commission in carrying out its functions and responsibilities pursuant to this Act.

SEC. 6. THE SCENIC AREA MANAGEMENT PLAN.

(a) STUDIES.—Within one year after the date the Commission is established, it shall, in cooperation with the Secretary, complete the following studies for use in preparing the management plan:

(1) RESOURCE INVENTORY.—The Commission shall complete a resource inventory. The resource inventory shall—

(A) document all existing land uses, natural features and limitations, scenic, natural, cultural, archaeological and recreation and economic resources and activities: *Provided*, That the location of any Indian burial grounds, village sites, and other areas of archaeological or religious significance shall not be made public information and such information shall be used for administrative purposes only; and

(B) incorporate without change the resource inventory developed by the Secretary pursuant to section 8 of this Act for the Special Management Areas.

(2) ECONOMIC OPPORTUNITY STUDY.—The Commission shall complete a study to identify opportunities to enhance the economies of communities in the Scenic Area in a manner consistent with the purposes of this Act.

(3) RECREATION ASSESSMENT.—The Commission shall complete an assessment of recreation resources and opportunities for enhancement of these resources. The recreation assessment shall—

(A) designate the location and specify the construction of an interpretive center or other appropriate facility, to be located in the State of Oregon, and of a conference center or other appropriate facility, to be located in the State of Washington;

(B) identify areas within the scenic area that are suitable for other public use facilities, including but not limited to educational and interpretive facilities, campsites, picnic areas, boat launch facilities and river access areas; and

(C) subject to the treaty and other rights of Indian tribes, designate areas to provide increased access for recreation purposes to the Columbia River and its tributaries; and

(D) incorporate without change the recreation assessment developed by the Secretary pursuant to section 8 of this Act for the Special Management Areas;

(b) LAND USE DESIGNATIONS.—Within two years after the Commission is established, it shall develop land use designations for the use of non-Federal lands within the Scenic Area. The land use designations shall—

(1) be based on the results of the resource inventory developed pursuant to subsection (a)(1) of this section, and consistent with the standards established in subsection (d) of this section;

(2) designate those lands used or suitable for the production of crops, fruits or other agricultural products or the sustenance of livestock as agricultural lands;

(3) designate lands used or suitable for the production of forest products as forest lands;

(4) designate lands suitable for the protection and enhancement of open spaces;

(5) designate areas in the Scenic Area outside Special Management Areas used or suitable for commercial development: *Provided*, That such designation shall encourage, but not require, commercial development to take place in Urban Areas and shall take into account the physical characteristics of the areas in question and their geographic proximity to transportation, commercial, and industrial facilities and other amenities;

(6) designate areas used or suitable for residential development, taking into account the physical characteristics of the areas in question and their geographic proximity to transportation and commercial facilities and other amenities; and

(7) incorporate without change the designation of Urban Areas established in section 4(e) of this Act.

(c) ADOPTION OF THE MANAGEMENT PLAN.—Within three years after the date the Commission is established, it shall adopt a management plan for the Scenic Area. The Commission shall adopt the management plan by a majority vote of the members appointed, including at least three members from each State. The management plan shall—

(1) be based on the results of the resource inventory developed pursuant to subsection (a)(1) of this section;

(2) include land use designations developed pursuant to subsection (b) of this section;

(3) be consistent with the standards established in subsection (d) of this section;

(4) incorporate without change the management direction for the use of Federal lands within and the land use designations for the special management areas adopted by the Secretary pursuant to section 8 of this Act; and

(5) include guidelines for the adoption of land use ordinances for lands within the Scenic Area. The guidelines—

(A) shall incorporate without change the guidelines for the development of Special Management Area land use ordinances developed by the Secretary pursuant to section 8 of this Act; and

(B) shall not apply to Urban Areas designated in section 4(e) of this Act.

(d) STANDARDS FOR THE MANAGEMENT PLAN.—The management plan and all land use ordinances and interim guidelines adopted pursuant to this Act shall include provisions to—

(1) protect and enhance agricultural lands for agricultural uses and to allow, but not require, conversion of agricultural lands to open space, recreation development or forest lands;

(2) protect and enhance forest lands for forest uses and to allow, but not require, conversion of forest lands to agricultural lands, recreation development or open spaces;

(3) protect and enhance open spaces;

(4) protect and enhance public and private recreation resources and educational and interpretive facilities and opportunities, in accordance with the recreation assessment adopted pursuant to subsection (a) of this section;

(5) prohibit major development actions in Special Management Areas, except for partitions or short plats which the Secretary determines are desirable to facilitate land acquisitions pursuant to this Act;

(6) prohibit industrial development in the Scenic Area outside Urban Areas;

(7) require that commercial development outside Urban Areas take place without adversely affecting the scenic, cultural, recreation, or natural resources of the Scenic Area;

(8) require that residential development outside Urban Areas take place without adversely affecting the scenic, cultural, recreation, and natural resources of the Scenic Area; and

(9) require that the exploration, development and production of mineral resources, and the reclamation of lands thereafter, take place without adversely affecting the scenic, cultural, recreation and natural resources of the Scenic Area.

(e) AGENCY CONSULTATION AND PUBLIC INVOLVEMENT.—The Secretary and the Commission shall exercise their responsibilities pursuant to this Act in consultation with Federal, State, and local governments having jurisdiction within the Scenic Area or expertise pertaining to its administration and with Indian tribes. The Secretary and the Commission shall conduct public hearings and solicit public comment prior to final adoption of the management plan and the Commission shall conduct public hearings and solicit public comment prior to final adoption of land use ordinances. The Commission and the appropriate county shall promptly notify the Secretary, the States, local governments and Indian tribes of all proposed major development actions and residential development in the Scenic Area.

(f) CONCURRENCE OF THE MANAGEMENT PLAN.—

(1) REVIEW BY THE SECRETARY.—Upon adoption of the management plan, the Commission shall promptly submit the plan to the Secretary for review. If the Secretary agrees with the Commission that the management plan is consistent with the standards established in this section and the purposes of this Act, the Secretary shall concur to that effect. Should the Secretary fail to act on the proposed plan within ninety days, the Secretary shall be deemed to have concurred on the management plan.

(2) DENIAL OF CONCURRENCE.—If concurrence is denied, the Secretary shall state the reasons for finding the plan is inconsistent with the standards established in this section or the purposes of this Act, and shall submit to the Commission suggested modifications to the management plan to make it consistent with such standards and the purposes of this Act.

(3) COMMISSION RECONSIDERATION.—Within one hundred and twenty days after receipt of notification of non-concurrence, The Commission shall—

(A) revise and resubmit the plan to the Secretary; or

(B) by a vote of two-thirds of its membership, including a majority of the members appointed from each State, reject the suggested modifications of the Secretary and adopt a management plan consistent with the provisions of this section and the purposes of this Act.

(g) REVISION OF THE PLAN.—No sooner than five years after adoption of the management plan, but at least every ten years, the Commission shall review the management plan to determine whether it should be revised. The Commission shall submit any revised management plan to the Secretary for review and concurrence, in accordance with the provisions of this section for adoption of the management plan.

(h) AMENDMENT OF THE PLAN.—If the Commission determines at any time that conditions within the Scenic Area have significantly changed, it may amend the management plan. The Commission shall submit

amendments to the management plan to the Secretary for review, in accordance with the provisions of this section for adoption of the management plan.

SEC. 7. ADMINISTRATION OF THE SCENIC AREA.

(a) MANAGEMENT OF THE SCENIC AREA.—The non-Federal lands within the Scenic Area shall be administered by the Commission in accordance with the management plan and this Act.

(b) ADOPTION OF SCENIC AREA LAND USE ORDINANCES.—

(1) Within sixty days of initial receipt of the management plan, each county shall submit to the Commission a letter stating that it proposes to adopt a land use ordinance consistent with the management plan. If any county fails to submit such letter or fails to adopt a land use ordinance as provided in this section, the Commission shall carry out the requirements of subsection (c) of this section.

(2) Within two hundred and seventy days of receipt of the management plan, each county shall adopt a land use ordinance consistent with the management plan, and thereafter may adopt an amendment, revision or variance to a land use ordinance at any time. Each county upon adoption of a land use ordinance shall promptly submit the ordinance to the Commission.

(3) APPROVAL BY COMMISSION.—(A) Within ninety days after receipt of a land use ordinance, the Commission, by majority vote including at least three members from each State, shall approve the ordinance unless it determines the ordinance is inconsistent with the management plan. Should the Commission fail to act within ninety days, the ordinance shall be deemed to be approved.

(B) If approval is denied, the Commission shall state the reasons for finding the ordinance is inconsistent with the management plan, and shall submit to the county suggested modifications to the ordinance to make it consistent with the management plan.

(C) Each county shall have ninety days after it receives recommendations from the Commission to make modifications designed to eliminate the inconsistencies and to resubmit the ordinance to the Commission for approval. The Commission shall have sixty days to approve or disapprove the resubmitted ordinance. Any resubmitted ordinance shall become effective upon approval. Should the Commission disapprove the resubmitted ordinance, it shall promptly resubmit the ordinance for reconsideration. Should the Commission fail to act within sixty days, the ordinance shall be deemed to be approved.

(c) COMMISSION LAND USE ORDINANCES.—(1) Within ninety days after making a determination that a county has failed to comply with the provisions of this section, the Commission shall make and publish a land use ordinance setting standards for the use of non-Federal lands in such county within the boundaries of the National Scenic Area, excluding Urban Areas identified in section 4(e) of this Act. The ordinance shall have the object of assuring that the use of such non-Federal lands is consistent with the management plan. The ordinance may differ amongst the several parcels of land within the boundaries of the Scenic Area. The ordinance may from time to time be amended by the Commission.

(2) SUBSEQUENT COMPLIANCE.—In the event the Commission has promulgated regulations pursuant to this section, a county may thereafter upon written notice to the Commission elect to adopt a land use ordinance, in which event it shall comply with the provisions of this section for adoption of a land use ordinance. Upon approval of a land use ordinance by the Commission it shall supersede any regulations for the county developed by the Commission, subject to valid existing rights.

(d) CONSTRUCTION OF FACILITIES.—The Secretary is hereby authorized to design, construct, operate and maintain such facilities as are included in the recreation assessment.

SEC. 8. ADMINISTRATION OF THE SPECIAL MANAGEMENT AREAS.

(a) ADMINISTRATION OF FEDERAL LANDS.—(1) The Secretary shall administer Federal lands within the Special Management Areas in accordance with this Act and other laws, rules and regulations applicable to the national forest system. In addition, the construction of roads and the management, utilization and harvest of timber on Federal lands within the Special Management Areas also shall be subject to Forest Service visual resource management guidelines. The Secretary shall utilize lands acquired through exchange in calculating the allowable sales quantity on the Gifford Pinchot and Mount Hood National Forests.

(b) WITHDRAWAL OF FEDERAL LANDS.—Subject to valid existing rights, all Federal lands located in the Special Management Areas are hereby withdrawn from all forms of entry appropriation, or disposal under the public land laws, from location, entry, and patent under the mining laws of the United States, and from disposition under all laws pertaining to mineral and geothermal leasing: *Provided,* That the Secretary may allow the exploration, development, or production of sand, gravel, and crushed rock as necessary to construct, maintain, or reconstruct roads in the Special Management Areas.

(c) RESOURCE INVENTORY.—The Secretary shall complete a resource inventory for the special management areas consistent with the process and substance of the inventory prescribed by section 6(a)(1) of this Act.

(d) RECREATION ASSESSMENT.—Within two years after the date of enactment of this Act, the Secretary shall complete an assessment of recreation resources in the Special Management Areas and opportunities for enhancement of these resources. The recreation assessment shall—

(1) identify areas within the Special Management Areas suitable for designation by the Commission pursuant to section 6 of this Act for the construction of an interpretive center or other appropriate facility, to be located in the State of Oregon, and of a conference center or other appropriate facility, to be located in the State of Washington;

(2) identify areas within the Special Management Areas suitable for other public use facilities, including but not limited to educational and interpretive facilities, campsites, picnic areas, boat launch facilities and river access areas; and

(3) subject to the treaty or other rights of Indian tribes, identify areas with the Special Management Areas suitable for use to increase access for recreation purposes to the Columbia River and its tributaries.

(e) LAND USE DESIGNATIONS.—Within three years after the date of enactment of this Act, the Secretary shall develop land use designations for the Special Management Areas. The land use designations shall be—

(1) based on the resource inventory prepared by the Secretary pursuant to this section; and

(2) consistent with the standards established in section 6 of this Act.

(f) *Guidelines for Land Use Ordinances.*—(1) Within three years after the date of enactment of this Act, the Secretary shall, in consultation with the Commission, develop guidelines to assure that non-Federal lands within the Special Management Areas are managed consistent with the standards in section 6 and the purposes of this Act. The Secretary shall promptly transmit the guidelines to the Commission for inclusion in the management plan. The guidelines shall require that management, utilization, and disposal of timber, and exploration, development, and production of sand, gravel, and crushed rock for the construction, maintenance, or reconstruction of roads used to manage or harvest forest products on non-Federal lands within the special management areas take place without adversely affecting the scenic, cultural, recreation, and natural resources of the Scenic Area.

(h) *Adoption of Special Management Area Land Use Ordinances.*—(1) Within sixty days of receipt of the management plan, each county shall submit to the Commission a letter stating that it proposes to adopt a land use ordinance consistent with the management plan. If any county fails to submit a letter as provided in this subsection, or fails to adopt a land use ordinance as provided in this section, the Commission shall carry out the requirements of subsection (l) of this section.

(2) Within two hundred seventy days of receipt of the management plan, each county shall adopt a special management area land use ordinance consistent with the management plan, and thereafter may adopt an amendment, revision or variance to a land use ordinance at any time. Each county upon adoption of a special management area land use ordinance shall promptly submit the adopted ordinance to the Commission.

(i) *Review by the Commission.*—(1) The Commission shall review the Special Management Area land use ordinance received from each county, and within ninety days after receipt shall make a tentative determination as to whether the ordinance is consistent with the management plan. If the Commission makes a tentative determination that the land use ordinance is consistent with the management plan, the Commission shall send the ordinance to the Secretary for concurrence.

(2) If the Commission makes a tentative determination that the land use ordinance is inconsistent with the management plan, the Commission shall state the reasons for the determination and shall return the ordinance to the appropriate county with suggested modifications required for consistency with the management plan.

(3) Each county shall have ninety days after it is notified by the Commission to make modifications designed to eliminate the inconsistencies and to resubmit the ordinance to the Commission for tentative determination of consistency. The Commission shall have sixty days to make a tentative consistency determination on the resubmitted ordinance. If found consistent, the land use ordinance shall be transmitted by the Commission to the Secretary for concurrence that the ordinance is consistent with the management plan. If the Commission finds the resubmitted ordinance inconsist-

ent, the Commission shall adopt an ordinance pursuant to subsection (l) of this section.

(j) CONCURRENCE BY THE SECRETARY.—(1) Upon receipt of a Special Management Area land use ordinance from the Commission, the Secretary shall notify the public of such receipt and shall, within ninety days thereafter, concur with the Commission's tentative determination of consistency with the management plan unless the Secretary determines the ordinance is inconsistent. Any ordinance submitted to the Secretary shall become effective upon notification of concurrence. Should the Secretary fail to act within ninety days, the Secretary shall be deemed to have concurred with the Commission's tentative consistency determination.

(2) DENIAL OF CONCURRENCE.—If concurrence is denied, the Secretary shall state the reasons therefor and shall submit to the Commission suggested modifications to the land use ordinances to make them consistent with the management plan and the purposes of this Act.

(k) COMMISSION RECONSIDERATION.—Upon receipt of notification of nonconcurrence by the Secretary, the Commission shall resubmit the land use ordinances to the appropriate county. Such county shall, within ninety days, reconsider and revise the ordinance and resubmit the ordinance to the Commission for reconsideration in accordance with the provisions of this section. Should the Secretary again deny concurrence, the Commission shall either prepare a land use ordinance for such county pursuant to subsection (l) of this section or, by a two-thirds vote of the membership of the Commission including a majority of the members appointed from each State, determine that the ordinance is consistent with the management plan.

(l) COMMISSION ORDINANCES.—(1) Within ninety days after making a determination that a county has failed to comply with the provisions of subsection (h) of this section, the Commission shall make and publish an ordinance setting standards for the use of non-Federal lands of such county within the boundaries of the Special Management Areas. The ordinances shall have the object of assuring that the use of such lands is consistent with the management plan. The ordinances may differ amongst the several parcels of land within the boundaries of the Special Management Areas. The ordinances may from time to time be amended by the Commission.

(2) The Commission shall promptly submit the ordinance to the Secretary. The Secretary shall, within ninety days after receipt of the ordinance from the Commission, concur with the tentative determination that the land use ordinance is consistent with the management plan unless a determination of inconsistency is made. Any ordinance submitted to the Secretary shall become effective upon concurrence. Should the Secretary fail to concur within ninety days, the land use ordinance shall be effective.

(3) If concurrence is denied, the Secretary shall state the reasons for finding the ordinance is inconsistent with the management plan, and shall submit to the Commission suggested modifications to the ordinance to make it consistent with the plan.

(4) The Commission shall have ninety days after it receives recommendations from the Secretary to make modifications designed to eliminate the inconsistencies and to resubmit the ordinance to the Secretary for concurrence. The Secretary shall have sixty days to concur with the resubmitted ordinance. Any resubmitted ordinance shall become effective upon concurrence by the Secretary. Should the Secretary deny concurrence for the resubmitted ordinance, the Secretary shall state the reasons therefor and shall promptly resubmit the ordinance for reconsideration. Should the Secretary fail to concur within sixty days, the ordinance shall be deemed effective.

(5) Within one hundred and twenty days after receipt of notification of nonconcurrence, the Commission shall—

(A) revise and resubmit the land use ordinance to the Secretary; or

(B) by a vote of two-thirds of its membership, including a majority of the members appointed from each State, reject the suggested modifications of the Secretary and adopt a land use ordinance consistent with the provisions of this section and the purposes of this Act.

(m) SUBSEQUENT COMPLIANCE.—In the event the Commission has adopted an ordinance pursuant to this section, the affected county may thereafter, upon written notice to the Commission and to the Secretary, elect to adopt a Special Management Area land use ordinance, in which event it shall comply with the provisions of this section for adoption of special management area land use ordinances. Upon concurrence of such land use ordinances by the Secretary they shall supersede any special management area land use ordinances for the county development by the Commission, subject to valid existing rights.

(n) EFFECT OF SECRETARY'S NON-CONCURRENCE.—If the Secretary does not concur in any land use ordinance approved or adopted by the Commission pursuant to this section, the availability of certain funds to the relevant county shall be governed by section 16(c) of this Act.

(o) SPECIAL RULES.—Any ordinance adopted pursuant to this section shall not apply to any parcel or parcels of land within a Special Management Area if, after the date such ordinance has been adopted, three years have elapsed after a landowner has made a bona fide offer to sell at fair market value or otherwise convey such parcel or parcels to the Secretary, unless the affected landowner agrees to an extension of the three year period: *Provided*, an offer shall not be considered bona fide if the landowner refuses consideration equal to the fair market value as appraised in accordance with the Uniform Appraisal Standards for Federal Land Acquisitions (Interagency Land Acquisition Conference, 1973). Lands for which an ordinance is suspended pursuant to this subsection shall be subject to the relevant Scenic Area land use ordinance adopted pursuant to section 7 of this Act.

SEC. 9. LAND ACQUISITION

(a) ACQUISITION AUTHORIZED.—(1) The Secretary is authorized to acquire any lands or interests therein within the Special Management Areas and the Dodson/Warrendale Special Purchase Unit which the Secretary determines are needed to achieve the purposes of this Act: *Provided*, That any lands, waters, or interests therein owned by either State or any political subdivision thereof may be acquired only by donation or exchange.

(2) Lands within the State of Oregon acquired by the Secretary pursuant to this Act shall become part of the Mount Hood National Forest. Lands within the State of Washington acquired by the Secretary pursuant to this section shall become part of the Gifford Pinchot National Forest. All lands acquired by the Secretary pursuant to this Act shall be subject to the laws and regulations pertaining to the National Forest System and this Act.

(b) LIMITATIONS ON EMINENT DOMAIN.—

(1) Where authorized in subsection (a) of this section to acquire land or interests therein without the consent of the owner, the Secretary shall—

(A) acquire only such land or interests therein as is reasonably necessary to accomplish the purposes of this Act; and

(B) do so only in cases where all reasonable efforts to acquire with the consent of the owner such lands, or interests therein, have failed.

(2) Notwithstanding the provisions of subsection (a) of this section, the Secretary may not acquire without the consent of the owner lands or interests therein which—

(A) on the date of enactment of this Act, were used primarily for educational, religious, or charitable purposes, single-family residential purposes, farming, or grazing so long as the existing character of that use is not substantially changed or permitted for change;

(B) are located in counties with land use ordinances in which the Secretary has concurred pursuant to section 8 of this Act, unless such lands are being used, or are in imminent danger of being used, in a manner incompatible with such ordinances;

(C) are within the boundaries of the Dodson/Warrendale Special Purchase Unit; or

(D) are owned by an Indian tribe, held in trust by the United States for an Indian tribe or member of an Indian tribe, or otherwise administered by the United States for the benefit of an Indian tribe or member of an Indian tribe.

(c) HARDSHIP CASES.—In exercising authority to acquire lands pursuant to this section the Secretary shall give prompt and careful consideration to any offer made by any person or entity owning any land, or interest in land, within the boundaries of a Special Management Area. In considering such offer, the Secretary shall take into consideration any hardship to the owner which might result from any undue delay in acquiring the property.

"(d) LAND EXCHANGES.—(1) The Secretary is authorized and directed, in conformance with the provisions of this subsection, to acquire by exchange any parcel of unimproved forest land at least forty acres in size within the boundaries of the special management areas which is owned by any private forest land owner if, after enactment of this Act but within 180 days after final adoption of the management plan, such private forest land owner offers to the United States such parcel of forest land."

(2) In exercising this authority to acquire forest lands pursuant to this subsection, the Secretary may accept title to such lands and convey to the owner federally owned lands deemed appropriate by the Secretary within the States of Oregon and Washington, regardless of the State in which the transferred lands are located. Forest lands exchanged pursuant to this subsection shall be of approximately equal value: *Provided*, That the Secretary may accept cash from or pay cash to the grantor in such an exchange in order to equalize minor differences in the values of the properties exchanged: *Provided further*, That the Secretary may reserve in any conveyance pursuant to this subsection such easements, subsurface rights, and any other interests in land deemed neces-

sary or desirable: *Provided further,* That the valuation of lands exchanged shall be determined in terms of forest uses for timber.

(3) It is the intention of Congress that land exchanges pursuant to this subsection shall be completed no later than five years after the date of enactment of this Act. No later than sixty days after the enactment of this Act, and every one hundred eighty days thereafter, the Secretary shall report in writing to the Committee on Energy and Natural Resources of the United States Senate and the Committees on Agriculture and Interior and Insular Affairs of the United States House of Representatives, on the status of negotiations with owners of non-Federal lands to effect the exchanges authorized by this subsection.

"(4) In the event that exchanges authorized by this section leave any private forest land owner with ownership of an uneconomic remnant of forest land contiguous to a special management area, the Secretary is authorized to acquire such forest lands as if they were within the boundaries of a special management area."

(5) The following-described Federal lands and interests therein are hereby identified as candidate lands for exchanges conducted pursuant to this section: *Provided,* That the determination of which candidate lands will be exchanged, and in what sequence, shall be at the discretion of the Secretary. Subject to valid existing rights, such lands are hereby withdrawn from all forms of entry or appropriation or disposal under the public land laws, and from location, entry and patent under the United States mining law, and from disposition under all laws pertaining to mineral and geothermal leasing and all amendments thereto until the Secretary determines such lands are no longer needed to complete exchanges authorized by this section: *Provided,* That such period shall not extend beyond five years:

(e) BOUNDARIES.—For the purposes of section 7 of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-9), the boundaries of the Scenic Area, including Special Management Areas and the Dodson/Warrendale Special Purchase Unit shall be treated as if they were within the boundaries of the Mt. Hood or Gifford Pinchot National Forests as of January 1, 1965.

SEC. 10. INTERIM MANAGEMENT.

(a) INTERIM GUIDELINES.—(1) Within one hundred and eighty days after the date of enactment of this Act, the Secretary shall develop interim guidelines for the Scenic Area outside Urban Areas to identify land use activities which are inconsistent with this Act and to govern the authority to acquire land without the consent of the owner provided by subsection (b) of this section. The Secretary shall promptly notify the public of adoption of the interim guidelines and transmit the guidelines to each county. Guidelines adopted by the Secretary pursuant to this subsection shall remain in effect for each county until the Secretary has developed guidelines for the Special Management Areas pursuant to section 8 of this Act and the land use ordinances prescribed by section 7 are in effect.

(b) INTERIM ACQUISITION AUTHORITY AND INJUNCTIVE RELIEF.—Prior to the concurrence by the Secretary of land use ordinances prescribed by section 8 of this Act and the approval by the Commission of land use ordinances prescribed by section 7 of this Act, the following authorities are granted:

(1) The Secretary may acquire by condemnation any land or interest which is being used or threatened to be used in a manner inconsistent with the purposes for which the Scenic Area was established and which will cause or is likely to cause impacts adversely affecting the scenic, cultural, recreation, and natural resources of the Scenic Area: *Provided,* That no lands or interests therein can be acquired by condemnation pursuant to this section if used in the same manner and for the same purposes as used on the effective date of this Act, unless such land is used for or interest is in the development and production of sand, gravel, or crushed rock, or disposal of refuse; *Provided further,* that within 30 days of the filing by the Secretary of a complaint for condemnation of any land or interest in the Scenic Area, outside of the special management areas and urban areas, the Commission, by a vote of two-thirds of its membership including a majority of the members appointed from each State, or if the Commission is not in existence the Governor of the State in which the land or interest is located, may disapprove such proposed complaint.

(2) Upon or after the commencement of any action for condemnation pursuant to this subsection, the Secretary, acting through the Attorney General of the United States, may apply to the appropriate United States District Court for a temporary restraining order or injunction to prohibit the use of any property within the scenic area, but outside of urban areas, which will cause or is likely to cause impacts adversely affecting the scenic, cultural, recreation and natural resources of the scenic area or is otherwise inconsistent with the purposes for which the Scenic Area was established. During the period of such order or injunction, the Secretary shall diligently and in good faith negotiate with the owner of the property to assure that, following termination of the order or injunction, the inconsistent use is abated or the adverse effect is mitigated.

(c) *Review of Development Action.*—Prior to the effective date of a land use ordinance for each county pursuant to section 7 of this

Act, and concurrence of the Secretary on a land use ordinance for each county pursuant to section 8 of this Act, the Commission shall review all proposals for major development actions and new residential development in such county in the Scenic Area, except Urban Areas. The Commission shall allow major development actions and new residential development only if it determines that such development is consistent with the standards contained in section 6 and the purposes of this Act.

SEC. 11. ECONOMIC DEVELOPMENT.

(a) *Economic Development Plan.*—Based on the Economic Opportunity Study and other appropriate information, each State, in consultation with the counties and the Commission, shall develop a plan for economic development projects for which grants under this section may be used in a manner consistent with this Act.

(b) *Funds Provided to States for Grants.*—Upon certification of the management plan, and receipt of a plan referred to in subsection (a) of this section, the Secretary shall provide $5,000,000 to each State which each State shall use to make grants and loans for economic development projects that further the purposes of this Act.

(c) *Conditions of Grants.*—Each State making grants under this section shall require as a condition of a grant that—

(1) all activities undertaken under the grant are certified by the Commission as being consistent with the purposes of the Act, the management plan, and land use ordinances adopted pursuant to this Act;

(2) grants and loans are not used to relocate a business from one community to another;

(3) grants and loans are not used for program administration; and

(4) grants and loans are used only in counties which have in effect land use ordinances found consistent by the Commission and concurred on by the Secretary pursuant to section 8 of this Act.

(c) REPORT.—Each State shall—

(1) prepare and provide the Secretary with an annual report to the Secretary on the use of the funds made available under this section;

(2) make available to the Secretary and to the Commission, upon request, all accounts, financial records, and other information related to grants and loans made available pursuant to this section; and

(3) as loans are repaid, make additional grants and loans with the money made available for obligation by such repayments.

SEC. 12. OLD COLUMBIA RIVER HIGHWAY.

The Oregon Department of Transportation shall, in consultation with the Secretary and the Commission, the State of Oregon and the counties and cities in which the Old Columbia River Highway is located, prepare a program and undertake efforts to preserve and restore the continuity and historic integrity of the remaining segments of the Old Columbia River Highway for public use as a Historic Road, including recreation trails to connect intact and usable segments.

SEC. 13. TRIBUTARY RIVERS AND STREAMS.

(a) WATER RESOURCES PROJECTS.—The following rivers and streams shall be subject to the same restrictions on the licensing, permitting, and exempting from licensing and the construction of water resource projects as provided for components of the National Wild and Scenic Rivers System pursuant to section 7(a) of the Wild and Scenic Rivers Act (16 U.S.C. 1278(a)):

(1) any tributary river or stream to the Columbia River not designated in subsections (c) or (d) of this section or otherwise specified in this subsection which flows in whole or in part through a Special Management Area, unless the construction of a water resources project would not have a direct and adverse effect on the scenic, cultural, recreation, and natural resources of the Scenic Area;

(2) any river or river segment which flows in whole or in part through the Scenic Area and which is established pursuant to State law as a wild, scenic, or recreation river or which is under study pursuant to State law for the potential inclusion in any such State protected river system, unless such project or projects meet terms and conditions set by State agencies exercising administration over such river or river segment;

(3) the Wind River, Washington, for a period not less than three years following the later of—

(A) final approval of the Gifford Pinchot National Forest Plan, adopted pursuant to the National Forest Management Act of 1976 (Act of October 22, 1976, Public Law 94-588, as amended) (16 U.S.C. 1600 et seq.); or

(B) submittal by the Secretary of a report to the President on the suitability or nonsuitability for addition to the national wild and scenic rivers system and a report by the President to the Congress of recommendations and proposals with respect to the designation of such river under the Wild and Scenic Rivers Act;

(4) the Hood River, Oregon, for a period not to exceed twenty years from the date of enactment of this Act, if such facility impounds or diverts water other than by means of a dam or diversion existing as of date of enactment of this Act; and

(5) the segment of the Little White Salmon, Washington, from the Willard National Fish Hatchery to its confluence with the Columbia River if such facility impounds or diverts water other than by means of a dam or diversion existing as of date of enactment of this Act.

(b) The provisions of subsection (a) shall not apply to those portions of tributary rivers or streams to the Columbia River which flow through or border on Indian Reservations. Nothing in this section shall apply to or affect any segment of any river designated as a wild and scenic river under section 3 of the Wild and Scenic Rivers Act (16 U.S.C. 1274) or any river designated for study under section 5 of such Act (16 U.S.C. 1276):

(c) WILD AND SCENIC RIVER DESIGNATIONS.—Section 3(a) of the Wild and Scenic Rivers Act (Public Law 90-542, Act of October 2, 1968, 82 Stat. 910, as amended) is further amended by adding the following new subsections:

"( ) Klickitat, Washington: The segment from its confluence with Wheeler Creek, Washington, near the town of Pitt, Washington, to its confluence with the Columbia River; to be classified as a recreation river and to be administered by the Secretary of Agriculture.

"( ) White Salmon, Washington: The segment from its confluence with Gilmer Creek, Washington, near the town of B Z Corner, Washington to its confluence with Buck Creek, Washington; to be classified as a scenic River and to be administered by the Secretary of Agriculture.".

(d) WILD AND SCENIC RIVER STUDIES.—Section 5(a) of the Wild and Scenic Rivers Act (Public Law 90-542, Act of October 2, 1968, 82 Stat. 910, as amended) is further amended by adding the following new subsections:

"( ) Klickitat, Washington: The segment from the southern boundary of the Yakima Indian Reservation, Washington, as described in the Treaty with the Yakimas of 1855 (12 Stat. 951), and as acknowledged by the Indian Claims Commission in Yakima Tribe of Indians v. U.S., 16 Ind. Cl. Comm. 536 (1966), to its confluence with the Little Klickitat River, Washington: *Provided*, That said study shall be carried on in consultation with the Yakima Indian Nation and shall include a determination of the degree to which the Yakima Indian Nation should participate in the preservation and administration of the river segment should it be proposed for inclusion in the Wild and Scenic Rivers system.

"( ) White Salmon, Washington: The segment from its confluence with Trout Lake Creek, Washington, to its confluence with Gilmer Creek, Washington, near the town of B Z Corner, Washington.".

SEC. 14. IMPLEMENTATION MEASURES

(a) ASSISTANCE TO COUNTIES.—The Secretary shall provide technical assistance on a nonreimbursable basis to counties for the development of land use ordinances prescribed by sections 7 and 8 of this Act: *Provided*, That in the event a county fails to obtain approval by the Commission for a land use ordinance within three years after the date technical assistance is first provided under this subsection for the development of a land use ordinance, the Secretary shall terminate all technical assistance for any participation in the development of such ordinance.

(b) PAYMENT OF TIMBER RECEIPTS.—(1) Notwithstanding the provisions of the last paragraph under the heading "Forest Service" of the Act of May 23, 1908 (c. 192, 35 Stat. 251, as amended; 16 U.S.C. 500), and of section 13 of the Act of March 1, 1911 (c. 186, 36 Stat. 961, as amended; 16 U.S.C. 500), that portion of which is paid under such provisions to the State of Oregon with respect to the special management areas within the Mt. Hood National Forest, the Gates of the Columbia Gorge Special Management Area, Mount Hood National Forest, and to the State of Washington with respect to the Special Management Areas within the Gifford Pinchot National Forest—

(A) not less than 50 percent shall be expended for the benefit of the public schools of the county which has adopted implementation measures pursuant to this Act; and

(B) the remainder shall be expended for the benefit of public roads or any public purposes of any county which has adopted implementation measures pursuant to this Act.

(2) Paragraph (1) of this subsection shall not apply—

(A) to any amount paid by the Secretary of the Treasury under the provisions of law referred to in subsection (b)(1) at the end of any fiscal year ending before the date of enactment of this Act; or

(B) for a particular county, if the county does not have in effect a land use ordinance which has been found consistent by the Commission and concurred in by the Secretary pursuant to section 8 of this Act.

(c) PAYMENTS TO LOCAL GOVERNMENTS.—(1) Subject to section 16(b) of this Act, in the case of any land or interest therein acquired by the Secretary pursuant to section 9, which was subject to local real property taxes within the five years preceding such acquisition and which is located in a county which has in effect a land use ordinance

which has been found consistent by the Commission and concurred in by the Secretary pursuant to section 8, the Secretary is authorized and directed to make annual payments to the county in which such lands are located in an amount equal to one per centum of the fair market value of such land or interest therein on the date of acquisition by the Secretary.

(2) Notwithstanding paragraph (1) of this subsection, any payment made for any fiscal year to a county pursuant to this subsection shall not exceed the amount of real property taxes assessed and levied on such property during the last full fiscal year before the fiscal year in which such land or interest therein was acquired by the Secretary.

(3) No payment shall be made under this subsection with respect to any land or interest therein after the fifth full fiscal year beginning after the first fiscal year in which such a payment was made with respect to such land or interest therein.

(d) FEDERAL CONSISTENCY.—Except as otherwise provided in subsection (e) or in section 17 of this Act, Federal agencies having responsibilities within the scenic area shall excercise such responsibilities consistent with the provisions of this Act as determined by the Secretary.

(e) LIMITATIONS ON FEDERAL EXPENDITURES AFFECTING THE SCENIC AREA.—(1) Except as provided in paragraph (3), if the Commission has not been established pursuant to Section 5 within 15 months after the date of enactment of this Act, or is otherwise disestablished for any reason, no new expenditures or new financial assistance may be made available, and no new license or new permit, or exemption from a license or permit requirement, shall be issued, under authority of any Federal law for any activity within the Scenic Area, excluding urban areas, which the Secretary, determines is inconsistent with any implementation measure pursuant to, the standards established in section 6(b) of, or the purposes of this Act.

(2)(A)(i) An expenditure or financial assistance made available under authority of Federal law shall be treated, for purposes of this subsection, as a new expenditure or new financial assistance if—

(I) in any case with respect to which specific appropriations are required, no money for construction or purchase was appropriated before October 1, 1986; or

(II) no legally binding commitment for the expenditure or financial assistance was made before October 1, 1986.

(ii) Payments made to the State pursuant to the following Acts shall not be treated as an expenditure or financial assistance for purposes of this subsection: the Act of May 23, 1908 (c. 192, 35 Stat. 251; 16 U.S.C. 500); Section 13 of the Act of March 1, 1911 (c. 186, 36 Stat. 961; 16 U.S.C. 500); the Mineral Lands Leading Act of 1920; chapter 69 of title 31 (relating to payments in lieu of taxes for entitlement land); the Act of June 9, 1916 (39 Stat 218), and the Act of Feb. 26, 1919 (40 Stat. 1179).

(B) A license or permit, or exemption from a license or permit requirement, shall be treated, for purposes of this subsection, as a new license or new permit, or exemption from a license or permit requirement, if such license or permit, or exemption from a license or permit requirement, was issued on or after October 1, 1986. A renewal under similar terms and conditions of a license or permit, or exemption from a license or permit requirement, issued before October 1, 1986, shall not be treated as a new license or new permit, or exemption from a license or permit requirement.

(3) Notwithstanding paragraph (1), the appropriate Federal officer, after consultation with the Secretary, may make Federal expenditures or financial assistance available within the area for any of the following:

(A) The maintenance of existing channel improvements and related structures, and including the disposal of dredge materials related to such improvements.

(B) The maintenance, replacement, reconstruction, or repair, but not the expansion, of publicly-owned or publicly-operated roads, structures, or facilities that are essential links in a larger network or system.

(C) Military activities essential to national security.

(D) Any of the following actions or projects, but only if the making available of expenditures or assistance therefor is consistent with the standards in section 6(b) and the purposes of this Act:

(i) Projects for the study, management, protection and enhancement of fish and wildlife resources and habitats, including, but not limited to, acquisition of fish and wildlife habitats and related lands, stabilization projects for fish and wildlife habitats, and recreational projects.

(ii) The establishment, operation, and maintenance of air and water navigation aids and devices, and for access thereto.

(iii) Projects under the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-4 through 11) and the Coastal Zone Management Act of 1972 (16 U.S.C. 1451 et seq.).

(iv) Scientific research, including but not limited to aeronautical, atmospheric, space, geologic, marine, fish and wildlife, and other research, development, and applications.

(v) Assistance for emergency actions essential to the savings of lives and the protection of property and the public health and safety, if such actions are performed pursuant to sections 305 and 306 of the Disaster Relief Act of 1974 (42 U.S.C. 5145 and 5146) and section 1362 of the National Flood Insurance Act of 1968 (42 U.S.C. 4103) and are limited to actions that are necessary to alleviate the emergency.

(vi) The maintenance, replacement, reconstruction, or repair, but not the expansion, of publicly owned or publicly operated roads, structures, or facilities. This clause shall not apply to roads, structures, or facilities referred to in paragraph (3)(B).

(vii) Nonstructural projects for shoreline stabilization that are designed to mimic, enhance, or restore natural stabilization systems.

(4) The Director of the Office of Management and Budget shall, on behalf of each Federal agency concerned, make written certification that each such agency has complied with the provisions of this subsection during each fiscal year beginning after September 30, 1987. Such certification shall be submitted on an annual basis to the House of Representatives and the Senate pursuant to the schedule required under the Congressional Budget and Impoundment Control Act of 1974.

(5) Nothing contained in this subsection shall be construed as indicating an intent on the part of the Congress to change the existing relationship of other Federal laws to the law of a State, or a political subdivision of a State, or to relieve any person of any obligation imposed by any law of any State, or political subdivision of a State. No provision of this subsection shall be construed to invalidate any provision of State or local law unless there is a direct conflict between such provision and the law of the State, or political subdivision of the State, so that the two cannot be reconciled or consistently stand together. This subsection shall in no way be interpreted to interfere with a State's right to protect, rehabilitate, preserve, and restore lands within its established boundary.

(f) *Transfer of Public Lands.*—Subject to valid existing rights, all public lands within the Scenic Area administered by the Secretary of the Interior through the Bureau of Land Management are hereby transferred without consideration to the jurisdiction of the Secretary to be managed as National Forest lands in accordance with the provisions of this Act.

SEC. 15. ENFORCEMENT.

(a) *Administrative Remedies.*—

(1) *Commission orders.*—The Commission shall monitor activities of counties pursuant to this Act and shall take such actions as it determines are necessary to ensure compliance.

(2) *Appeal to the commission.*—Any person or entity adversely affected by any final action or order of a county relating to the implementation of this Act may appeal such action or order to the Commission by filing with the Commission within thirty days of such action or order, a written petition requesting that such action or order be modified, terminated, or set aside.

(3) CIVIL PENALTIES.—Any person or entity who willfully violates the management plan or any land use ordinance, any implementation measure or any order issued by the Commission pursuant to this Act may be assessed a civil penalty by the Commission not to exceed $10,000 for each violation. No penalty may be assessed under this subsection unless such person or entity is given notice and opportunity for a public hearing with respect to such violation. The Commission may compromise, modify, or remit, with or without conditions, any penalty imposed under this subsection, taking into consideration the nature and seriousness of the violation and the efforts of the violator to remedy the violation in a timely manner.

(b) JUDICIAL REMEDIES.—

(1) CIVIL ACTIONS TO ENFORCE ACT.—(A) Except as otherwise limited by this Act, the Attorney General of the United States may, at the request of the Secretary, institute a civil action for an injunction or other appropriate order to prevent any person or entity from utilizing lands within the special management areas in violation of the provisions of this Act, interim guideline adopted or other action taken by the Secretary pursuant to this Act.

(B) The Commission, or, at the request of the Commission, or the Attorney General of Oregon or Washington, may institute a civil action for an injunction or other appropriate order to prevent any person or entity from utilizing lands within the Scenic Area outside Urban Areas in violation of the provisions of this Act, the management plan, or any land use ordinance or interim guideline adopted or other action taken by the Commission or any county pursuant to this Act.

(2) CITIZENS SUITS.—Any person or entity adversely affected may commence a civil action to compel compliance with this Act—

(A) against the Secretary, the Commission or any county where there is alleged a violation of the provisions of this Act, the management plan or any land use ordinance or

interim guideline adopted or other action taken by the Secretary, the Commission, or any county pursuant to or Commission under this Act; or

(B) against the Secretary, the Commission, or any county where there is alleged a failure of the Secretary, the Commission or any county to perform any act or duty under this Act which is not discretionary with the Secretary, the Commission or any county.

(3) LIMITATION ON BRINGING OF CITIZENS SUITS.—No action may be commenced—

(A) under paragraph (2)(A) of this subsection—

(i) prior to sixty days after the plaintiff has given notice in writing of the alleged violation to the Secretary, to the Commission, and to the county in which the violation is alleged to have occurred; or

(ii) if the Attorney General of the United States, or the Attorney General of Oregon or Washington, has commenced and is diligently prosecuting a civil action on the same matter pursuant to paragraph (1) of this subsection to require compliance with the management plan or any regulations, guidelines, or standards issued or other actions taken by the Secretary, the Commission, or any county pursuant to this Act: *Provided*, That in any such action any person or entity otherwise entitled to bring an action pursuant to paragraph (2) of this subsection may intervene as a matter of right; or

(iii) which challenges the consistency of the draft management plan with the purposes and standards of this Act or with other applicable law prior to the certification or adoption of the Management Plan pursuant to section 6 of this Act; or

(B) under paragraph (2)(B) of this subsection prior to sixty days after the plaintiff has given notice in writing of such action to the Secretary, the Commission, and to the county in which the failure to perform any act or duty pursuant to this Act is alleged: *Provided*, That such action may be brought immediately after such notification where the violation or order complained of constitutes an imminent threat to the health or safety of the plaintiff or would immediately affect a legal interest of the plaintiff.

(4) JUDICIAL REVIEW.—Any person or entity adversely affected by—

(A) any final action or order of a county, the Commission, or the Secretary relating to the implementation of this Act;

(B) any land use ordinance or interim guideline adopted pursuant to this Act; or

(C) any appeal to the Commission pursuant to this section; or

(D) any civil penalty assessed by the Commission pursuant to paragraph (a)(3) of this subsection may appeal such action or order by filing in any of the courts specified in paragraph (5) of this subsection, within sixty days after the date of service of such order or within sixty days after such action is taken, a written petition requesting such action, order, land use ordinance, interim guideline, or appeal taken to the Commission be modified, terminated, or set aside.

(5) FEDERAL COURT JURISDICTION.—The United States district courts located in the States of Oregon and Washington shall have jurisdiction over—

(A) any criminal penalty imposed pursuant to 16 U.S.C. 551 or any other applicable law for violation of any order, regulation or other action taken by the Secretary pursuant to this Act;

(B) any civil action brought against the Secretary pursuant to this section; or

(C) any appeal of any order, regulation, or other action of the Secretary taken pursuant to paragraph (4) of this subsection.

(6) STATE COURT JURISDICTION.—The State courts of States of Oregon and Washington shall have jurisdiction—

(A) to review any appeals taken to the Commission pursuant to subsection (a)(2) of this section;

(B) over any civil action brought by the Commission pursuant to subsection (b)(1) of this section or against the Commission, a State, or a county pursuant to subsection (b)(2) of this section;

(C) over any appeal of any order, regulation, or other action of the Commission or a county taken pursuant to paragraph 4 of this subsection; or

(D) any civil penalties assessed by the Commission pursuant to subsection (a)(3) of this section.

SEC. 16. AUTHORIZATION OF APPROPRIATIONS.

(a) AUTHORIZATIONS.—There are authorized to be appropriated for fiscal years after the fiscal year 1986 such sums as are described below:

(1) for the purpose of acquisition of lands, water, and interests therein pursuant to this Act: $40,000,000: *Provided*, That of this amount no more than $10,000,000 shall be available to acquire lands, water, and interests therein pursuant to section 10. Such amounts are authorized to be appropriated from amounts covered into the Land and Water Conservation Fund notwithstanding any allocation, apportionment, or limitation contained in the Land and Water Conservation Fund (16 U.S.C. 4601-4 and following).

(2) For the purpose of providing payments to local governments pursuant to section 14(c): $2,000,000. (b) There are authorized to be appropriated for fiscal years after the fiscal year 1986, effective upon concurrence on the management plan pursuant to section 6 of this Act:

(1) For the purpose of construction of an interpretive center to be located in the State of Oregon, and a conference center to be located in the State of Washington: $10,000,000.

(2) For the purpose of construction of recreation facilities pursuant to section 7(d): $10,000,000.

(3) For the purpose of preparing a program and restoring and reconstructing the Old Columbia River Scenic Highway, Oregon pursuant to section 12 of this Act: $2,800,000.

(4) For the purpose of providing economic development grants pursuant to section 11: $5,000,000 for each State: *Provided*, That funds authorized to be appropriated pursuant to this paragraph shall be available for the acquisition of lands and interests therein pursuant to section 10 if, at the expiration of three years, the States have failed to carry out their respective function pursuant to section 5 of this Act.

(c) *Availability of Funds.*—Funds appropriated under subsections (a)(2) and (b) shall not be made available for any county which does not have in effect a land use ordinance which has been found to be consistent by the Commission, and concurred on by the Secretary as consistent with the management plan pursuant to section 8 of this Act.

SEC. 17. SAVINGS PROVISIONS

(a) Nothing in this Act shall—

(1) affect or modify any treaty or other rights of any Indian tribe;

(2) except as provided in section 13(c), authorize the appropriation or use of water by any Federal, State, or local agency, Indian tribe, or any other entity or individual;

(3) except as provided in section 13(c), affect the rights or jurisdictions of the United States, the States, Indian tribes or other entities over waters of any river or stream or over any ground water resource or affect or interfere with transportation activities on any such river or stream;

(4) except as provided in section 13(c), alter, establish, or affect the respective rights of United States, the States, Indian tribes, or any person with respect to any water or water-related right;

(5) alter, amend, repeal, interpret, modify, or be in conflict with any interstate compact made by the States before the enactment of this Act;

(6) affect or modify the ability of the Bonneville Power Administration to operate, maintain, and modify existing transmission facilities;

(7) affect lands held in trust by the Secretary of the Interior for Indian tribes or individual members of Indian tribes or other lands acquired by the Army Corps of Engineers and administered by the Secretary of the Interior for the benefit of Indian tribes and individual members of Indian tribes;

(8) affect the laws, rules and regulations pertaining to hunting and fishing under existing State and Federal laws and Indian treaties;

(9) require any revision or amendment of any forest plan adopted pursuant to the National Forest Management Act of 1976 ((Act of October 22, 1976, P.L. 94-588, as amended) (16 U.S.C. 1600 et seq.)); or

(10) establish protective perimeters or buffer zones around the Scenic Area or each Special Management Area. The fact that activities or uses inconsistent with the management directives for the Scenic Area or Special Management Areas can be seen or heard from these areas shall not, of itself, preclude such activities or uses up to the boundaries of the Scenic Area or Special Management Areas.

(b) Except for the offsite disposal of excavation material, nothing in this Act shall be construed to affect or modify the responsibility of the U.S. Army Corps of Engineers to improve navigation facilities at Bonneville Dam pursuant to Federal law.

(c) Except for the management, utilization, or disposal of timber resources of non-Federal lands within the Special Management Areas, nothing in this Act shall affect the rights and responsibilities of non-Federal timber land owners under the Oregon and Washington Forest Practices Acts or any county regulations which under applicable State law supercede such Acts.

(d) Mandatory language in this Act respecting the powers and responsibilities of the Commission shall be interpreted as conditions precedent to Congressional consent to the interstate compact described in section 5 of this Act.

(e) In the event that the States of Washington and Oregon fail to comply with the provisions of section 5 of this Act, the Secretary shall not be obligated to take actions which are predicated upon the establishment of the Commission.

(f)(1) Actions by the Secretary pursuant to subsections (f), (g), and (h) of section 6; subsections (f), (j), (k) and (l) of section 8; section 9; and subsections (a) and (b)(2) of section 10 shall neither be considered major Federal actions significantly affecting the quality of the environment under section 102 of the National Environmental Policy Act (42 U.S.C. 4332) nor require the prepa-

ration of an environmental assessment in accordance with that Act.

(2) Except as provided in paragraph (1) of this subsection, nothing in this Act shall expand, restrict, or otherwise alter the duties of the Secretary under the National Environmental Policy Act.

SEC. 18. SEVERABILITY.

(a) If any provision of this Act or the application thereof to any person, State, Indian tribe, entity, or circumstance is held invalid, neither the remainder of this Act, nor the application of any provisions herein to other persons, States, Indian tribes, entities, or circumstances, shall be affected thereby.".

The CHAIRMAN. No amendments are in order except three amendments by and, if offered by Representative ROBERT F. SMITH of Oregon, which shall not be subject to amendment or to a demand for a division of the question, but each amendment shall be debatable for 20 minutes, to be equally divided and controlled by Representative SMITH and a Member opposed thereto.

The Chair recognizes the gentleman from Oregon [Mr. ROBERT F. SMITH].

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. ROBERT F. SMITH

Mr. ROBERT F. SMITH. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. ROBERT F. SMITH: Strike all after the enacting clause and insert in lieu of the following new language:

SHORT TITLE

SECTION 1. This Act may be cited as the "Columbia River Gorge Act of 1983".

FINDINGS AND PURPOSES

SEC. 2. (a) FINDINGS.—The Congress finds that—

(1) the Columbia River Gorge is a unique national and regional asset containing historic, cultural, community, biological, scientific, economic, geologic, and transportation resources which must be maintained for the benefit of all citizens;

(2) the Columbia River Gorge is an indivisible natural entity which should be viewed as one unit since management or development actions of one agency may have serious impacts on resources such as air and water quality, water flow, soil stability, fish and wildlife habitat and scenic beauty of areas of the Gorge within the jurisdiction of other agencies;

(3) there are more than fifty local, State, and Federal agencies presently exercising governmental authority in the Gorge which have widely divergent regulations and policies governing development, management, and protection of the Gorge, and the existence of so many different and divergent governmental agencies functioning in two States within the Gorge has made unified management of the Gorge difficult;

(4) in order to protect natural, scientific, economic, cultural and other values of Federal, State, and local government lands and facilities located within the Gorge, there must be a real partnership between all jurisdictions within the Gorge through a management entity having the authority and financial resources to protect and enhance the Gorge's resources;

(5) the Gorge area contains over forty thousand residents in cities, towns, and rural communities whose right to continued enjoyment of their homes and their economic well-being must be assured.

(6) the scenic, historic, recreational, archeological, and scientific qualities of the Gorge, particularly those located in the most sensitive and critical lands within the Gorge, deserve identification and protection;

(7) the Gorge is an historic gateway between the Pacific Ocean and the interior of North America traveled by native Americans, explorers, traders, and pioneers; evidencing human habitation for over eleven thousand years, the Gorge area contains a major navigable waterway used in interstate commerce and is today of commercial and economic importance to the Pacific Northwest and the Nation in terms of transportation, energy production, fishing, agriculture, and recreation;

(8) the Gorge is a spectacular canyon of compelling and majestic beauty formed by the Columbia River, cutting through the Cascade Range which contains magnificent scenic, natural, and recreational resources of regional, national, and international significance;

(9) the botanical diversity of the Gorge, ranging from sagebrush and grasslands in the eastern portion to lush rain forests in the west, includes many threatened and endangered species and is unique in the Nation and the world;

(10) because of its unique resources, the Gorge is a natural area for tourism and recreation, and the highways, trails and scenic viewpoints in the Gorge area are heavily used by residents of the nearby Portland-Vancouver metropolitan area and by visitors from throughout the Pacific Northwest, the Nation, and the world;

(11) competing uses of and human impacts on the Gorge include Federal hydroelectric power development, State and interstate highway construction and intense development of port and navigation facilities, farms, orchards, forest production, cities, and towns;

(12) the possibility of urban and suburban development and the lack of coordinated planning and authority within the Gorge have given rise to the fear of a threat to the preservation of this unique natural resource;

(13) State and Federal agencies and private parties undertake land management and development activities such as timber harvesting, development of energy and transmission facilities and highway construction which impact the physical appearance of the Gorge area and have a substantial effect on interstate commerce;

(14) Federal and State government agencies and local governments currently lack the financial and technical resources and areawide planning authority necessary to protect and enhance the unique resources of the Gorge and to resolve existing and potential differences between and inconsistent actions taken by those government agencies and citizens involved in developing, planning for, protecting and enhancing the Gorge; and

(15) numerous comprehensive studies of the Gorge have been done by Federal and State agencies and commissions detailing the resources of and threats to the Gorge area which have concluded that unified management of the Area is essential to its continued viability.

(b) PURPOSES.—The purposes of this Act are—

(1) to protect and enhance the scenic, cultural, and natural resources of the Columbia River Gorge, including sensitive habitats of threatened and endangered species of flora and fauna and critical and sensitive lands, while providing for public enjoyment, enhancement of local communities, and continued commerce;

(2) to protect, conserve, and enhance the scenic, natural, cultural, and other values of existing Federal, State, and local government property located in the Gorge, including lands owned or controlled by the numerous departments of the United States Government and the States of Oregon and Washington;

(3) to enhance the well-being of residents and encourage continued growth and vitality of existing municipalities, homes and businesses in the Gorge area;

(4) to establish a single management entity charged with providing for and managing the public use and enjoyment of the Columbia River Gorge in a manner consistent with natural resource protection and maintenance of the existing landscape, including establishment, acquisition, maintenance, and operation of public recreation, natural areas, and tourist and interpretive facilities to meet the needs of the growing population and increased travel in the region;

(5) to establish a mechanism for effective cooperation in the Gorge by local, State and national interests through creation of a commission with authority and resources to develop, monitor, and enforce a unified management plan for the Gorge which is binding on all governmental entities having authority over land and resources in the Gorge that will protect, preserve, and enhance its unique resources;

(6) to establish a process by which critical and sensitive lands within the Gorge will be identified and a program to assure their protection and preservation will be established and maintained;

(7) to protect and preserve the historic and archeological resources of the Columbia River Gorge and, where appropriate, to make these resources more available to the public for educational and scientific purposes;

(8) to encourage and strengthen tourism and economic development efforts in the Gorge which rely on the natural resources and are compatible with the unique natural setting of the Area;

(9) to foster and enhance the historical uses of the Gorge as a vital transportation corridor in interstate commerce and as an important source of regional power generation in the Pacific Northwest;

(10) to utilize to the fullest extent possible the land use planning and other resources and powers of local and State governments and existing Federal agencies to develop and implement the management plan for the Gorge;

(11) to provide resources and assistance to State and local governments to foster the policies and realize the purposes of this Act;

(12) to provide for extensive public review and comment on Gorge management plans; and

(13) to provide funds to assist in the administration of this Act and for the purchase of critical and sensitive lands in the Gorge.

DEFINITIONS

SEC. 3. As used in this Act the term—

(1) "Agency" or "Agencies" refers to all State and Federal agencies, departments, commissions, boards, instrumentalities and quasi-governmental entities which have any authority to undertake, assist, regulate or grant any permit, license or other form of approval for any land management or development within the Gorge Area.

(2) "Assist" refers to any grant, loan, loan guarantee, sale of flood insurance or any other form of direct or indirect financial or technical assistance to any other agency, person, corporation or private entity.

(3) "Columbia River Gorge", "Gorge", or "Area" refers to the combined geographical area respectively defined on the effective date of this Act as the Columbia River Gorge by the Washington State Legislature in chapter 48, Laws of 1975, First Extraordinary Session, now codified as RCW 43,97.090 and by the Oregon State Legislature in chapter 482, Laws of 1977, now codified as ORS 390.460 and as depicted generally on the map entitled "Columbia River Gorge Vicinity, October, 1979," filed with the Committee on Interior and Insular Affairs of the United States House of Representatives.

(4) "Commission" refers to the Columbia River Gorge Commission established by section 5(a) of this Act.

(5) "Critical and sensitive lands" refers to lands or shorelines having any of the characteristics described in section 9(b)(2) of this Act.

(6) "Implementation Plans" refer to the plans developed by Federal and State agencies and local governments pursuant to section 10 of this Act which shall govern and regulate land management and development within the Gorge Area.

(7) "Land Management or Development" or "Development" refers to projects and activities, or permits and approvals which allow projects and activities, which may impact, alter or modify the physical appearance, form or character of land or shorelines and the structures thereon within the Gorge Area, including but not limited to:

(A) construction, expansion, modification or location of buildings, mobile homes, energy facilities, transmission and receiving facilities or other structures;

(B) agency or local government approvals of plans, zoning and other land use ordinances, subdivisions or other land use or building approvals or permits;

(C) sales or conveyances by agencies of timber or timber lands, timber harvesting and application of forest practices regulations;

(D) land clearing, grading and filling, except land cultivation for agricultural activities;

(E) road or highway construction or expansion; and

(F) sand, gravel or mineral extraction.

(8) "Land" shall include "shorelines", which shall refer to (A) all lands extending landward of the low water mark of, (B) all wetlands, bogs, marshes and deltas associated with, and (C) all lands which are subject to intermittent or periodic inundation with water from any river, stream or lake situated within the Gorge Area. If any part of a development is located within a shoreline, the entire development shall be subject to this Act.

(9) "Local government", refers to any county, city, town, port, or other municipal corporation or other governmental entity created by or pursuant to State law and located, in whole or in part, within the geographical area defined in section 3(b) of this Act.

(10) "Management Plan" refers to the management plan developed pursuant to section 9(a) and 9(b) of this Act.

ESTABLISHMENT OF AREA

SEC. 4. The Columbia River Gorge Area is hereby established, consisting of all lands located within the geographical area described in section 3(b) of this Act.

ESTABLISHMENT OF THE COMMISSION

SEC. 5. (a) ESTABLISHMENT.—There is hereby established the Columbia River Gorge Commission which shall administer this Act, and which shall consist of fourteen members, to be appointed as follows:

(1) one elected official or other county resident each from Clark, Skamania, and Klickitat Counties in the State of Washington, or a local government within said counties;

(2) one elected official or other county resident each from Wasco, Hood River, and Multnomah Counties in the State of Oregon, or a local government within said counties;

(3) four members-at-large who shall be residents of the State of Washington, at least two of whom shall be residents of the Gorge Area; and

(4) four members-at-large who shall be residents of the State of Oregon, at least two of whom shall be residents of the Gorge Area.

(b) NOMINATION AND APPOINTMENT.—Not more than thirty days after the effective date of this Act, and thereafter within forty-five days if a vacancy occurs, the Governors of the States of Washington and Oregon each may provide to the President of the United States a list of nominations from such State for each of the State's positions and shall include such information about the nominees as the President may request. Within thirty days of receipt of the nominations, the President shall appoint the Commission members from each Governor's list of nominations for each State's positions, except that the President may decline to appoint for any reason any of a Governor's nominees for a position and shall so notify the Governor. The Governor may thereafter make successive nominations within thirty days of receipt of the notice until nominees acceptable to the President are appointed for each position. In the event the required nominations for any State position on the Commission are not received from the Governor of either State within the time specified for such nominations, the President shall appoint the Commission member or members for the positions specified in subsection (a) of this section.

(c) CHAIR AND VICE-CHAIR.—Each Governor may include in the lists of nominees submitted to the President pursuant to subsection (b) of this section one nominee each for the chair and vice-chair of the Commission. Such nominees shall be chosen from among the nominees for the member-at-large positions on the Commission. The President shall appoint the chair and vice-chair from among the nominees designated by the Governors, except that the President may decline to appoint for any reason any of a Governor's nominees for chair or vice-chair of the Commission and shall so notify the Governors. The Governors may thereafter make successive nominations for chair and vice-chair of the Commission within thirty days of receipt of such notice until nominees acceptable to the President are appointed for each position. The President shall decide whether the first chair will be from Oregon or Washington and the positions of chair and vice-chair shall alternate thereafter between the States every two years. The chair and vice-chair may not be residents of the same State. The vice-chair shall serve as the chair-elect.

(d) TERMS.—Members of the Commission shall be appointed for a term of four years, except that the initial appointment of the eight members-at-large shall be as follows: one from each State shall be appointed for a term of four years, and one from each State shall be appointed for a term of three years, and one from each State shall be appointed for a term of two years, and one from each State shall be appointed for a term of one year. Thereafter, all citizen members of the Commission shall be appointed for terms of four years. No member shall serve more than two full four-year terms, which shall not include partial terms served as a result of initial appointments or appointments to fill vacancies.

(e) NONVOTING EX OFFICIO MEMBERS.—The President shall appoint as nonvoting ex officio members of the Commission a representative of the United States Forest Service, the Bonneville Power Administration, the United States Corps of Engineers, the United States Fish and Wildlife Service, and such other Federal or State agencies as he deems appropriate.

(f) VACANCIES.—Any vacancy in the Commission shall be filled in the same manner in which the original appointment was made.

(g) HOLDOVER TERMS.—Any member may serve after the formal expiration of his or her term until a successor is appointed.

(h) QUORUM AND VOTING.—A quorum shall consist of eleven members. The Commission shall act only on an affirmative vote of a majority of those members present, except that a lesser number may, pursuant to rules established by the Commission, be authorized to hold hearings.

(i) COMPENSATION.—Commission members shall be allowed per diem compensation and travel expenses in the same manner as prescribed by sections 5702-5707 of title 5, United States Code.

(j) MEETINGS.—(1) The Commission shall meet at least once every three months and meetings of the Commission shall be held within the Columbia River Gorge Area. The Commission shall give notice of all regular meetings and hearings by publishing notice fourteen days in advance thereof in two or more newspapers of general circulation in the Gorge Area, one of which shall be pub-

lished in Washington and one in Oregon. The notice shall state the date, time, place and agenda of the meeting. The Commission shall not be limited to considering items of business included on the published agenda. The Commission may call such emergency or special meetings as the chair or a majority of the members of the Commission deem necessary without having first complied with the notice provisions of this section, provided that the Commission shall make a reasonable attempt to notify the news media in the Gorge Area of such special or emergency meetings.

(2) All actions of the Commission shall be taken at open public meetings except, the Commission may hold executive sessions during a regular or special meeting; to consider matters affecting national security; to consider the selection of a site or the acquisition of real estate by lease or purchase, when publicity regarding such consideration would cause a likelihood of increased price; to consider the disposition of real estate by lease or sale, when publicity regarding such consideration would cause a likelihood of decreased price; to discuss pending or ongoing litigation; to consider the appointment, employment, or dismissal of a public officer or employee; or to hear complaints or charges brought against such officer or employee by another public officer, person, or employee unless such officer or employee requests a public hearing. The Commission also may exclude from any public meeting, hearing or executive session, during the examination of a witness on any matter, any or all other witnesses in the matter being reviewed or investigated by the Commission.

(k) COMMISSION OFFICE.—The Commission shall designate a principal office to be located within the Gorge Area and may designate other offices within or outside of the Gorge Area.

POWERS OF THE COMMISSION

SEC. 6. (a) AUTHORITY AND RESPONSIBILITY.—The Commission shall have the following powers and duties—

(1) it shall prepare, adopt, implement and enforce a unified Management Plan for the Gorge;

(2) it shall identify critical and sensitive lands in the Gorge and develop, implement, and enforce a program to protect those lands;

(3) it shall review Federal, State, and local Implementation Plans for compliance with the Management Plan and certify such plans as are found to be in compliance;

(4) it shall prepare a biennial report to the President, the Congress, and the Governors and State legislatures of the States of Washington and Oregon advising them of the status of the Management Plan and its implementation;

(5) it is authorized to acquire any fee or less-than-fee interest in property pursuant to section 11 of this Act;

(6) it is authorized to exercise the power of eminent domain but only to acquire critical and sensitive lands and further subject to the provisions of section 11(b) of this Act;

(7) it is authorized to make gifts or exchanges of land or interests therein or enter into contracts with other agencies, local governments or not-for-profit organizations for purposes of conveying or accepting fee or less-than-fee interests in land or providing for management of lands or interests in lands held by the Commission when the Commission determines that such gifts, exchanges or contracts will further the purposes of this Act;

(8) it is authorized to acquire real and personal property or services in furtherance of the purposes of this Act;

(9) it is authorized to make grants to agencies, local governments and not-for-profit organizations for purposes of purchasing fee or less-than-fee interests in land as set forth in section 11;

(10) it is authorized to review and recommend to Congress any alterations of the boundaries of the Gorge Area as may become necessary to achieve the purposes of this Act;

(11) it is authorized to provide technical and financial assistance to Federal agencies as well as to State agencies and local governments to carry out the purposes of this Act;

(12) it is authorized to adopt such rules and regulations as it may deem necessary pursuant to the procedures established in section 553 of title 5, United States Code: *Provided*, That adoption of the Management Plan and certification of Implementation Plans shall not constitute adoption of rules or regulations within the meaning of section 553;

(13) it is authorized to establish an executive committee and appoint subcommittees and advisory committees as needed;

(14) it is authorized to hear appeals pursuant to the procedures established in sections 554–557 of title 5, United States Code, and this Act;

(15) it is authorized to employ such staff as may be needed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service. Employees of the Commission may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that no individual so appointed may receive pay in excess of the annual rate of basic pay for grade GS–15 of the General Schedule as it is established from time-to-time;

(16) it is authorized to procure professional, technical and other services, including legal counsel, to the extent deemed necessary and at rates determined by the Commission to be reasonable compensation for such services;

(17) it is authorized to nominate sites and objects of historic or archeological significance for inclusion on the National Register of Historic Places;

(18) it is authorized to sue and be sued;

(19) it is authorized to initiate and approve such amendments to the Management Plan or Implementation Plans as the Commission deems necessary to implement the purposes and policies of this Act; and

(20) it is authorized to take such other actions as may be necessary to carry out the purposes and policies of this Act.

TIMETABLE FOR ADOPTION OF PLANS

SEC. 7. (a) APPOINTMENT OF COMMISSION.—Within thirty days after the date of enactment of this Act, the Governors of the States of Washington and Oregon may submit nominations to the President for appointment to the Commission and within sixty days after the effective date of this Act the President shall appoint the members of the Commission pursuant to the provisions of section 5 (a) and (b) of this Act.

(b) MANAGEMENT PLAN.—Within eighteen months after appointment of its members, the Commission shall adopt the Management Plan pursuant to section 9 of this Act.

(c) IMPLEMENTATION PLANS.—Within twelve months after the Commission's adoption of the Management Plan, all agencies and local governments covered by this Act shall submit implementation plans to the Commission pursuant to section 10 of this Act.

INTERIM PROCEDURES

SEC. 8. (a) ACTIVITIES REQUIRING COMMISSION REVIEW.—Those land management or development activities in the Gorge which consist of sand, gravel or mineral extraction, subdivisions and short platting, and construction of commercial and industrial facilities may not be undertaken, assisted, regulated, or approved by any Federal or State agency or local government, or any official or employee thereof, between the date the Commission members are appointed (but in any event no later than sixty days after the date of enactment of this Act) and the date the Commission certifies an Implementation Plan for the agency or local government pursuant to section 10(b), until sixty days have expired after the Commission receives notice of any proposal or application for such land management or development activities pursuant to section 8(b).

(b) PROCEDURE FOR COMMISSION REVIEW.—(1) Prior to certification of its Implementation Plan, every agency or local government which proposes to undertake, assist, regulate, or which receives an application for those land management or development activities defined in subsection (a) in the Gorge shall give notice of the proposal or application to the Commission at the earliest possible time. The notice shall include a copy of the application and all plans, profiles, studies, and other documents related to the proposal or application available to the agency or local government. In the case of an application received by an agency or local government, notice of the application shall be given to the Commission no later than seven days after the agency or government receives such application.

(2) Within sixty days after receipt by the Commission of the notice required in subsection (b)(1), the Commission shall have the authority to review such proposal or application to determine whether it is consistent with the purposes of this Act, the Commission's interim guidelines when adopted, and the Management Plan when adopted. If the Commission determines that the proposal or application is inconsistent with such purposes, guidelines or Management Plan, it shall so notify the agency or local government submitting the proposal or application, setting forth the reasons for its decision in writing.

(3) In the event the Commission has made a written determination of inconsistency, said land management or development activity shall not proceed unless, upon resubmission of the proposal or application to the Commission, a determination of consistency is made. No proposal or application shall be resubmitted to the Commission unless it has been modified to eliminate the inconsistencies found by the Commission. In the event the Commission makes no written finding of inconsistency as provided herein within sixty days of receipt by it of the notice required in subsection (b)(1), the proposal or application shall be deemed approved. In the event the documents constituting notice described in subsection (b)(1) are not all received by the Commission on the same date, the sixty-day review period will commence on the latest of the submission dates.

(4) Upon certification by the Commission of an Implementation Plan pursuant to section 10 of this Act, the requirements of this section shall cease to apply to the agency or local government for which an Implementation Plan has been certified; except that

nothing in this section shall be construed to prohibit the Commission from receiving and investigating complaints of noncompliance with such certified Implementation Plans or taking such actions as it deems necessary to enforce the provisions of this Act, the Management Plan or any certified Implementation Plan.

(c) COMMISSION REVIEW OF ADDITIONAL ACTIVITIES.—In addition to reviewing the activities specified in subsection (a), the Commission is authorized to initiate review of any other land management or development activity in the Gorge, as defined in section 3, (1) on lands which meet the criteria for critical and sensitive lands or (2) which the Commission determines may cause an irreparable change inconsistent with the purposes of the Act or which may have a significant adverse impact upon effectiveness of the Management Plan to be adopted. The Commission may initiate such review by written notice from the chair to the Federal or State agency or local government proposing or which has received an application for such land management or development activity. After receipt of said notice from the Commission, the agency or local government shall provide the Commission with the applications, plans, profiles, studies, and other documents relating to such activity and no such land management or development shall be undertaken, assisted or approved by any Federal or State agency or local government until the Commission makes a written determination of consistency or inconsistency. The Commission shall make a determination within sixty days after it receives the application and related documents and the Commission shall follow the procedures of subsection (b) (2) and (3) to the extent not inconsistent with this subsection.

(d) INFORMATION TO AGENCIES AND LOCAL GOVERNMENTS.—From time-to-time the Commission in its discretion may provide information or notice to agencies and local governments regarding the application of this Act to land management or development undertaken, regulated or approved by said agencies or local governments, the requirements and procedures for interim review or any other matters relating to compliance with the Act and the rules, regulations or guidelines of the Commission except that no information or notice given shall affect the required submission of proposals or applications to the Commission under subsections (a) and (b) of this section or under section 10.

MANAGEMENT PLAN FOR THE AREA

SEC. 9. (a) PREPARATION.—The Commission shall prepare a Management Plan for conservation, use, and development of the Area. In preparing the Management Plan, the Commission shall use, among other data and documents, the information and data developed in previous studies of the Gorge conducted by Federal and State agencies and local governments. During the preparation of the Management Plan, the Commission shall hold public meetings and hearings to receive testimony from residents of the Area, representatives of governments and agencies potentially affected by the Management Plan, and citizens and representatives of groups interested in the development and preservation of the Gorge. The Commission shall give notice of the dates, times, and locations of such public meetings and hearings as provided in section 5(h) of this Act. Participation in meetings and hearings concerning the Management Plan shall be provided for and the Commission shall insure that the objectives of the Management Plan, the actions to be undertaken in the preparation of the Management Plan and the times when such actions are proposed to be taken are well publicized and openly discussed.

(b) CONTENT.—The Management Plan shall—

(1) be based upon such inventories, studies, and analyses of the Gorge's resources, including but not limited to the archeological, social, economic, forest, historical, natural, geological, botanical, recreational, and scenic characteristics of the Area as the Commission deems appropriate;

(2) designate critical and sensitive lands within the Gorge Area which are essential to its protection, development, and interpretive value including—

(A) lands which have unique or distinctive scenic features in the Gorge;

(B) lands containing rare or endangered wildlife or plants eligible for designation under Federal or State authorities;

(C) lands which are or may qualify for designation as landmarks or natural heritage, historic places, or archeological sites of State or national significance;

(D) lands needed to provide critical recreation and interpretative facilities and access to public lands for visitors to the Gorge including lands identified for park, recreation, open space, trails, or natural areas pursuant to Federal, State, or local plans;

(3) contain a program for protection of the critical and sensitive lands identified by the Commission. This can be through land use controls, incentives and subsidies, land trades, less-than-fee acquisition, including scenic easements and development rights, fee title acquisition or other means pursuant to the provisions of section 11 of this Act;

(4) contain goals and guidelines which establish objectives for the treatment of resources in the Gorge, including urban, rural, and natural resource lands, that set forth appropriate residential, commercial, industrial, timber, agricultural, mining and recreational uses, practices and design standards;

(5) establish procedures for review of Federal, State, and local Implementation Plans, and amendments thereto, for conformance with the goals, guidelines, and standards of the Management Plan;

(6) contain goals and guidelines to promote the economic viability of the communities within the Gorge Area in a manner consistent with the purposes of this Act;

(7) establish procedures for periodic amendments to the Management Plan and Implementation Plans.

CERTIFICATION OF IMPLEMENTATION PLANS

SEC. 10. (a) NOTICE AND LETTERS OF INTENT.—(1) Upon adoption of the Management Plan, the Commission shall transmit a copy of the Management Plan to and notify each Federal and State agency and local government which engages in, assists, regulates, or issues permits or approvals for land management or development in the Gorge that an Implementation Plan shall be submitted within twelve months of the notice. Within sixty days after receipt of such notice, each agency and local government shall submit to the Commission a letter stating that it proposes to develop an Implementation Plan for land management and development with the Area in which it operates or has authority and any agency or local government may request assistance from the Commission in developing an Implementation Plan.

(2) If any agency or local government fails to submit a letter as provided in this section, or fails to submit an Implementation Plan in accordance with the time provided in this section, the Commission may issue to such agency or local government a notice and order pursuant to section 17 of this Act and may adopt an Implementation Plan for that agency or local government.

(b) SUBMISSION OF IMPLEMENTATION PLANS.—Within twelve months after adoption of the Management Plan, all Federal and State agencies and local governments required to submit letters of intent shall submit Implementation Plans to the Commission for review and certification. All such Plans shall provide for regulation of all land management and development within the Gorge Area which the agency or local government may engage in, assist, regulate, or for which it issues permits or approval. The Implementation Plans shall recognize it is the responsibility of the agencies and local governments to enforce the Implementation Plan and utilize the full authority of the agencies and local governments to carry out the purposes of the Act. The Implementation Plan shall be consistent with the Management Plan. The Commission may specify the format and types of provisions to be included within the Implementation Plans.

(c) COMMISSION REVIEW OF IMPLEMENTATION PLANS.—Implementation Plans shall become effective upon review and approval by the Commission. The Commission shall make a good faith effort to complete its review within six months of submission to it of an Implemenation Plan. If the Plan is consistent with the Management Plan and the purposes of this Act, the Commission shall so certify to the agency or local government submitting the Plan.

(d) EFFECT OF SUBMISSION OF INCONSISTENT IMPLEMENTATION PLAN.—If the Commission finds that an Implementation Plan is not consistent with the Management Plan or the purposes of this Act, the Commission shall make a good faith effort to so notify the agency or local government submitting the Plan within six months of submission. The Commission shall state in detail the basis for that decision and shall submit to the agency or local government suggested modifications to the Plan to make it consistent with the Management Plan and the purposes of this Act. The agency or local government shall have ninety days after it receives recommendations from the Commission to make modifications eliminating the inconsistencies and to resubmit the Plan to the Commission for approval. Any resubmitted Implementation Plan shall take effect when and in such form and content as is approved and certified to the local government or agency by the Commission. In the event that the Commission determines that a resubmitted Plan is not consistent with the Management Plan or the purposes of this Act, the provisions of section 10(a)(2) shall apply and the Commission may adopt an Implementation Plan for the agency or local government.

(e) LATER SUBMISSION BY FEDERAL, STATE, OR LOCAL AGENCY OR GOVERNMENT.—(1) In the event that an agency or local government has not complied with the requirements of this section, it may thereafter on written notice to the Commission elect to develop an Implementation Plan, in which event it shall comply with the requirements of this section. Upon certification of such Implementation Plan by the Commission, it shall supersede any Plan that may have

been adopted by the Commission for that local government or agency.

(2) Federal and State agencies and local governments not initially required to submit letters of intent and Implementation Plans to the Commission pursuant to subsections (a) and (b) of this section shall submit letters of intent within sixty days, and Implementation Plans within twelve months, of the occurrence of one or more of the following events:

(A) creation after the effective date of this Act of an agency or local government which is authorized to undertake, assist, regulate or approve activities which constitute land management or development as defined in this Act;

(B) additions to or changes in the functions or authority of an existing agency or local government which authorizes it to undertake, assist, regulate or approve activities which constitute land management or development as defined in this Act; or

(C) a determination by an agency or local government which does not normally undertake, assist, regulate, or approve activities which constitute land management or development as defined in this Act to do so.

(f) EFFECT OF CERTIFIED IMPLEMENTATION PLAN.—Upon certification by the Commission of an Implementation Plan, that Plan shall become the basis for all subsequent decisions by the agency or local government concerning all land management and development and shall overlay and supersede all conflicting or inconsistent statutes, laws, ordinances, plans, rules, and regulations.

(g) AMENDMENTS OF IMPLEMENTATION PLANS.—Either the Commission or an agency or local government having a certified Implementation Plan may propose such amendments as it deems necessary from time-to-time. Proposed amendments shall be reviewed and approved or disapproved in conformance with the requirements of this section.

ACQUISITION

SEC. 11. (a) AUTHORIZATION.—The Commission is authorized to identify fee and less-than-fee interests in lands within the Gorge which shall be acquired and held in public ownership. In the event such lands are not acquired or held by existing Federal or State agencies or local governments, then the Commission is authorized to acquire by donation, purchase with donated or appropriated funds, exchange, bequest, lease, gift or to otherwise acquire fee or less-than-fee interests in any lands, including but not limited to air rights, water rights, mineral rights, development rights, and scenic and conservation easements, which the Commission determines are necessary or appropriate to achieve the purposes of this Act. The Commission may hold and manage such property or may convey or lease such property under such covenants or other contractual arrangements as provided in section 6 as will limit the future use of the property in accordance with the purposes of this Act.

(b) EMINENT DOMAIN.—The Commission may only exercise the power of eminent domain where such power is—

(1) limited to acquisition of critical and sensitive lands,

(2) exercised to acquire full fee title not a less-than-fee interest,

(3) exercised only upon a written determination that all other methods for protecting such lands, including but not limited to land use controls, incentives, and subsidies, willing seller less-than-fee or fee title acquisition are unsuccessful, and

(4) not exercised to acquire buildings or structures which are in existence on the date of enactment of this Act.

The Commission shall separately approve by a two-thirds majority each exercise of the power of eminent domain by official action at a public meetings. Eminent domain proceedings initiated by the Commission shall be governed by the provisions of the Act of August 1, 1888 (23 Stat. 357; 40 U.S.C. 257), except to the extent inconsistent with the provisions of this Act.

(c) CONSIDERATION OF AREA LANDOWNER OFFERS.—The Commission shall give prompt and careful consideration to all offers of sale or transfer made by persons owning real property or any interest therein within the Area, weighing any hardship to the owner which may result from delay in acquisition.

(d) ACQUISITION BY AGENCIES AND LOCAL GOVERNMENTS.—The Commission may recommend to any agency or local government the acquisition of particular lands and the fee or less-than-fee interest therein as appropriate to carry out the purposes of this Act. Notwithstanding any other provision of law to the contrary, any agency or local government is hereby authorized to acquire by donation, purchase with donated or appropriated funds, exchange, bequest or otherwise any fee or less-than-fee interests in any lands in the Gorge identified by the Commission. The Secretary of Agriculture, acting through the United States Forest Service, may acquire through purchase, exchange or otherwise any land within the Gorge notwithstanding the proximity of such lands to be acquired to lands then owned or controlled by the Forest Service. The commission may direct the United States Forest Service to make such exchanges of land as the Commission deems necessary to acquire critical and sensitive lands within the Gorge.

FEDERAL LANDS WITHIN AREA

SEC. 12. Lands owned or managed by any agency of the United States shall remain subject to management and control by the appropriate Federal agency and otherwise subject to the provisions of law applicable to management of such lands. In the case of conflict between any provision of this Act and any other provision of law applicable to Federal management of lands within the Gorge Area, the provisions of this Act shall govern.

INTERGOVERNMENTAL COOPERATION

SEC. 13. (a) RETENTION OF STATE AND LOCAL JURISDICTION.—Nothing in this Act shall diminish, enlarge, or modify any right of the State of Oregon, the State of Washington or any local government of either State to exercise civil and criminal jurisdiction within the Area or to tax persons, corporations, franchises, or property, including mineral or other interests, in or on lands or waters therein.

(b) STATE AND LOCAL LAND USE POWERS FULLY EXERCISABLE.—Nothing in this Act shall be construed to prevent the enactment, adoption or implementation by any State or local government of any law, ordinance, rule or regulation, plan, land use control or other provision of law which is consistent with the applicable State law and with the provisions of this Act. In the case of conflict between any provision of this Act and any other provision of State or local law applicable to lands within the Area, the provisions of this Act shall govern.

INDIAN TRIBAL RIGHTS NOT IMPAIRED

SEC. 14. Nothing in this Act shall be construed to alter, amend, repeal, impair, modify or otherwise affect any treaty or other right of an Indian tribe.

EXEMPTIONS FROM THE ACT

SEC. 15. The provisions of this Act shall not apply to—

(1) the ongoing development of new locks at the Bonneville Dam;

(2) any emergency land management or development by an agency or local government which is essential to the protection of public health or safety or necessary for national security or defense;

(3) any land management or development which has commenced prior to the date of enactment of this Act; or

(4) agricultural activity on lands used principally for agriculture purposes, and commercial forest activities conducted on forest lands as those lands are now or hereafter defined in the respective Forest Practice Acts of Oregon and Washington; excepting only where, upon completion of the agricultural or commercial forest activity, the lands will be converted to a different use.

For purposes of paragraph (3), in the case of land management or development undertaken by or receiving assistance from agencies or local governments, "commencement" shall occur at such time as binding agreements or contractual obligations for the land management or development activity have been entered into and such agreements or obligations cannot be cancelled or modified without substantial monetary loss or penalty, or if no contract or binding agreement is used or required, at such time as actual physical modification of the land or shoreline has occurred. For land management or development consisting of agency or local government approvals or permits for land management or development, "commencement" shall occur at such time as the agency or local government has issued all required permits and approvals for the land management or development activity.

ENFORCEMENT

SEC. 16. (a) INITIATION OF ENFORCEMENT PROCEEDINGS.—(1) The Commission shall have authority to enforce this Act through an administrative notice and order proceeding to be established pursuant to the standards set forth in paragraph (2). Whenever the Executive Committee has reason to believe a use or condition exists in violation of the Act, the Management Plan, an Implementation Plan, interim guidelines or a determination of the Commission pursuant to sections 8 and 10 of this Act, the Executive Committee may direct the issuance of a notice and order to stop work, to assess a civil penalty in an amount not to exceed $500 per day, or to abate the violation and restore the land or shoreline, or any combination thereof. The effect of a notice and order to stop work shall be to require the immediate cessation of such work or activitiy until authorized by the Commission to proceed.

(2) Prior to issuing a notice and order under this subsection, the Commission shall have adopted rules and regulations to implement this section which shall—

(A) establish standards and procedures for the issuance, contents, and service of a notice and order to stop work and for civil penalties and abatement and restoration;

(B) provide that a notice and order to stop work shall be issued only when agencies or local governments have not commenced an enforcement action and where the Commission's Executive Committee determines—

(i) that a volation exists and the violation is causing or can reasonably be expected to cause significant, imminent environmental harm or an imminent danger to the health or safety of the public; or

(ii) that more than thirty days have expired since the issuance of a notice and order to abate and restore and the abatement and restoration ordered therein have not been undertaken or completed;

(C) provide that where a notice and order has been issued pursuant to subparagraph (B), the owner, operator, person, or agency upon whom the notice and order is served may, within thirty days of service thereof, apply to the chair or vice-chair for temporary relief from the notice and order to stop work and that within five days of receipt of such request for temporary relief, the chair or vice-chair shall issue a written decision granting or denying the requested relief or modifying the notice and order to stop work and stating the reasons for decision; and

(D) provide for an administrative appeal of a notice and order pursuant to section 19 of this Act.

(3) Any person adversely affected by a decision of the Commission rendered after an administrative appeal of an enforcement order may, within thirty days of the decision of the Commission, bring an action for review of such order as provided in section 19(e) of this Act.

(b) JUDICIAL RELIEF.—Notwithstanding any other procedure or remedy provided for in this section, the Commission may bring an action for damages, punitive damages, injunctive, declaratory or other relief, including suspension or revocation of a permit or approval, in the United States District Courts of Oregon or Washington to prevent or correct any violation of this Act, the interim guidelines, the Management Plan, an Implementation Plan, or a decision or an order of the Commission.

(c) CRIMINAL PENALTIES.—Any person who knowingly and willfully violates any order of the Commission which is lawfully issued pursuant to subsection (a) above shall be fined no more than $10,000 or imprisoned no more than twelve months, or both.

(d) WITHHOLDING OF FEDERAL FUNDS.—In addition to the remedies provided for in subsections (a) through (c) of this section, no Federal funds shall be granted, loaned, contracted for or in any manner committed or disbursed for, or with regard to any land management or development as defined in this Act which does not comply with the Act, interim guidelines, the Management Plan, an Implementation Plan, or a decision or an order of the Commission.

JURISDICTION OF FEDERAL COURTS

SEC. 17. The courts of the United States shall have exclusive jurisdiction of actions arising under this Act, and venue shall be in the United States District Courts for Washington or Oregon.

APPEALS

SEC. 18. (a) DECISIONS APPEALABLE.—Any agency, local government, or person aggrieved by a decision or order of the Commission made pursuant to sections 8 (including failure of the Commission to find inconsistency thereunder), 10, 11, and 17 of this Act shall be deemed final unless a written appeal stating the basis and arguments therefor is filed in the principal office of the Commission no later than thirty days after entry by the Commission of the decision or order being appealed. Rules and regulations adopted by the Commission shall not be construed as decisions or orders under this section.

(b) ADMINISTRATIVE LAW JUDGES.—Appeal hearings for the Commission shall be conducted by an independent administrative law judge who shall make findings and recommend actions to the Commission.

(c) HEARING PROCEDURE.—All appeal hearings shall be conducted pursuant to sections 554 through 557 of title 5, United States Code.

(d) DECISIONS FINAL.—All decisions of the Commission shall be final unless within thirty days of the decision an action is brought in the United States District Courts for Washington or Oregon challenging the decision.

MITIGATION OF LOCAL REVENUE LOSSES

SEC. 19. Any private lands acquired by the Commission under this Act, whether retained by the Commission or transferred to the administrative jurisdiction of any other department, agency, or instrumentality of the United States, shall be treated as entitlement land within the meaning of sections 1601 et seq. of title 31, United States Code.

AUTHORIZATION OF APPROPRIATIONS

SEC. 20. (a) IN GENERAL.—Effective for fiscal years commencing after September 30, 1984, there are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.

(b) LAND AND WATER FUND.—Effective for fiscal years commencing after September 30, 1984, amounts in the Land and Water Conservation Fund are authorized to be appropriated for the acquisition, in accordance with this Act and other applicable law of lands, waters, and interests therein within the Area.

(c) Effective for the first fiscal year that commences after September 30, 1984, there is authorized to be appropriated such sums as may be necessary for the operation of the Commission and the initial implementation of this Act.

ACQUISITION FUND

SEC. 21. (a) ESTABLISHMENT.—There is established an acquisition fund for the acquisition of lands and interests therein within the Area. This fund shall be available without fiscal year limitation for expenses necessary for acquiring land and interests therein under section 11 hereof.

(b) INITIAL CAPITAL.—The initial capital of the fund shall consist of appropriations made for that purpose. The Commission is authorized to make such subsequent transfers to the fund as it deems appropriate in connection with activities to be carried on through the fund.

(c) APPROPRIATION.—There is hereby authorized to be appropriated a sum not to exceed $ as initial capital of the acquisition fund.

(d) DONATIONS.—The Commission may accept contributions or donations of money, services, and property, real, personal or mixed, for the management, protection, development, acquisition, and conveying of the lands within the Area. Moneys received hereunder shall be credited to the acquisition fund.

COMPLIANCE WITH BUDGET ACT

SEC. 22. No authority under this Act to enter into contracts or to make payments shall be effective except to the extent and in such amounts as provided in advance in appropriation Acts. Any provision of this Act which, directly or indirectly, authorized the enactment of new budget authority shall be effective only for fiscal years beginning after September 30, 1984.

SEVERABILITY

SEC. 23. Should any section, subsection, paragraph, sentence, clause, or phrase of this Act be declared unconstitutional or invalid for any reason, such decision shall not affect the validity of the remaining portions of this Act.

Mr. ROBERT F. SMITH (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

PARLIAMENTARY INQUIRY

Mr. VENTO. I have a parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. VENTO. Mr. Chairman, are there copies of this amendment available for the committee? We have seen no copy of this particular amendment.

The CHAIRMAN. The copies are in control of the Clerk. A copy is being sent to the gentleman from Minnesota [Mr. VENTO].

The CHAIRMAN. The gentleman from Oregon [Mr. ROBERT F. SMITH] will be recognized for 10 minutes, and the gentleman from Oregon [Mr. WEAVER] will be recognized for 10 minutes.

The Chair recognizes the gentleman from Oregon [Mr. ROBERT F. SMITH].

Mr. ROBERT F. SMITH. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, ladies and gentleman of the Committee, I am introducing this substitute as a total substitute bill, and I think now the gentleman from Oregon [Mr. WEAVER] will recognize the reason that I could not offer the other amendments; because this is a bill that was introduced initially by Mr. WYDEN.

I cosponsored this bill. This is a bill to control the Columbia River Gorge. This is a bill that has been cosponsored by every member of the Washington delegation, by every member of the Oregon delegation, save one; by the Senators of Washington and of Oregon; by the Governors of Oregon and Washington.

In 1983 I was a cosponsor of this legislation and this is the kind of Columbia River Gorge control we need in the Pacific Northwest.

My substitute provides that we truly have local control. You will recall when I told you about the important fundamentals of legislation that should be drafted, the first is local control.

In this substitute, the commission, which is a bi-state commission, has 8 members who live inside the impacted areas of the Gorge out of 14 members on the commission. That is a majority of the commission.

That means local control to the people affected; and why not? Does it not follow that if you are going to make long term land use decisions—and remember, when you control land use, you control the value of property. That is like controlling how much money you have in your pocket. If you make those long-term kinds of decisions, should it not and would it not be better to have the people who are affected make those decisions who live in the area and whose neighbors they know will be impacted with their decision.

It seems to me fundamentally reasonable, and ought to be done, and I support that part of this bill.

The second fundamental part is the question of condemnation. Now, while there is strict condemnation in this bill that I am supporting along with my colleagues from Washington and Oregon, this does not have the Federal intrusion that the bill we are now discussing has.

We do not have the players of the Department of Agriculture and the Secretary of Agriculture in this bill. We have a commission formed between two States, logically which should take care of the problems between the two States.

Now, there is Federal opportunity here for assistance; surely, there is, but there is not the condemnation rights of the Federal Government in this bill. That is another reason I support it.

Also in this bill, the other fundamental principle that I believe in is the fact that in this bill, that everybody signed, is the opportunity for those States that have land use laws already on the books to make that the majority position. In other words, any more land use may not exceed the authority of the existing land use laws in that particular or respective State. That is a fundamental issue in this bill.

□ 1615

So, Mr. Chairman, while this bill does a good deal to protect the gorge, which I agree with, by the same token the bill we are considering provides just the opposite, no local control in the gorge, Federal condemnation of land and the elimination of recognition of land use laws in the State.

I suggest this is a reasonable alternative. I want to know why the bill, this bill is not acceptable today. It was acceptable in 1983 and those who want control in the gorge ought to give it to the people locally to control it. They ought to do that, they deserve that. They have not ruined the gorge, else we would not be here. If the gorge was ruined, there would be nothing lovely and beautiful to protect.

The people on the Oregon side have done an outstanding job of protecting our State. We are proud of it. There is lots to protect.

I want you to know that I support this legislation, I want you to know that here is a way that we can protect the lovely gorge that we all love and respect but we can do it with local people making local decisions for local futures.

Mr. Chairman, I reserve the balance of my time.

Mr. WEAVER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I wonder if my good friend from Oregon [Mr. SMITH], would respond to a question.

Mr. ROBERT F. SMITH. Yes.

Mr. WEAVER. The gentleman mentioned that a number of years ago this was endorsed by a large number of Members from Washington and Oregon, including myself.

Mr. ROBERT F. SMITH. I thank the gentleman. I meant to point that out.

Mr. WEAVER. I wonder if the four Senators now support at this time this substitute that he is offering.

Mr. ROBERT F. SMITH. I cannot answer for the four Senators. I can answer for myself as you have answered for yourself.

Mr. WEAVER. Does the gentleman know if the Governors support this substitute?

Mr. ROBERT F. SMITH. Well, I assume the Oregon Governor supports it, since he was enthusiastic in writing it. I have no idea, however.

Mr. WYDEN. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I would be happy to yield to my friend from Oregon.

Mr. WYDEN. I thank the gentleman for yielding.

Mr. Chairman, I want to make this very clear. In 1983—and the gentleman and I have been working on this for years and years—we did in fact introduce that bill in 1983. The Governors supported that legislation in 1983. But today is 1986 and today the Governors of Oregon and Washington support this legislation, the legislation that was introduced by the gentleman from Oregon [Mr. WEAVER].

I think it is important to understand that today, 1986, we have the Governors supporting this bill and not the bill that they were for in 1983.

I thank the gentleman for yielding.

Mr. WEAVER. The gentleman summed it up very accurately.

Mr. AUCOIN. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Oregon.

Mr. AUCOIN. I thank the gentleman for yielding.

My colleague from Portland [Mr. WYDEN], I think makes the point, this is a bill that is 3 years behind the curve. Negotiations have taken place with the Governor's staffs, with the Senatorial staffs, with office and staff of every Member who has been interested in the negotiations. The door, the welcome mat has been opened to the gentleman from Oregon [Mr. ROBERT F. SMITH], and others, over the course of those 3 years. Now what we have before us now is a bill that is endorsed by our Governor, Governor Atiyeh, and I have in hand a letter from him to the Republican senior Senator from Oregon [Mr. HATFIELD], who supports the committee bill, the bill on our side.

In that letter the Governor, who is a Republican and who served in the legislature with my friend, Mr. SMITH, says:

OFFICE OF THE GOVERNOR,
Salem, OR, October 13, 1986.

Hon. MARK HATFIELD,
U.S. Senate,
Hart Senate Office Building,
Washington, DC.

DEAR MARK: I noted with sheer excitement the passage of the Columbia River Gorge Bill through the Senate. As you know, this has been a personal goal of mine since I took office in 1979 and had desperately hoped for this certainty that would benefit generations to come. Now we are on the verge of success.

It came as no easy solution I know. Much conversation and compromise had to take place. However, the goal was never lost and personal differences were set aside.

I also noted the staying power of support among my fellow Republicans, and applaud their vision.

My fingers are crossed awaiting that last wonderful shoe to drop.

Sincerely,

VICTOR ATIYEH,
Governor.

What the gentleman is referring to is, of course, not the gentleman's 3-year-old amendment but this bill facing us now, the 1986 bill, which represents all important players on both sides of the political fence, the political aisle, in the House and in the Senate, and in the State capitals of our two respective States.

Mr. WEAVER. I thank my friend for his very cogent remarks, and I conclude simply by saying that the substitute offered by our good friend from Oregon [Mr. ROBERT F. SMITH] was part of a negotiating process. There were three bills at the time. I was a sponsor actually with Senator PACKWOOD of the strongest protection bill. And the other gentlemen involved were sponsors of a third bill.

In that 3 years, we have negotiated among all the parties a consensus bill that is represented here before the House as H.R. 5705 and passed the Senate as S. 2225. So that is the difference.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I am glad to yield to my friend from Minnesota.

Mr. VENTO. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to this. This would deny the evolution in the compromises that have gone on and go back to a bill 3 years in the past. I think the point has to be made here that there has been a great deal of compromise on my part. I have indicated my displeasure with some of the provisions of this. I think others could say that as well. We are trying to work the will of the body, let the majority work its will. There have been numerous hearings, both field investigations and hearings on the part of Agriculture and Interior and Insular Affairs Committees on many of these bills. What we are trying to do today is bring some conclusion to this. Nothing undermines the process than the continual rehashing of the same issues over and over again, never coming to any conclusion. While I do not like some elements here is this conclusion, I am here to tell you today that this substitute is far worse and I think this body should reject it out of hand.

Mr. WEAVER. I appreciate those kind remarks.

Mr. BONKER. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Washington.

Mr. BONKER. I thank the gentleman for yielding.

I would simply note as I did earlier in the debate that a number of proposals have been advanced in the course of our deliberations on the Columbia Gorge scenic area. Mr. AuCoin and I sponsored a bill at one point; the Governors had a bill; it goes on and on.

But the legislation before us now represents a consensus of almost all the participants who have worked on this legislation. It is put together very, very delicately. No one should be mistaken that the substitute offered by the gentleman from Oregon is not the legislation that the consensus backers want. Indeed the Governor of the State of Washington absolutely would oppose the amendment. Indeed he wanted tougher language in the Gorge bill, not weaker language.

So I think that, as Mr. AuCoin and others have noted, the substitute is not acceptable to the people who support the legislation that is before us sponsored by Mr. Weaver.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield further to me?

Mr. WEAVER. I yield to the gentleman.

Mr. AuCOIN. I thank the gentleman for yielding.

The other problem I have on a substantive basis with the gentleman's substitute, which is a bill 3 years out of date in terms of the negotiations that have commenced and gone on since then, is that the appointment of the members of the commission under the gentleman's substitute would be Presidential appointments. If we are interested in bringing decision making and representation on policy matters closer to the people, we should want the counties to make the appointments, we should want the Governors to make the appointments. But the gentleman's substitute, which is one of the defects in the 1983 bill, calls for Presidential appointments. I do not think that is a vote for local control.

Mr. WEAVER. Would the gentleman say that our friend, our dearest colleague from Oregon has offered a substitute that would make a stronger Federal presence and less local control?

Mr. AuCOIN. Unfortunately, people would have to come back to Washington, DC, to the White House or hope that the President comes to them, if they wanted to speak to the President and have personal input on his appointments for the commission which would set these guidelines.

Mr. WEAVER. Under our consensus bill that we have brought before the House, do not the local county commissioners make the appointments?

Mr. AuCOIN. We bring that appointment process to the people, you see, we bring it to the county commissioners to let them name some of the members of the commission, and then we let the Governors make the other appointments. That is a lot closer to the people, and for that reason I think our bill is infinitely better.

Mr. WEAVER. We are indebted to the gentleman from Oregon for bringing this information to us.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from Oregon [Mr. Weaver] has consumed 8 minutes and has 2 minutes remaining; the gentleman from Oregon [Mr. Robert F. Smith] has 5 minutes remaining.

Mr. ROBERT F. SMITH. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I had imagined the scurrying about that would occur after the offer of this substitute. I did so to make the point, Mr. Chairman, that we are considering a bill here drafted, in effect, by the Senate. Even the spokesmen from that side have said this is a Senate bill we are considering.

The House has had really no opportunity, none, in fact, to craft a bill of its own for various reasons that you have heard about all day long.

The bill, this substitute is a matter which all Members can support, and I can support what we now are calling control of the gorge.

May I point out that this is local control and the Presidential appointments are only those recommended by the Governors, and the counties to make their appointments. In fact, it is stronger local control because there must be a locally elected official from each of the counties, and that is six, on the commission itself. So at least we have the influence of someone who has been elected to something who is responsible for their duties and may be recalled. That is local control.

There have been allegations that those who oppose the Senate bill will be held in such a position as being antienvironmentalist somehow. I think this substitute gives everybody the point and the idea that it is not the question of whether or not we try to formulate a protection for the Columbia River Gorge, it is how we go about it. And that is exactly what I have portrayed here.

This is totally rejected, they say the issue is 3 years old. Now, we did introduce it 3 years ago, that is for sure, but it certainly achieves the very important goals I mentioned for the people on the Oregon side, local control of their own lives.

So I offer it in good faith to those who believe that some of us are intransigent on this point. I offer it in good faith, that an answer in the gorge is within reach, but I also offer it in the same instance that I was offered the Senate bill, in the middle of the night. We have not heard this bill and that is too bad. That is a flaw. We have not heard the other bill either, and that is a flaw.

Rather than rushing off and crafting legislation at the ninth hour, I guess my final point is simply that when you are dealing with people's lives and their futures, you must go slow. The all-powerful Federal Government ought to be very careful how it extends its tentacles into the lives of local people. And before we run away in the euphoria of protecting the gorge, let us look again at how we are doing and who we are impacting and how their lives will be affected.

Mr. Chairman, I have no more speakers on my side, and I reserve the remainder of my time.

The CHAIRMAN. The gentleman from Oregon representing the committee has the right to close debate. The gentleman from Oregon [Mr. Weaver] has 2 minutes remaining, and the gentleman from Oregon [Mr. Robert F. Smith] has 1 minute remaining.

Mr. WEAVER. Mr. Chairman, I yield myself such time as I may consume.

I just simply say to my good friend from Oregon that the substitute he has offered was part of the building block process that finally emerged with a consensus bill that is now supported by both Governors, all four Senators and almost every House Member from Washington and Oregon.

□ 1630

And this consensus bill had the work of at least a dozen House Members all this year giving their fine suggestions and negotiations. It is a highly tuned House product that I think we can be proud of.

I urge a "no" vote on the amendment.

Mr. ROBERT F. SMITH. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would only say that it is interesting that the three issues I mentioned, local control, restricting condemnation and recognition of local land use laws, suddenly got lost in the so-called compromise. It was there all the time, and that is where I was.

I just want to make the point that I have not left those ideals, but I have been left.

So I recommend we support the substitute.

Mr. Chairman, I yield back the balance of my time.

Mr. WEAVER. Mr. Chairman, I yield the remainder of my time to the gentleman from Oregon [Mr. WYDEN].

Mr. WYDEN. Mr. Chairman, I just want to say that, in my view, a lot of those issues have not been lost in the efforts to forge the compromise. Particularly on the condemnation question, the legislation that we are considering today does provide the commission with the authority to disapprove the Secretary's proposed condemnation of private lands during the interim period. I think that is a significant effort, Mr. Chairman, to deal with the condemnation issue.

Mr. WEAVER. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Oregon [Mr. ROBERT F. SMITH].

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. ROBERT F. SMITH. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members answered to their names:

The Clerk announced the following pair:

On this vote:

Mr. Hansen for, with Mr. Hayes against.

Mr. ROE changed his vote from "aye" to "no."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

□ 1700

The CHAIRMAN. Under the rule, the gentleman from Oregon [Mr. ROBERT F. SMITH] may offer another amendment.

AMENDMENT OFFERED BY MR. ROBERT F. SMITH

Mr. ROBERT F. SMITH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by ROBERT F. SMITH: Page 8, line 4, after the comma, insert "at least one of whom shall be a resident of the Scenic Area,".

Page 8, line 6, after the comma, insert "at least one of whom shall be a resident of the scenic area,".

Mr. ROBERT F. SMITH (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The CHAIRMAN. Under the rule, the gentleman from Oregon [Mr. ROBERT F. SMITH] will be recognized for 10 minutes, and the gentleman from Oregon [Mr. WEAVER] will be recognized for 10 minutes.

The Chair recognizes the gentleman from Oregon [Mr. ROBERT F. SMITH].

Mr. ROBERT F. SMITH. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this amendment that I have before the House at the present time goes to the very heart of the issue of establishing a commission that is now going to control what occurs in the scenic area of the areas of Oregon and Washington. The commission as proposed in the bill is comprised of 12 members, 6 to be appointed by the 6 counties facing each other across the river and 6 to be appointed by the Governors of the various States. In an effort to retain local control in this situation, this amendment provides that the Governors of Oregon and Washington must appoint one of their three appointees from the areas inside the scenic area of the gorge on the Washington and Oregon sides respectively. That expands the local control of the commission to 8 members out of 12 who will live and reside in the gorge within the 6 counties and within the gorge area.

It is a very important amendment, Mr. Chairman, since we have been talking about who is going to control the lives of the people who live in and around the Columbia River. It is especially important since we have brandnew Federal condemnation procedures in this bill and we have brandnew eminent domain features within the Department of Agriculture.

There is a provision in this bill that will allow an override of any condemnation by the Federal Government by the commission, a super majority, but only in the scenic area and not in the special management area and the urban area.

This an essential amendment if we are going to carry out the question of local control. It does no harm to the bill. It seems reasonable. It ought to be adopted by both sides. I ask you to support this rather harmless looking amendment, but so essential to local control within the gorge itself.

Mr. MORRISON of Washington. Mr. Chairman, will the gentleman yield?

Mr. ROBERT F. SMITH. I yield to the gentleman from Washington.

Mr. MORRISON of Washington. Mr. Chairman, I thank the gentleman for yielding.

This is one of the amendments that we did adopt within the Forestry Subcommittee of the Agriculture Committee. I think it is a logical addition to insure local control as far as this commission is concerned.

Mr. Chairman, I will support the gentleman's amendment.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. ROBERT F. SMITH. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, I thank the gentleman for yielding.

It seems to me this is an eminently fair amendment. I do not see how anyone could oppose it and I urge my colleagues to support it.

Mr. ROBERT F. SMITH. Mr. Chairman, I reserve the remainder of my time.

The CHAIRMAN. The gentleman from Oregon [Mr. WEAVER] is recognized in opposition to the amendment.

Mr. WEAVER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the commission that is established under this bill does much of the work in carrying out the provisions of this bill. It has been very carefully designated a local government commission. Six of the members are appointed by the county commissioners of the affected counties. Six of the members are appointed by the Governors.

What my friend from Oregon [Mr. ROBERT F. SMITH] would do is take one of the three appointees of the Governor and require that they be from the scenic area.

The gentleman's amendment would say that one of the appointees of each Governor would be from the scenic area.

Now, this amendment was adopted in the subcommittee, but it was taken out in the full committee. We had a vote on this amendment in the full Agriculture Committee and it was defeated.

Mr. Chairman, I would be in a spirit of cooperation with my friend from Oregon if he would change "scenic area" to "affected counties."

I would ask my friend from Oregon if he would be willing to change "scenic area" to "affected counties"; in other words, each Governor would have to appoint one of his appointments to this commission from an affected county. I think we could expedite the work of this bill in this House. I would agree to such an amendment as a good compromise. It was, as I say, passed in the subcommittee, but defeated in the full Agriculture Committee, and we could split the difference.

Mr. ROBERT F. SMITH. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I am delighted to yield to the gentleman from Oregon.

Mr. ROBERT F. SMITH. Mr. Chairman, I thank the gentleman for yielding.

I believe my recollection is correct that this is not an amendment that was defeated in the full committee. The amendment defeated in the full committee was the gentleman's question about whether or not counties are to appoint people within the scenic area.

Mr. WEAVER. The gentleman is correct.

Mr. ROBERT F. SMITH. Mr. Chairman, I thank the gentleman.

I suggest, the gentleman has made an offer here and I wanted to correct the record. The whole purpose, and as the gentleman knows, we debated this issue of whether or not the county appointees ought to be within the scenic area. It is very important to me that the Governors be allowed to appoint somebody on each side of the river living in the scenic area.

Mr. WEAVER. Mr. Chairman, reclaiming my time, I will tell my dear friend that the Governor can appoint all three members from the scenic area if the Governor wishes. The Governor has under this bill full authority and ability to appoint all three members from the scenic area. They can do that now.

But if my friend wishes to restrict the Governor on one of his appointments to the affected counties, I will accept his amendment.

Mr. AUCOIN. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to my friend, the gentleman from Oregon.

Mr. AUCOIN. Mr. Chairman, I appreciate the gentleman yielding.

I would like to pose a question to my friend from Oregon [Mr. ROBERT F. SMITH]. As I read the gentleman's amendment, I believe that persons who reside in the urban areas of the gorge, and that is where most of the population does in fact reside in the urban areas, they would be ineligible for appointment to the commission, unless I misunderstand the gentleman's amendment. If that is true, I would just ask the gentleman, and this is not meant to be a hostile question at all, would it not be better to allow a little broader area for these gubernatorial appointments so that the areas of population concentration where most of the people live can be eligible for these appointments?

If the gentleman does not do that, the way I understand his amendment, he is going to exclude about 23,000 of the 40,000 people who live within the gorge from being eligible for appointment. I may be wrong, but that is the way I read the gentleman's amendment.

Now, the gentleman from Oregon [Mr. WEAVER] has the time, so he would have to yield to the gentleman.

Mr. ROBERT F. SMITH. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I am delighted to yield to the gentleman from Oregon.

Mr. ROBERT F. SMITH. Mr. Chairman, I thank the gentleman for yielding.

This amendment states that the Governors shall appoint one resident of the scenic area. The scenic area is the designation on the map in Oregon and Washington, as the gentleman well knows, inside of which are the special management areas, inside of that are the urban areas. The scenic area is the line surrounding that to be protected. There are more than 41,000 people who live in the scenic area, 20,000 of whom live on the Oregon side.

No one is suggesting that a Governor appoint a developer or an environmentalist.

I am very interested in the point that if the Governors appoint somebody within the scenic area, that will mean there will be 8 members of the 12-member commission who live within the scenic area and the affected counties.

Mr. WEAVER. Mr. Chairman, may I ask the gentleman from Oregon a question. Can the Governor now appoint one, two, or all three members in the scenic area under the bill?

Mr. ROBERT F. SMITH. Oh, absolutely correct.

Mr. WEAVER. They can already do that.

Mr. ROBERT F. SMITH. If I may answer the gentleman's question, however, the point remains——

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Minnesota.

Mr. ROBERT F. SMITH. Mr. Chairman, will the gentleman let me answer his question?

The CHAIRMAN. The Chair would like to point out that the gentleman from Oregon [Mr. WEAVER] has the time.

Mr. WEAVER. Mr. Chairman, I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, before the time runs out on our side, I appreciate the discussion that is going on here, but the fact is that I think it is important, and it is obvious that the type of compromise the gentleman from Oregon is going to offer here is not being accepted, but I thought probably we ought to look at this in a somewhat different light.

We have given extraordinary powers to the commission that is created by a compact in this bill. The fact is that if the Governor—if, for instance, the counties select all residents from the scenic area, and they can do that, the six counties, then the Governor would have the opportunity to provide some balance in terms of the commission.

If, for instance, the counties appointed no one from the scenic area, then the Governor would have the opportunity to provide balance by appointing members from the scenic area; but to tie the hands of the Governor in this particular way by saying that he must appoint one, when indeed we know the counties, the active interests in those counties would be for members who live in that scenic area to be the representatives from the county, I think that is logical, would eliminate some flexibility.

The fact of the matter is that I do not think it is an accident that the operative vote here for dealing with some of the plans that are developed provides for a two-thirds vote.

□ 1715

So if you effectively provide that, then they could block just about any type of plan that would represent a broader interest in this issue.

So I think that the argument here that I would portray on this point—it is a small point, perhaps, but I think an important one—is that we ought to

not accept the Smith amendment, and I would urge my colleagues to not accept the amendment.

Mr. WEAVER. Mr. Chairman, I will make my offer one more time and conclude. Would the gentleman accept "affected counties"?

Mr. ROBERT F. SMITH. Will the gentleman yield?

Mr. WEAVER. Will the gentleman say "yes" or "no," and then he can have his own time? I will accept "affected counties."

The CHAIRMAN. The Chair will inform the gentleman from Oregon [Mr. WEAVER] that he has 2 minutes remaining, and the gentleman from Oregon [Mr. ROBERT F. SMITH] has 5½ minutes remaining.

Mr. WEAVER. Mr. Chairman, I reserve the balance of my time.

Mr. ROBERT F. SMITH. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, the gentleman has made an offer which I cannot accept. The reason that I cannot accept it is because the rule was so proscribed that there be no amendments to my amendments. I did not write the rule. I was there at 1:30 this morning when it happened.

Mr. WEAVER. If the gentleman will yield, I have asked the Parliamentarian. He may do this. He may do it by unanimous consent.

PARLIAMENTARY INQUIRY

Mr. AUCOIN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. AUCOIN. Mr. Chairman, my question is this. Would it not be possible under the rule for the gentleman from Oregon [Mr. ROBERT F. SMITH] by unanimous consent to modify his amendment in the manner suggested?

The CHAIRMAN. Only by unanimous consent.

Mr. AUCOIN. So the gentleman is permitted to do that if he wishes to make a unanimous-consent request under the rule.

Mr. ROBERT F. SMITH. Mr. Chairman, I yield 1 minute to the gentleman from North Carolina [Mr. WHITLEY].

Mr. WHITLEY. Mr. Chairman, I want to be sure that I understand the gentleman's position. The gentleman's amendment, which as I recall passed in the Subcommittee on Forests and Family Farms of the Committee on Agriculture, would require that one of the Governor's three appointees come from the scenic area. Is that correct?

Mr. ROBERT F. SMITH. If the gentleman will yield, that is correct.

Mr. WHITLEY. Mr. Chairman, as I understood the gentleman's description just a moment ago of the scenic area, he seemed to be talking about the outer boundaries of the entire area.

Mr. ROBERT F. SMITH. That is correct.

Mr. WHITLEY. Which would include both the urban areas and the nonurban areas that are within the outer limits of the scenic area.

Mr. ROBERT F. SMITH. That is correct.

Mr. WHITLEY. So it seems to me that the offer that was just made by the gentleman from Oregon [Mr. WEAVER] is essentially to accept the amendment that the gentleman has offered. Is that correct?

We have no objection, so far as the Committee on Agriculture is concerned, to accepting the amendment with the understanding that we are talking about the outer boundaries of the scenic area, the entire scenic area.

Mr. ROBERT F. SMITH. Mr. Chairman, I think that the point is that the scenic area runs down through six counties on each side of the river. It does include most of the urban areas, and not some of the rural areas; 41,000 of the people living in the six counties live within the scenic area. So there is plenty of opportunity to find anybody whom a Governor would want to serve in that capacity. I only make that point to the gentleman. I am considering the issue.

Mr. Chairman, how much time do I have remaining?

The CHAIRMAN. The gentleman from Oregon [Mr. ROBERT F. SMITH] has 2½ minutes remaining.

Mr. ROBERT F. SMITH. Mr. Chairman, I yield myself such time as I may consume.

Mr. WEAVER. Mr. Chairman, will the gentleman yield?

Mr. ROBERT F. SMITH. I yield to the gentleman from Oregon.

Mr. WEAVER. Mr. Chairman, I will accept the amendment, and I yield back the balance of my time.

Mr. ROBERT F. SMITH. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oregon [Mr. ROBERT F. SMITH].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ROBERT F. SMITH

Mr. ROBERT F. SMITH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROBERT F. SMITH: On page 46, after line 16, add the following new subsection:

"(g)(1) Nothing in this Act shall affect any land management or development which has commenced before the date of enactment of this Act.

(2) For the purpose of paragraph (1), the term "land management of development" refers to projects and activities, or permits and approvals which allow projects and activities, which may impact, alter, or modify the physical appearance, form, or character of land or shorelines, and the structures thereon, within the Scenic Area, including—

(A) construction, expansion, modification, or location of buildings, mobile homes, energy facilities, transmission and receiving facilities, or other structures;

(B) agency or local government approvals of plans, zoning and other land use ordinances, subdivisions, or other land use or building approvals or permits;

(C) sales or conveyances by agencies of timber of timber lands, timber harvesting, and application of forest practices regulations;

(D) land clearing, grading, and filling, except land cultivation for agricultural activities;

(E) road or highway construction or expansion;

(F) sand, gravel, or mineral extraction; and

(G) a generalized, coordinated land use map and policy statement of the governing body of a local government that interrelates all functional and natural systems and activities relating to the use of lands including, but not limited to, sewer and water systems, transportation systems, educational facilities, recreational facilities, and natural resources and air and water quality management programs.

Mr. ROBERT F. SMITH (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The CHAIRMAN. The gentleman from Oregon [Mr. ROBERT F. SMITH] will be recognized for 10 minutes, and a Member opposed will be recognized for 10 minutes.

Is the gentleman from Oregon [Mr. WEAVER] opposed to this amendment?

Mr. WEAVER. I am, Mr. Chairman.

The CHAIRMAN. The gentleman from Oregon [Mr. WEAVER] will be recognized for 10 minutes.

The Chair recognizes the gentleman from Oregon [Mr. ROBERT F. SMITH].

Mr. ROBERT F. SMITH. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this is again a very important amendment to the construction of this bill. Currently the bill, and even by the colloquy that the gentleman had, does recognize that, at least in the colloquy, that there is some sense that local land use plans indeed be considered by the commission before the adoption of another Federal overlay of land use plans on top of the situation which we have today.

This amendment would provide relatively the same language that we had all agreed upon initially in these bills that we cosponsored earlier, and that is simply that if the State has land use laws, then the Commission cannot overlay superior land use laws over those existing in that particular State.

Let me just clear this out for the Members so that we know what we are talking about. I mentioned earlier in this discussion that Oregon has the most restrictive, comprehensive land use laws in America. We zone every acre. We control every building site. We control every expansion. A State

commission is appointed, not elected, to control land in Oregon.

Then does it not stand to reason that while we are compiling new kinds of Federal intervention through the Department of Agriculture, we are providing for new kinds of Government condemnation of private land in this situation, that if you have land use plans already in effect, you ought not to have to be overrun by another Federal land use commission layered on top of your existing nonelected State commission?

If this bill passes the way in which it is formulated, without this amendment, the State of Oregon, which has the most progressive land use laws in America, will be subject to an additional Federal overlay—two nonelected commissions running land use planning in our State.

I suggest that that is too high a price to pay to control the gorge. We can control the gorge without that. The gorge on the Oregon side is controlled already. Ninety percent of the gorge is now owned by the Federal Government on the Oregon side. Ten percent is still left in private hands—10 percent.

It has been testified to by the Forest Service that they will take about 100,000 acres of private land if this bill passes, leaving 25,000 acres in the scenic area in private hands.

We are going to lose much more private land to the Federal Government if this bill passes, but in the meantime are we going to be subject to an additional Federal land use nonelected Commission determining what happens in the gorge? I suggest that this amendment is necessary to protect what we have already—land use planning in the gorge.

Mr. Chairman, I yield 2 minutes to the gentleman from Washington [Mr. MORRISON].

□ 1725

Mr. MORRISON of Washington. Mr. Chairman, I thank the gentleman for yielding me this time and wish that I could rise in support of his amendment. But let me point out to you the difficulty we have with this.

We concede the fact that the State of Oregon has the most restrictive land use laws within the Nation, and I commend them for this. Under these circumstances, you would say that is more than adequate, and it probably will turn out to be more than adequate.

I have predicted that as the bi-state commission prepares its guidelines to apply in this area that with the exception of perhaps a few items related directly to scenic values, that Oregon constituents of Mr. SMITH and Mr. WYDEN will, in fact, not be impacted by the changes that are proposed, but they will have access, of course, to the economic development funds and other opportunities.

However, the amendment proposed by the gentleman from Oregon [Mr. SMITH], now would apply the Oregon land use plan as the only plan within the State of Oregon, and we are going through this procedure then of appointing a bi-state commission to have essentially authority only over decisions to be made on the Washington side of the Columbia River. I personally feel that it is not appropriate nor fair, and so I must oppose the gentleman on this particular amendment and thank him for yielding.

Mr. WEAVER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I oppose the amendment as well for the exact reasons that our friend from Washington State [Mr. MORRISON], opposes the amendment. It is not fair.

I suppose being from Oregon I can say, gee, we have got a great land use law in Oregon and all, but we have got to treat Oregon and Washington the same. That is fair. Our friend from Washington State [Mr. MORRISON], opposes the amendment because the bill should apply equally to Washington and Oregon, and this amendment would, of course, put an onus on the State of Washington that makes an imbalance between the two States.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Oregon.

Mr. AuCOIN. Mr. Chairman, I appreciate the gentleman yielding.

The problem I have with the gentleman's amendment is that in addition to the disparity of treatment between the two States, as the gentleman from Washington [Mr. MORRISON] pointed out, is that it does one thing that I do not think is very useful or proper, in fact, and that is that it puts Congress in the position of making a determination for the locally appointed commissioners as to what should be the substance and the detail of the management decisions. We are sitting here in Washington by this amendment saying that the LCDC regulations in Oregon are, in our judgment, those that should be followed for the purposes of managing the Gorge on the Oregon side. I think we ought to leave it to the locally appointed commissioners to decide based on the framework that LCDC regulation gives Oregonians, to decide how they can apply, how they arrive at their management decisions.

But for us to just mandate what those are supersedes the determination of the commissioners who are appointed locally and I think is wrong.

Mr. WEAVER. Mr. Chairman, the gentleman from Oregon makes an excellent point.

I reserve the balance of my time.

Mr. ROBERT F. SMITH. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, there is no language in this bill that says this is a mandated land use law. The language does say that if the commission determines that there be land use laws, they cannot be more stringent that the LCDC laws in the State of Oregon. They can certainly be less stringent and they can be anything on the Washington side up to and at the level of land use laws.

Very frankly, this language again was in the original bill that we all agreed to initially and we all cosponsored. So suddenly it is wrong to say that Oregon has outstanding land use laws and that we ought not to have another Federal bureaucracy running over us.

Now I see nothing wrong with the application of this amendment. I suggest that if Washington had this land use law regulation there would be no reason to protect the gorge. We would not be here in this situation fighting about Federal domination, Federal eminent domain and Federal taking of private property.

I reserve the balance of my time.

Mr. WEAVER. Mr. Chairman, I yield such time as he may consume to the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. Mr. Chairman, this completely pulls the rug out from under the proposals of this bill, carefully structured provisions of this bill. This just says that we are going to continue on with the status quo, we are not going to have a national designation, but there is going to be no degree of uniformity on what goes on on one side of the river and what goes on on the other.

If a particular county adopts the plan before the enactment of this measure, that would be the plan that would dictate what goes on. I concede that the State of Oregon, based on my colleague's comments, has a rather good land use plan. But the fact of the matter is this could be interpreted as being static. It would never be changed, there could never be any modifications, so it would fit within the purpose for which we are creating this particular designation. I think the colloquy between the gentleman from Oregon [Mr. WEAVER] and the gentleman from Oregon [Mr. WYDEN] pointed out the way that this will coordinate. Certainly it is the anticipation and the hope and I think realistically it will be the reality that, in fact, the plans that have been developed will be built upon by the commission and by the others that are devising plans in coordination with the counties in terms of what the land use will be.

So I do not think there is a necessity for this. I think it makes it static. I

think that it really undermines the entire purpose and the carefully structured provisions of this bill, Mr. Chairman, and I would hope we would defeat this amendment for that reason.

Mr. WEAVER. Mr. Chairman, I will only take 10 seconds to conclude after the gentleman from Oregon has yielded back the balance of his time.

Mr. ROBERT F. SMITH. Mr. Chairman, I believe I have the right to close debate.

The CHAIRMAN. The gentleman from Oregon [Mr. WEAVER] has the right to close debate representing the committee.

Mr. ROBERT F. SMITH. I thank the Chair.

The CHAIRMAN. The gentleman from Oregon [Mr. ROBERT F. SMITH] has 3 minutes remaining.

Mr. ROBERT F. SMITH. Mr. Chairman, I yield myself such time as I may use.

Mr. Chairman, I just want to again refute the charge that all we are demanding is the status quo and a static situation.

My goodness, land use laws in Oregon are not status quo by any means. So I suggest the adoption of this amendment to provide fairness to Oregonians while we are correcting the problem on the other side of the river in the State of Washington.

Mr. Chairman, I yield back the balance of my time.

Mr. WEAVER. Mr. Chairman, I yield myself such time as I may consume and rise in strong opposition to this amendment. It is unfair to the State of Washington. The gentleman from Washington [Mr. MORRISON] opposes this amendment.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oregon [Mr. ROBERT F. SMITH].

The amendment was rejected.

□ 1735

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. GRAY of Illinois) having assumed the chair, Mr. MONTGOMERY, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5705) to protect and provide for the enhancement of the resources of the Columbia River Gorge, and for other purposes, pursuant to House Resolution 596, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. ROBERT F. SMITH

Mr. ROBERT F. SMITH. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. ROBERT F. SMITH. I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. ROBERT F. SMITH of Oregon moves to recommit the bill, H.R. 5705, to the Committee on Agriculture.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ROBERT F. SMITH. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 290, nays 91, not voting 51, as follows:

□ 1745

The Clerk announced the following pairs:

On this vote:

Mr. Hayes for, with Mr. Hansen against.
Mr. Moody for, with Mr. Barton against.

Mr. BROWN of Colorado and Mrs. MARTIN of Illinois changed their vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WEAVER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Oregon?

There was no objection.

CORRECTING ENROLLMENT OF S. 1200, IMMIGRATION REFORM AND CONTROL ACT OF 1985

Mr. RODINO. Mr. Speaker, I offer a concurrent resolution (H. Con. Res. 414) to correct the enrollment of the bill S. 1200, and ask unanimous consent for its immediate consideration.

The SPEAKER pro tempore. The clerk will report the concurrent resolution.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 414

Resolved by the House of Representatives (the Senate concurring), That, in the enrollment of the bill (S. 1200) to amend the Immigration laws, and for other purposes, the Secretary of the Senate shall make the following corrections: In subsection (k) of section 274B of the Immigration and Nationality Act (inserted by section 102(a) of the bill)—

(1) in paragraph (1), strike "or referring and insert "referring, or discharging", and

(2) in paragraph (2), strike the closing quotation marks and succeeding period at the end of subparagraph (B) and insert below such subparagraph the following: The provisions of subsections (m) and (n) of section 274A shall apply to any joint resolution under subparagraph (B) in the same manner as they apply to a joint resolution under subsection (1) of such section.".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. LUNGREN. Mr. Speaker, reserving the right to object, and I shall not object, I just want to say that this is something worked out with the minority to take care of a truly technical problem. We have been working on it all day. We have no objection to it.

Mr. RODINO. Mr. Speaker, this is correct.

Mr. LUNGREN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. The Chair recognizes the gentleman from New Jersey [Mr. RODINO].

Mr. RODINO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the antidiscrimination provisions contained in this bill are designed to protect individual legal aliens who intend to become citizens from possible, though unlikely, discrimination resulting from the presence of employer sanctions.

In our statement of managers, therefore, we have indicated that the antidiscrimination provisions in the conference report are intended to act as a complement to the sanction provisions, and must be considered only in this context. I would like to read some of our statement of managers language to emphasize this point.

The antidiscrimination provisions of this bill are a complement to the sanctions provisions, and must be considered in this context. The bill broadens the title VII protections against national origin discrimination, while not broadening the other title VII protections, because of the concern of some Members that people of "foreign" appearance might be made more vulnerable by the imposition of sanctions. While the bill is not discriminatory, there is some concern that some employers may decide not to hire "foreign" appearing individuals to avoid sanctions.

The antidiscrimination provisions of the bill will only provide this broadened protection while the sanctions are in effect; if the sanctions are repealed by joint resolution, the antidiscrimination provisions will also expire, the justification for them having been removed.

The antidiscrimination provisions would also be repealed in the event of a joint resolution approving a GAO finding that the sanctions had resulted in no significant discrimination, or that the administration of the antidiscrimination provisions had resulted in an unreasonable burden on employers.

In this regard, the conferees also expect that GAO would specifically look into the issue of whether the antidiscrimination mechanism and remedies are being utilized in a manner that is inconsistent with their original purpose (i.e. to guard against employment discrimination based on national origins or citizenship status). Conferees wish to emphasize that the antidiscrimination provision has been included in order to respond to the fears and concerns expressed by many that sanctions will result in employment discrimination based on national origins or citizenship status. Thus, the antidiscrimination provision does not in itself in any way set a precedent for the expansion of other title VII protections. Furthermore, nothing in this bill shall prevent the use of language as a Bona Fide Occupational Qualification.

All conferees clearly agreed that we do not intend this provision to act as a precedent for future efforts to broaden civil rights coverage generally for classes now protected under title VII, nor is it the intent of this Congress that this language be abused by some who would hope to establish, through its administrative procedures, a particularized agenda. In fact, in the statute, we have specifically said that such exploits might jeopardize the entire Frank mechanism.

We clearly do not expect to see harassment suits initiated under this language, nor efforts to extort jobs from small employers through the threat of administrative action. In this regard, we incorporated into the attorneys' fees provisions of the Frank amendment limitations on recovery. We agreed that attorneys' fees should not be awarded unless the losing party's argument "is without reasonable foundation in fact or law." This language is intended to frustrate frivolous suits by taking away the incentive to bring them.

Further, it should be clear that the possible sunset of Frank is tied to the absence of "significant discrimination" resulting from sanctions. Such a sunset is intended to parallel the expedited sunset contained in the original Kennedy language in the Senate bill. We failed to include this language in our haste to draft the finished product, and that is the reason for this amendment. With the adoption of this amendment, then, both Frank and sanctions will be eligible for sunset by an expedited process which guarantees floor consideration following an appropriate finding by the Comptroller General.

The SPEAKER pro tempore. The question is on the concurrent resolution.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

PRESIDENT'S COUNCIL ON HEALTH PROMOTION AND DISEASE PREVENTION ACT OF 1986

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce be discharged from further consideration of the Senate bill (S. 2057) to establish the President's Council on Health Promotion and Disease Prevention, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. RITTER. Mr. Speaker, reserving the right to object, does the gentleman from California intend to offer his amendment?

Mr. WAXMAN. Mr. Speaker, will the gentleman yield?

Mr. RITTER. I yield to the gentleman under my reservation.

Mr. WAXMAN. I thank the gentleman for yielding.

Yes. We do intend to offer an amendment in the nature of a substitute that would embody the agreement that we worked out with the minority and which we feel would make this a more perfect piece of legislation.

Mr. Speaker, S. 2057 provides for the establishment of a President's Council on Health Promotion and Disease Prevention. The legislation was reported unanimously by the other body. The amendment I have offered will clarify the responsibilities of the Council and the composition of Council membership. The amendment has been reviewed by our colleagues on the other side of the aisle and I know of no objection to its consideration.

The purpose of this Presidential Council is to evaluate the effectiveness of Federal, State, and local health promotion and disease prevention programs. An objective study of this kind has never before been commissioned and will provide useful information on the characteristics of successful and unsuccessful health promotion programs.

The Council is charged with responsibility for identifying steps individuals can take to promote health and reduce their risk of disease in four areas.

First, reducing the risk of cancer and heart disease. These are the Nation's leading causes of death.

Second, the proper use and benefits to health of exercise;

Third, obtaining adequate nutrition in the diet and understanding the relationship between proper nutrition and the prevention of disease;

Fourth, promoting proper dental hygiene and reducing the incidence of oral disease.

The Council will be composed of 15 members appointed by the President; 18 months after the Council is established, it will complete its work and submit a report to the President and Congress on its findings.

The Council's activities will generate valuable information to guide the development of health promotion and disease prevention programs.

I urge support for the amendment and passage of the legislation.

I ask unanimous consent that all Members have 5 legislative days to revise and extend their remarks.

Mr. RITTER. Mr. Speaker, I wish to commend the gentleman from California for bringing this bill to the floor at this time. Not only do I support this bill, but it is supported by the ranking Republican of the Subcommittee on Health and the Environment of the Energy and Commerce Committee, Mr. MADIGAN.

This bill to establish the President's Council on Health Promotion and Disease Prevention was introduced in the other body on February 6, 1986, by Senator HATCH, Senator LUGAR, and Senator KENNEDY. It was passed in the Senate under unanimous consent on June 16. I introduced a companion bill, H.R. 4723, in the House on April 30, 1986. The intent of this bill is to establish a council that will crystalize the value of prevention in the public mind.

Why shouldn't our most fitness-conscious, extremely healthy, senior-citizen President lead the charge of a prevention conscious America?

Because of the critical need and importance of prevention measures, the President of the United States, through the President's Council on Health Promotion and Disease Prevention, would focus national attention on health promotion and disease prevention while encouraging individual and joint efforts among government, business, health professionals, and community groups to take action in preventive activities.

The President's Council on Health Promotion and Disease Prevention will be one important part of this Congress' actions to improve the health of Americans. The President's Council of Health Promotion and Disease Prevention would—and this list is by no means complete—establish a council to:

First, crystalize the value of prevention in the public's mind;

Second, identify those populations who can benefit most from increased emphasis on prevention and health promotion and developing programs for them, especially for the elderly, poor, women, and minority population;

Third, encourage private sector participation in disease prevention and health promotion activities;

Fourth, develop and provide incentive plans to encourage the creation of programs in such places as schools, businesses, and community centers;

Fifth, encourage State and local governments to emphasize prevention activities and research; and

Sixth, evaluate available health promotion and disease prevention resources and suggest methods for better use of these resources.

Our Nation needs to continue and strengthen its commitment to preventive health measures. In a very real sense, Mr. Speaker, we can all benefit by giving the ounce of prevention that will provide a pound of cure.

Americans will spend nearly $1.2 billion evey day for health care. This enormous financial burden weighs heavily on individuals, businesses, and our society as a whole. And prevention—by looking to the future to avoid physical, emotional, and financial burdens—is an effective way to help address health concerns and costs.

Prevention has proven to work very well. The case with heart disease illustrates this. In the last 15 years, the mortality rate from coronary heart disease in persons aged 35 to 74 has fallen more than 20 percent. Healthier lifestyles played the biggest role in reducing this death rate. This means over 800,000 lives have been saved since 1968. And this translates into an annual dollars savings of 10 billion in direct costs for care and treatment, in addition to the immeasurable value of avoiding the trauma of those individuals and families affected by heart disease.

Public focus on prevention of consensus-acknowledged, health-damaging behaviors or risks also has the salutary effect of giving citizens some greater perspective on the hazards they face in a modern technological society. Prevention programs already underway have, most naturally, engaged in priority rankings of hazards and risks that allow individuals to view their risk environment in more logical perspective. Down the line this can only be helpful to the intelligence of the health, safety, and environment regulatory process. This result would not deflect efforts away from air and water pollution, hazardous waste, food additives, and so forth, but would allow a system with scarce resources to use those resources more effectively.

Many prevention methods can be promoted as simple, personal, voluntary acts: putting aside the salt shaker, watching one's diet, going out for regular, brisk walks, installing a smoke detector, buckling up a seatbelt.

Already several key sectors of our society have demonstrated an avid interest in prevention and recognized its significance. The Department of Health and Human Services has set up an Office of Disease Prevention and Health Promotion. The 1990 Health Promotion Objectives, established by the U.S Public Health Service, serve as an excellent blueprint for prevention actions on a national scale.

At the vanguard of focusing attention on prevention has been Robert Rodale, chairman of Rodale Press, which publishes Prevention—the world's largest health magazine—with a readership of 3 million people. Rodale Press also sponsors the Prevention Index, a survey of people's attitudes and actions toward health-promoting behavior defined by a cross-section of health experts, conducted by Lou Harris & Associates. The President's Council on Health Promotion and Disease Prevention, which Mr. Rodale wholeheartedly endorses, is a creative and potentially effective means to that goal.

The concept of individual action is realized in this important legislation. According to the Prevention Index 1985, 70 percent of adults say that information from the media has motivated them to improve their health habits in the last 5 years. Federal commitment to health prevention meas-

ures that will increase public awareness of disease prevention and health promotion is also important.

This administration prides itself on tapping local citizens efforts and then providing national coherence and motivation to such efforts. Such is the potential for a President's Council on Health Promotion and Disease Prevention.

Mr. RITTER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California.

Mr. WALKER. Mr. Speaker, reserving the right to object, can the gentleman tell me what the cost of this bill is each year?

Mr. WAXMAN. Mr. Speaker, will the gentleman yield to me?

Mr. WALKER. I yield to the gentleman from California.

Mr. WAXMAN. I thank the gentleman for yielding.

Mr. Speaker, this is a council that is being set up on the subject of prevention, and it is charged with a number of responsibilities to be composed of 15 members. I do not know that there is a cost to it.

Mr. WALKER. There is no cost involved in the bill?

Mr. WAXMAN. I do not know that there is any cost to it. Maybe the gentleman from Pennsylvania [Mr. RITTER] can tell us about the cost. This is his proposal introduced on the House side, and we think it is a good proposal.

Mr. MADIGAN. Mr. Speaker, I want to join my colleagues in supporting S. 2057, which unanimously passed the Senate on June 16, 1986. This bill will establish a Presidential level council to promote good health and disease prevention. This council will review current Federal health promotion and disease prevention recommendations and activities and determine their effect on the public.

I anticipate that the council will utilize much of the material already developed by the Departments of Health and Human Services, Agriculture, and Transportation in making their recommendations. With regard to the council's activities regarding adequate nutrition and diet, I would expect the council to follow the "Dietary Guidelines for Americans" which were issued jointly by the U.S. Department of Agriculture and the Department of Health and Human Services in 1985. These guidelines are the result of careful analysis by the Government, private industry and public health officials and should be included in the council's recommendations and future programs.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2057

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "President's Council on Heatlh Promotion and Disease Prevention Act of 1986".

ESTABLISHMENT OF COUNCIL

SEC. 2. Title XVII of the Public Health Service Act is amended by adding at the end thereof the following new section:

"PRESIDENT'S COUNCIL ON HEALTH PROMOTION AND DISEASE PREVENTION

"SEC. 1707. (a) There is established the President's Council on Health Promotion and Disease Prevention (hereafter in this section referred to as the 'Council').

"(b) The Council shall—

"(1) advise the President with respect to all matters concerning the building and maintaining of the maximal personal health of Americans;

"(2) advise the President with respect to State, local, and private activities relating to health promotion and disease prevention;

"(3) encourage State and local governments and private entities in the development and conduct of research relating to, and programs and activities to foster, health promotion and disease prevention;

"(4) prepare an inventory of Federal, State, local, and private programs and activities for promotion of health and the prevention of illness and injury, particularly programs and activities directed toward subgroups of the American population who have special risks to health;

"(5) assess which of the available health promotion and disease prevention resources are not being fully used by Americans and how such resources may be better targeted toward the subgroups described in paragraph (4); and

"(6) make recommendations to the President concerning—

"(A) appropriate methods to make available to the public information concerning available health promotion and disease prevention resources, including information concerning the programs and activities included in the inventory prepared under paragraph (4); and

"(B) additional health promotion and disease prevention programs and activities which should be undertaken to improve the personal health of Americans.

"(c) The Council shall be composed of fifteen members appointed by the President, of which—

"(1) five shall be Federal, State, and local officers and employees who have expertise and experience in health promotion or disease prevention;

"(2) four shall be representatives of academic institutions who have expertise and experience in health promotion or disease prevention;

"(3) four shall be representatives of public and private organizations who have expertise and experience in health promotion or disease prevention; and

"(4) two shall be representatives of the general public.

"(d) Members shall be appointed for the life of the Council. A vacancy in the Council shall be filled in the same manner as the original appointment was made.

"(e) The President shall designate a member of the Council as Chairperson.

"(f) The Council shall meet at the call of the Chairman,

"(g) Eight members of the Council shall constitute a quorum, but a lesser number may hold hearings. A vacancy in the Council shall not affect its powers.

"(h) Each member of the Council shall serve without compensation. While away from their homes or regular places of business in the performance of services for the Council, all members of the Council shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of agencies under section 5702 of title 5, United States Code.

"(j)(1) The Secretary shall appoint and fix the compensation of an Executive Director for the Council. The Executive Director shall be an individual who has expertise and experience in health promotion or disease prevention. The Secretary shall provide the Council with such additional personnel, and with such additional support services and facilities, as the Secretary considers necessary to enable the Council to carry out its functions.

"(2) Any Federal employee may be detailed to the Council without reimbursement, and such detail shall be without interruption or loss of civil service status or privilege.

"(k)(1) The Council may, for the purpose of carrying out this section, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Council considers appropriate.

"(2) The Council may secure directly from any department or agency of the United States information necessary to enable the Council to carry out this section. Upon request of the Chairman of the Council, the head of such department or agency shall furnish such information to the Council.

"(3) The Council may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

"(l) Within eighteen months after the date of enactment of this section, the Council shall prepare and transmit to the President and the Congress a report which describes the activities of the Council under this section.

"(m) The Council shall terminate at the earlier of—

"(1) twenty-four months after the date of enactment of this section;

"(2) eighteen months after the first date on which all members have been appointed to the Council pursuant to subsection (c); or

"(3) thirty days after the date on which the President and the Congress receive the report of the Council pursuant to subsection (l).".

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WAXMAN

Mr. WAXMAN. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. WAXMAN:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "President's Council on Health Promotion and Disease Prevention Act of 1986".

SEC. 2. ESTABLISHMENT AND DUTIES OF COUNCIL.

(a) ESTABLISHMENT.—There is established the President's Council on Health Promotion and Disease Prevention (hereafter in this Act referred to as the "Council").

(b) DUTIES.—

(1) The Council shall study and report to the President and the Congress on appropriate steps individuals can take to—

(A) reduce the risk of cancer and heart disease,

(B) use properly and obtain the benefits of exercise with attention to the benefits and possible risks of exercise,

(C) obtain adequate nutrition in the diet and understand the relationship between proper nutrition and the prevention of disease and

(D) promote proper dental hygiene and reduce the incidence of oral disease.

(2) In carrying out paragraph (1), the Council shall—

(A) review current Federal health promotion and disease prevention recommendations,

(B) review the effects of Federal, State, local, and private health promotion and disease prevention programs on the public,

(C) prepare an inventory of successful and unsuccessful Federal, State, local, and private health promotion and disease prevention programs and activities,

(D) assess which of available Federal health promotion and disease prevention resources are not being fully used, how such resources may be better targeted to those at greatest risk, and the best means of informing the public about successful health promotion and disease prevention techniques and programs.

SEC. 3. COMPOSITION OF COUNCIL.

(a) IN GENERAL.—The Council shall be composed of 15 members appointed by the President, of which—

(1) 5 shall be State and local health officers and employees who have expertise and experience in the health promotion or disease prevention activities of the Council,

(2) 4 shall be representatives of academic institutions who have expertise and experience in the health promotion or disease prevention activities of the Council, and

(3) 6 shall be representatives of public and private voluntary organizations who have expertise and experience in the health promotion or disease prevention activities of the Council.

The President may also appoint nonvoting, ex officio members from Federal agencies with expertise in the health promotion or disease prevention activities of the Council, including the Centers for Disease Control, the National Cancer Institute, the National Heart, Lung, and Blood Institute, the National Institute of Dental Research, the Public Health Service, the Food and Drug Administration, the Consumer Product Safety Commission, the National Highway Traffic Safety Administration.

(b) TERMS.—Members shall be appointed for the life of the Council. A vacancy in the Council shall be filled in the same manner as the original appointment was made.

(c) COMPENSATION.—Each member of the Council shall serve without compensation. While away from their homes or regular places of business in the performance of services for the Council, all members of the Council shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of agencies under section 5703 of title 5, United States Code.

SEC. 4. ADMINISTRATIVE MATTERS.

(a) CHAIRMAN.—The President shall designate a member of the Council as Chairman.

(b) MEETINGS.—The Council shall meet at the call of the Chairman.

(c) QUORUM.—Eight members of the Council shall constitute a quorum, but a lesser number may hold hearings. A vacancy in the Council shall not affect its powers.

(d) PERSONNEL.—

(1) The Secretary of Health and Human Services shall appoint and fix the compensation of an Executive Director for the Council. The Executive Director shall be an individual who has expertise and experience in the health promotion or disease prevention activities of the Council. The Secretary shall provide the Council with such additional personnel, and with such additional support services and facilities, as the Secretary considers necessary to enable the Council to carry out its functions.

(2) Any Federal employee may be detailed to the Council without reimbursement, and such detail shall be without interruption or loss of civil service status or privilege.

(e) AUTHORITIES.—

(1) The Council may, for the purpose of carrying out section 2, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Council considers appropriate.

(2) The Council may secure directly from any department or agency of the United States information necessary to enable the Council to carry out section 2. Upon request of the Chairman of the Council, the head of such department or agency shall furnish such information to the Council.

(3) The Council may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

SEC. 5. REPORT.

Within 18 months after the date all the members of the Council are appointed, the Council shall prepare and transmit to the President and the Committee on Energy and Commerce of the House of Representatives and the Committee on Labor and Human Resources of the Senate. A report which describes the activities of the Council under section 2 and the result of the study conducted under such section.

SEC. 6. TERMINATION.

The Council shall terminate at the earlier of—

(1) 24 months after the date of enactment of this Act,

(2) 18 months after the date on which all the members have been appointed to the Council, or

(3) 30 days after the date on which the President and the Congress receive the report of the Council pursuant to section 5.

Mr. WAXMAN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from California [Mr. WAXMAN].

The amendment in the nature of a substitute was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CHILD INJURY PREVENTION ACT OF 1986

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2648) to improve the public health through the prevention of injuries, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. RITTER. Mr. Speaker, reserving the right to object, I do not intend to follow through with my objection, but I yield to the gentleman from California for the purpose of explaining the bill to the Members of the House.

Mr. WAXMAN. I thank the gentleman for yielding.

Mr. Speaker, the bill, as passed by the Senate, is intended to address the major public health problem of injuries in the United States. The National Academy of Sciences published a study in 1985 called, Injury in America, outlining the serious economic and health costs that are created by preventable injuries, such as burns, falls, and poisonings. The Academy concluded that "injury is the principal public health problem in America today."

This bill authorizes the Centers for Disease Control to continue its activities to research and control such injuries and requires that the Secretary prepare a report to Congress on the incidence and causes of childhood injury. The bill authorizes $10 million a year for fiscal years 1988 through 1990.

CDC has been working on these important and costly problems for the past 2 years now, and this legislation is needed to provide ongoing authority for those activities. I would note that CDC has worked cooperatively with a number of other agencies, including the Consumer Product Safety Commission, on injury control, and that we intend that the CDC continue to do so, perhaps, when appropriate, forming cooperative agreement or contracts with these agencies. I also think that it is important to note that this CDC Program does not now duplicate ongoing CPSC activities and that we do not intend it to do so; rather we would expect the CDC to continue its data exchange and cooperative efforts.

□ 1800

Mr. RITTER. Mr. Speaker, further reserving the right to object, I want to thank the gentleman for his explanation and concur with his remarks. S. 2648 will authorize funds for the Centers for Disease Control to continue their ongoing activities in injury prevention and control. The minority members of the Energy and Commerce Committee have no objection to House passage of S. 2648.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from California?

Mr. WALKER. Mr. Speaker, reserving the right to object, I think I understood the gentleman to say that the bill would cost $10 million a year; is that correct?

Mr. Speaker, under my reservation of objection, I yield to the gentleman from California.

Mr. WAXMAN. The gentleman is correct. The bill authorizes $10 million a year for fiscal years 1988 through 1990.

Mr. WALKER. Could the gentleman tell me whether or not the spending was included in the budget?

Mr. WAXMAN. It is currently appropriated.

Mr. WALKER. The money is currently appropriated and included in the budget?

Mr. WAXMAN. That is correct.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. MILLER of California. Mr. Speaker, reserving the right to object, I rise in support of this legislation, and commend the gentleman from California for bringing this to the floor.

The accidents described in this legislation are now responsible for nearly 50 percent of the childhood deaths in America, and that is costing us some $100 billion a year in deaths and injuries to those young children. I think that this work is well worthwhile, and I support the legislation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2648

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Injury Prevention Act of 1986".

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds and declares that:

(1) Injury is one of the principal public health problems in America, and causes over 140,000 deaths per year.

(2) Injury rates are particularly high for children and the elderly.

(3) Injury causes 50 percent of all deaths for children over the age of one year and two-thirds of all deaths for children over the age of 15 years, and is the leading cause of death for individuals under the age of 44 years. Individuals over the age of 65 years have the highest fatality rates for many injuries.

(4) Injury control has not been given high priority in the United States, and the research being conducted on injury control and the number of personnel involved in injury control activities are not adequate.

(b) The purposes of this Act are—

(1) to promote research into the causes, diagnosis, treatment, prevention, and control of injuries and rehabilitation from injuries;

(2) to promote cooperation between specialists in fields involved in injury research; and

(3) to promote coordination between Federal, State, and local governments and public and private entities in order to achieve a reduction in deaths from injuries.

PUBLIC HEALTH RESEARCH AND ACTIVITIES RELATING TO INJURY CONTROL

SEC. 3. Title III of the Public Health Service Act is amended by adding at the end thereof the following new part:

"PART J—INJURY CONTROL

"RESEARCH

"SEC. 391. (a) The Secretary, through the Director of the Centers for Disease Control, shall—

"(1) conduct, and give assistance to public and nonprofit private entities, scientific institutions, and individuals engaged in the conduct of, research relating to the causes, mechanisms, prevention, diagnosis, treatment of injuries, and rehabilitation from injuries; and

"(2) make grants to public and nonprofit private entities (including academic institutions, hospitals, and laboratories) and individuals for the conduct of such research.

"(b) The Secretary, through the Director of the Centers for Disease Control, shall collect and disseminate, through publications and other appropriate means, information concerning the practical applications of research conducted or assisted under subsection (a).

"CONTROL ACTIVITIES

"SEC. 392. (a) The Secretary, through the Director of the Centers for Disease Control, shall—

"(1) assist States and political subdivisions of States in activities for the prevention of injuries; and

"(2) encourage regional activities between States designated to reduce injury rates.

"(b) The Secretary, through the Director of the Centers for Disease Control, may—

"(1) enter into agreements between the Service and public and private community health agencies which provide for cooperative planning of activities to deal with problems relating to injuries and injury control; and

"(2) work in cooperation with Federal, State, and local agencies to promote injury control.

"STUDY

SEC. 393. By January 1, 1989, the Secretary, through the Director of the Centers for Disese Control, shall prepare and transmit to the Congress a report analyzing the incidence and causes of childhood injuries in the United States and containing recommendations for such legislation with respect to injury control as the Secretary considers approprate.

"AUTHORIZATIONS OF APPROPRIATIONS

"SEC. 394. (a) To carry out sections 391 and 392, there are authorized to be appropriated $10,000,000 for each of the fiscal years 1988, 1989, and 1990. Of the amounts appropriated under this section for any fiscal year, not more than 20 percent may be used for Federal administrative expenses to carry out such section for such fiscal year.".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the legislation just considered and adopted.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

COMMENDING THE ROYAL THAI GOVERNMENT FOR ITS HUMANITARIAN CONTRIBUTION TO THE REFUGEE COMMUNITY IN THAILAND AND FOR ITS WILLINGNESS TO REMAIN A COUNTRY OF FIRST ASYLUM

Mr. SOLARZ. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs be discharged from further consideration of the resolution (H. Res. 594) commending the Royal Thai Government for its extraordinary humanitarian contribution to the large, diverse refugee community in Thailand and for its continued willingness to remain a country of first asylum open to those fleeing repressive regimes in Indochina, and ask for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. LEACH of Iowa. Mr. Speaker, reserving the right to object, I do so simply to ask the distinguished chairman of the subcommittee to explain the resolution.

Mr. Speaker, under my reservation of objection, I yield to the gentleman from New York.

Mr. SOLARZ. Mr. Speaker, this resolution, which was introduced by my very good friend, the gentleman from Massachusetts [Mr. ATKINS] essentially pays tribute to the Government of Thailand which has been willing to serve as a country of first asylum for hundreds of thousands of refugees fleeing from the Communist regimes in Southeast Asia.

At this very moment, as we speak, there are 120,000 refugees still in Thailand, about a quarter of a million Cambodians along the border in border camps, and the willingness of the Thai Government to permit these people to remain and to be served by international agencies has made it possible for them to survive.

The resolution, I might add, also takes note of the long history of close and cooperative relationships between

our two governments, and expresses the profound appreciation of the United States to the Government of Thailand for the humanitarian contribution it is making to the welfare and well-being of hundreds of thousands of people in Southeast Asia.

Mr. LEACH of Iowa. Mr. Speaker, further reserving the right to object, I rise in support of House Resolution 594, commending the Royal Thai Government for its extraordinary humanitarian contribution to the large, diverse refugee community in Thailand and for its continued willingness to remain a country of first asylum open to those fleeing repressive regimes in Indochina.

As the ranking minority member of the Subcommittee on Asian and Pacific Affairs of the House Foreign Affairs Committee, I am pleased to be a cosponsor of the resolution introduced by our distinguished colleague, the gentleman from Massachusetts [Mr. ATKINS], and also cosponsored by the distinguished chairman of the subcommittee [Mr. SOLARZ].

It is both timely and appropriate to offer special recognition and appreciation to the Government and people of Thailand for providing a safe haven for nearly 2 million Indochinese who have fled from Vietnam, Cambodia, and Laos, in the wake of Communist takeover in those countries. The generous humanitarian response of the Thais has not been without great cost to that nation, in spite of outside assistance from the United States, the United Nations High Commissioner for Refugees and other governments and international refugee agencies. Congressional support in sustaining adequate U.S. assistance to these refugees is essential in ensuring that the United States fulfills its obligation to carry a fair share of the burden of caring for the thousands of Indochinese who remain in Thailand today.

Clearly, there are continuing concerns in Congress with respect to such matters as the safety and protection of individuals on the border, the review of rejected Khmer cases, family reunification, education, piracy, and a number of other issues. I would urge the administration to work closely with the Thai in ensuring a satisfactory resolution to these ongoing problems.

In this connection, I would also like to take the opportunity to commend the distinguished former Governor of Iowa, the Honorable Robert D. Ray, who recently chaired the Indo-China Refugee Panel established at the request of the Secretary of State, and which issued a report in April 1986, reviewing the refugee situation in Southeast Asia and making recommendations to ensure the responsiveness of U.S. refugee policies and programs to the humanitarian needs which still exist in that part of the world.

The United States, a new homeland for over 800,000 Indochinese refugees, is honored to be in partnership with the Thai in this endeavor and we hope to maintain that close working relationship in the future.

Again, Mr. Speaker, I want to express my strong support for House Resolution 594. It is my understanding that the administration has no objection to the resolution and I would urge my colleagues to give it their wholehearted endorsement.

Mr. Speaker, I withdraw my reservation of objection.

Mr. FISH. Mr. Speaker, I rise to support in the strongest possible terms House Resolution 594, commending the Royal Thai Government for their humanitarian role in the plight of refugees from the Indochinese Nations of Vietnam, Laos, and Cambodia.

Ever since those Nations fell under Communist oppression in 1975, the Royal Thai Government and the Thai people have exhibited a willingness to accept refugees from neighboring countries that serves as a model of humanitarianism for the entire world. In the face of a strained economy, Thailand has sacrificed much to accept hundreds of thousands of refugees, even during periods when third country resettlement was waning—threatening a potential large refugee population with no recourse other than remaining under care of the Thais.

I have had the pleasure of vissting Thailand and discussing the refugee situation with Thai officials on two separate occasions, and I came home both times impressed by their compassion.

Since 1975 over half a million refugees have benefited from Thai good will and have been resettled in third countries. Today nearly 150,000 refugees remain in Thailand, waiting for a future. Another 250,000 Cambodians are languishing on the Thai/Cambodian border, with no place to go.

Now, with "compassion fatigue" weighing on resettlement countries and on countries of first asylum, it is imperative that we assist the Thais in maintaining their traditional humanitarian approach to the refugee problem.

And problems do now exist, with the first asylum status of some threatened. We need to show to Thais, through trade policies, offtake of refugees through resettlement and immigrant visa processing, encouragement of resettlement by other countries, and assistance for protection programs, that we will not abandon them in continuing to deal with the problem. The Thais will then be encouraged to continue their longstanding humanitarian policies.

As the leader of the free world and the world's strongest economic power we can and should do no less. As ranking member of the Judiciary Committee and member of the Subcommittee on Refugees, Immigration and International Law with oversight responsibility over our refugee policy I am committed to continuance of a humanitarian response to the plight of Indochinese refugees.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York.

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 594

Whereas the people of the United States and the people of Thailand have a long and enduring history of friendship and mutual support;

Whereas the United States and the Royal Thai Government have a history of close cooperation and mutual respect;

Whereas the people of the United States and the people of Thailand share a strong commitment of freedom and democracy;

Whereas Thai and United States forces fought side by side in the conflicts in Korea and Vietnam;

Whereas the Royal Thai Government has demonstrated its commitment to the protection of internationally recognized human rights, particularly through its generous provision of first asylum to refugees fleeing repression in Indochina;

Whereas there are still large numbers of Indochinese refugees in Thailand ten years after the fall of Vietnam, Laos, and Cambodia;

Whereas the number of Indochinese seeking refuge in Thailand has increased in the past ten years due to the continuation of repressive regimes in their native lands;

Whereas the Royal Thai Government has played a vital and unselfish role in the care and protection of Indochinese refugees;

Whereas Thailand's continuing support for the key international agencies, particularly the United Nations High Commission on Refugees, has helped to preserve and protect the human rights of this large refugee population;

Whereas the generous provision of first asylum to literally hundreds of thousands of refugees has not been without cost to Thailand;

Whereas this humane policy has won for Thailand the respect and appreciation of all freedom loving peoples and helped preserve regional stability; and

Whereas the United States has recognized the burden which this large refugee population has imposed on Thailand by effectively supporting the international agencies providing relief and protection and by continuing to offer resettlement opportunities to refugees: Now, therefore, be it

Resolved, That the House of Representatives—

(1) commends the Royal Thai Government for its extraordinary humanitarian contribution to the large, diverse refugee community in Thailand and for its continued willingness to remain a country of first asylum open to those fleeing repressive regimes in Indochina; and

(2) on behalf of the people of the United States, expresses strong support for the unselfish work of the Royal Thai Government to ensure greater stability in Southeast Asia, particularly through efforts to alleviate the plight of refugees from Indochina.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SOLARZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their re-

marks on the resolution just considered and agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I take this 1-minute speech so that the Members may have some idea when the 99th Congress will be freed at last.

Mr. Speaker, I would be glad to yield to the distinguished majority leader so the gentleman could give us information on the schedule. I understand that that is being considered right now.

But the Members would like to know what is going to be the next thing up on the floor. Is it the Boxing Commission here in this waning hour of this great Congress? We are going to take up the Boxing Commission? And what, heaven forbid, is going to be the schedule after that? Are we going to be here until 9 o'clock and recess? Are we going to be here until 10 o'clock? Are we going to finish, ever?

Mr. Speaker, I would be glad to yield to the distinguished majority leader and, at the appropriate time, I would be glad to present the gentleman with the new insignia here, the "Free the 99th" button, because I know the gentleman would want to wear one. The gentleman is trying to work with leadership and with the leadership in the other body to mercifully end this process.

Mr. Speaker, I yield to the gentleman from Washington [Mr. FOLEY].

Mr. FOLEY. Mr. Speaker, we will proceed to consider the U.S. Boxing Commission, open rule, 1 hour of debate. Following that, we will propose that the House stand in recess to a time certain, at which point Members can be advised if there is any further program.

Mr. LOTT. Hello?

Mr. FOLEY. That is the end of my sentence.

Mr. LOTT. Is that it?

May I inquire, do we have any idea what issues might come up when we do reconvene after that recess?

Mr. FOLEY. We think it is possible that we may be coming up with the rule on the FIFRA, the Federal Insecticide, Fungicide and Rodenticide Act, which is, I will hasten to say, as I understand it, not controversial at this point. Agreements have been reached between the Committee on Energy and Commerce and the Committee on Agriculture in both parties.

Mr. LOTT. Let me ask some specifics then. Do we anticipate that the drug bill might be in a position to be considered tonight, or would that drug legislation instead come up sometime tomorrow?

□ 1810

Mr. FOLEY. I am advised that the drug bill will probably not be ready until tomorrow. There is a possibility of the reconciliation bill being brought up tonight. That was the matter I referred to with respect to a further program in addition to FIFRA.

What we would hope to do is complete the Boxing Commission which has an open rule, 1 hour of debate. I do not think that is a controversial bill. Following that, we would seek to take whatever unanimous consent requests might be undertaken and to recess the House until a time certain which we would consult with the minority about. At that juncture, members would either be given opportunity to return for that business or would be advised that there would be no further business until tomorrow.

I assume that we would be meeting tomorrow at 10 a.m., and we will be proceeding to consider any of the remaining matters, subject to their availability: The increase in the Public Statutory Debt; the Water Resources Conservation Development and Infrastructure Improvement and Rehabilitation Act; the Drug Enforcement Education and Control Act; the continuing appropriations bill, and the possible consideration, subsequently, of a veto override on the Superfund.

Mr. LOTT. Did the gentleman mention the continuing resolution.

Mr. FOLEY. Yes; the continuing appropriations.

Mr. LOTT. That would be tomorrow also?

Mr. FOLEY. It could be earlier if it is available.

Mr. LOTT. So the schedule tomorrow will be when things become available?

Mr. FOLEY. Someone has reminded me that it is a definition of maturity that one has the capacity to tolerate ambiguity.

Mr. LOTT. I hope I stay young forever if that is what it takes.

Mr. FOLEY. Members must call upon whatever reserves of maturity they may have.

Mr. LOTT. If I may inquire, we are going to have some unanimous consent requests and maybe some special orders before we go into recess; is that correct?

Mr. FOLEY. Yes; we would have special orders.

Mr. LOTT. I take it that would be the appropriate time for me to present my lament on the fall of the House; would that be the appropriate time?

Mr. FOLEY. I know that the gentleman is a poet of private distinction and public anonymity. I share his satisfaction on his debut tonight before the country and the Congress in this new role of poet laureate of the House of Representatives.

Mr. LOTT. I thank the gentleman very much. I know you will be waiting anxiously to hear my first effort at poetry.

ALASKA NATIONAL INTEREST LANDS CONSERVATION ACT AMENDMENTS

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 485) to amend the Alaska National Interest Lands Conservation Act of 1980 to clarify the treatment of submerged lands and ownership by the Alaskan Native Corp., and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Ohio?

Mr. YOUNG of Alaska. Mr. Speaker, reserving the right to object, I do not intend to object but I yield to the gentleman from Ohio [Mr. SEIBERLING] for an explanation of the legislation.

Mr. SEIBERLING. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, the effect of the amendment would be to merely extend for 2 years the statute of limitations on certain challenges to decisions about the navigability of water bodies in Alaska. This will give Congress time to deal with the question of treatment of submerged lands in Alaska. This is not a new issue. We have dealt with it several times in recent years. Since our hearing on the present version of the bill, there have been discussions exploring whether there might be a basis for resolving some of the past disagreements about the legislation, so we could go forward with a noncontroversial proposal. So far those discussions have not reached a conclusion.

The issue is an important one. I believe that it deserves a serious effort to see if it can be resolved. However, it has become clear that more time and more information are needed before a substantive resolution of this problem can be developed.

Therefore, we are moving forward now with this extension of the statute of limitations. At the same time, Chairman UDALL and I are joining with the gentleman from Alaska in requesting that the Department of the Interior and the Congressional Research Service compile the information and do the studies necessary for us to return to this issue again and to dispose of it on an informed basis.

Mr. YOUNG of Alaska. Mr. Speaker, I thank the gentleman for his explanation.

I strongly support this legislation and compliment the gentleman for his leadership on this issue.

Mr. Speaker, this legislation is necessary to extend a statute of limitations in the Alaska Lands Act. Unless the statute of limitations is extended, we face the filing of many lawsuits in the State of Alaska solely to preserve rights which would be barred by the 5-year deadline.

I believe there is no compelling interest in having litigation filed to meet an arbitrary deadline. We will be able to settle the acreage issues next year. I believe we are close to resolving these issues, and I know that the chairman and staff have developed some working proposals after much deliberation. In the meantime, the extension in this legislation is a postive step forward. For these reasons I urge my colleagues to support this legislation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 485

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 901 of the Alaska National Interest Lands Conservation Act (Public Law 96-487), as amended, is hereby amended by striking out the word "six years after the date of execution" each time such words occur in such subsection, and by inserting in lieu thereof in each instance the words "eight years after the date of execution", and by striking the words "seven years after the date of enactment" each time such words occur in such subsection, and by inserting in lieu thereof in each instance the words "nine years after the date of enactment".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unamimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

REQUEST TO DISCHARGE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS AND COMMITTEE ON SCIENCE AND TECHNOLOGY FROM FURTHER CONSIDERATION OF S. 1026, CONTINENTAL SCIENTIFIC DRILLING AND EXPLORATION ACT

Mr. UDALL. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs and the Committee on Science and Technology be discharged from further consideration of the Senate bill (S. 1026) to direct the cooperation of certain Federal entities in the implementation of the Continental Scientific Drilling Program, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. LUJAN. Mr. Speaker, reserving the right to object, I do so at this point to ask the gentleman from Arizona if he would give us a little information about the legislation.

Mr. UDALL. Mr. Speaker, if the gentleman will yield, this is a simple measure to establish a coordinated cooperative effort on the part of the Departments of Energy and Interior and the National Science Foundation to carry out a continental scientific drilling program.

S. 1026 authorizes no new funds but will give policy direction for this important scientific undertaking.

In addition, the bill requires that within 180 days of enactment a report be submitted to the Congress setting out the near and long-term goals of the program, a schedule of scientific and engineering events as well as a description of the benefits to be derived from these activities.

The bill is identical to H.R. 4523 introduced by the gentlelady from Rhode Island [Miss SCHNEIDER] and enjoys strong bi-partisan support.

Mr. LUJAN. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, I must admit that I have some concerns about this process because at least insofar as the Science and Technology Committee is concerned, there were no hearings held on this bill. It is a bill that has not been subject to any scrutiny by the committee at all, and it does refer to matters that are presently covered under House Joint Resolution 648, section 323, that was enacted into law on October 12, 1984.

Language concerning the obligation to carry out these kinds of activities is already a part of the law. It is a part of an interagency accord of April 2, 1984. It just does not see to me that we can countenance end runs around the processes of the committee to do things which are already covered, it seems to me, in a way which is sufficient.

I do have a concern about the bringing up of this legislation.

Mr. LUJAN. Mr. Speaker, further reserving the right to object, I can understand the gentleman's concern, however, if we look at the bill very carefully, it really does not do all that much. There is a feeling that the interest in the program is waning somewhat in that we are just giving it a little more oomph by highlighting it and saying within 180 days we do not think enough is being done, so within 180 days this coordinating group shall give us a report. There they should tell us about the objectives, the schedules, the funding, the benefits and those sorts of things just to kind of give it a little push.

It does not change the present law at all except that there is a concern that it is not moving as fast or as well as we would like for it to.

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Arizona.

Mr. UDALL. I want to reassure my colleagues and the gentleman from Pennsylvania that this is intended to make no change in policy, it simply adds a little emphasis and tells the two Departments to get along and give us a report and telling us what they are going to do.

□ 1820

Mr. LUJAN. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, the fact is that it does make some changes in policy in this gentleman's opinion. I am sure the intent is not to do so, but it does call upon the agencies to implement it. It says "shall implement," and then on page 5 of the bill, it also talks about the "Coordinating Group deems practicable, maximum, minimum and intermediate levels of resources and funding that would be required."

That, in fact, is seen by OMB as being potentially an authorization process that could end up costing us money over a period of time. It seems to me that that is a concern, and particularly a concern that should have been addressed as a part of a regular hearing process, rather than having to come to us here at the last minute in the Congress on the floor.

Mr. LUJAN. Mr. Speaker, if I might address that particular point of funding, we are not recommending funding. What we are saying is that this interagency coordinating group shall prepare a report within those 180 days

that I talked about describing the amounts of money that should be needed and for how long, and submit it to the Congress.

The only objection that OMB would have, it seems to me, and not that it is authorizing any funding, but that there would be somebody else, other than OMB, also having some input into the funding process.

I would think it is a turf problem, rather than that we should be putting in any more money. What would happen, in effect, is that we would look at the interagency coordination group recommendations and we would look at OMB recommendations and balance both of them and the Congress would have to vote on them anyway.

Mr. WALKER. If the gentleman will yield further, I understand that the purpose of the act is to create that report. However, the language of the act in section 4 also calls upon the Director of the National Science Foundation that he "shall implement the policies of section 323," and then goes to the issue of the funding.

That is, in fact, a quasi-authorization, at least, and it causes my concern.

Therefore, Mr. Speaker, I feel constrained to object.

The SPEAKER pro tempore. (Mr. GRAY of Illinois). Objection is heard.

NATIONAL AIR AND SPACE MUSEUM AUTHORIZATION

Mr. HOWARD. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate bill (S. 1311) to authorize the Smithsonian Institution to plan, design, and construct facilities for the National Air and Space Museum.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. SHAW. Mr. Speaker, reserving the right to object, I will not object, but I would ask that the gentleman from New Jersey [Mr. HOWARD] be given an opportunity to describe what is in the bill.

Mr. HOWARD. Mr. Speaker, will the gentleman yield?

Mr. SHAW. I yield to the gentleman from New Jersey.
